

Instructions on how to cut MP3 without software

You love an MP3 song and want to cut it into a ringtone but don't know how to do it? Instead of downloading the software to cut the music, you should refer to how to cut MP3 without using the software below!

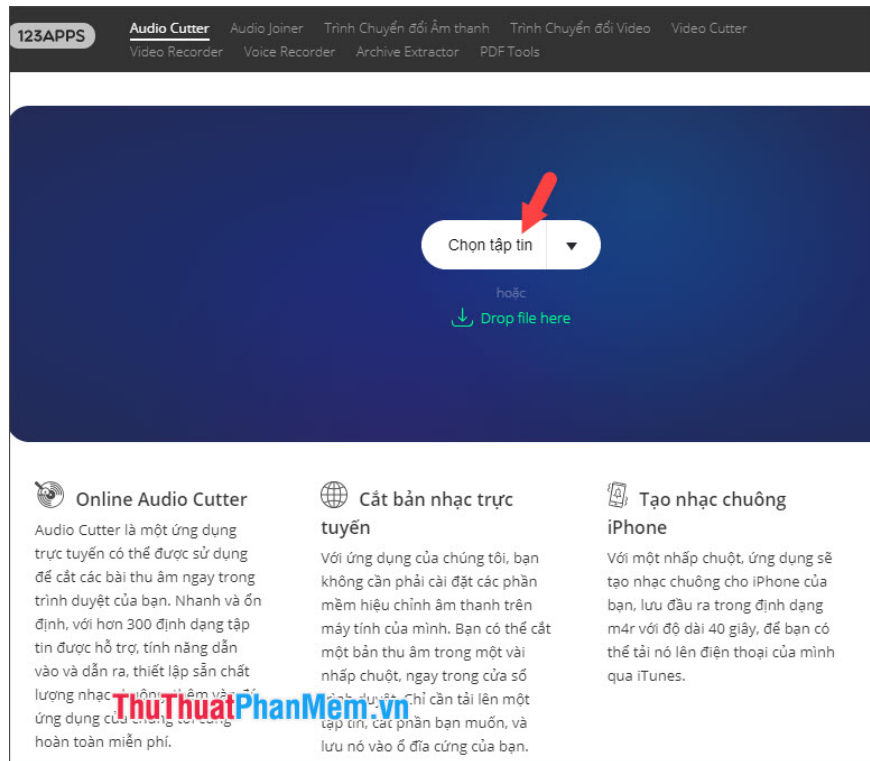

You love an MP3 song and want to cut it into a ringtone but don't know how to do it? Instead of downloading the software to cut the music, you should refer to how to cut MP3 without using the software below!

