

Instructions for sending audio files via MMS on Android

Currently, there are many ways to send someone voice recordings like Facebook Messenger, WhatsApp and many other popular platforms. However, what if you want to send the recording file via MMS service on Android? Please follow the article below to know how to do it!

Currently, there are many ways to send someone voice recordings like Facebook Messenger, WhatsApp and many other popular platforms. However, what if you want to send the recording file via MMS service on Android? Please follow the article below to know how to do it!

In this article, I will use the Android Messages application, but you can also use another application.

Note: Your messaging application must support voice over MMS so you can do it.

1. How to get money back when buying apps on Android

First, open a conversation in the message section, click on the "+" sign on the left side of the text input box.

To record audio, give Messages access to Microphone

ALLOW

Next, simply press and hold the microphone button to record the message. There will be a limited time for recording, so you record as short as possible.

Type an SMS message

Touch & hold

After completing the recording, this function will automatically place it in the message send box. You can include a text message if you want.

Finally, press the **Send** button and you're done.

Good luck!
