

Instructions for typing French on a computer with Unikey

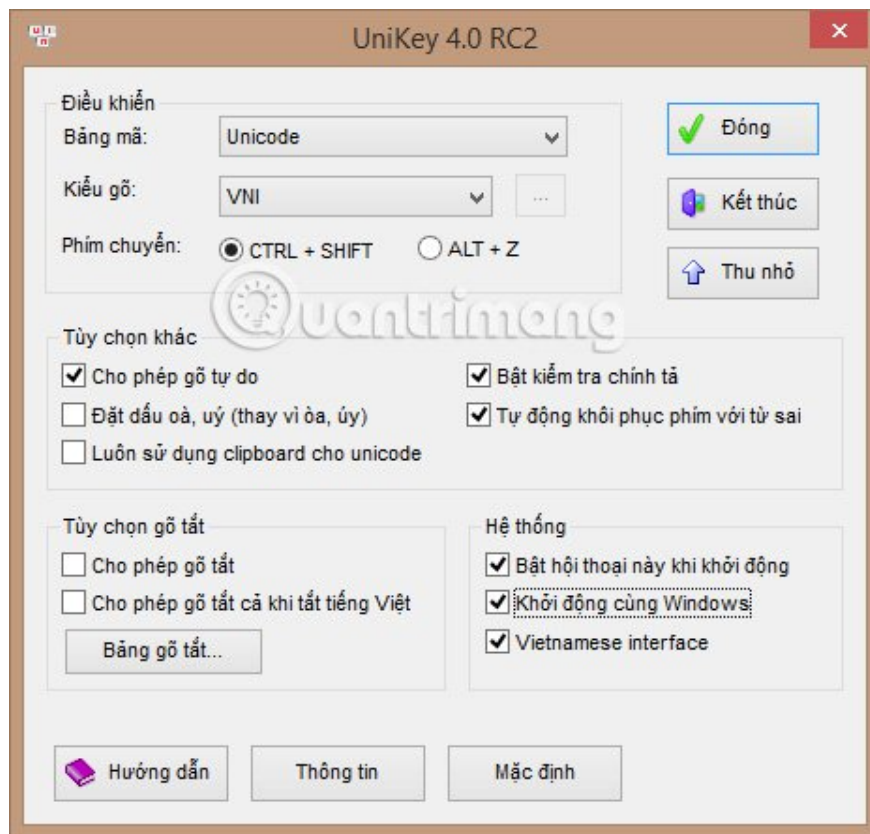

Unikey is currently a popular Vietnamese typing tool, but we can use this software to type other languages ??like French, German, ...

Unikey is now a popular Vietnamese keyboard and is widely used by many users, because of the variety of uses. You can type in Vietnamese, type in the text, or even use Unikey to type other languages ??such as French.

We can change the Code or Typing to type French on the computer, in the text content or in any content that the user wants. In addition to using Unikey, there are several ways to type in French on a computer. So how to use Unikey to type in French, and there are other ways to type in French? Follow along in the tutorial below of Network Administrator.

1. How to type in French with Unikey:

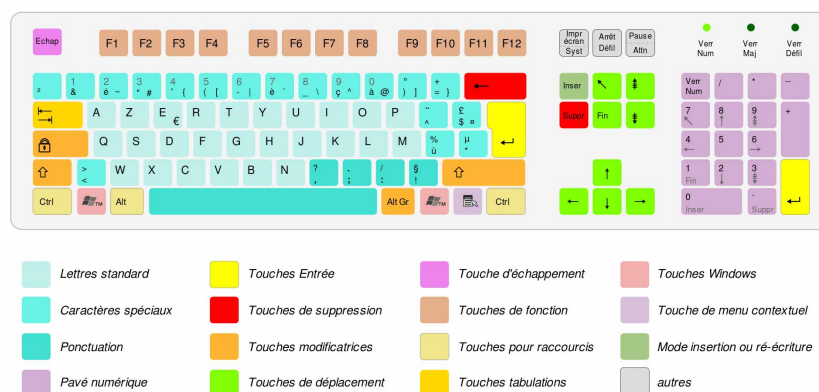

As mentioned, to be able to type in French with Unikey, we will **change the Typing Method and Code Table** .

