

# Instructions for voice chat when playing Apex Legends Mobile

Apex Legends is the survival game that was very popular with the PC version, now bringing all the essence of the original game into the mobile version.

Joining Apex Legends Mobile, players will form strategies with their teammates to find the best course of action for the whole team.

To do that, people first need to turn on the voice chat feature to be able to communicate, exchange and discuss quickly and easily. Players can even send recorded messages to other players if needed. In this article, let's learn how to voice chat and send voice messages in Apex Legends Mobile.

## How to enable voice chat in Apex Legends Mobile

First, players need to equip themselves with a quality headset to start voice chat while playing Apex Legends Mobile. To enable voice chat settings, follow these steps:

1. Click **Settings** .
2. Select **Graphics and Audio** .
3. Scroll down until you see a section called Voice-over. Then select **ON** in the **Use built-in mic** section .

1. Exit settings and then start a match.
2. When the game is in the character selection menu, tap **the microphone icon** in the lower left corner.
3. From here, gamers will have a number of options such as muting teammates, muting themselves or using the tap-to-speak feature.

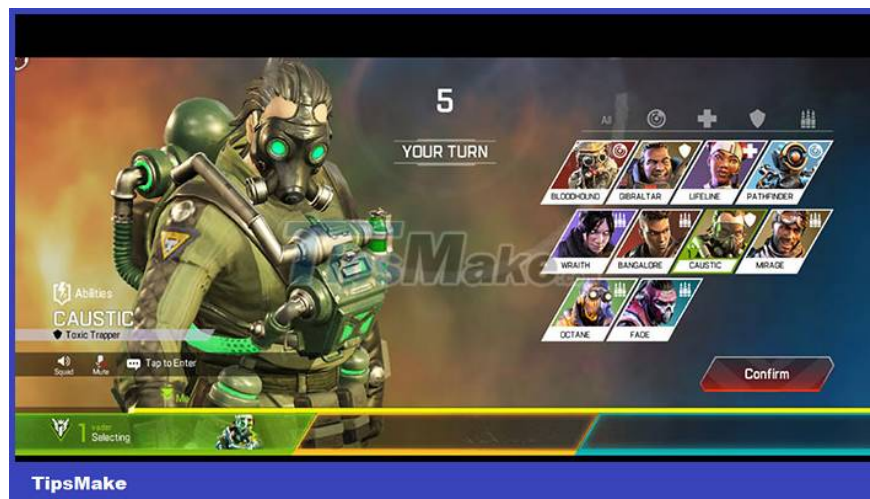

Keep in mind that some characters work better together than others, so players will want to discuss and plan which Legend they and their teammates will work well together.

## How to send voice messages in Apex Legends Mobile

Sometimes it's better for players to limit the amount of noise they hear from the speakers. This is the perfect time for voice messages to come in handy. Here's how to send voice messages to other Apex Legends Mobile players.

1. Tap the button that **says Tap to enter chat** in the bottom left corner of the screen.
2. Select the player everyone wants to send voice messages to.
3. Hold down **the microphone icon** and record your voice message. It will stop recording when the player lifts his finger from the microphone button.
4. If you decide not to send the recorded message, swipe up and then let go of the screen to cancel the message.

Now that everyone knows all the ways to communicate with their teammates in Apex Legends Mobile, it will help all gamers in a team work together more effectively.

Communication is key to planning an attack strategy or informing teammates of an enemy's arrival. Gamers will be able to play a lot better if they really talk often with friends and teammates. Besides, the gaming experience will be much more enjoyable when everyone can joke and have fun together the whole time.
