

# Instructions from AZ how to install Windows 10 build 14393.222

Recently, Microsoft released the latest cumulative update for Windows 10 PC users called Build 14393.222. This update was released for Windows 10 to primarily fix errors based on user feedback, and improve the operating system experience.

Recently, Microsoft released the latest cumulative update for Windows 10 PC users called **Build 14393.222** . This update was released for Windows 10 to primarily fix errors based on user feedback, and improve the operating system experience.

In the following article, Network Administrator will guide you from AZ how to install Windows 10 build 14393.222.

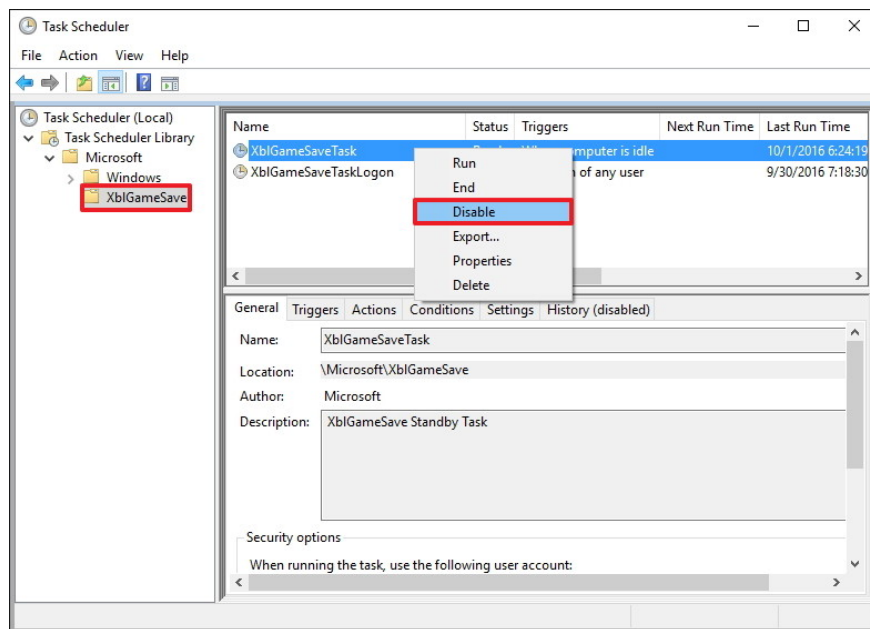

## Steps to install Windows 10 build 14393.222

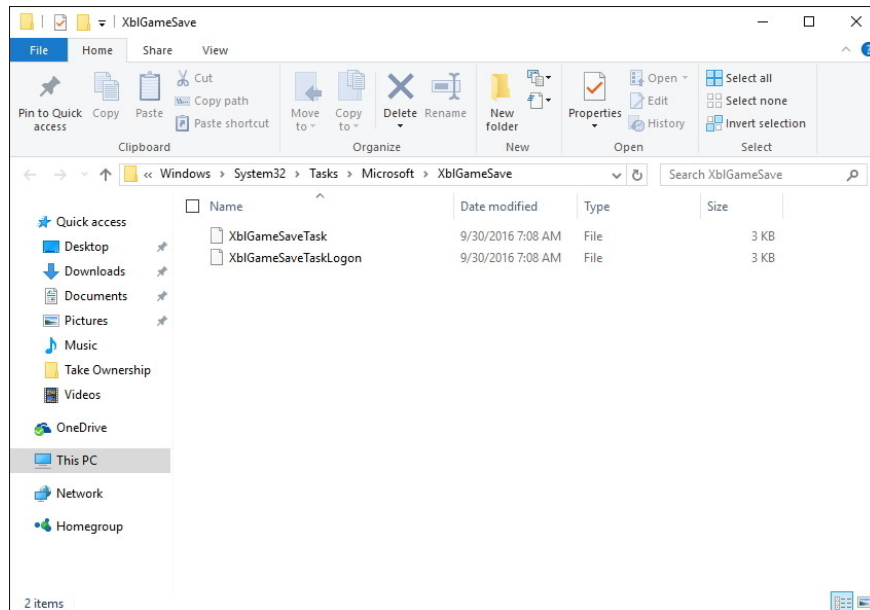

Important note:

Before taking the steps, you should make a backup of the entire system to avoid possible bad situations.

1. First open **Start** , then enter **Task Scheduler** into the **Search** frame and press **Enter** to open the **Task Scheduler** window.
2. On Task Scheduler window, expand **Microsoft Task Scheduler Library** => .
3. Select **XblGameSave** .
4. In the right pane, right-click **XblGameSaveTask** , select **Disable** .
5. Right-click **XblGameSaveTaskLogon** and select **Disable** .

6. Close the Task Scheduler window again.
7. Press **Windows + E** key combination to open **File Explorer** .
8. On the File Explorer window, navigate to the key:  
**C: WindowsSystem32TasksMicrosoftXblGameSave**
9. Find and delete both files: **XblGameSaveTask** and **XblGameSaveTaskLogon** .

10. Press the **Windows + R** key combination to open the **Run** command window.

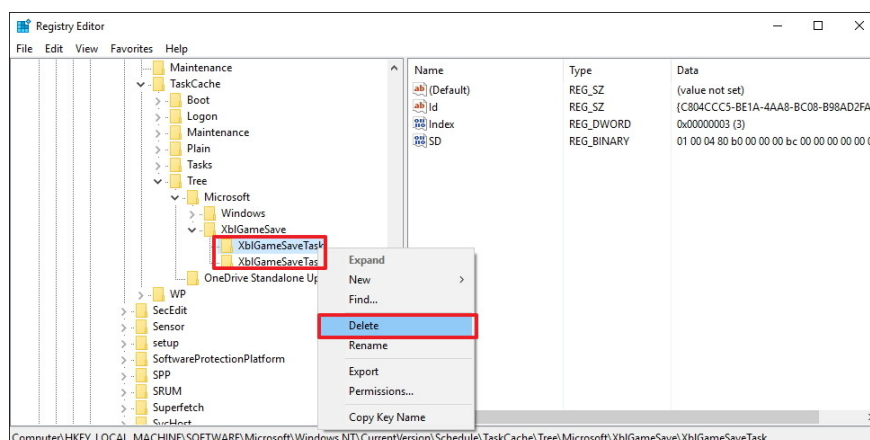

11. On the Run command window, enter **regedit** there and press **Enter** or click **OK** to open the **Registry** window under **Admin** .

If you are unsure, enter regedit in the Search box on **Start Menu** , then on the search results list, right-click it and select **Run as Administrator** .

12. In the Registry window, navigate to the key:

**HKEY\_LOCAL\_MACHINE\SOFTWARE\Microsoft\Windows NT\CurrentVersion\Schedule\TaskCache\Tree\Microsoft\XblGameSave**

13. Right-click and delete the subkeys: **XblGameSaveTask** and **XblGameSaveTaskLogon** .

14. Close the Registry window.

15. Open **Settings** .

16. Click on **Update & security** .

17. Click **Check for updates** to install the new update.

After you have completed the steps above, you can install Windows 10 build 14393.222 on your device. After installing the update (update), the 2 tasks that you deleted earlier will reappear, which means you will not have to change the changes again.
