

Instructions for rotating videos are inverted and inclined by VLC Media Player

Depending on the needs of the user, you need to rotate the video upside down or rotate it at 180 degrees or 90 degrees. There are quite a lot of software that can help users to rotate videos according to the angle they want.

The current music and video player programs have integrated many other features, in addition to playing music or video to users. Such as the ability to rotate backwards, rotate the video to 180 degrees or 90 degrees. To be able to rotate the video from the angle you want, for your job you can choose Windows Movie Maker software, or VLC Media Player. In this tutorial, we will show you how to rotate videos using VLC Media Player software.

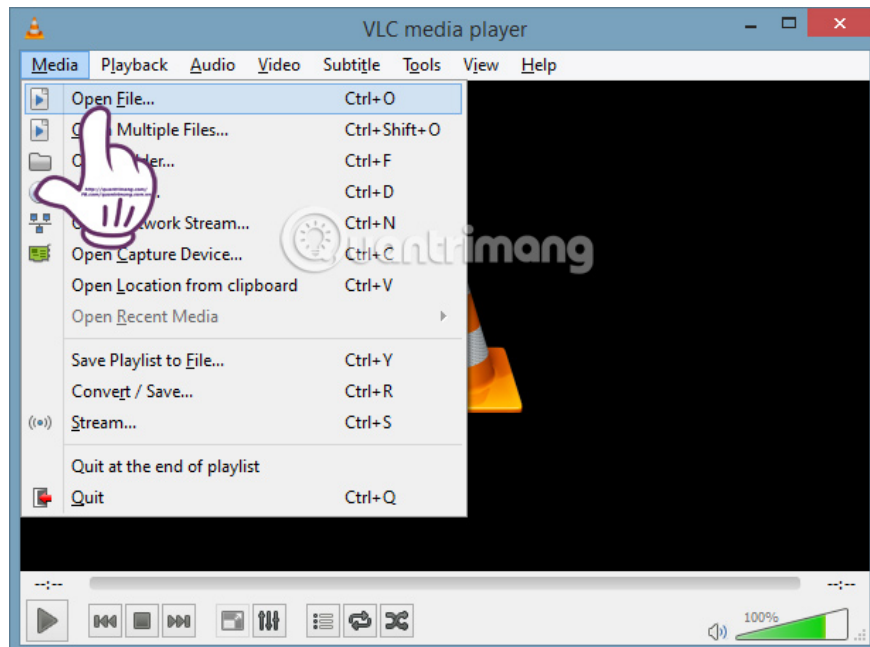

How to rotate videos with VLC Media Player

First, download and install the VLC Media Player program under the link below.

1. Download VLC Media Player for free

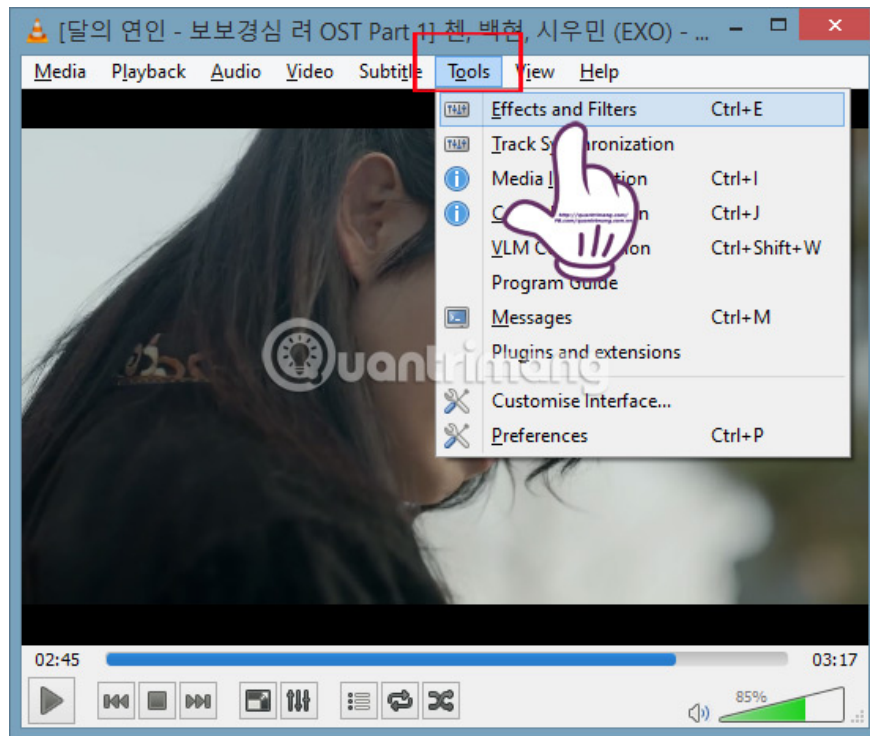

Step 1:

You open VLC software on your computer. Click on the **Media** item above and select **Open File** to open the video you want to rotate. Or press Ctrl + O.

