

How to use Perplexity to create AI images on WhatsApp

WhatsApp users can now create chats with Perplexity to exchange any information you want, including creating AI images with descriptions.

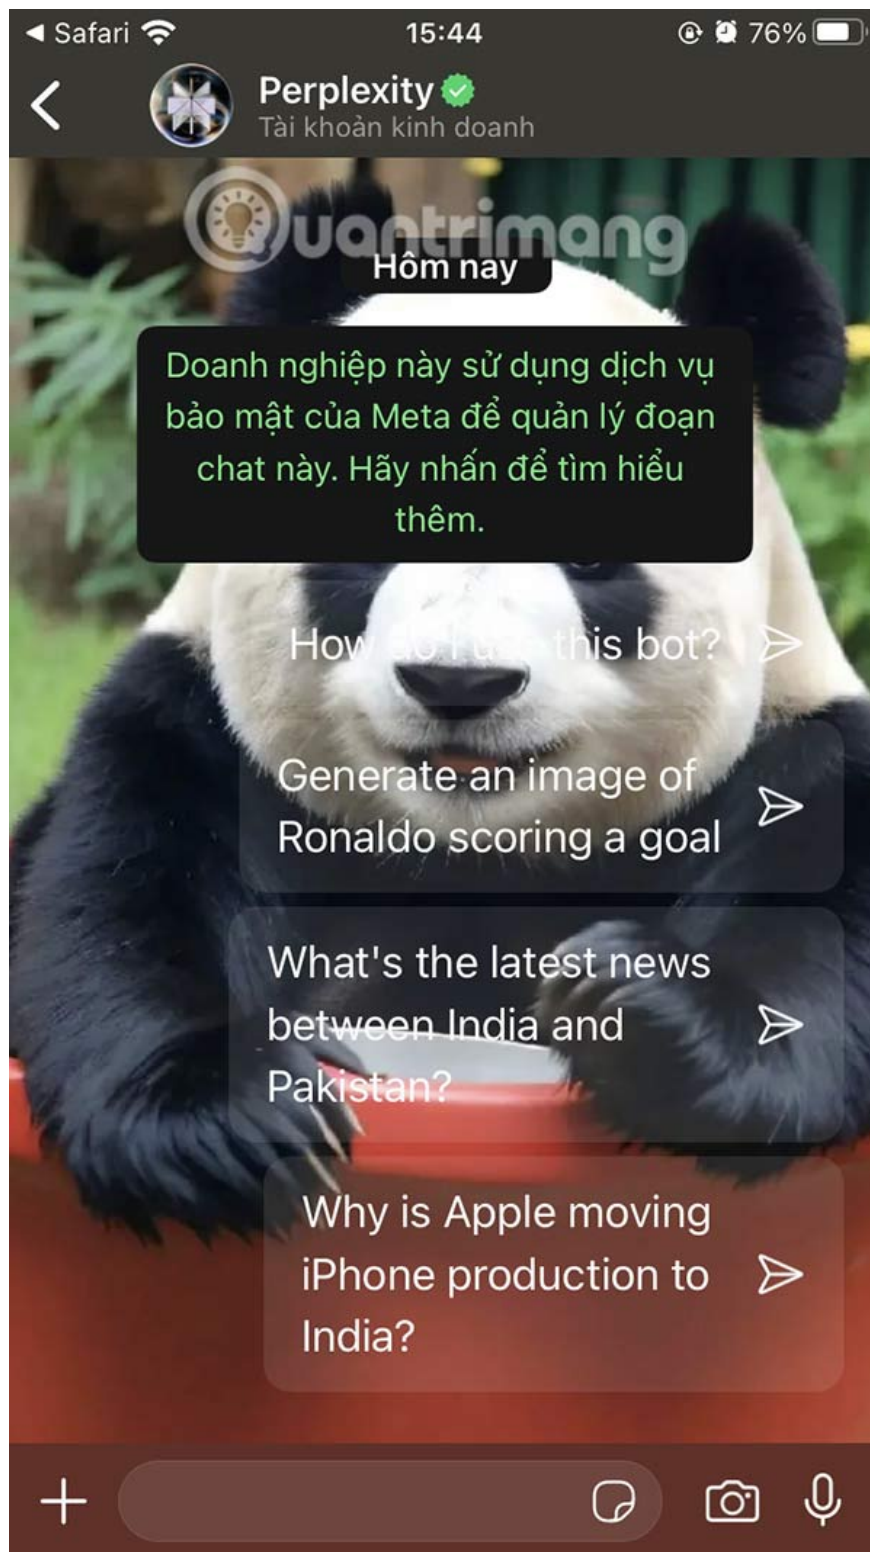

WhatsApp users can now create a chat with Perplexity to exchange any information you want, including creating AI images with descriptions. Users just need to enter a detailed description of the image they want to create and Perplexity will immediately create an AI image in the WhatsApp chat. Here is a guide to using Perplexity on WhatsApp to create AI images.