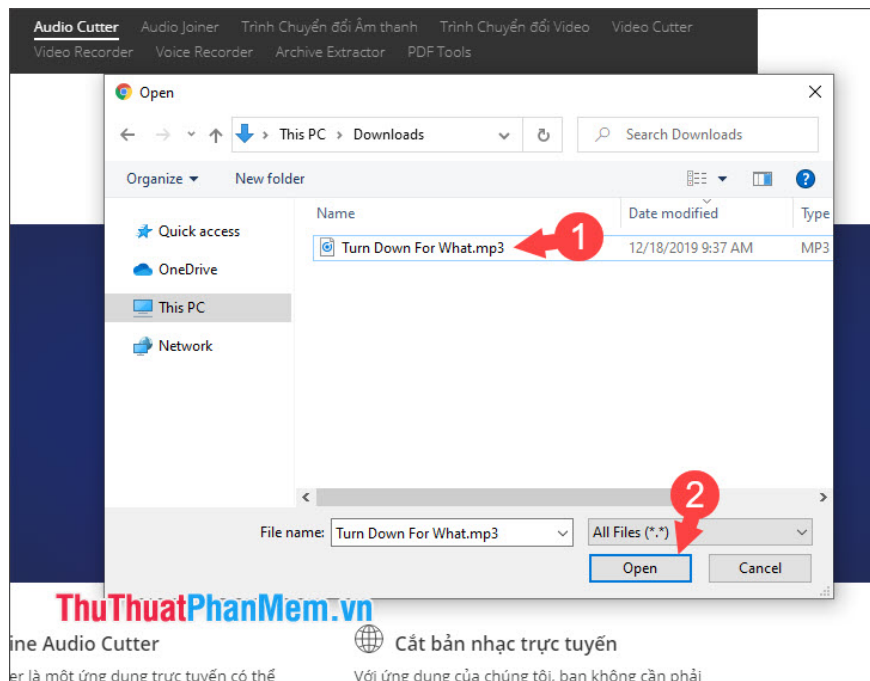

1. Cut MP3 music online on Mp3Cut

Step 1: You access the website <https://mp3cut.net/en/>

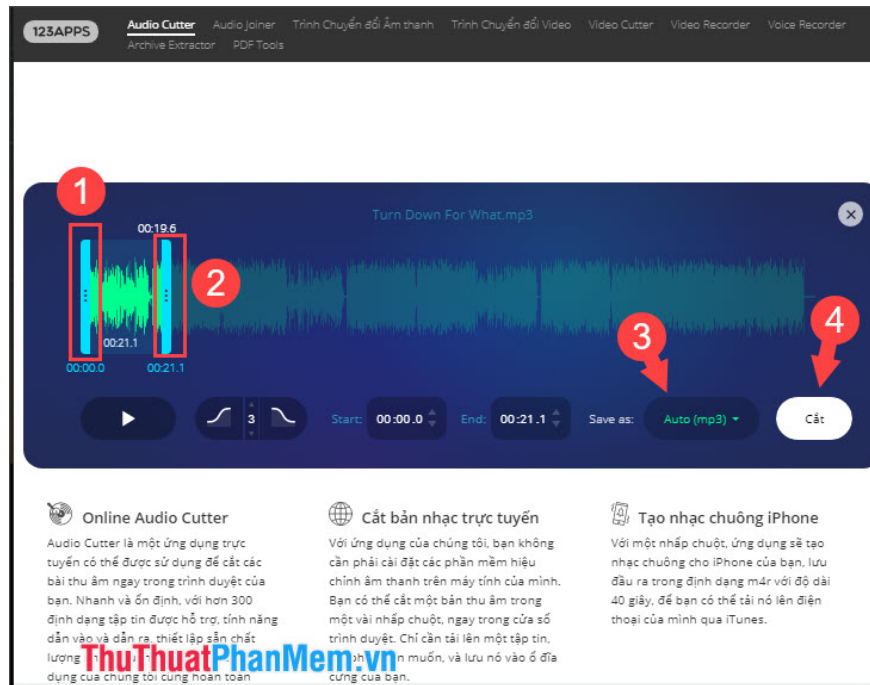

On the interface of the home page, click on **Select file** to open the MP3 music file from the computer.

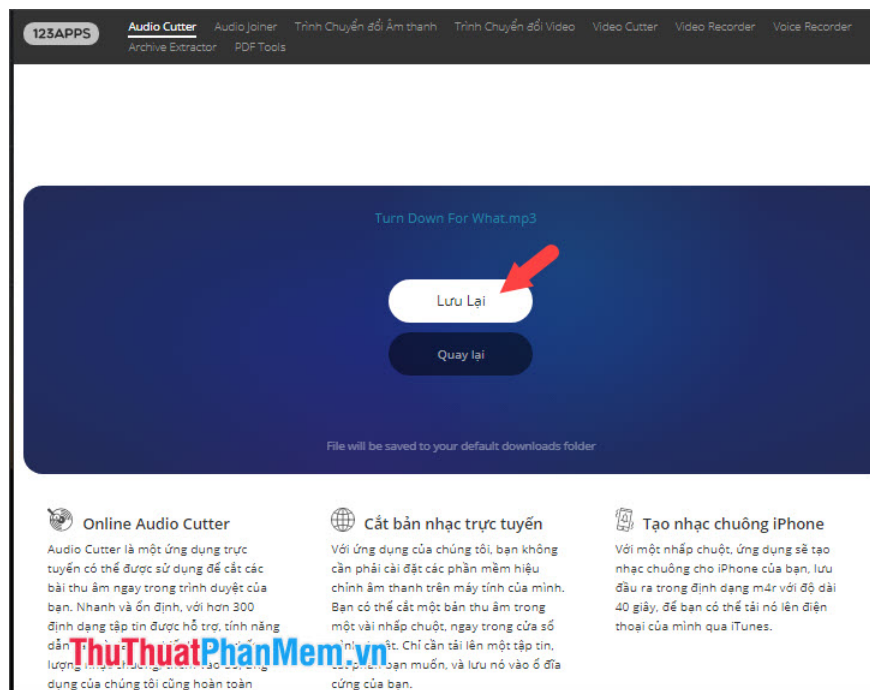

Step 2: Open the folder, select the song to cut (1) and click **Open** (2) to start uploading to the website.

