

Instructions for setting up reading text content on a Mac

With a Mac, users can completely set the text reading mode, all the text content that the user chooses.

One of the useful tricks on iPhone that is Siri virtual logic can read all text content. And with Macs we can also turn them into readers of text content like on iPhone. Users can select the text content on the device, then let the reader read it to you. If we don't see the content, or want to practice listening and typing, this feature is very useful.

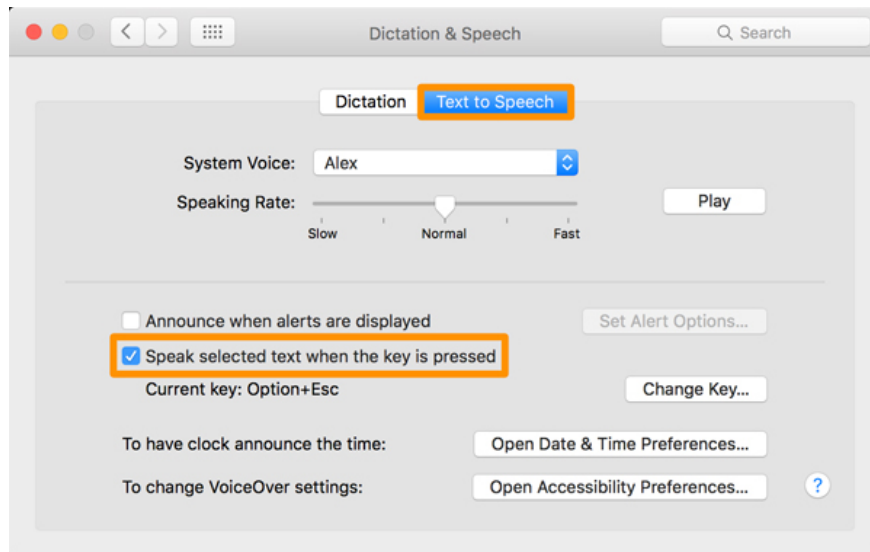

Step 1:

First, open **System Preferences** and select **Dictation & Speech** .

Step 2:

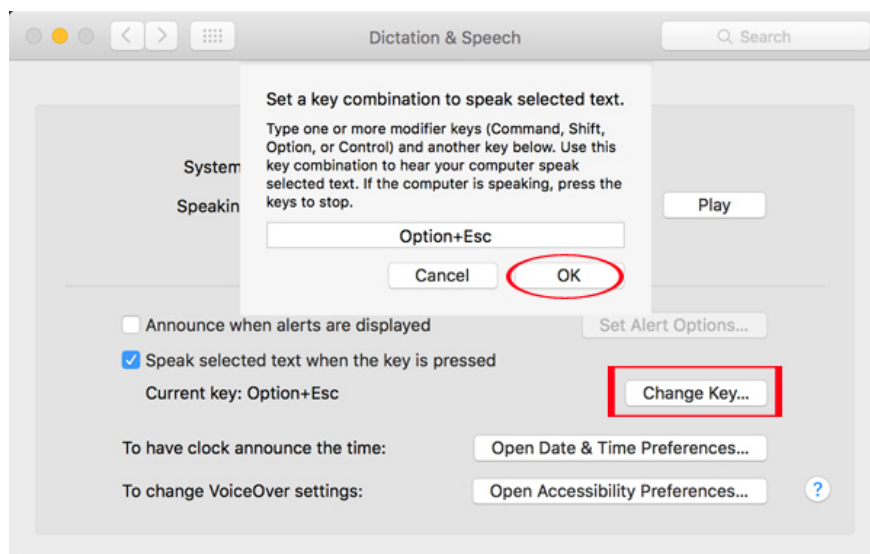

Next, open **Text to Speech** in **Dictation** . Select the **Speak selected text** item **when the key is pressed** .

Step 3:

We will click on the **Change Key** shortcut option. Then select the key to set the mode to read the selected text on the device.

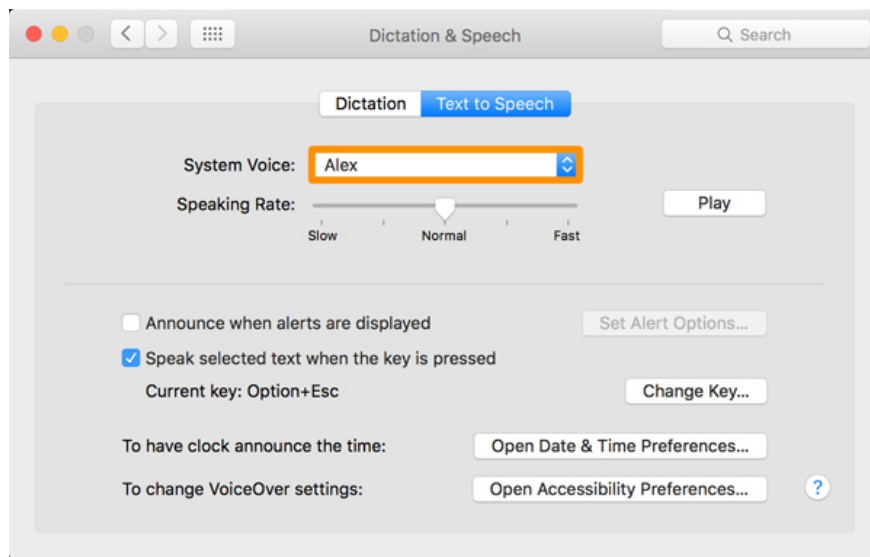

Click **OK** to save the setting of this shortcut.

Step 4:

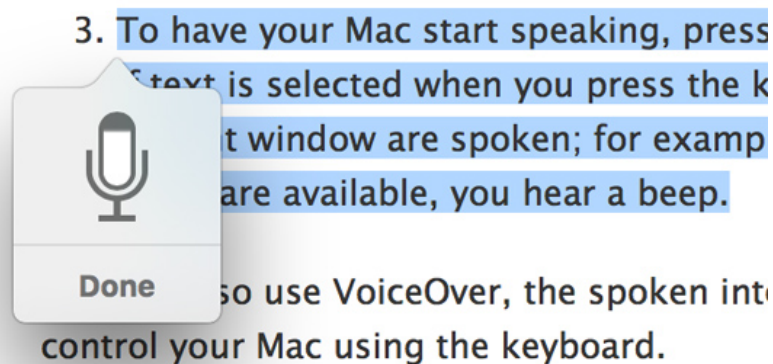

At the **System Voice** section, the reader can select the appropriate reading character for each listener. At the **Speaking Rate** bar, move the horizontal bar to the left or right to select a fast, or slow reading speed.

You can adjust the 2 items above to suit each person's listening ability.

Step 5:

Next, you open some piece of text on your computer. Then highlight the text and press the shortcut key to set the content to read.

The above are simple setup steps for reading text content on a Mac. This little trick is useful for those who need to type long text content or if you need to practice listening to English.