2. Use AZERTY French keyboard on computer:

This way will turn the English keyboard on the computer QWERTY to the keyboard to type in French AZERTY . To be able to switch like that, we will interfere with the keyboard typing mode on the computer.

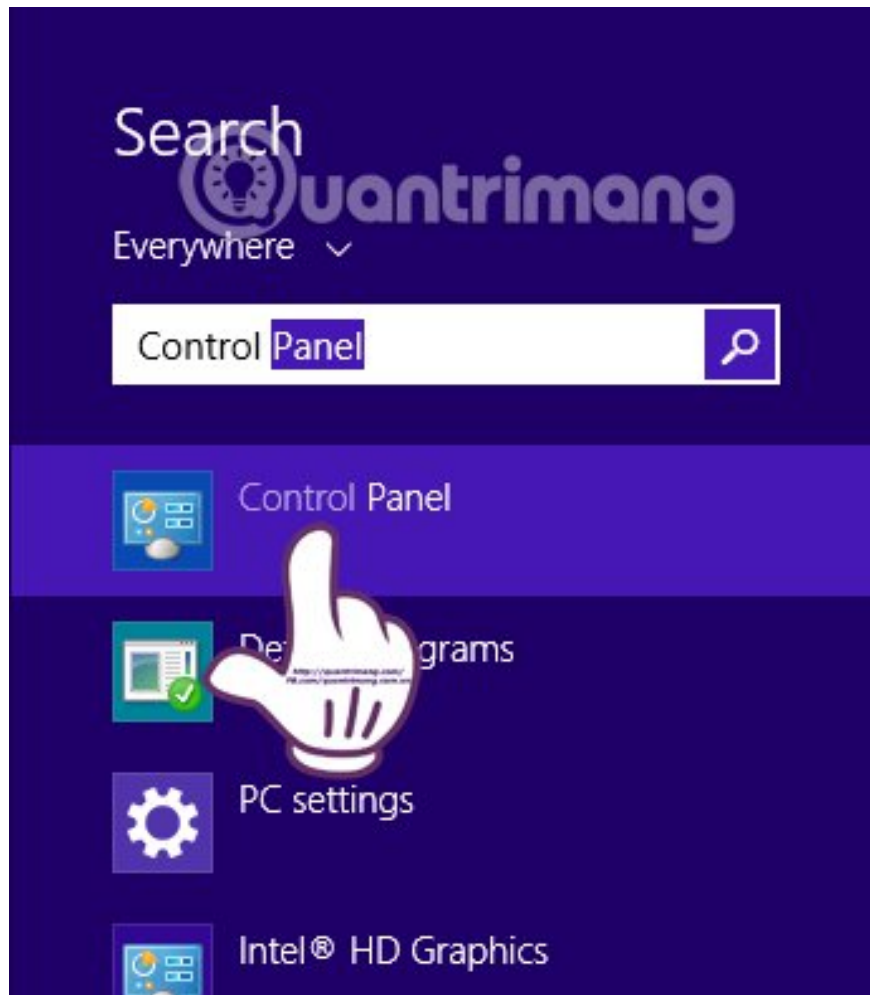

However, users should note, to be able to type in French you need to turn off Vietnamese typing mode when using Unikey.

