

Instructions on how to create animations online with the Gickr website

Gickr is a website that helps you create free animations with photos from your computer or use videos from YouTube. In the tutorial below, TipsMake.com shows you how to create animations directly with Gickr.

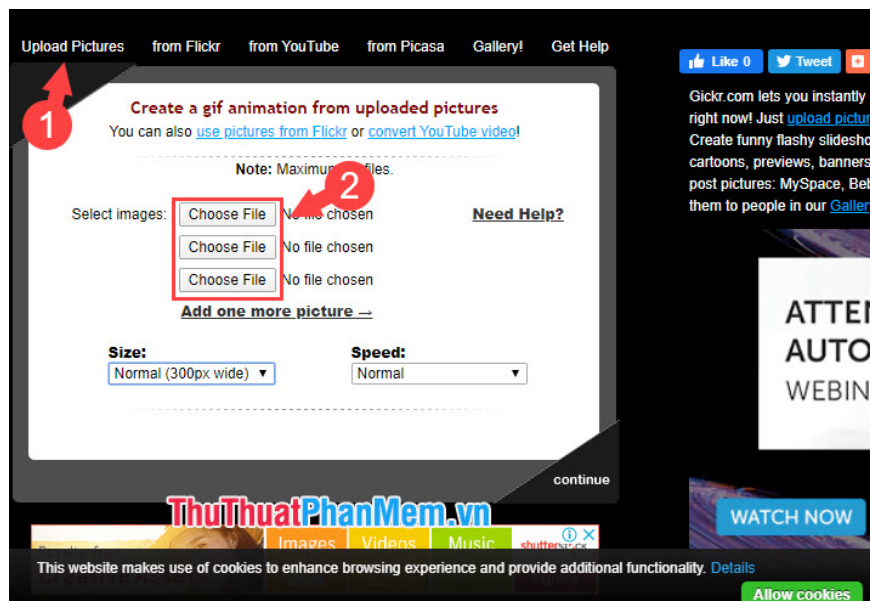

Gickr is a website that helps you create free animations with photos from your computer or use videos from YouTube. In the tutorial below, TipsMake.com shows you how to create animations directly with Gickr.

