

# Instructions for sending Google Maps location on PC to smartphone

Delivering useful new features for users, Google Maps will help you find the fastest address on your computer and then send it to your phone.

Right after its birth, Google Maps received many positive reviews and became the most popular online location search application today. And to meet all the needs of users, technology giant Google has updated the new feature to send search locations from computer to phone Sen to Phone.

With this function, users can completely help lost friends or relatives when accessing the same Gmail address. Join the Network Administrator to discover this new feature in the tutorial below.

**Note to use this new feature you need to upgrade the latest version of Google Maps on your phone.**

1. Download Google Maps for Android
2. Download Google Maps for iOS

## Step 1:

Log in to the same account on your Google Maps computer and phone.

## Step 2:

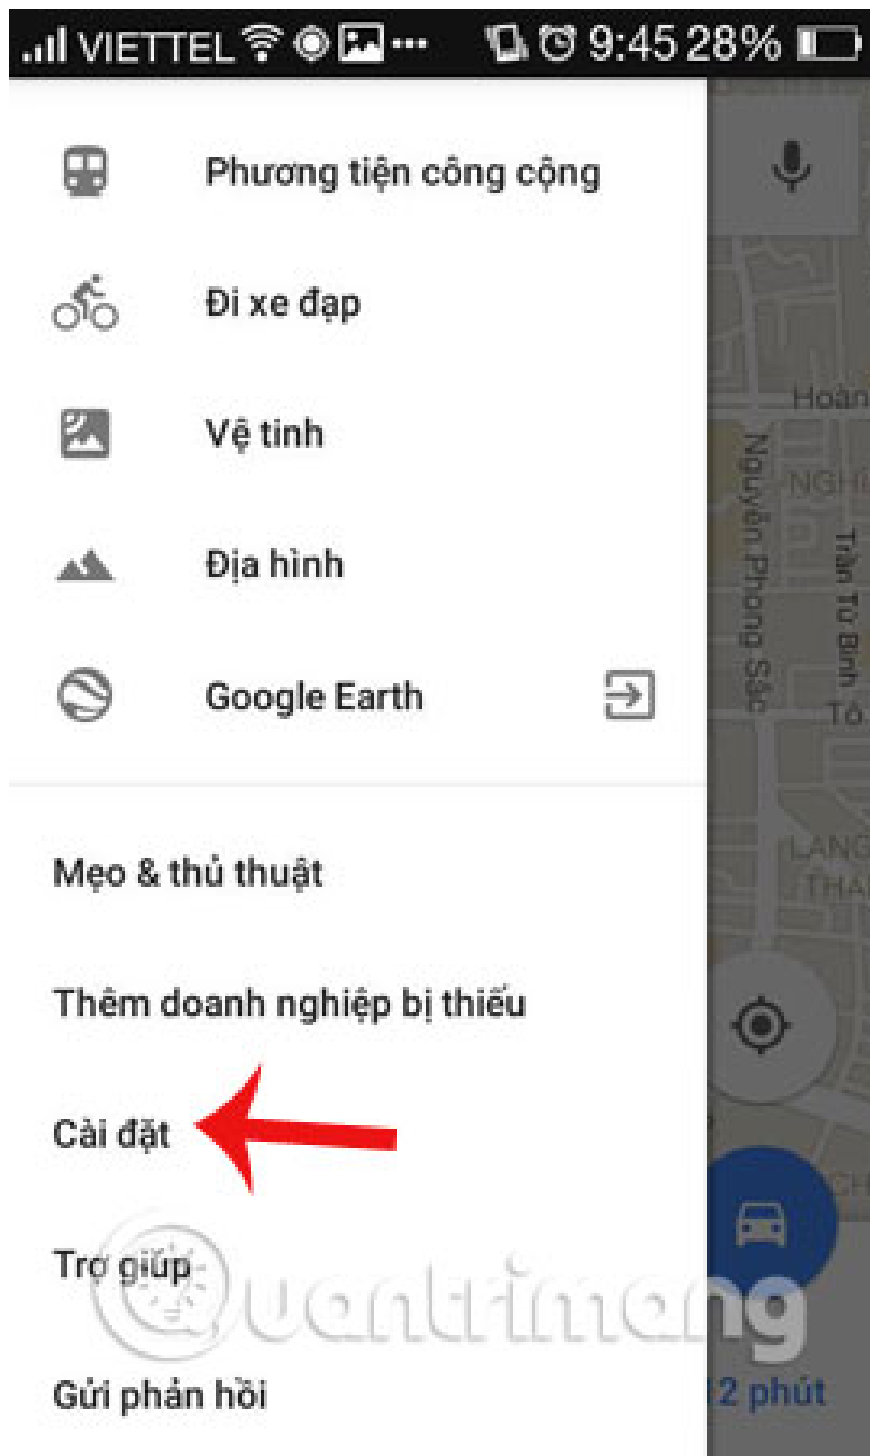

Access Google Maps on your phone, click **3 dashes** and go to **Settings** .