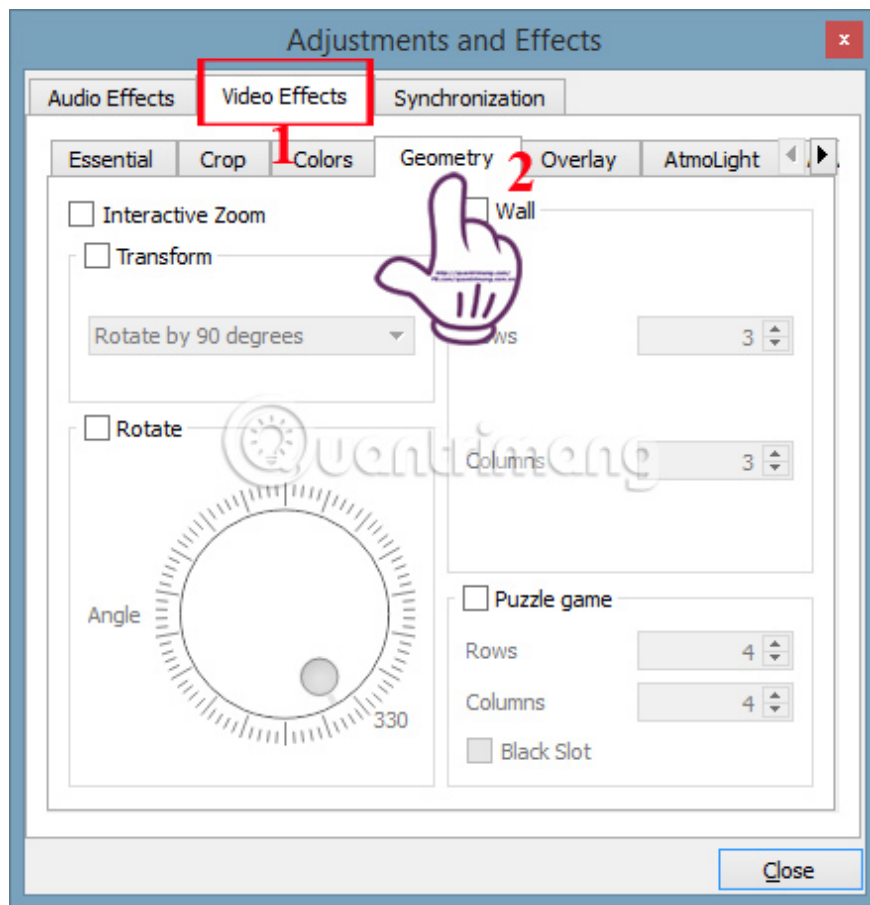

Step 2:

After you've opened the video, click **Tools** and click **Effects and Filters** . Or click Ctrl + E.