Perzerty keyboard for French

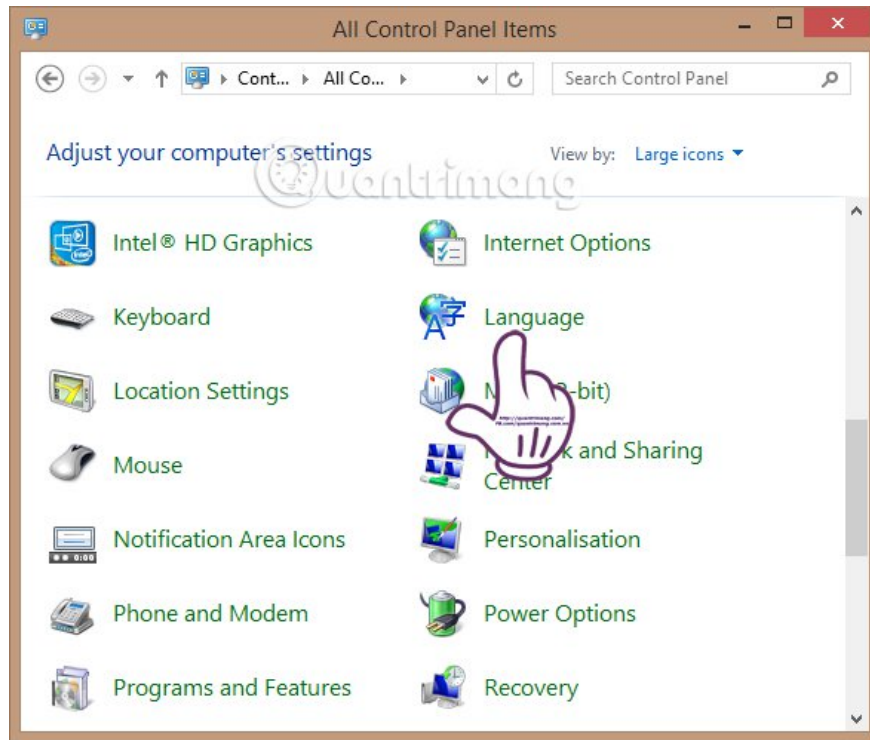

Step 1:

First of all, you need to type the keyword **Control Panel** and access it on the computer.

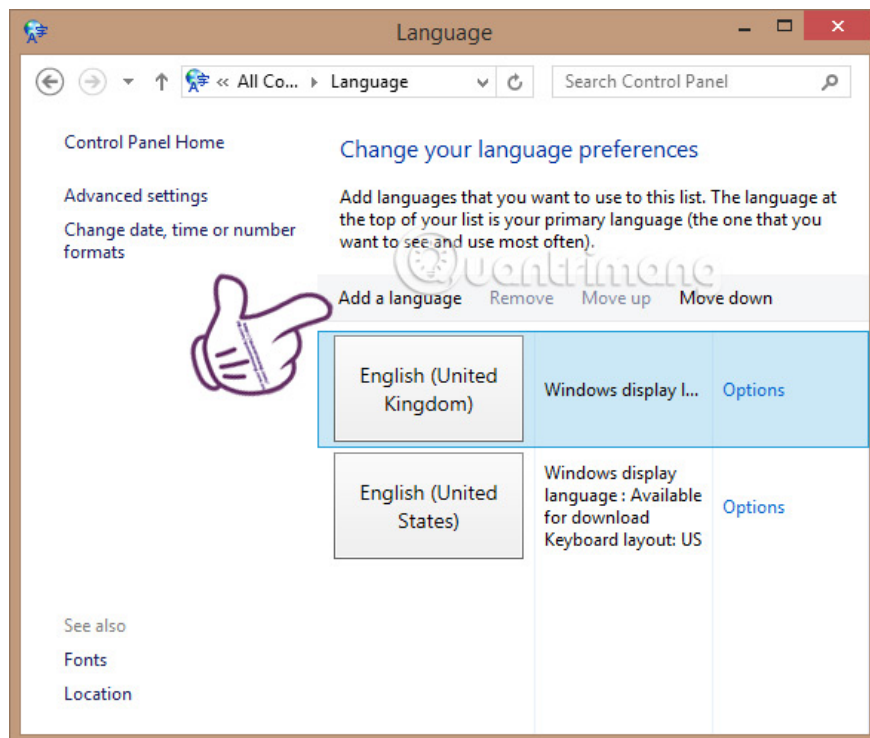

Step 2:

Next at the **All Control Panel Items interface**, we click on the **Language** or Region and Language section with the other operating systems.

