

# Instructions for sending Offline files on Skype

Users can send Skype data to people even if they are not online, a new feature that Skype updates in the new version. Recipients will still receive full files if they are offline.

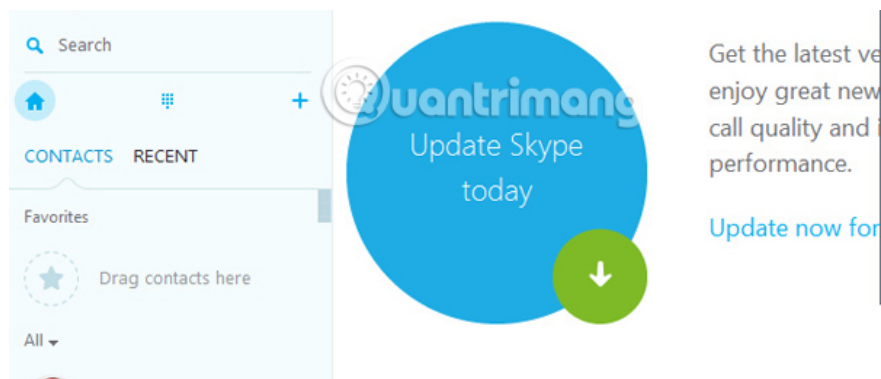

The strong development of messaging chat applications has made it easier for users to exchange. You can comfortably message anywhere, any medium and completely free. Besides, upgrading new features for those applications also increases the number of users.

Recently, the Skype application has upgraded to include support for sending data to people who are offline. With the old version, if you want to send the file to someone, then the recipient must be in active online status. However, with this new Skype upgrade, sending data will not be as hard as before. Even if the recipient does not use Skype and online, you can still send data quickly.

1. Download the latest Skype version
2. Download Skype for iOS for free
3. Download Skype for free for Android

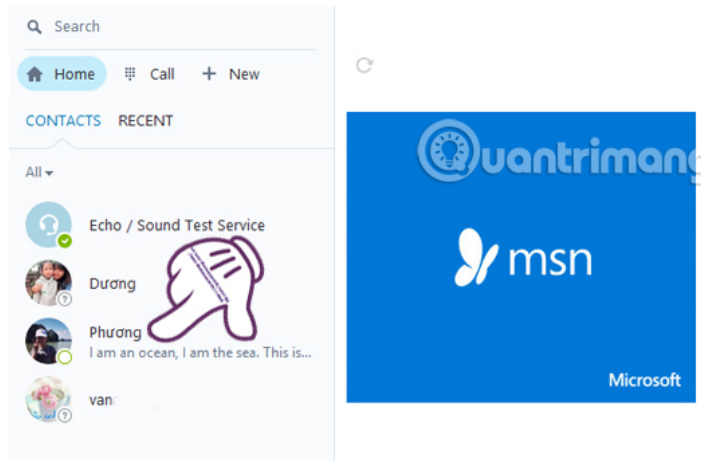

## Step 1:

First of all we need to **upgrade and download the latest version of Skype** to use. When you access the main interface of Skype if you have Update notification, please upgrade. Or install a new version using the link above.

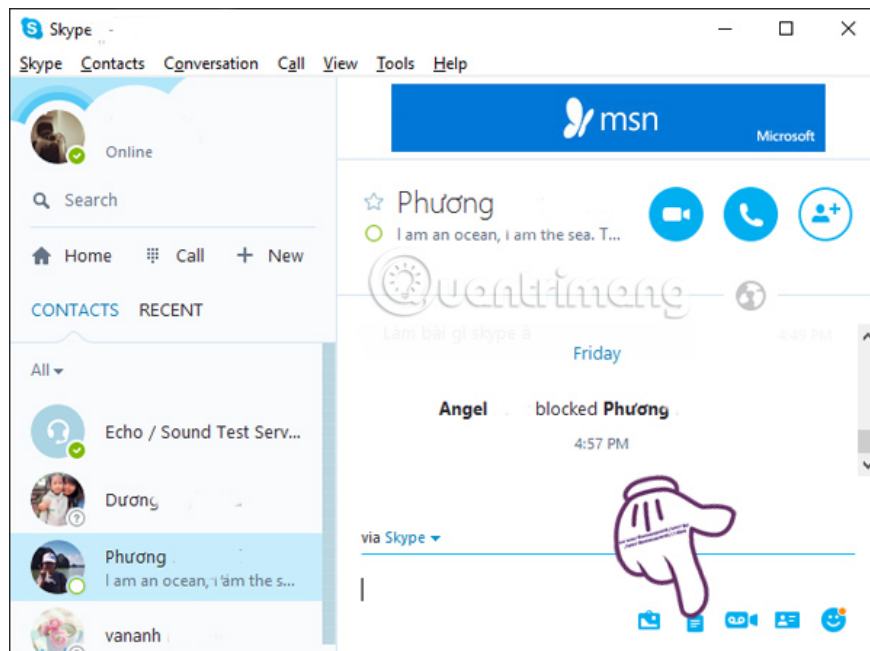

## Step 2:

To proceed with sending data files when the recipient is offline, click the recipient in the list.