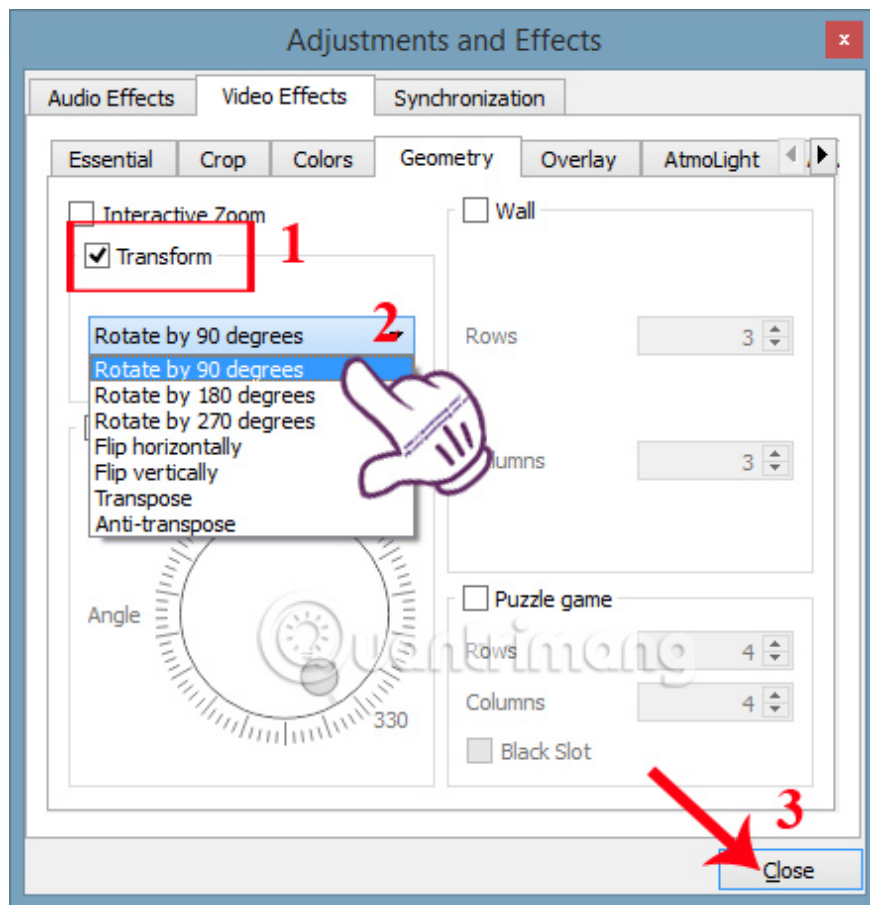

Step 3:

Appearance of **Adjustments and Effects** window (Customize and effect). Here, click on the **Video Effects** tab and select the **Geometry** tab.

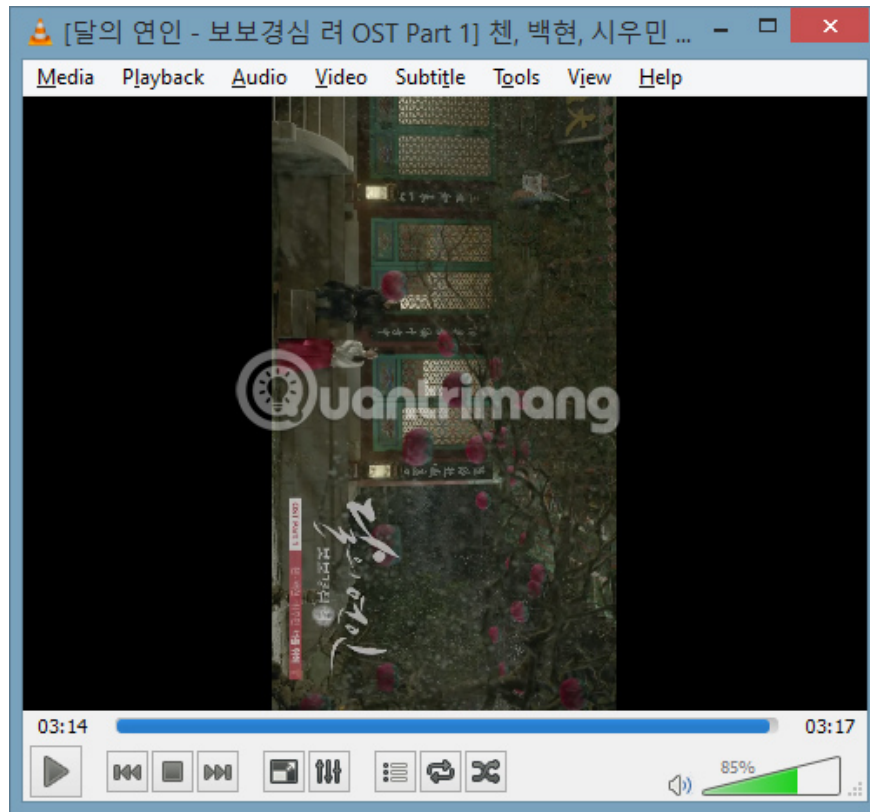

Step 4:

Next, select the **Transform** box, then **select the video rotation angle** below that you want to convert. For example, Network Administrator chooses to rotate video with 90 degree angle. Click **Close** to save the new setting.

Step 5:

This is the video after shooting according to the desired angle. Once rotated, your original video will automatically rotate according to the selected angle. You can open the folder where the original video was saved to open the recorded video.

These are very simple steps when you want to rotate the video at 180 degrees, 90 degrees angle with VLC Media Player software. The original video will be transferred to the angle you selected. If the user wants to watch the video with an old angle, you can choose another software in the computer to watch the video.