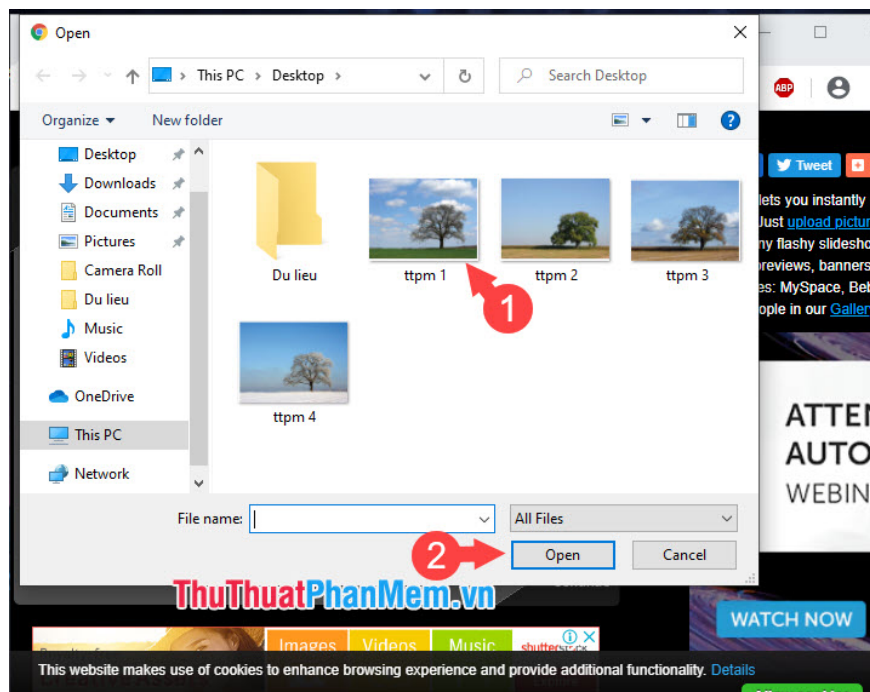

1. Create animations from images with Gickr

Step 1: You access the website <https://gickr.com/>

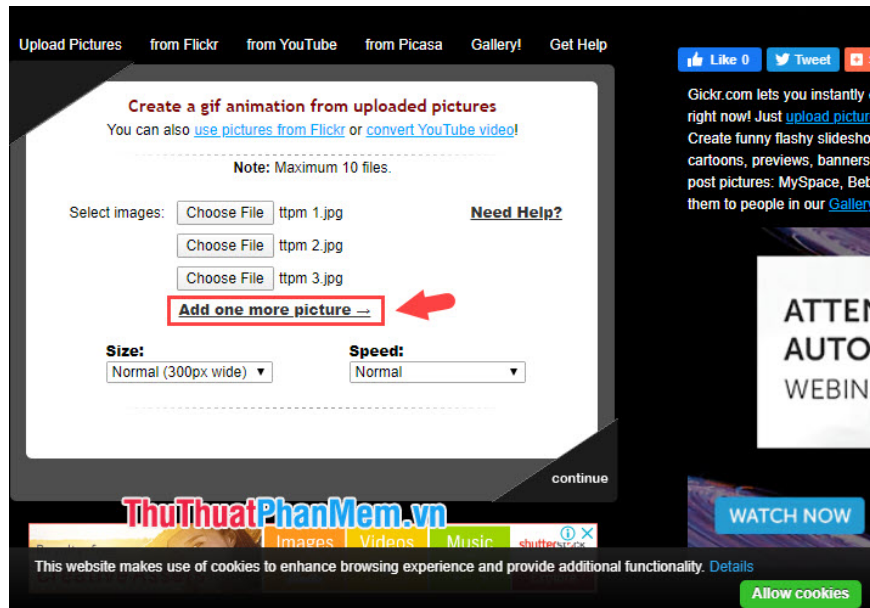

First, click **Upload Pictures (1)** . Next, click **Choose File (2)** to upload the image from the computer.

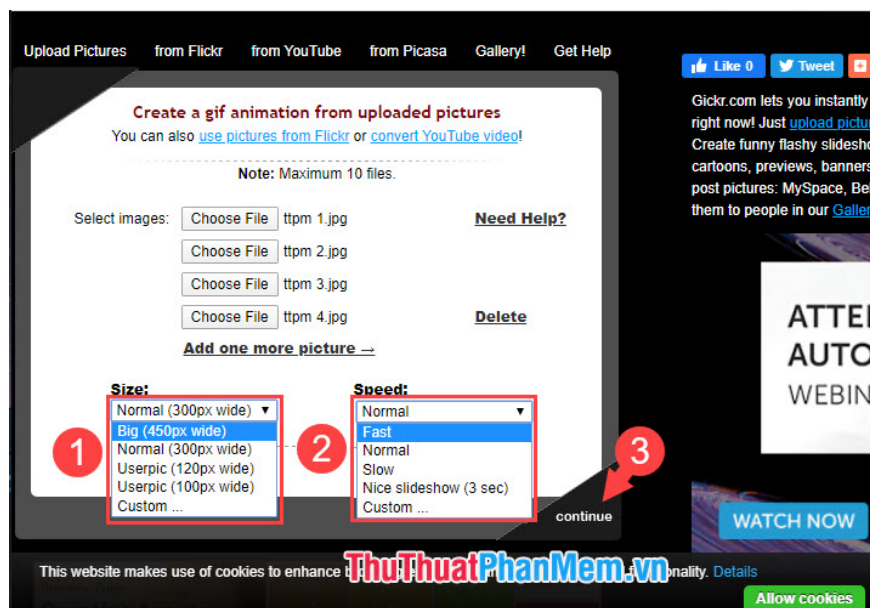

Next, select the image from your computer (1) and click **Open** (2) to upload.

