

# Instructions for recording a clone effect video on TikTok

Want to create unique videos with the clone effect on TikTok? With just a few simple steps, you can clone yourself into three different versions, creating creative and attractive angles. Please refer to the detailed instructions below.

The split photo effect on TikTok, although newly launched, has quickly become a trend, helping to create creative videos with millions of views.

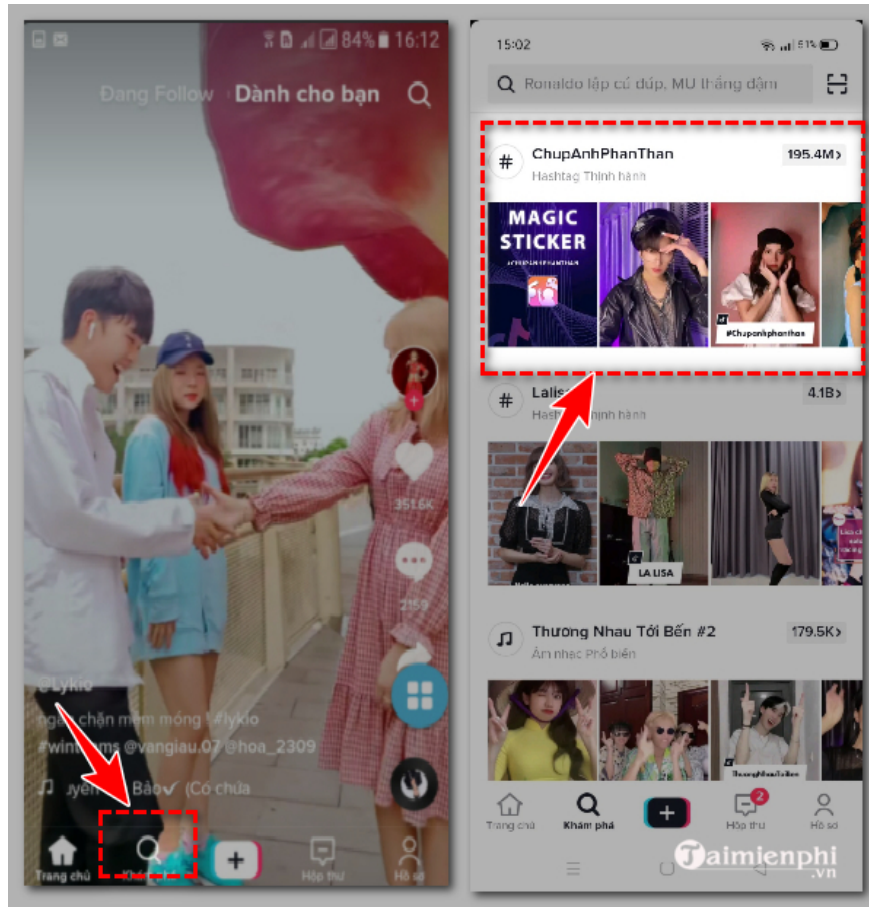

## *Instructions for filming clone videos on TikTok*

**Step 1** : Open TikTok. If not installed, download and install from the link below.

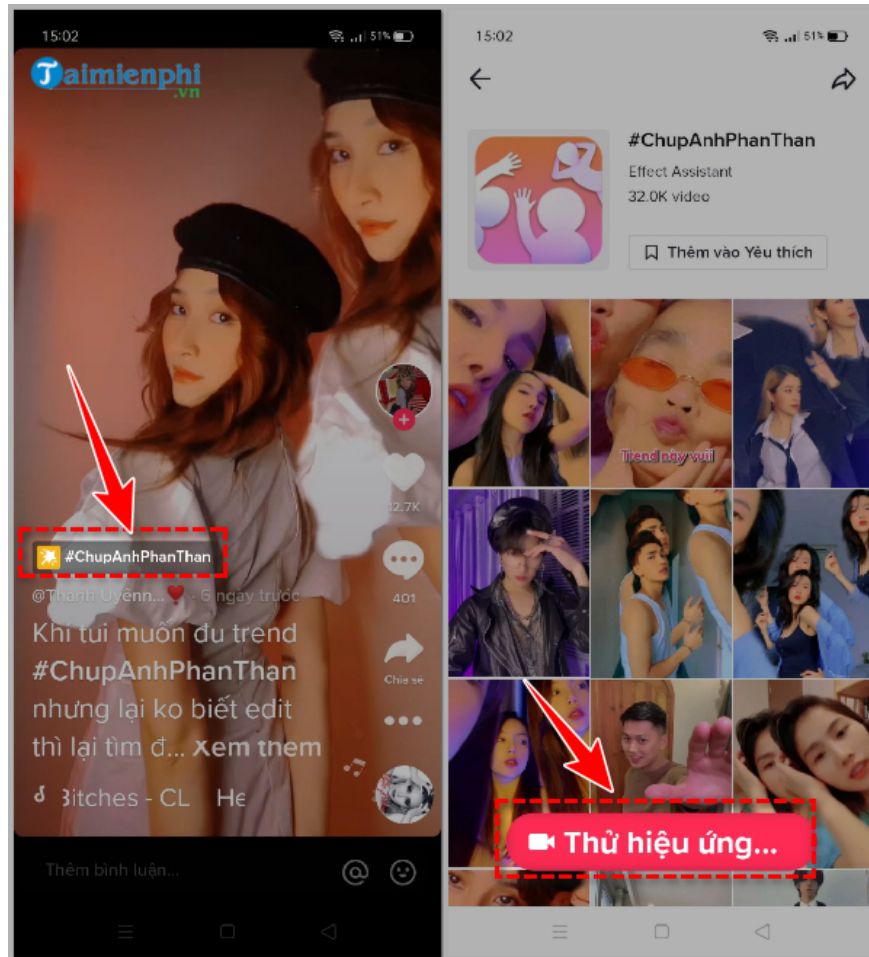

- Download **TikTok for Android**
- Download **TikTok for iPhone**

**Step 2** : On the main interface, click " **Explore** " => **Scroll down and select the " Clone photo "**effect

Or quickly search with the keyword " **#chupanhphanthan** " in the search bar.

