

Instructions for separating lyrics with GoldWave

When listening to a song that has good melody, you want to make the song's background music as a ringtone but you can't find the beat of that song. In this article, I will show you how to separate lyrics with GoldWave software.

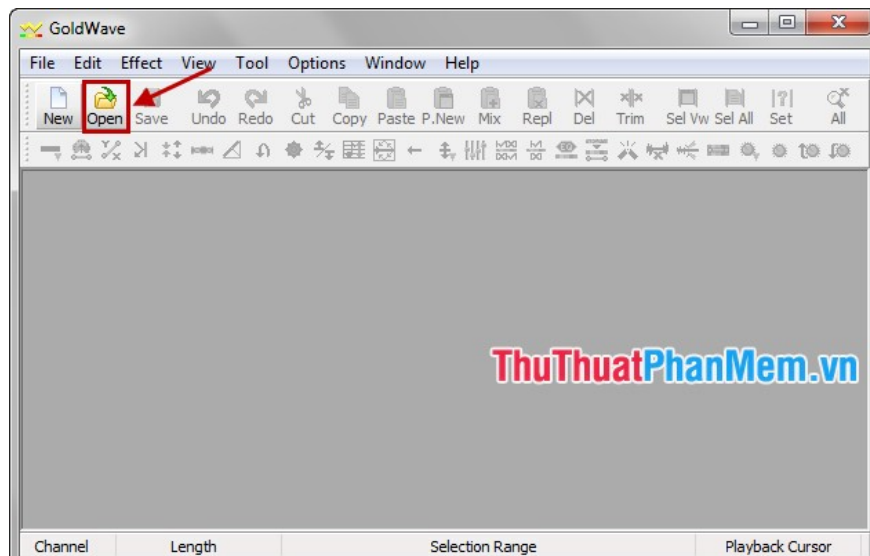

When listening to a song that has good melody, you want to make the song's background music as a ringtone but you can't find the beat of that song. You accidentally see someone mentioning the separation of lyrics to get background music. But you do not know how to separate the lyrics?

In this article, I will show you how to separate lyrics with GoldWave software.

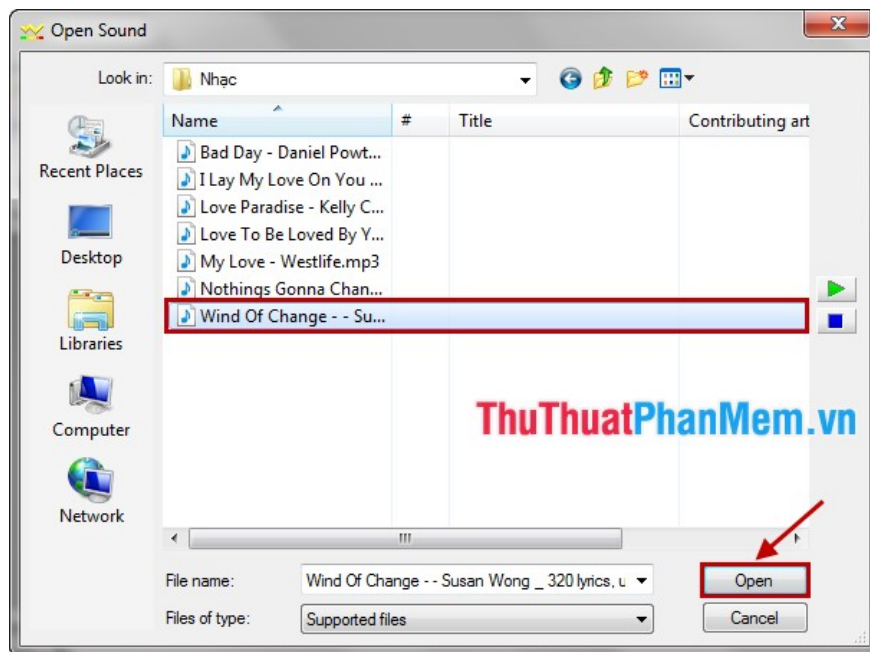

Step 1: You need to download and install GoldWave software on your computer.

Download it at <http://www.goldwave.com/release.php>

Step 2: Launch the program, select **File -> Open** or the **Open** icon on the interface to open the song you want to extract the lyrics.

