

Instructions for using Facebook avatar video on iOS

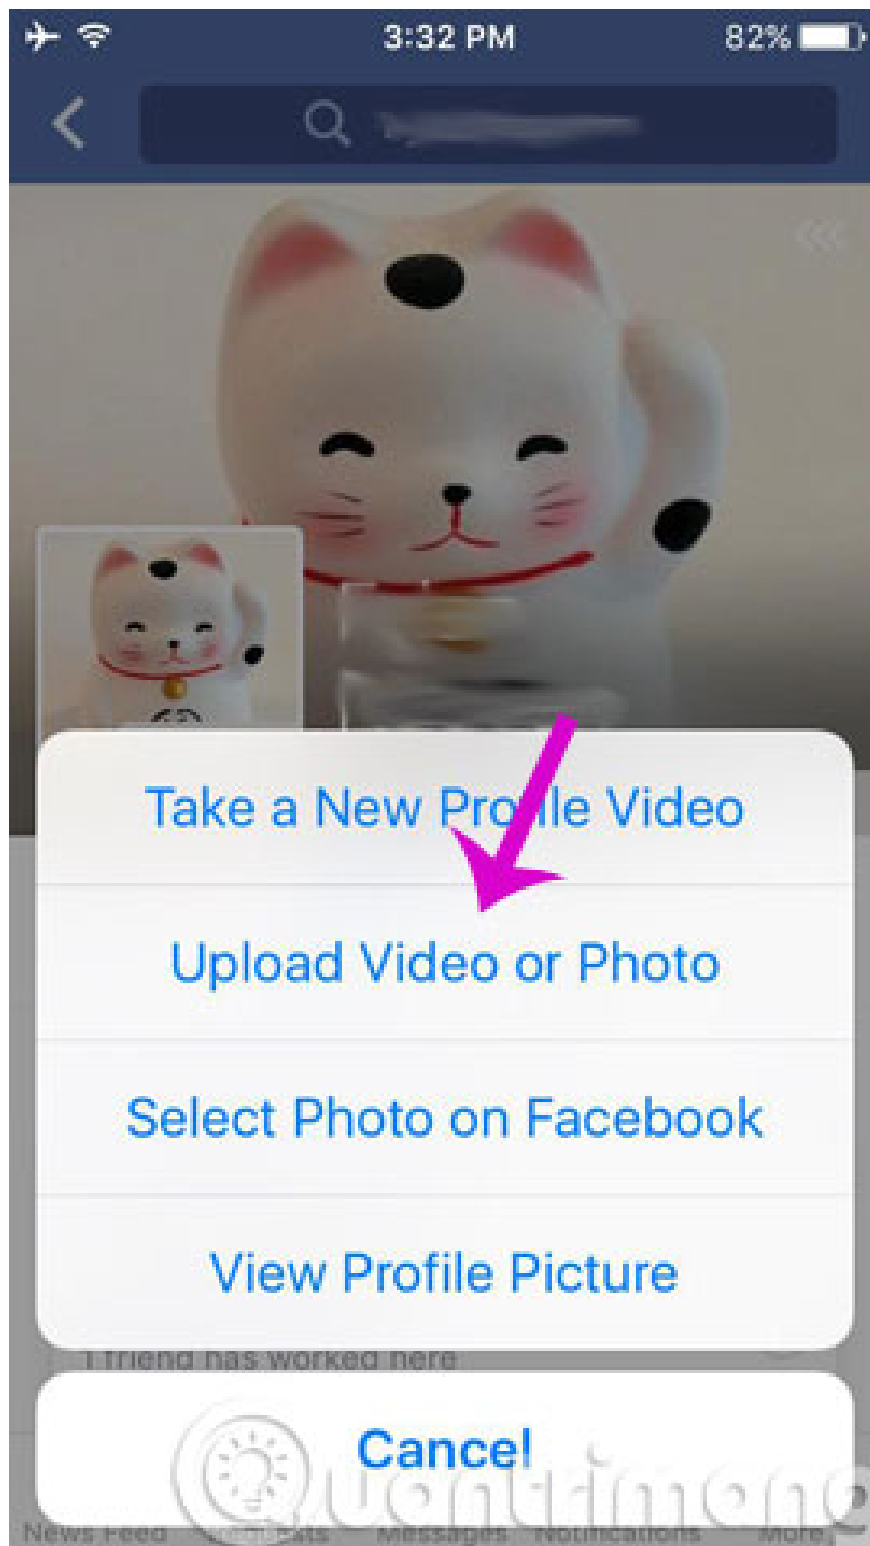

After a period of testing, the Facebook app on iOS has officially allowed users to use videos (up to 7 seconds in length) to make avatars. Proceed as follows

After a period of testing, the **Facebook** app on iOS has officially allowed users to use videos (up to 7 seconds in length) to make avatars. Proceed as follows

