

Instructions for reading code of air conditioner, Casper air conditioner for quickest repair

Repair and troubleshooting of air conditioner, Casper air conditioner will become much simpler if you know this error code.

Casper is one of the most popular air conditioner brands in Vietnam. Casper products not only own beautiful designs but also integrate many smart features, especially the ability to self-diagnose errors and notify users. Today's article from TipsMake.com will share the most common Casper air conditioning and fault codes to correct and correct your problems.

content

1. Wall-mounted mono error code casper error code
2. Wall-mounted Casper line air conditioner error code
3. Air conditioner error code, Casper air conditioner with mono ceiling
4. Air conditioner error code, Casper air conditioner mono stand type

Wall-mounted mono error code casper error code

Casper air conditioner error code

Error name

Reason

E1

Room temperature sensor error

The position of the sensor is wrong; circuit board connection is not accurate; sensor is broken.

E2

Outdoor temperature sensor error

The position of the sensor is wrong; circuit board connection is not accurate; sensor is broken.

E3

Indoor temperature sensor error

The position of the sensor is wrong; circuit board connection is not accurate; sensor is broken.

E4

Error signal of motor control of indoor unit.

Wrong match of wire said the fan of the indoor unit fan; indoor fan motor works poorly; The indoor unit is broken.

Wall-mounted Casper line air conditioner error code

Casper air conditioner error code

Error name

E1

Room temperature sensor error.

E2

Error of outdoor unit sensor.

E3

Sensor error of indoor unit.

E4

Cooling fan motor error.

E5

Error connecting outdoor unit and indoor unit.

F0

Outdoor unit fan motor error.

F1

Error of IPM part.

F2

Error of PFC part.

F3

Compressor error.

F4

Room temperature sensor error.

F5

Compressor protection error.

F6

Hot temperature sensor for environment temperature sensor.

F7

High, low voltage protection error.

F8

Error connecting hot spots.

F9

Error chip processing hot spots.

FA

Return path sensor error.

Air conditioner error code, Casper air conditioner with mono ceiling

Casper air conditioner error code

Error name

F1

Connection errors.

E0

Defective refrigerant (gas).

E1

Indoor temperature sensor error.

E2

Error sensor outside the home.

E3

Error sensor outside the home.

E4

Error of condensate drainage pump system.

E5

Control signal connection error.

E6

Error losing hot phase.

E7

Outdoor condenser sensor error.

E8

Return path sensor error.

E9

High, low pressure protection error.

EA

Return road overheat protection error.

Air conditioner error code, Casper air conditioner mono stand type

Casper air conditioner error code

Error name

Reason

E1

Room temperature sensor error.

The sensor position is wrong, the circuit board connection is not correct, the sensor is broken.

E3

Indoor temperature sensor error.

The sensor position is wrong, the circuit board connection is not correct, the sensor is broken.

E4

Outdoor temperature sensor error.

The sensor position is wrong, the circuit board connection is not correct, the sensor is broken.

F1

Phase loss, phase difference protection, high pressure protection.

The PCB indoor circuit board works poorly, phase failure, low pressure protection or switch pressure is broken.

F2

Overheat protection error

Poor overheating sensor, indoor part filter and dirty outdoor make the air circulation system work poorly.

Above are the most common **air conditioner error codes, Casper air conditioner** . They will help you to detect and fix problems related to this device. Visit META.vn to share more useful knowledge about air conditioners and air conditioners.