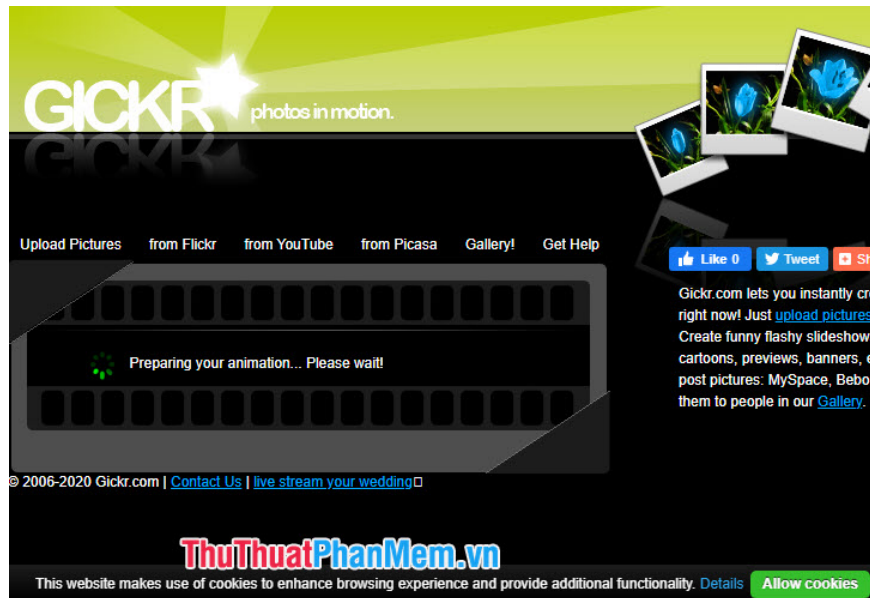

Step 2: If you want to add more pictures, click **Add one more picture** .

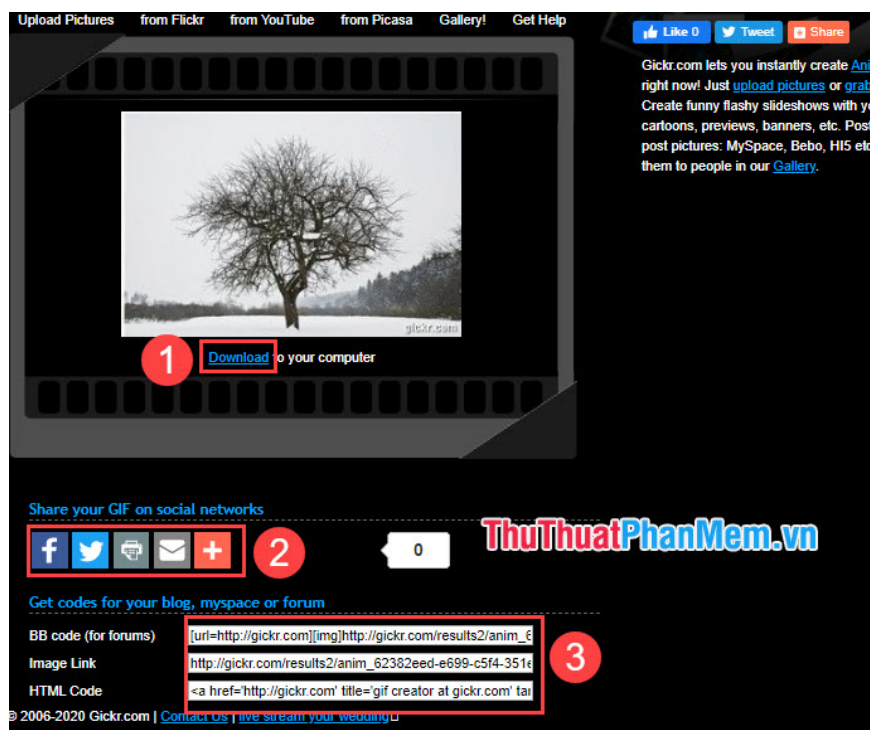

Step 3: Choose the size of the animation in **Size (1)** and transition speed in **Speed (2)** . After selecting it, select **continue (3)** .