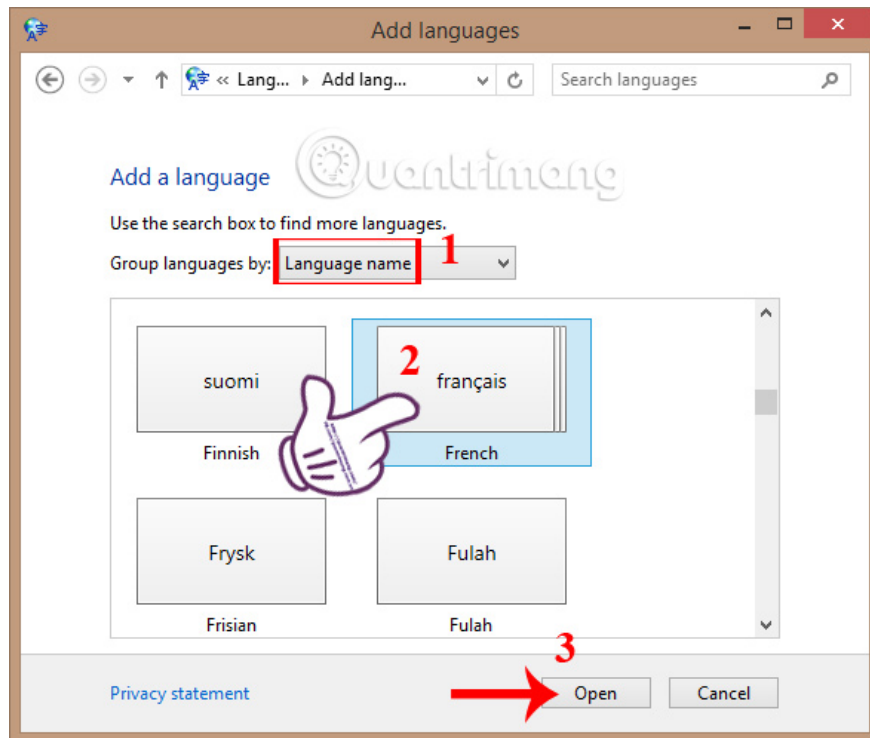

Step 3:

Soon the **Change your language preferences** interface will appear. You will see a list of keyboard languages ?? that we have installed on the computer. Click **Add a language** , or Change keyboards and click Add with the computer from Windows 7 or below.

