## Instructions for screenshot on Android TV

The screen capture steps on Android TV are quite simple.

### Method 1: Screen capture on Android TV with remote control

#### Step 1:

On Android TV's remote control, press and hold the Home button for 5 seconds.

#### Step 2:

At this point, you will see a new menu appear on the screen. Scroll right and select Screenshot.

### **Step 3:**

Next, press the Home button.

### **Step 4:**

Scroll down and select Save to Photos or Save and Share.

### **Note:**

When selecting the Save and Share function, be sure to add a step to select the application you want to share your photos with.

### **Method 2: Screen capture on Android TV without remote control**

If your Android TV device does not have a remote control, you have two options as follows:

- In case, Android TV has a USB port, take the wireless keyboard plugged into this port and click the Print Screen button.
- Conversely, if there is no USB port, you can download one of the remote Android TV control applications on Google Play Store like Android TV Remote Control for Android, Android TV for iOS, . All This app contains Home button for you to use.

With the steps to take screenshots on Android TV that we have just introduced, hope to help you capture photos or moments on TV in a simple and satisfactory way.