How to use Perplexity to create AI images on WhatsApp

Step 1:

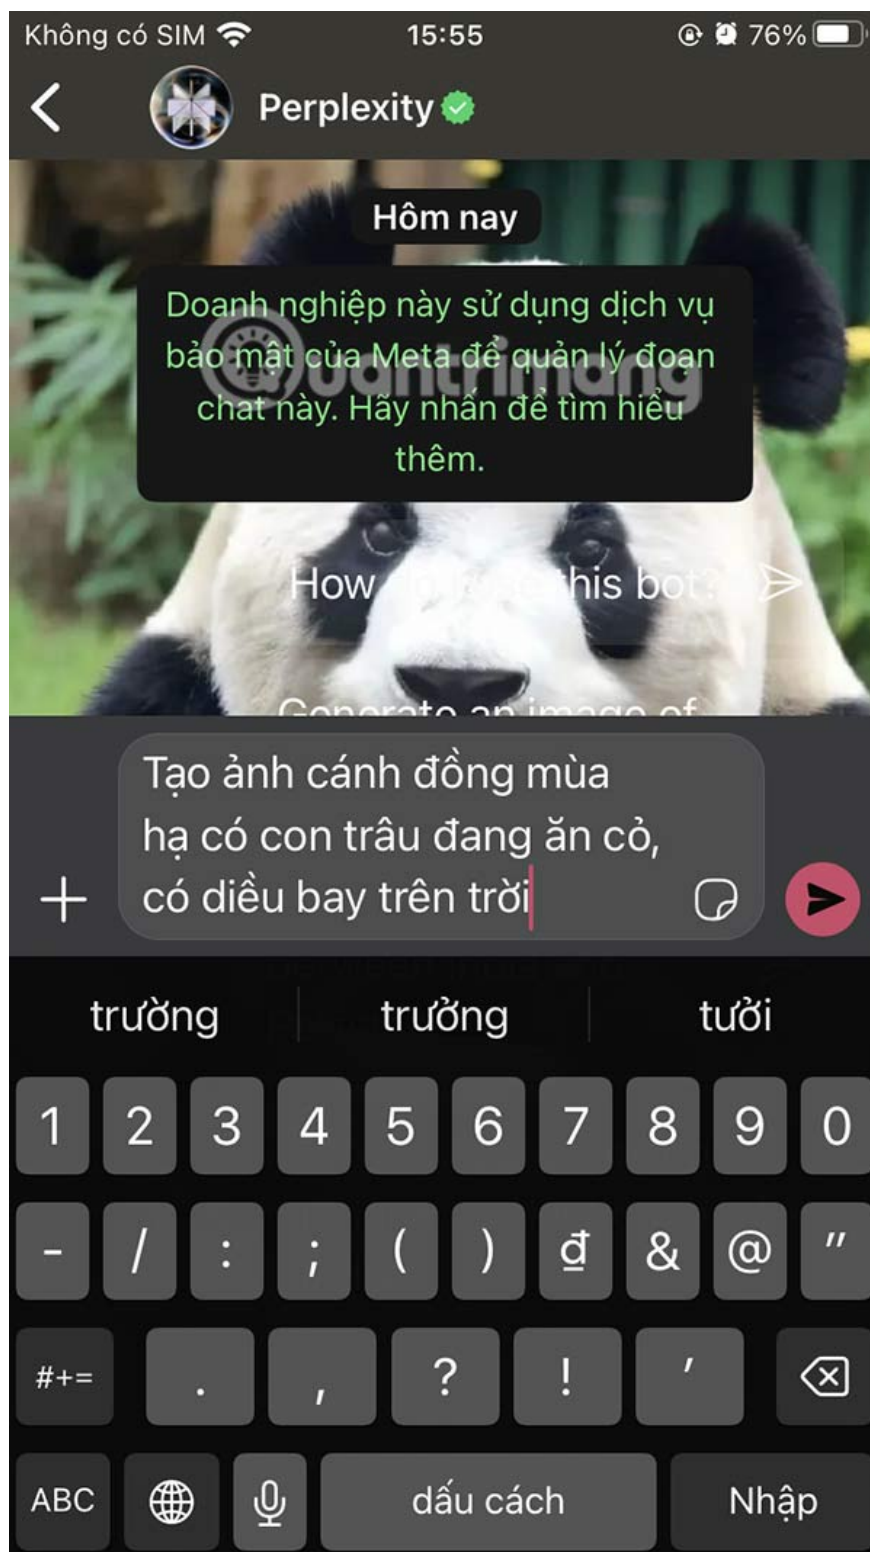

First, you access the link below to create a quick chat on WhatsApp. We add the Perplexity phone number to WhatsApp to use.

1. How to Add Perplexity AI on WhatsApp

Step 2:

At the Perplexity chat interface with WhatsApp, we **enter the description of the AI image** you want to create. You fill in all the details and then press send as usual.

Step 3:

Users wait for a while for Perplexity to analyze the content you sent and proceed to create an AI image based on the description you sent. The result is that we have an AI image created by Perplexity on WhatsApp as shown below.

Step 4:

You click on the image and then **click on the arrow icon to forward the AI ??image to someone else in WhatsApp**. We select the object to send and then enter the message to send as usual.
