

# How to enable lock screen space scene on iOS 26

In addition to Liquid Glass on iOS 26 completely changing the device interface, Apple also added a 3D effect to your lock screen wallpaper with extremely unique Spatial Scenes.

In addition to Liquid Glass on iOS 26 completely changing the device interface, Apple also added a 3D effect to your lock screen wallpaper with extremely unique Spatial Scenes. When you tilt the phone, the wallpaper also has extremely unique movements. Below are instructions to enable space scenes on iOS 26.

## What is Space Scene in iOS 26?

Spatial Scenes is a new feature in iOS 26 that adds depth and movement to still photos. As you tilt or move your iPhone, the image shifts slightly, making it look like you're looking at a 3D scene instead of a flat photo. It separates the foreground and background and animates them based on the movement of your phone.

Apple uses on-device AI and the Neural Engine to analyze the depth of a photo. Interestingly, this feature doesn't rely on the new Apple Intelligence system. So even if you don't have the latest iPhone with the full AI suite, you can still access this feature if your device supports iOS 26.

## How to enable space scenes on iOS 26

### Step 1:

We click **on the photo we want to set as wallpaper** and then click on **the share icon** below. Next, click on **Use as wallpaper** .