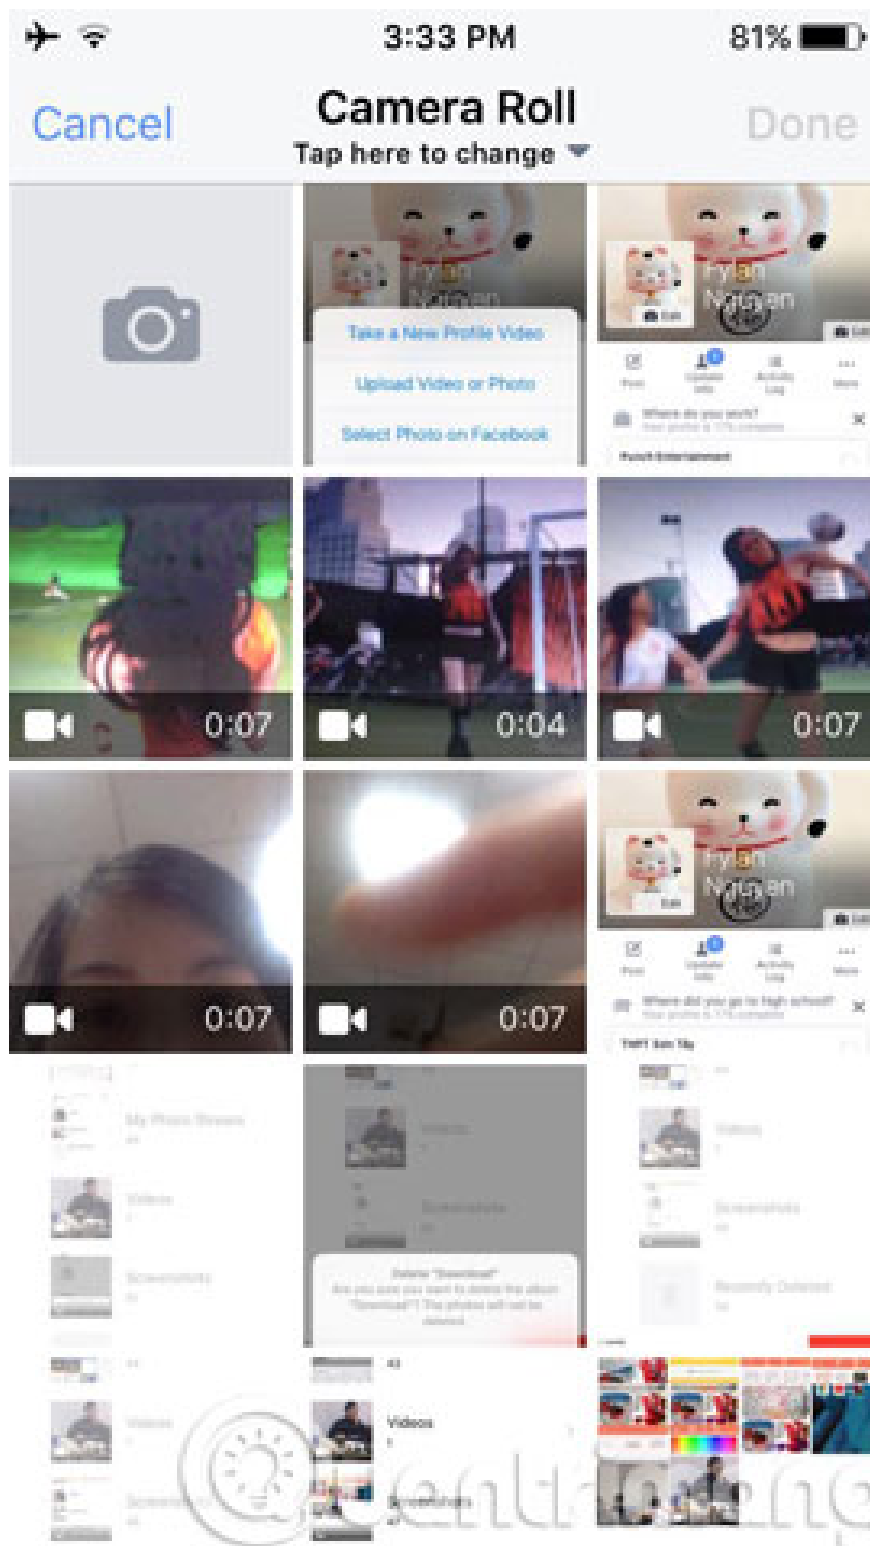

Step 1 : Open the Facebook application and access the personal page. Then click on avatar

Step 2 : When the new dialog box opens, select the video that is available in the phone or dial it automatically. Here, we choose option 1

Step 3 : Select 1 video available in the phone

Step 4 : You will be previewed the video, click **Next** to move to the next step

Step 5 : Select the Thumbnail image for the video you just recorded, to avoid the case that the video does not work for some reason, the Thumbnail image will behave like a normal avatar. Then, click **Save** to save.
