

Instructions for turning on gyroscope mode PUBG Mobile

With gyroscopic mode, gamers will aim at the shot more flexibly in PUBG Mobile on the phone

PUBG Mobile is a game on the phone, but players can play on PC with various Android emulators like BlueStacks, NoxPlayer, KOPlayer, MEMu . and especially Tencent Gaming Buddy. Tencent's emulator was developed exclusively for PUBG Mobile so if you install and play PUBG Mobile on Tencent Gaming Buddy, this is the most optimized version to play PUBG Mobile on your computer.

Controlling PUBG Mobile with Tencent emulator is easy, gamers just need to use the mouse and keyboard to control the character like other shooters. As for PUBG Mobile playing on the phone, players will also have support settings for controlling characters.

One of the options to help players is **Gyroscope** , also known as gyroscope. This adjustment will help players on the phone to control when aiming more quickly and flexibly. But it will take time to get used to the default of the player still controlling the character with the icons on the screen, if you don't know how to turn on the PUBG Mobile gyroscope, check out the article below.

Instructions for turning on gyroscope PUBG Mobile

1. Download PUBG Mobile for PC
2. Download PUBG Mobile for iOS
3. Download PUBG Mobile for Android

Step 1: In the main interface, select the Settings icon.

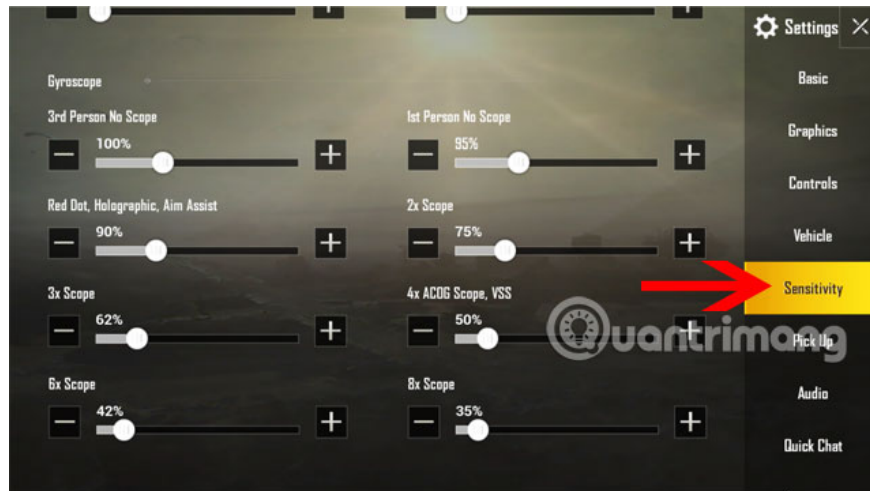

Step 2: By default the game will take you to Basic, this section will contain a lot of options to control the characters in the game. Scroll down and you will see the **Gyroscope** section, there are two options to use the gyroscope: **Scope On (viewfinder only)** and **Always on (always on)** .

With **Scope On** , the gyroscope option will only turn on when you use Scope. As for Always on, the gyroscope always turns on in both first and third view modes.

To adjust the rotation speed of Gyroscope mode, you can select the **Sensitivity** item below. When you access the Sensitivity menu, please scroll down and adjust the speed of using Gyroscope for each Scope or different viewing angle.

After you've adjusted it, go to the game, get a Scope and watch **Aim Down Sight** , then tilt your phone and you'll see Gyroscope working. Now you won't need to use the rotation icon on the screen anymore.

As mentioned above, using the **Gyroscope** option will take a bit of time to get used to initially, but if you've used it well, you'll find this option very flexible when looking at **ADS** . Hopefully, the above procedure PUBG Mobile will help you in shooting PUBG Mobile.