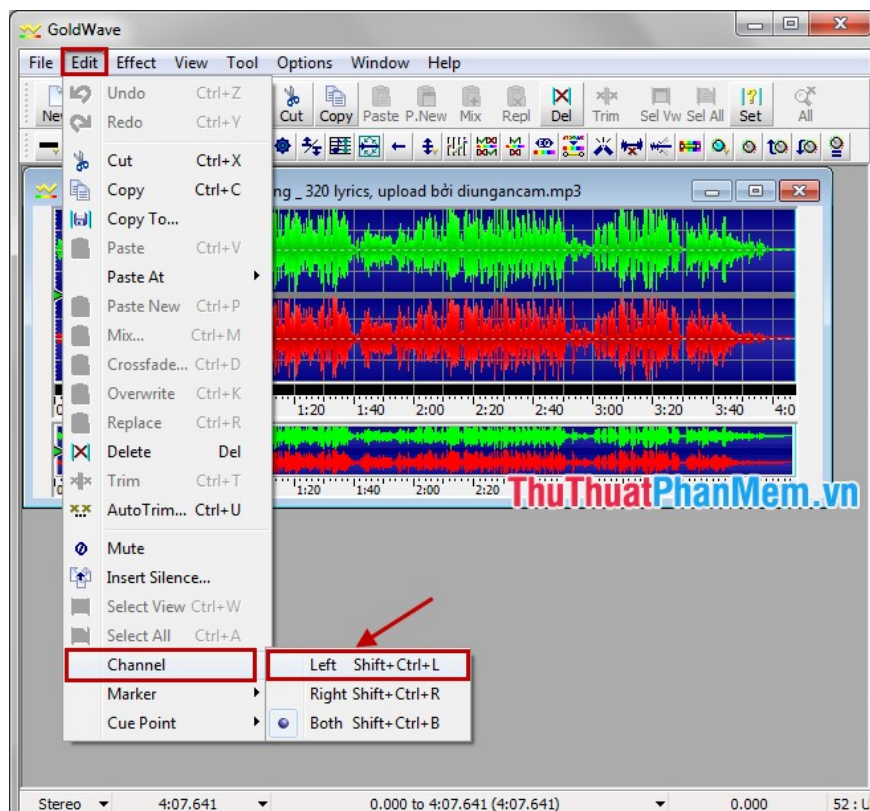

Open Sound window appears, select the song and click **Open** .

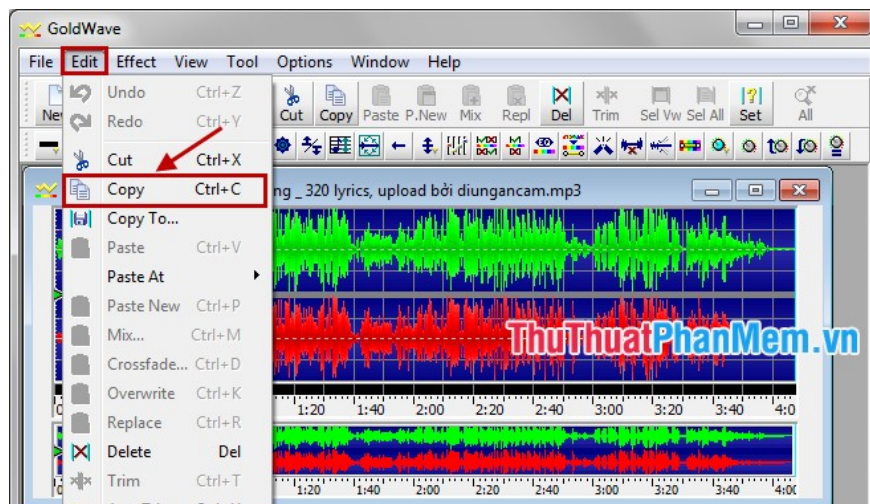

Step 3: Create the **Untitled1** file .

