

Instructions for security of personal information on the Internet by Deseat.me

When we access any website address, your personal information is recorded, more or less. The fact that we delete the web browser is also unlikely to help you secure all the information.

To be able to delete all of your account information, passwords, and access links, you will probably think of the only and most secure method of deleting web browser data. However, it is unlikely that all of our personal information will be exposed. When you visit any website, personal information is saved no matter how much.

However, with Deseat.me tool, everything becomes much simpler and safer. This program will help users to discover services and applications associated with personal accounts according to a list. From there, users can follow these accounts to choose whether to delete those accounts or not. If you are feeling troubled and have problems with personal information of social networks, or other registration services, you can follow the guide to using the Deseat.me tool below. network.

Step 1:

First of all, log in to Deseat.me page by following the link below with any browser.

1. Delete personal information by Deseat.me

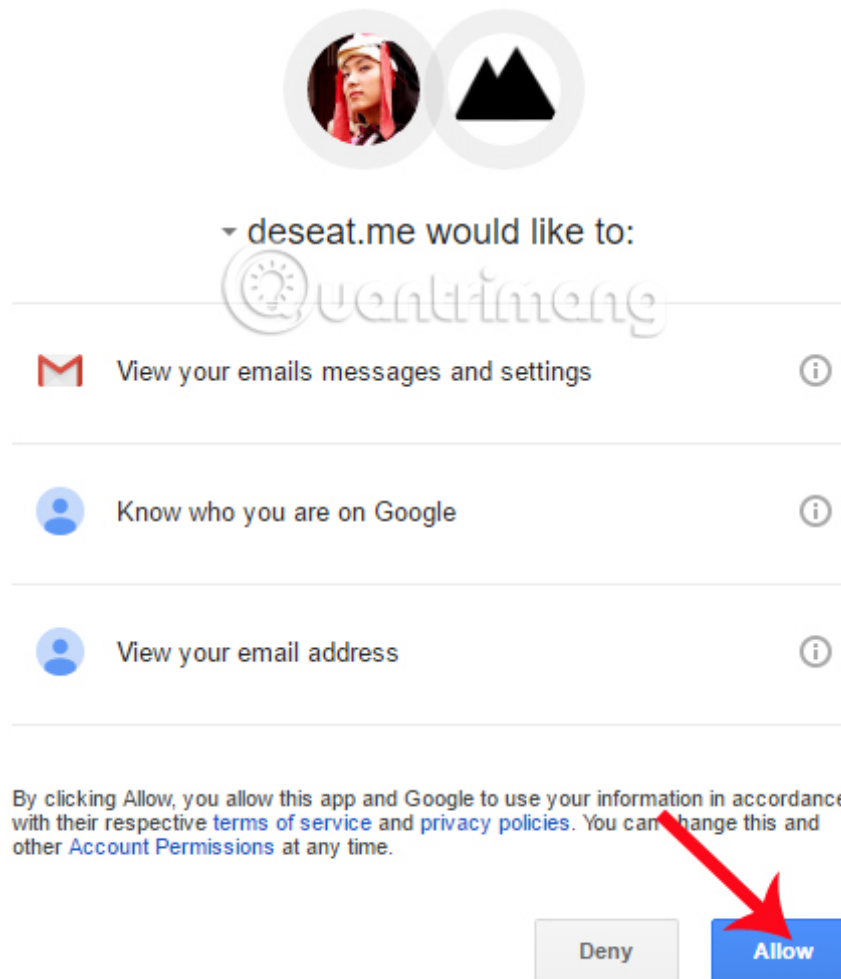

Step 2:

At the main interface of the service, we click on **Sign in with Google** .

Step 3:

Next, we will login to the Google account. Right after that, the licensing interface for Deseat.me will be available to access Google account. Click **Allow** to continue using Deseat.me.

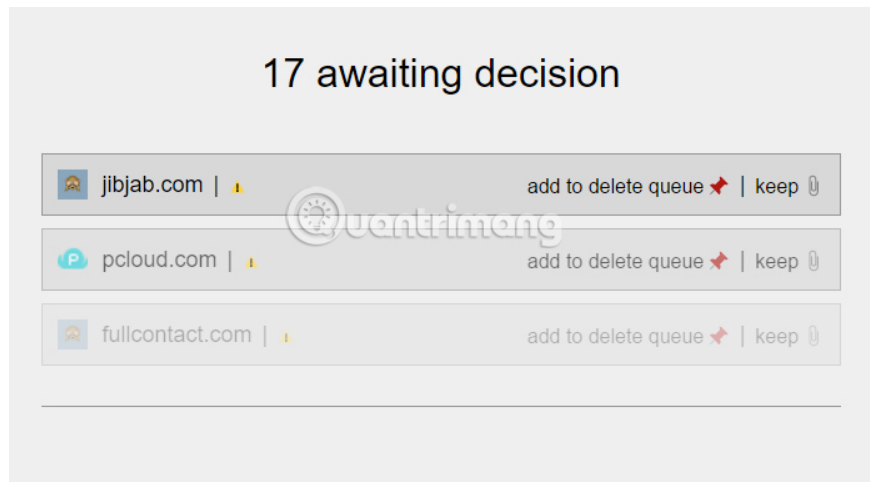

Step 4:

Next you wait for Deseat.me to scan the services, applications that we used to email for account registration, as well as other application links. Soon the user will see the **number of applications and services associated with the account in the awaiting decision section** .

At each service, we will see there are 3 options with 3 different icons including:

1. **Add to delete queue** : pin icon to add apps to the delete list.
2. **Keep** : attach icon to add application to personal account.
3. **Yellow exclamation icon** : Do not use this service anymore.

Step 5:

To proceed with deleting applications, we **click on the red pin icon Add to delete queue** . Soon, the selected service will be **moved to the Delete queue list** and marked as deleted as shown below.

15 awaiting decision

fullcontact.com ⚠️	add to delete queue 🚩 keep 📄
mailtrack.io ⚠️	add to delete queue 🚩 keep 📄
snapchat.com ⚠️	add to delete queue 🚩 keep 📄

🚩 Delete queue 1

pcloud.com	mark as deleted ✓ delete 🗑️
------------	-------------------------------

Step 6:

At the Delete queue list, we will click the **mark as delete** button at each service. After that, those applications will appear in the **Delete accounts** list to delete the registration account.

If you want to return this service to an awaiting decision list, click the arrow icon.

🚩 Delete queue 6
