

Instructions on 3 simple ways to turn on the Lenovo laptop keyboard light

In this article TipsMake will guide you through 3 ways to turn on the Lenovo laptop keyboard light, including: Using keyboard shortcuts, using key combinations, opening with control panel,...

In case users often operate and work in low-light environments, immediately refer to the 3 ways to turn on the Lenovo laptop keyboard light shared by TipsMake in the following article!

Instructions to identify Lenovo laptops with keyboard lights

Many new Lenovo laptop lines currently launched on the market often integrate a keyboard light feature. For users to check whether the device they are using is equipped with a keyboard light or not, please do the following:

First, look **at the buttons from F1 to F12** as well as **the spacebar** to see if any keys have the keyboard light symbol printed on them. If so, it means your laptop is a laptop with a backlit keyboard.

In addition, you can also check by referring to the user manual included after purchasing the product. Please turn to the table of contents and see if there is a section '**Instructions for turning on the keyboard LED button**' .

Some Lenovo laptops have prominent keyboard lights on the market

Equipping keyboard lights on laptops brings many significant benefits to users. Not only does it improve working efficiency when used in low-light environments. Furthermore, the keyboard light also adds to the aesthetics of the device.

For the Lenovo laptop brand, most of the lines that the brand distributes on the market such as Gaming, Thinkbook, Thinkpad, Ideapad or Yoga are currently equipped with keyboard lights with prices ranging from the mid-range segment or higher. .

Typical Lenovo laptop models equipped with keyboard lights that you can consider when choosing to buy include:

1. Lenovo Ideapad C340.
2. Lenovo Ideapad S540.
3. Lenovo Ideapad 530s.
4. Lenovo Ideapad L340.

How to turn on Lenovo laptop keyboard light with Windows 10

For users using Lenovo Windows 10 laptops equipped with keyboard lights but do not know how to turn them on, please follow the following instructions:

Turn on Lenovo laptop keyboard light with keyboard shortcut

Users can save time and quickly find out how to turn on Lenovo laptop keyboard lights with keyboard shortcuts. To turn on the light, you just need to look at the button with the light on symbol printed on the button row from F1 to F12 and press that button, the light will light up.

Usually on Lenovo models, the manufacturer will print a light-on symbol on the **F3 and F4** buttons . So, you can customize the brightness of the keyboard light by pressing F3 to decrease brightness and F4 to increase brightness or vice versa.

However, not all devices have such fixed settings, so you should observe each device carefully to find the right way to turn on the light. In case there is no light-on symbol printed on the buttons, don't worry. Please refer to the following instructions on how to turn it on using the key combination.

How to turn on Lenovo laptop keyboard light with key combination

Some new generation Lenovo laptops launched on the market recently have a way to turn on the keyboard light with a key combination. The operation to turn on the light is very simple, you just need to press **Fn + Spacebar** and the light will be activated.

In addition, you can also turn on/off the light and adjust the brightness options with the mouse pointer using the Control Panel application on the device.