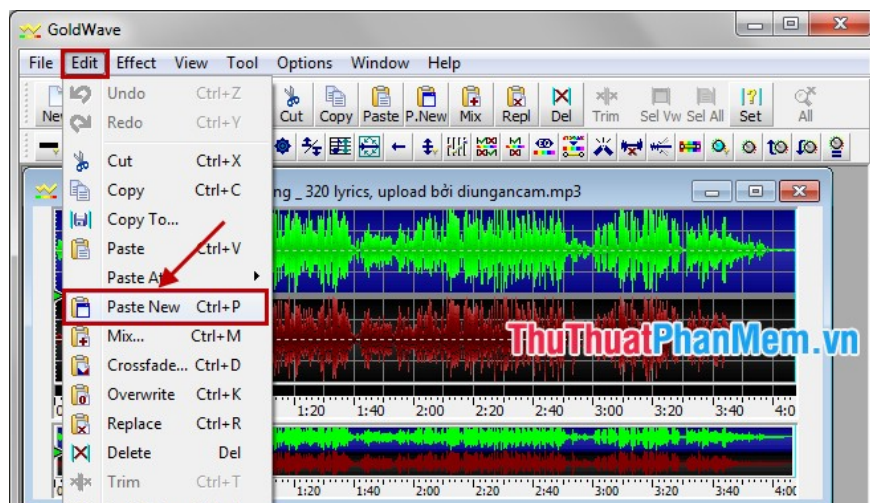

Choose **Edit -> Chanel -> Left** (or **Shift + Ctrl + L** key combination).

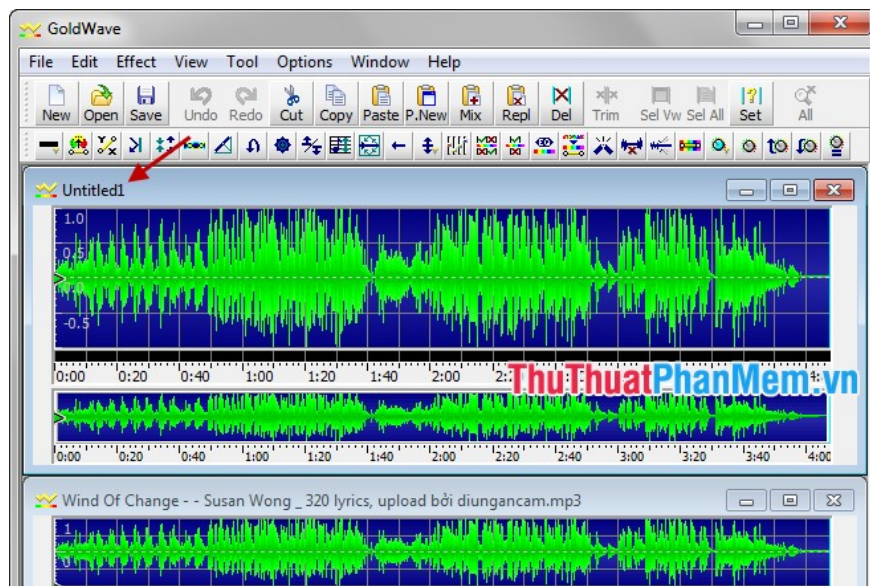

Click **Edit -> Copy** (or press **Ctrl + C**) to copy the song.

Then choose **Edit -> Paste New** to create a new file.