**Step 3** : Select video preview => Click "**#chupanhphanthan**" on the screen => Select "**Try effect**"

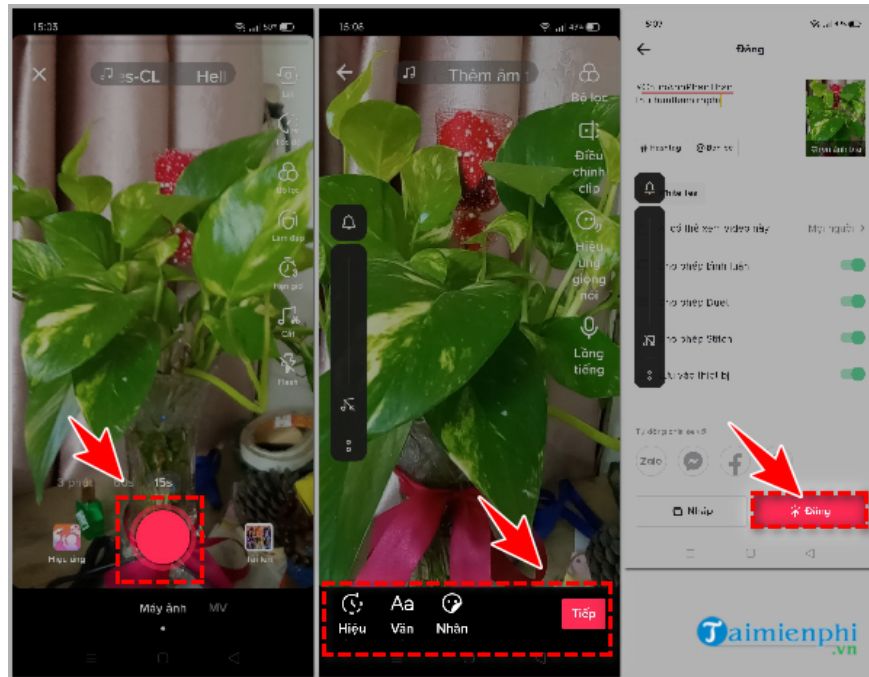

**Step 4:** Select the recording time and press the round button in the middle to start.

You can upload existing videos from your phone to apply effects.

**Step 5 :** You can customize the video after recording => Click " Next "

**Step 6:** Write caption, add hashtag, customize audience and comments => Click " Post "

With these simple steps, you have quickly created beautiful and impressive clone videos on TikTok to show off to your friends on social networks. Wish you success and quickly become a hot TikToker with your cute clone videos.

Although not too new, "Ugly Duckling Turns into Swan" is also a trend that many people use today. To be able to create magical videos from this effect, you need to refer to the article sharing how to use Tik Tok to turn an Ugly Duckling into a Swan that TipsMake shared before.