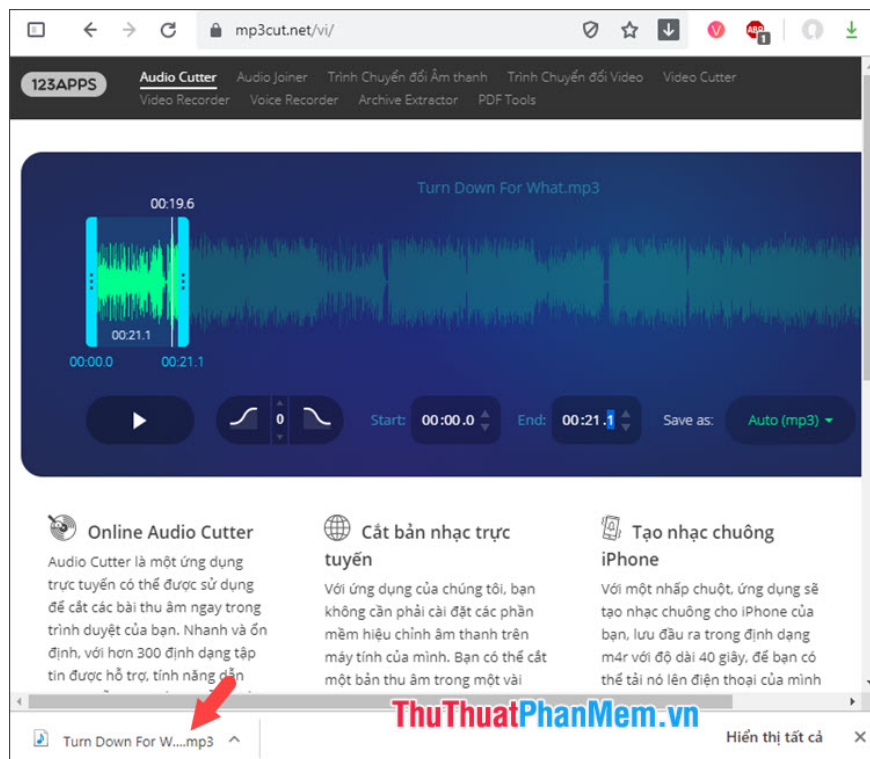

Step 3: You select the music to be cut by setting two points (1) and (2) in that piece. After selecting, click **Save as** (3) to change to another music format if needed. To finish, click **Cut** (4) to cut the music.

Step 4: After cutting, you click **Save** to finish.

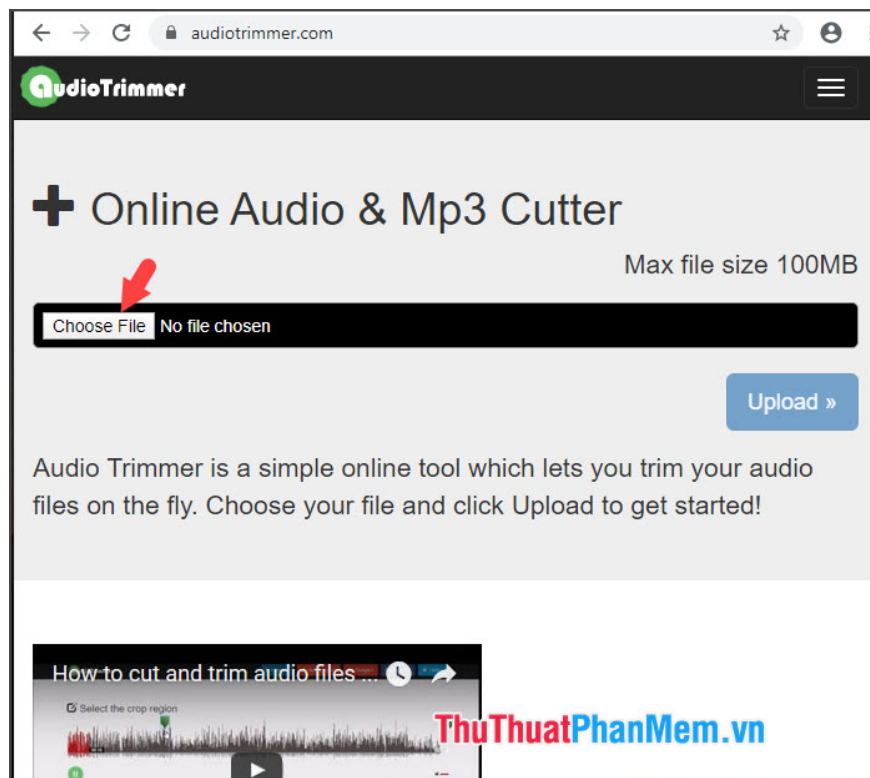

Step 5: The song will automatically download to your computer. To quickly open the cut song, please click on the song in the download section as shown below.

