

# Instructions for playing the game Hit the Island on Dynamic Island

Instructions for playing the game Hit the Island on Dynamic Island, Instructions for playing the game Hit the Island on Dynamic Island of the iPhone 14 Pro series, providing an extremely interesting experience

Apple recently launched the Apple Watch 8 and iPhone 14 series including the regular iPhone 14, iPhone 14 Plus (a new version that complements and replaces the iPhone mini), iPhone 14 Pro, and iPhone 14 Pro Max.

People can see a drastic change in the performance of the Pro series, as the chipsets used are the A16 Bionic Chipset and A15 Bionic Chipset, respectively. Apple has made a significant upgrade with some features such as always on display, maximum outdoor brightness of 2000 nits, 48 MP Pro camera system, .

Finally, the biggest form change, Apple has provided a punch-hole screen or pill-shaped notch for the iPhone 14 Pro series, along with a unique feature, called Dynamic Island.

Dynamic Island displays all information about currently running applications in minute byte size format. It includes cool features like multitasking shortcuts, music playback and control, alarm notifications, ongoing calls, and more.

Since this is a completely new feature, there are not many compatible apps, but there is an interesting game with Dynamic Island called Hit the Island. In this article, let's learn how to play Hit the Island on Dynamic Island of the iPhone 14 Pro series.

## Hit the Island for iPhone 14 Pro and iPhone 14 Pro Max

Dynamic Island game - Hit the Island, now available on the App Store, was developed by Kriss Smokla.

People can play this game on iPhone 14 Pro and iPhone 14 Pro Max models. Besides, Hit the Island can also be played on other iPhones, as long as it is supported, but the experience will not be as great as the notch. The developer also said it might be compatible with some other iPhones soon.

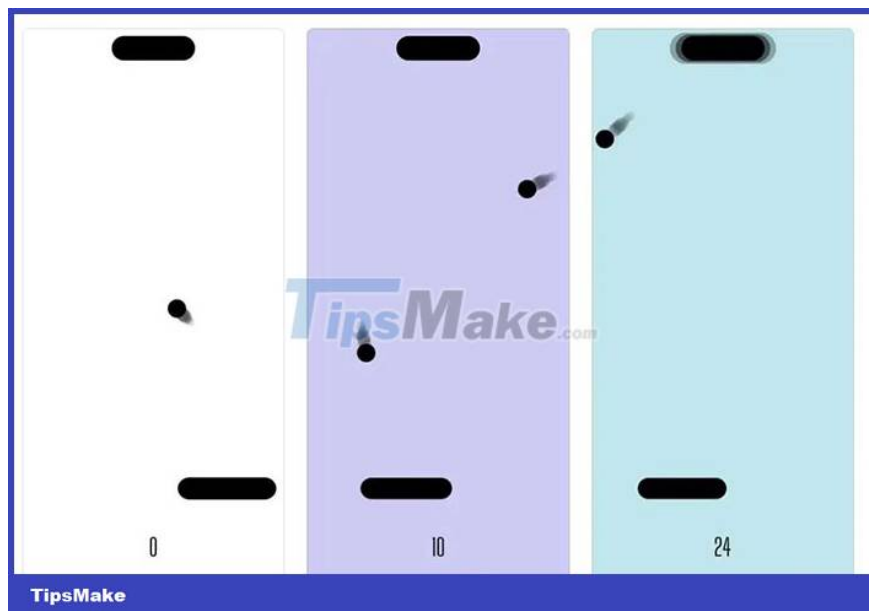

The interface of the game is also very eye-catching with a capacity of only 7 MB and is free on the app store. The concept behind the game is based on something like a brick cutter.

## How to play Hit the Island game

Hit the Island players will hit the provided ball into Dynamic Island and with each hit the score will increase.

The background of the game will change color when the player reaches a minimum of 5 points each time.

The speed of the ball is proportional to the number of points the player scores. The more points everyone earns, the faster the ball will move.

Along with the increase of the score, the hit bar will get smaller, making the game more difficult.

All players need to pay attention is to keep the ball from falling off the hit bar.

This game is simple yet super fun to play. There aren't many apps compatible with the new iPhone notch yet, so enjoy and show off your ingenious skills with Hit the Island, while you wait for more exciting apps for Dynamic Island.
