

Instructions for sending GIFs on Telegram

Telegram application owns a diverse GIF image store with many different topics for users to choose from, besides sending still images as usual.

Telegram application owns a diverse GIF image store with many different topics for users to choose from, besides sending still images as usual. The GIF image template on Telegram can be searched through the GIF image store on the application in the messaging frame, or users can enter the keyword of the GIF image they want with the topic of their choice for Telegram to find the GIF image according to that topic. The following article will guide you to send GIFs on Telegram.

How to send GIFs on Telegram via GIF repository

Step 1:

At the interface on the Telegram application, users click on **the circular send icon** below. Now display the file selection interface, click on **the GIFs item** to select the animation you want to send on Telegram.