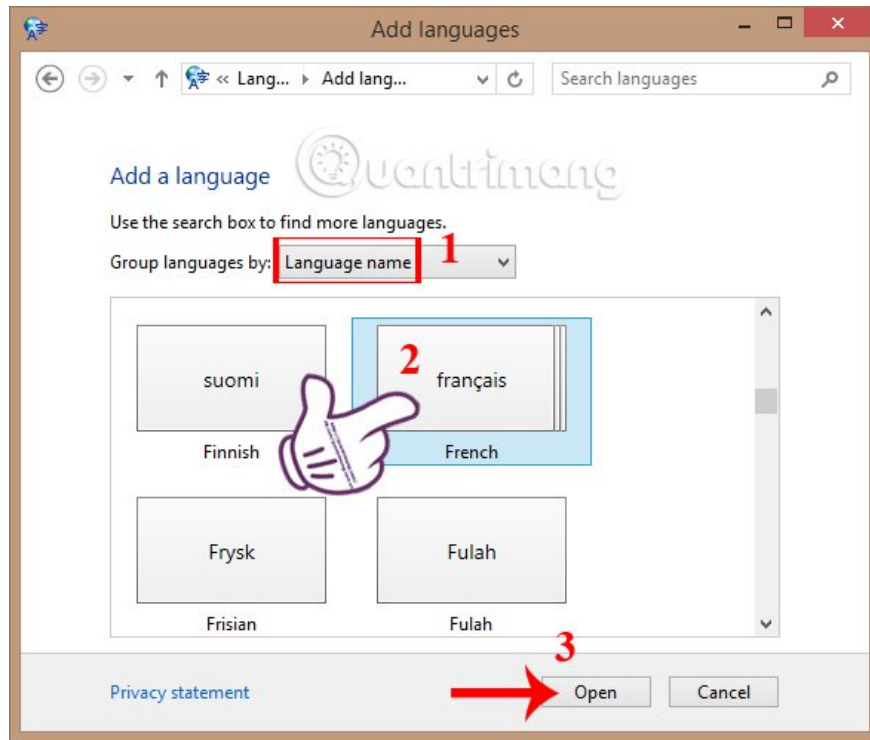

Step 4:

At the Add a language interface, we will select the **Language name** group and select French - **French** . Click on it and click **Open** .

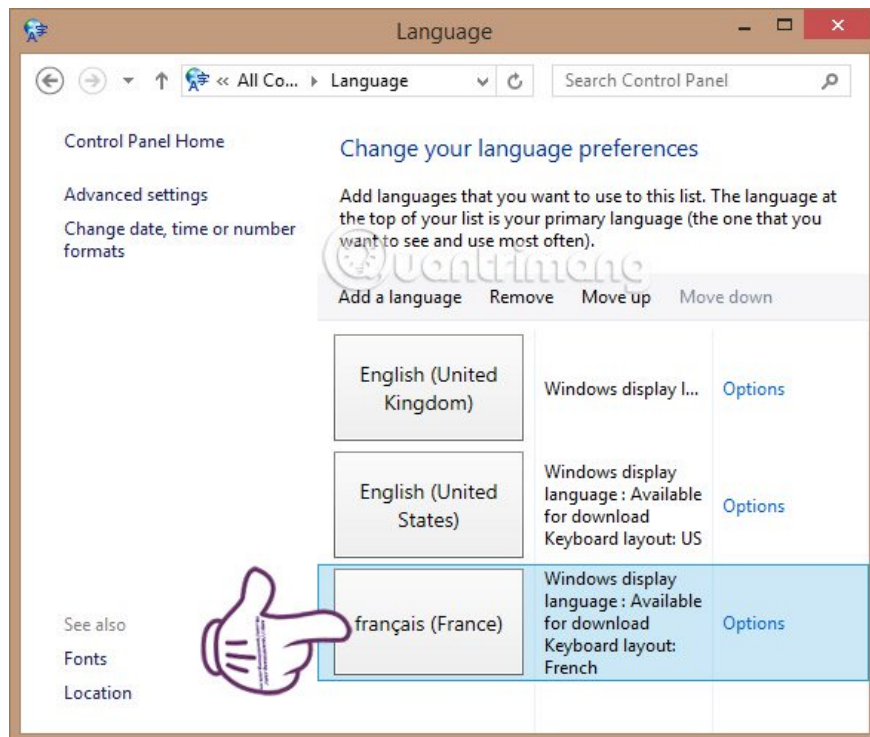

Next, readers will see a list with many French typing methods such as French (Canada), French (Belgium), French (Monaco), . We will click on the French typing method **French (France)** , then Click **Add** right below.

