Google Bard is an AI tool that works like Microsoft's Copilot, helping you find information such as searching for YouTube videos as you like. You just need to enter a video search request on YouTube and then the tool will search for what you want. Below are instructions for using Google Bard to find YouTube videos.

## How to use Google Bard to find YouTube videos

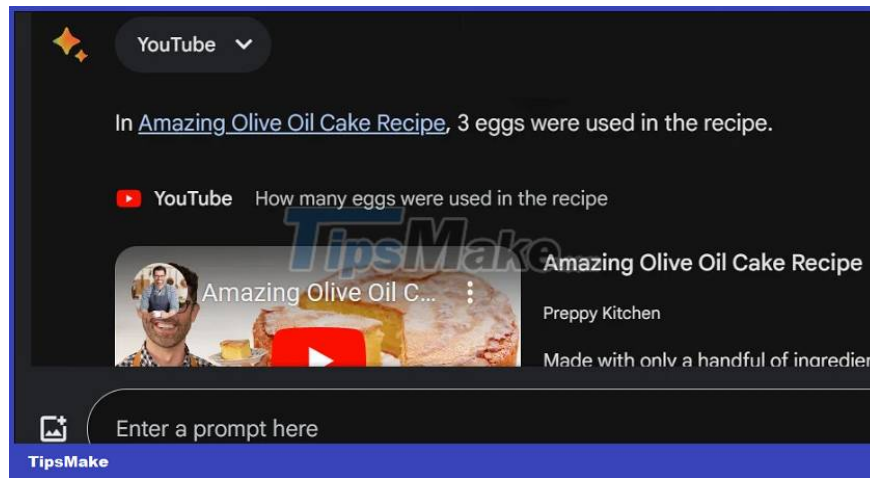

### Step 1:

First, access Google Bard by following the link below to use. Next at the chat frame interface, enter **the formula @YouTube for the video content you want to find** and press Enter to send the message.

### Step 2:

You will then see YouTube video results based on the information you want to find.

You can use Google Bard to search for specific information in YouTube videos. Immediately after that, Google Bard will provide the exact information you need to search for in the video.

In case you don't want to watch the entire video, just enter the required ingredients in Google Bard.

As a result, you also get the ingredients used, or information on demand without having to watch the video.
