

Instructions for sharing passwords in Google Family

Password manager on Google already has account password sharing settings between members of the Google Family group.

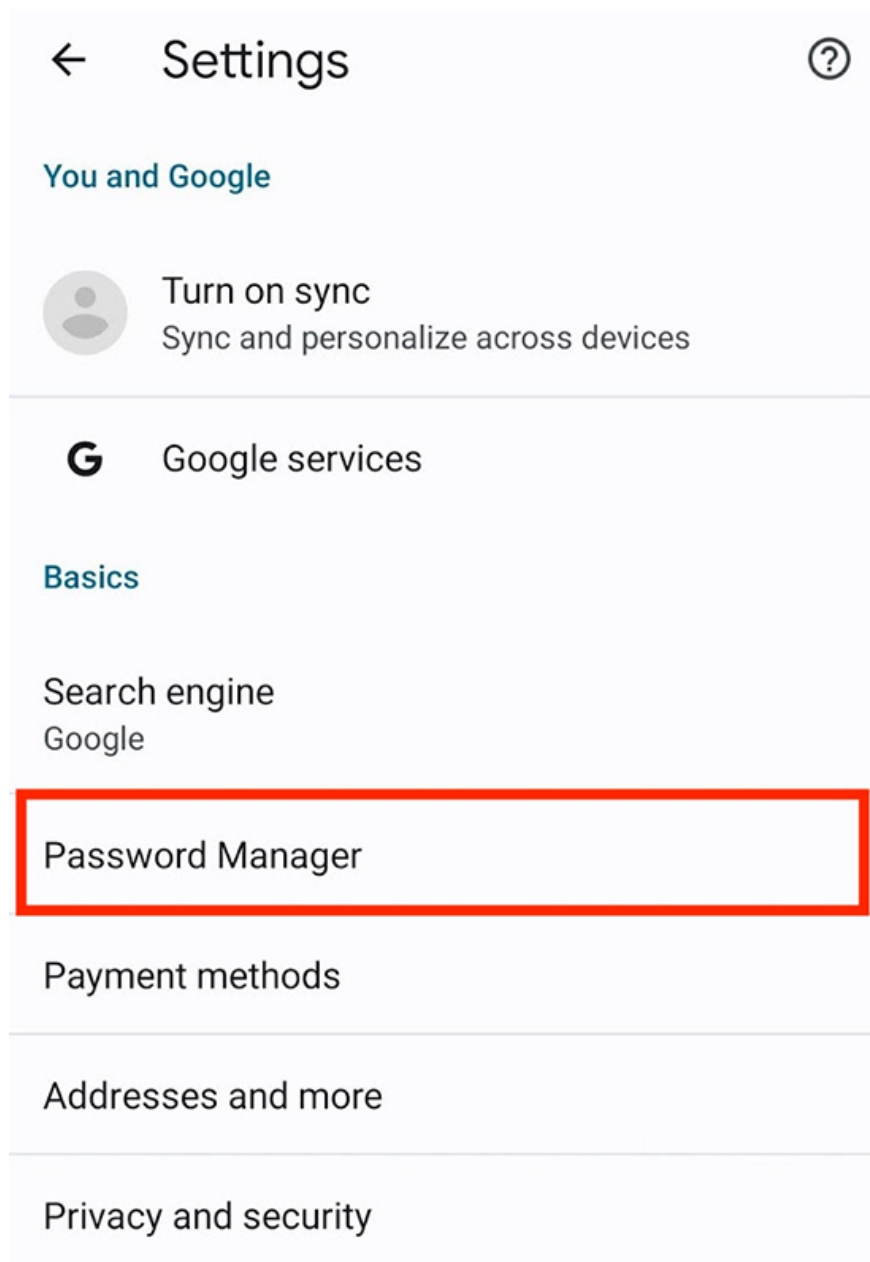

Google Family lets you share content with other Google accounts. You can also use Google Family to set up parental controls for families with young children. This makes it easy for members of the Google Family group to access shared content. Below are instructions for sharing passwords in Google Family.

How to share passwords in Google Family

Note, currently this feature only applies to Google Play version 24.20 and above.

Step 1:

At the interface on the Google Chrome browser on the phone, users click on **the 3 dashes icon** and then select **Settings** . Next in the displayed interface, select **Password Manager** .

Step 2:

Displays the password management interface with password information and applications that save information on Google. Click on **the account information** that the user **wants to share** .

Google Account

Password Manager

See, change or remove passwords that you saved in your Google Account. [Learn more](#)

Password Checkup

Your passwords were exposed in a third-party data breach. You should change them now.
