You've heard of iCloud, but what is hidden iCloud? How to check if your iPhone, iPad has hidden iCloud? This article will guide you on how to check iCloud hidden on the device extremely simple.

1. Instructions on how to check hidden iCloud with IMEI code

- Step 1: Find the IMEI code

Before checking hidden iCloud, you need to find the IMEI code on your iPhone, iPad.

Go to your device's Settings, select General> Select About.

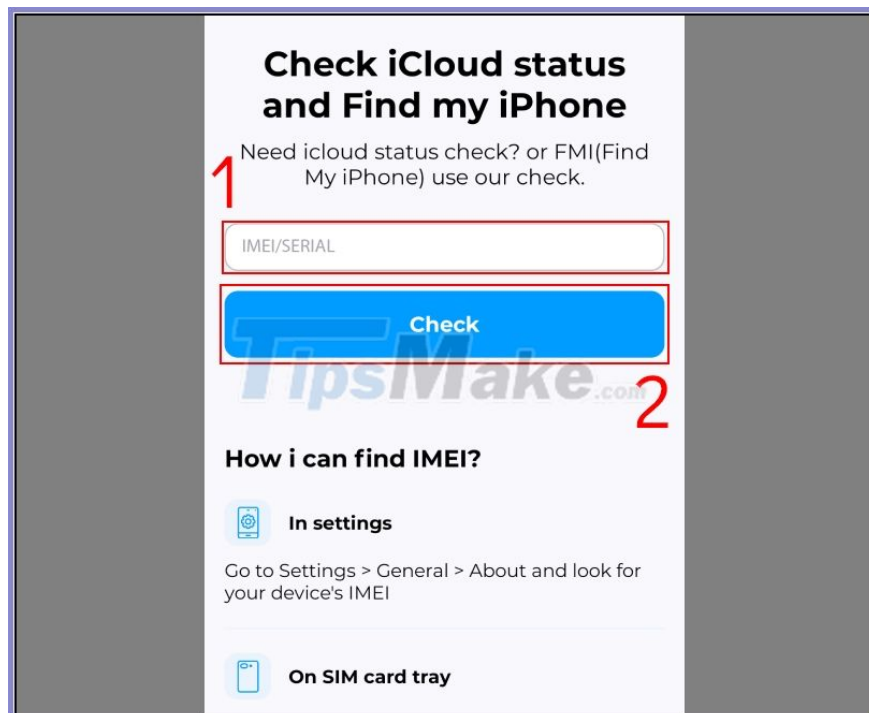

Navigate to the IMEI line to see your IMEI code.

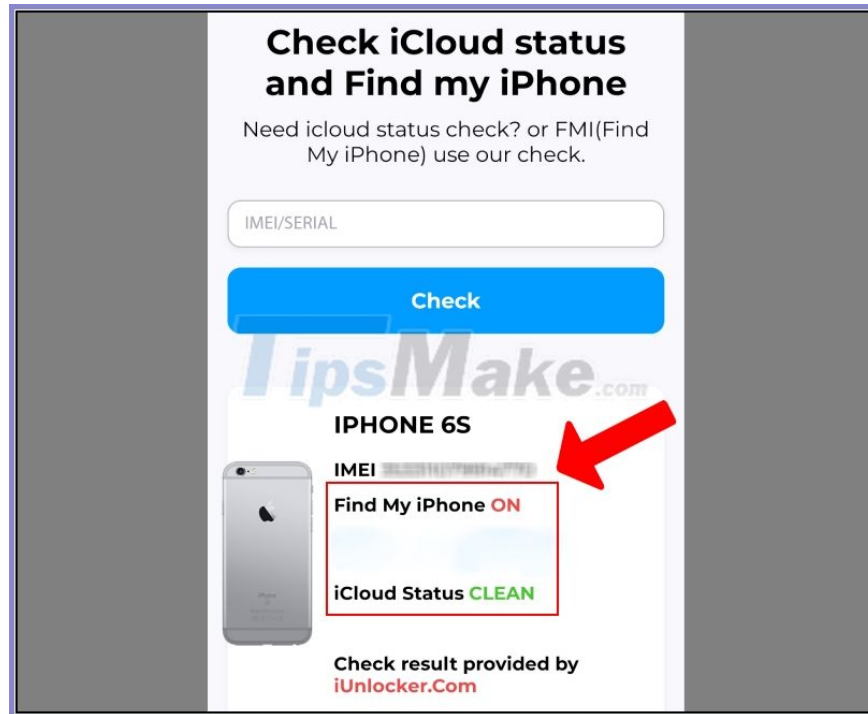

- Step 2: Check iCloud for iPhone, iPad

You go to Check iCloud for Apple devices page [HERE](#)> Enter your device IMEI> Select Check.

Check iCloud status and Find My Device

If the Find My iPhone line shows the On status, your device is hidden iCloud and vice versa.

2. How to check hidden iCloud with a factory reset

Checking out hidden iCloud using a factory reset is one of the easiest.

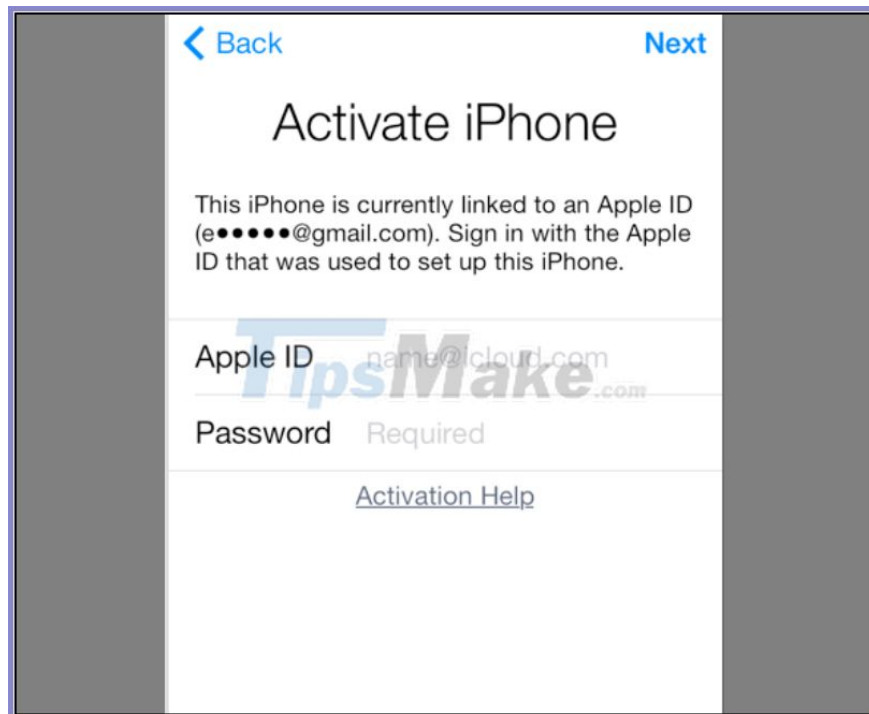

Go to Settings on your device> Select General> Select Reset.

Next, choose to go to Erase all content and settings> Select Delete iPhone.

If the device has iCloud hidden, when it restarts, the activation standby screen will appear until you import into the old iCloud.

This iPhone is already connected to 1 Apple ID