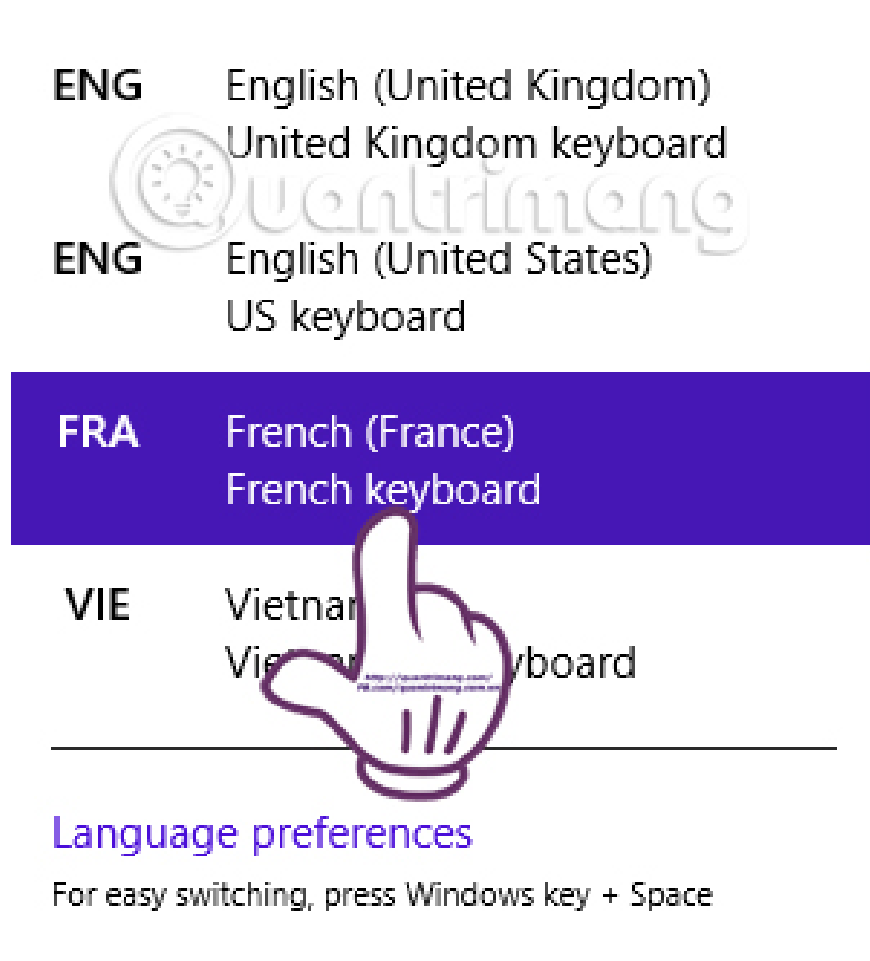

Step 5:

When you return to the Change your language preferences interface, you will see the French keyboard typing method that appears in the list.

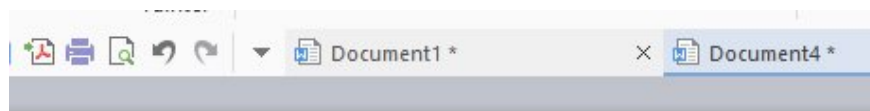

Step 6:

Exit the Control Panel interface and return to the screen. At the **Language bar** icon below the Taskbar, we click to select **FRA** to switch to French keyboard typing.

So you can type French on the computer already. If you are new, you can look at the AZERTY key image above.

3. Use keyboard shortcuts:

In addition to using Unikey, installing additional French typing on a computer keyboard, users can also use shortcuts on the computer. However, this method will need you to practice more to remember the shortcuts and special characters attached.

Characters Shortcut Alt Alt + 0192 Alt + 0194 € Alt + 0128 «Alt + 0171» Alt + 0187 â ALT + 131 à ALT + 133 æ ALT + 145 Æ ALT + 146 Ç ALT + 128 ç ALT + 135 ALT É + 144 Ñ ALT + 130 ALT ALT + 136 è ALT + 138 ë ALT + 137 î ALT + 140 ï ALT + 139 ALT + 147 û ALT + 150 ù ALT + 151 ü ALT + 129

Above are the French typing methods on the computer, using the Unikey tool, adding a French keyboard, using keyboard shortcuts. Depending on the purpose of use as well as the convenience of each person in use, they choose the best French typing method.