Then the animation process will take place. The speed of creation depends on the number of image files you insert and the size of animation you set.

Step 4: Once completed, we can download the image already. Click **Download (1)** at the bottom of the image to download to your device. Animations created by Gickr will be tagged with a small logo in the bottom right corner of the image. In addition, you can choose to share photos on social networks **(2)** or copy the link **(3)** to share photos with friends.

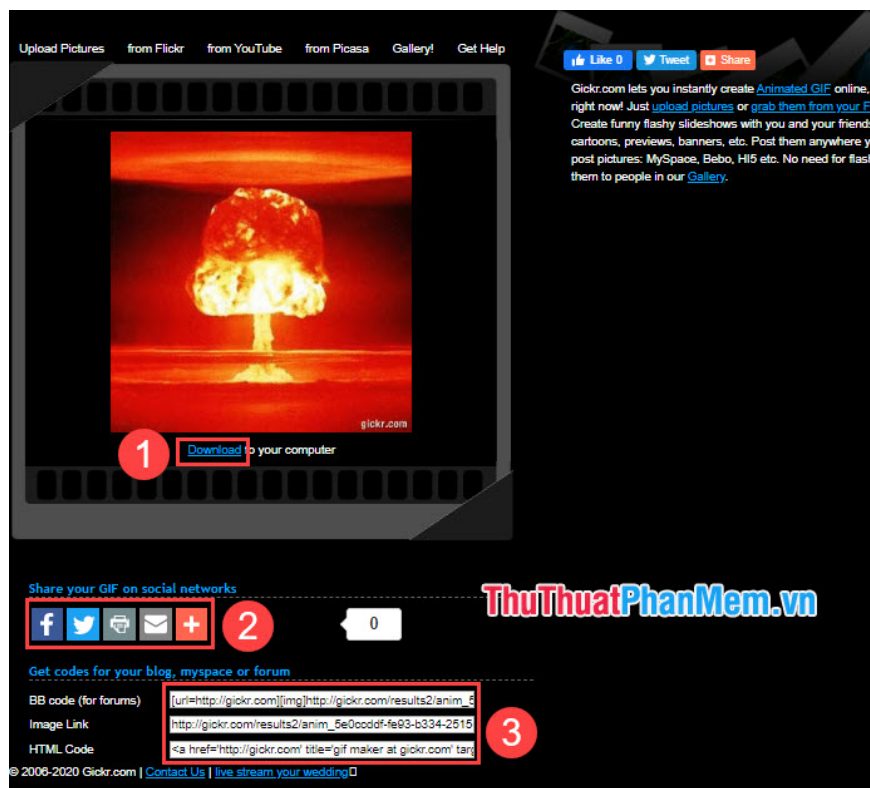

2. Create animations from youtube videos

Creating animations from videos on youtube is simpler, but you should choose videos that are moderately longer and smaller than 3 minutes. Proceed as follows:

Step 1: Click on from Youtube (1) and paste the Youtube video link in the **Youtube link** (2) section . Next, you select the frame rate of the animation in the **Number of frames** (3) and select the size of the image in **Size** (4) . After choosing, click **Continue** (5) to save the settings.

Step 2: After that, the image creation process will take place and the speed is fast or slow depending on the video length and image quality you have set. After the animation creation is complete, click the **Download** button (1) at the bottom to download it to your computer. In addition, you can share photos on social networks (2) or copy the link (3) to send to friends.

By creating photos with Gickr, you can create ordinary still photos into beautiful animations through a few simple steps. Good luck!