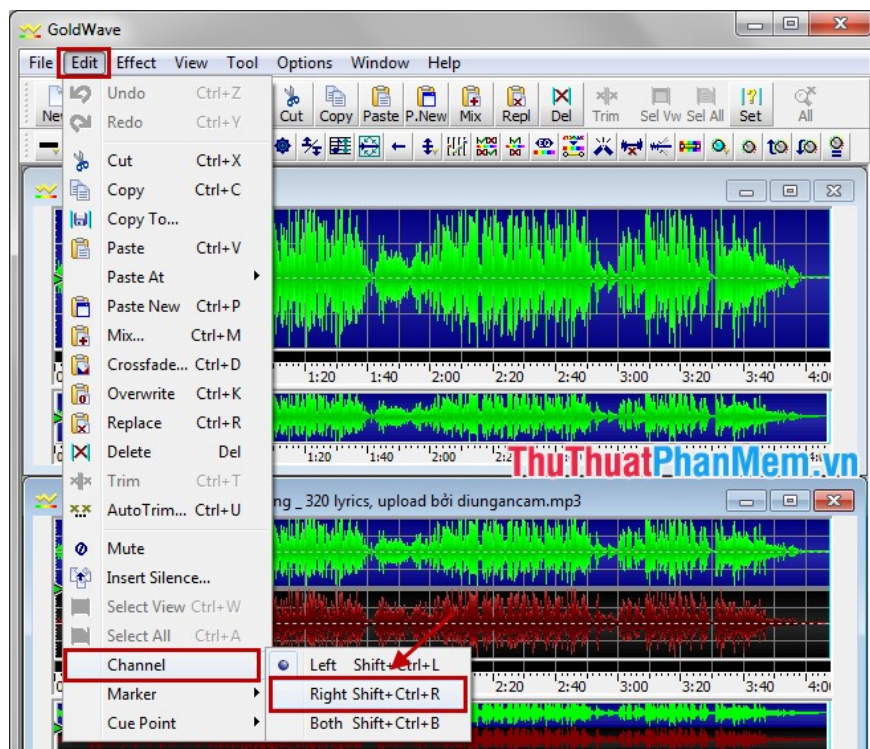

The newly created Untitled1 file is displayed in the interface.

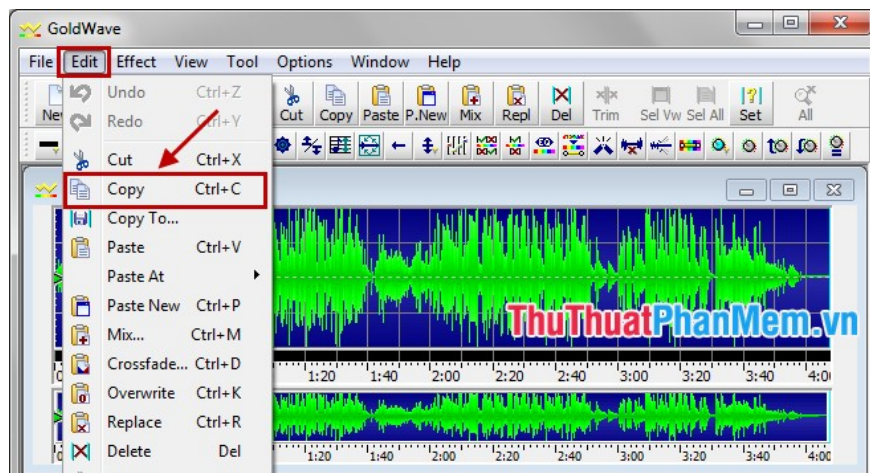

Step 4: Create the Untitled2 file.

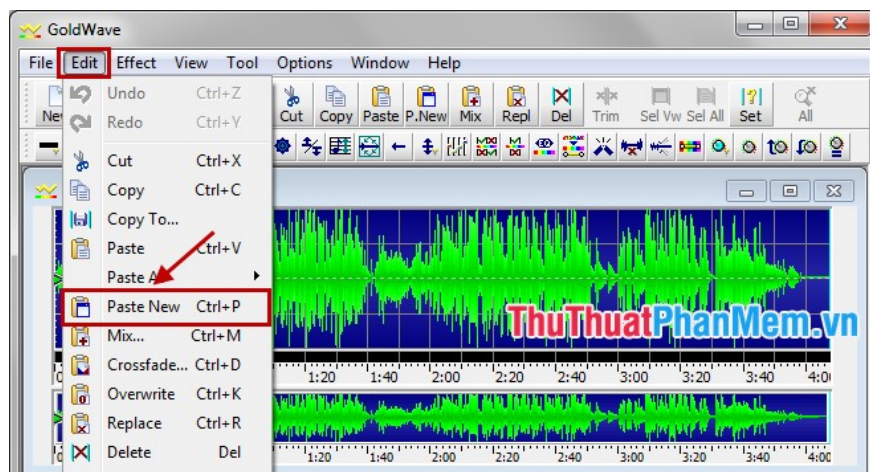

You need to select the original song and then select **Edit -> Chanel -> Right** (or the keyboard shortcut **Shift + Ctrl + R**).

