

Instructions for sending audio messages on Viber

Viber has just updated the feature of sending voice messages and audio recording messages. In addition to sending text messages, stickers, we can now record voices to send to friends.

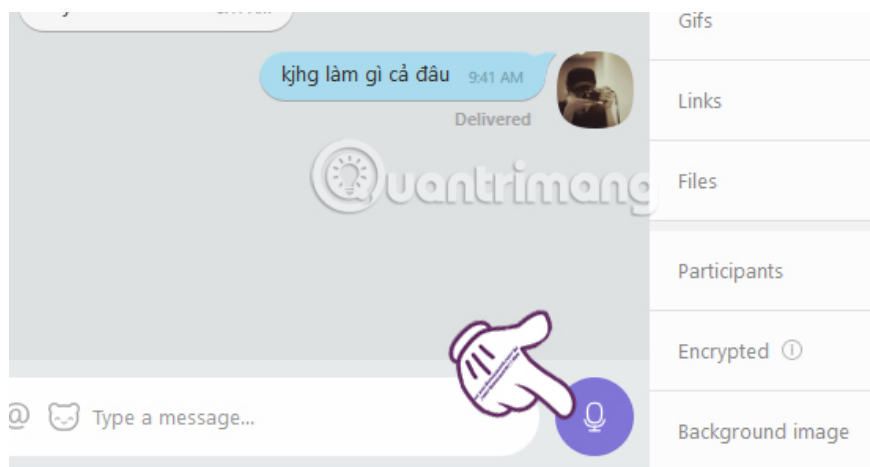

Along with chat, texting applications like Zalo, Skype, Viber is now also used by many people. And in the updated version, Viber has given users an attractive feature that is sending voice messages and audio messages. In addition to sending regular text messages, stickers to friends, users can now record voice, or any sound and send to their friends.

1. Send audio messages on Viber PC

1. Download Viber software for PC

Step 1:

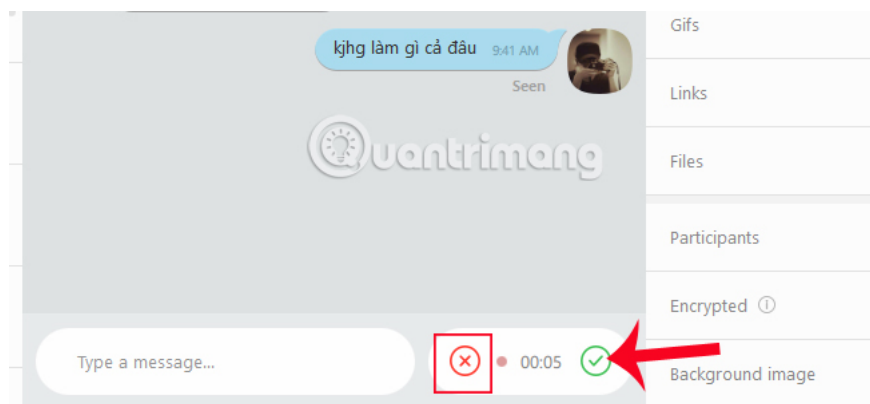

First of all, we need to update Viber to the latest version. At the viber chat frame interface, you will see a **microphone icon** for voice recording.

Step 2:

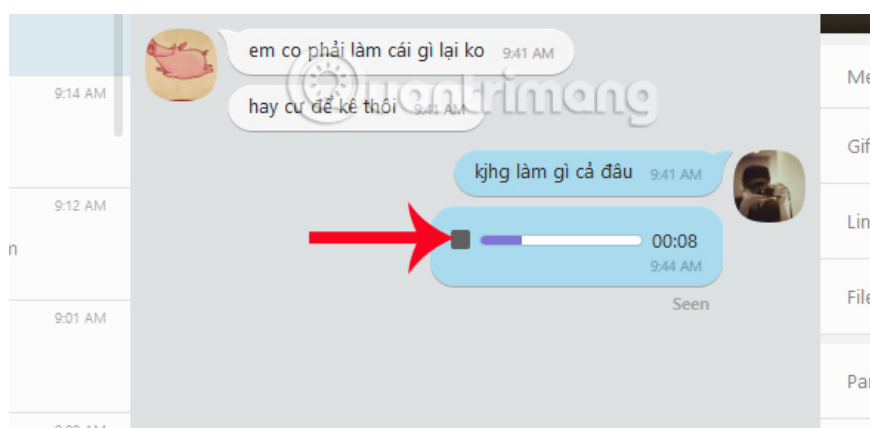

To conduct voice message sending, first **click the microphone icon** . Immediately afterwards a small frame for recording was recorded, Viber will support users to allow for a **maximum of 30 seconds to send audio** .

To **end the recording** and send it to a friend, we click on **the blue tick icon** . If you do not want to record and **delete the recorded voice message segment** , press **the red X icon** .

Step 3:

After sending that voice message, you will see the message appear at the chat interface on Viber. Click **the Play button** to listen to the recorded voice message again.

2. Send audio messages on Viber application

1. Download the Viber app for iOS
2. Download the Viber app for Android

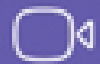

The voice messaging feature has also been updated on the Viber app for smartphones. The implementation is also very simple, similar to when we send voice messages to the Viber version on the computer.

Step 1:

In the chat frame interface, we will also see the microphone icon. When you **press and hold the microphone icon**, a message will appear as shown below.