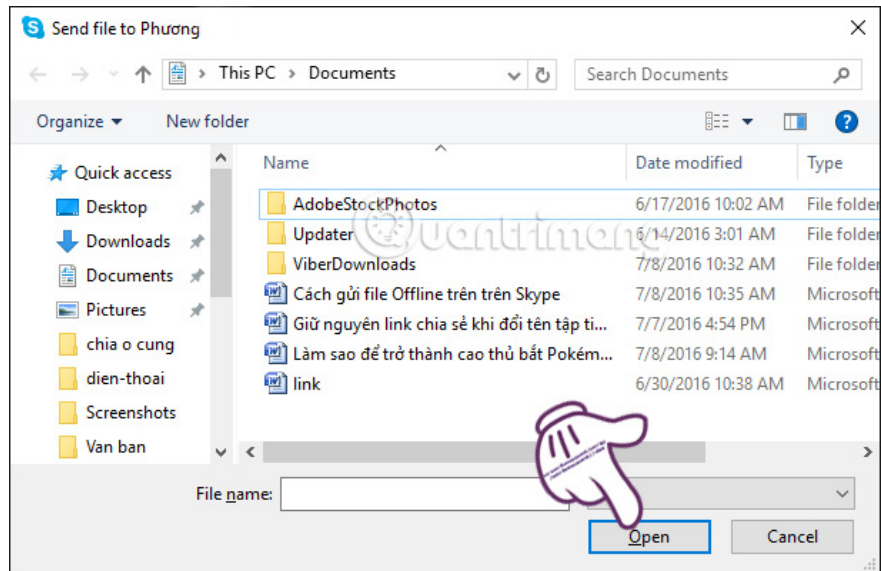

Next in the messaging interface, click **the clip icon** and select **the icon of the file type you want to send** as data, images, . as below.

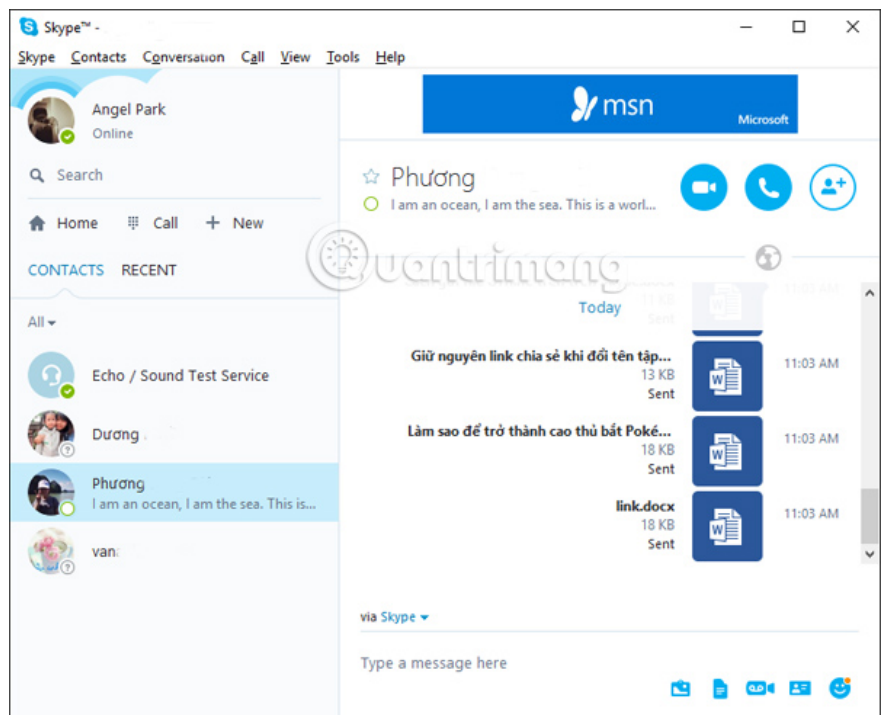

### Step 3:

Next, you will be taken to the Windows interface window. We open **the folder containing the data file to send** , click and select **Open** .

You will see the data files will be sent along with the **Sent** text next to it. If the old version sends Skype data offline, you will immediately receive an error message. However, with this new version, sending offline data on Skype is still done.

## Step 4:

When Online recipients will receive all the files you sent before.

This new feature will support users a lot, when you can send all kinds of files, from text, image, video to friends even if they are not in the online state camp, to avoid interruption of work. user's. Now you can freely send files on Skype everywhere.