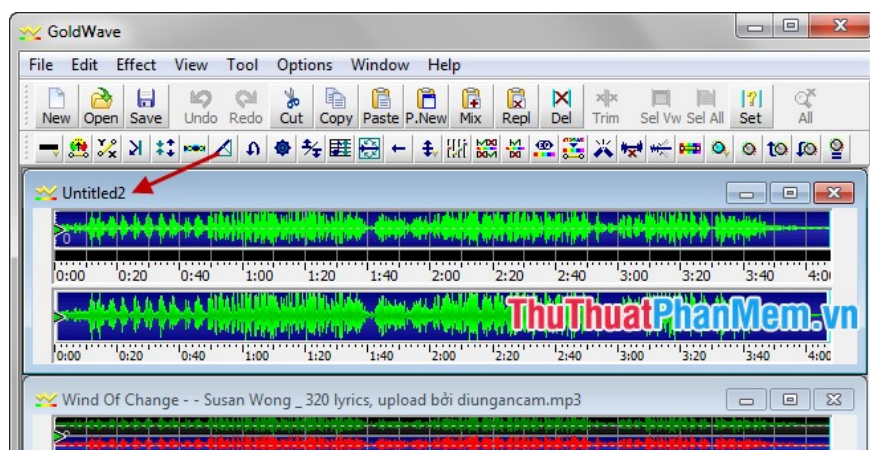

Next choose **Edit -> Copy** (or **Ctrl + C**).

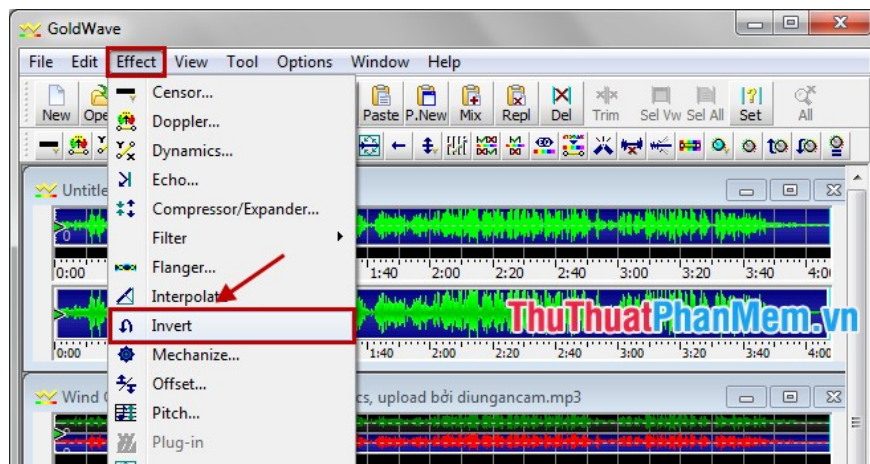

Then choose **Edit -> Paste New** (**Ctrl + P** key combination).

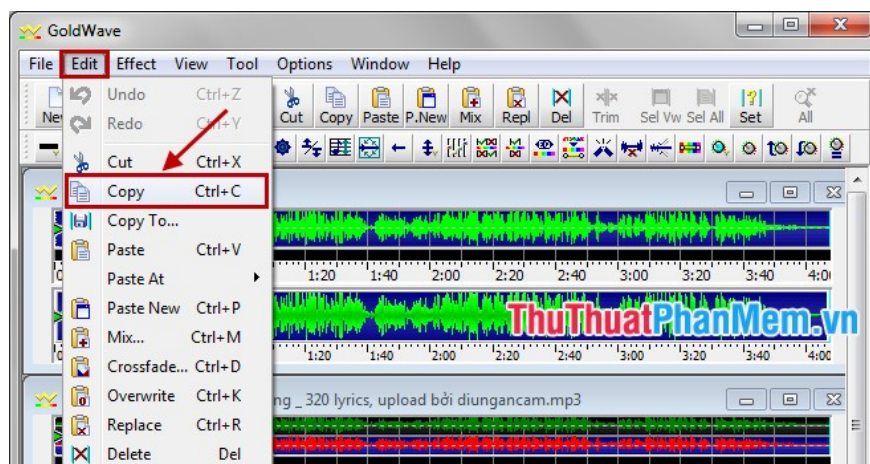

A new file named **Untitled2** was created.

