

# Instructions on creating fill-in-the-blank exercises on Twee

One of the tools that helps teachers design exercises quickly and creatively is Twee. In particular, fill-in-the-blank exercises not only help students reinforce vocabulary and grammar but also train their reading comprehension and logical thinking skills.

In the teaching process, creating interactive and engaging exercises plays a crucial role in improving students' learning effectiveness. One tool that helps teachers design exercises quickly and creatively is Twee. In particular, fill-in-the-blank exercises not only help students reinforce vocabulary and grammar but also train their reading comprehension and logical thinking skills.

With the help of Twee, teachers can easily create exercises suitable for a variety of topics such as the environment, mental health, or study habits, in just minutes. Below is a guide on how to create fill-in-the-blank exercises on Twee.

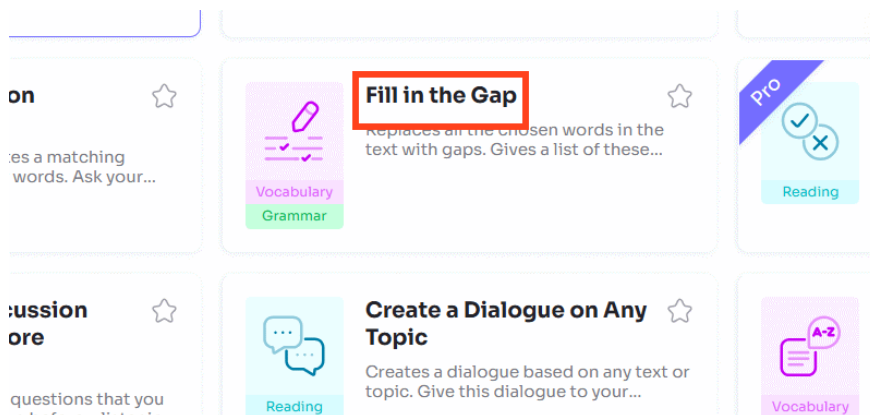

## How to create fill-in-the-blank exercises on Twee

### Step 1:

First, teachers should access the link below and register an account using their Google account.

<https://app.twee.com>

In the main interface of the application, you will see many review activities for both free and paid accounts. We select the **"Fill in the Gap"** activity as shown below.

## Step 2:

Switch to the new interface, where we enter the complete text to adjust some words we want to hide so that students can choose the correct words to fill in the blanks.

remove the gap, click on it once and select "Remove".

In the future, there will be many exciting jobs for children today. Some kids may become doctors who use new machines to help people stay healthy. Others might be teachers who use computers and fun games to help students learn better. There will also be scientists who study space and maybe even travel to other planets! Technology will be very important in future jobs. For example, people may work with robots to build houses, make cars, or clean the environment. Some jobs that exist today may change, and new jobs will appear. That is why it is important for students to learn new skills like problem-solving, teamwork, and creativity. Learning English, science, and computer skills can help children prepare for these future jobs. No matter what job they choose, they should follow their dreams and work hard. The future is full of opportunities, and today's students can become anything they want.

**Do the magic!**

### Step 3:

Next, **click the Create button** in the upper right corner to start creating a fill-in-the-blank activity.

The result will be a fill-in-the-blank paragraph that appears immediately afterward, with hidden words above for students to choose from and drag into the blanks below.

teachers Technology doctors

In the future, there will be many exciting jobs for children today. Some kids may become  who use new machines to help people stay healthy. Others might be  who use computers and fun games to help students learn better. There will also be scientists who study space and maybe even travel to other planets!  will be very important in future jobs. For example, people may work with robots to build houses, make cars, or clean the environment. Some jobs that exist today may change, and new jobs will appear. #### Step 4:

Upon receiving the link, students fill in their name, access the assignment, select the words to fill in the blanks, and submit their work. They will then see their results.

Good job! All gaps are filled

In the future, there will be many exciting jobs for children today. Some kids may become

✗ Technology ✗ doctors who use new machines to help people stay healthy. Others might be

✗ doctors ✗ teachers who use computers and fun games to help students learn better. There

will also be scientists who study space and maybe even travel to other planets!

✗ teachers ✗ Technology will be very important in future jobs. For example, people may work

with robots to build houses, make cars, or clean the environment. Some jobs that exist today may

change, and new jobs will appear. That is why it is important for students to learn new skills like

problem-solving, teamwork, and creativity. Learning English, science, and computer skills can help

children prepare for these future jobs. No matter what job they choose, they should follow their

dreams and work hard. The future is full of opportunities, and today's students can become anything

they want.

Yeah, kinda sad... but no worries, every expert was once a beginner!
