

Instructions for sending video messages on Viber

In the latest version of Viber, in addition to sending voice messages and audio recordings, users can now record videos and send messages to friends on Viber.

Immediately after bringing to the user a new feature that allows to send voice messages on Viber, the manufacturer has continued to update more extremely unique features that are sending video messages on Viber. Users can record videos for nearly 30 seconds right on Viber and then send them to friends. With this new feature, our conversation on Viber will be much more attractive and rich, compared to just sending text messages like before.

Video tutorial to send video messages on Viber

Instructions for sending video messages on Viber

Step 1:

First, users need to update Viber apps on Android and iOS to the latest version to use the video messaging feature on Viber.

1. Download the Viber app for Android
2. Download Viber for iOS for free

Step 2:

Next, open a chat conversation to send a video message. At the bottom of the interface when we **swipe the microphone icon to the right** will switch to the video icon. This is the symbol for users to record videos. Then, **press and hold the video icon** to record the video. On the interface, there will also be a video recording time to send messages on Viber.