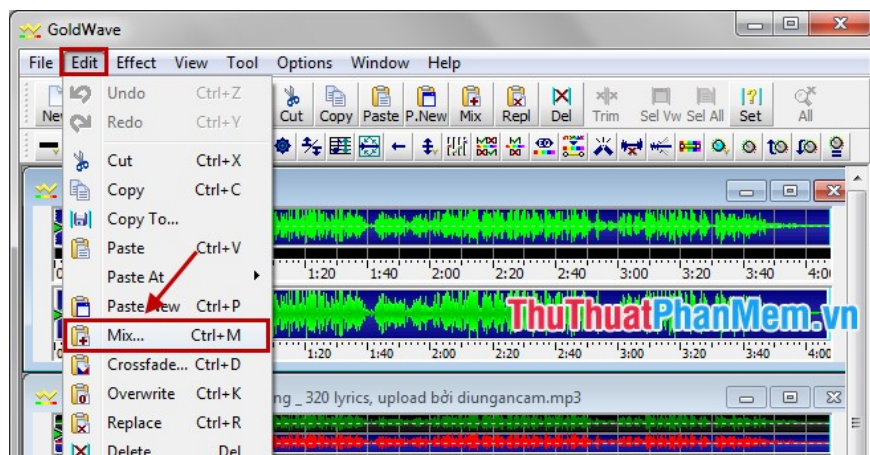

Step 5: Choose **Untitled1** and select **Effect -> Invert** .

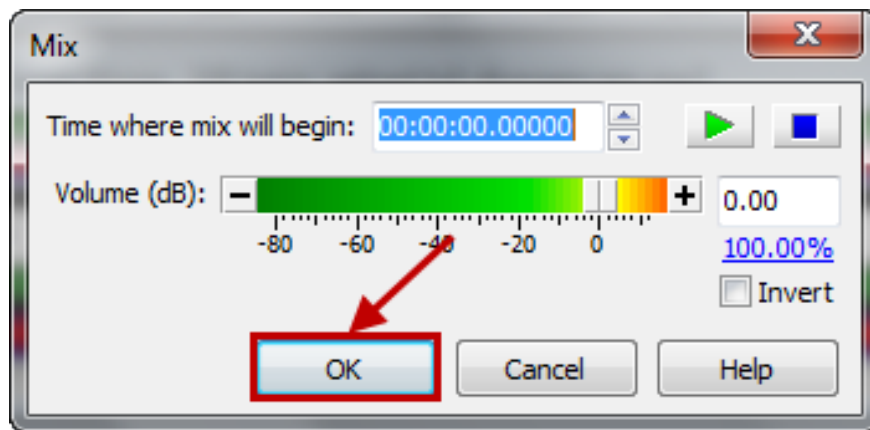

Next choose **Edit** -> **Copy** to get the music in section Untitled1.

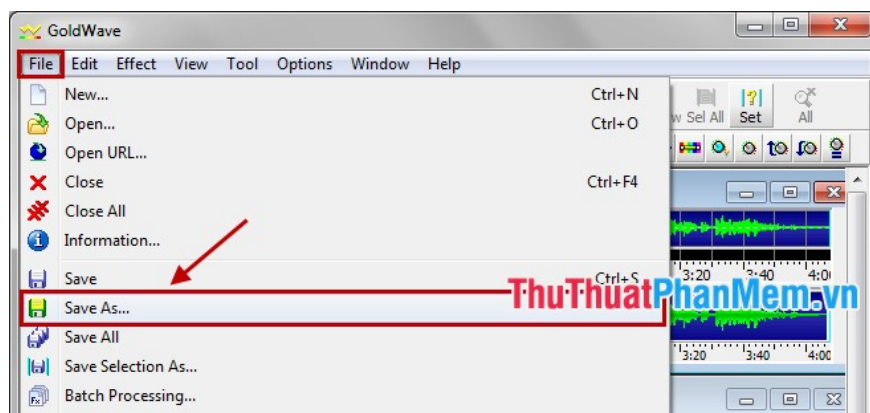

Step 6: Select Untitled2 and select **Edit** -> **Mix** to add to the background music.

Mix dialog box appears, select **OK** to finish.

Step 7: Save the background music file. You select Untitled2 and select **File -> Save As** to save the background music file that you just extracted from the song.

The first time you do it, you will find it very long and difficult to understand, but from the second time on, you will find it very simple. You just need to manipulate the steps in the article, you have a background music without lyrics. Good luck!