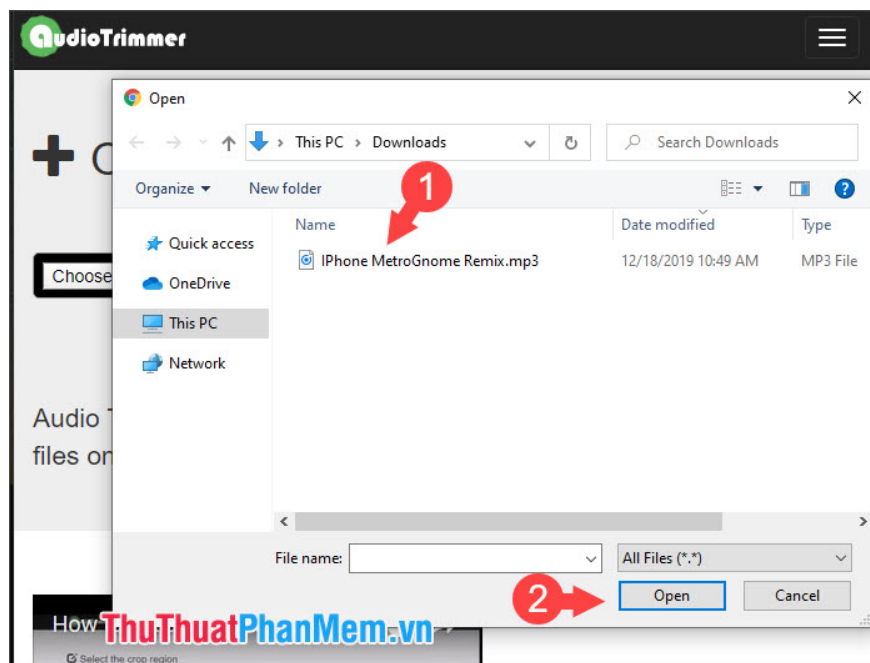

2. Cut MP3 music without software with AudioTrimmer

Step 1: You access the website <https://audiotrimmer.com/>

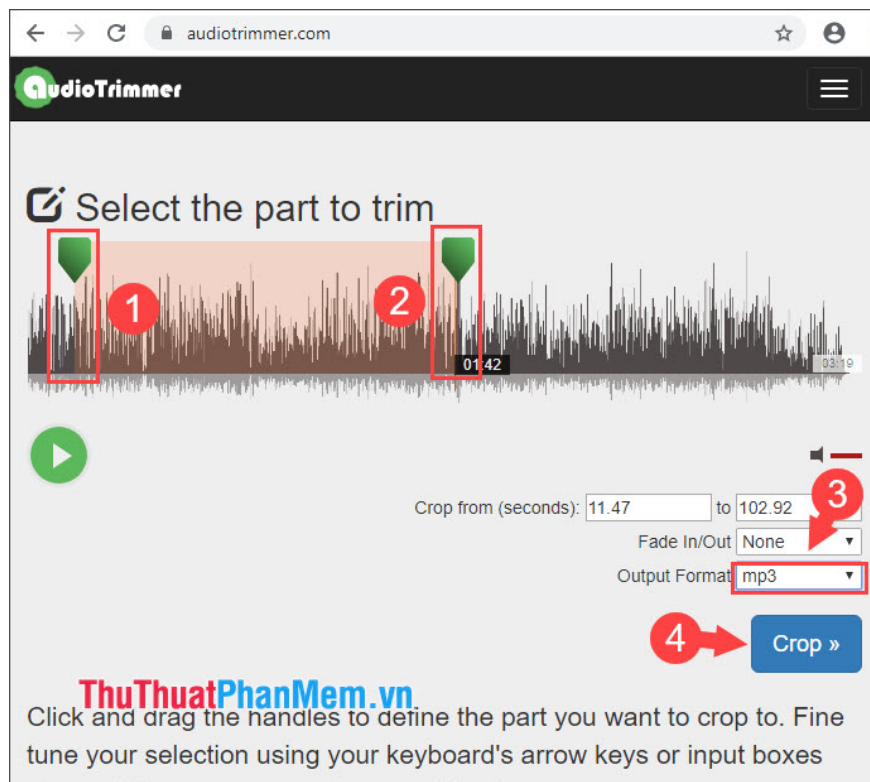

Next, click on **Choose File** to upload music files from your computer.

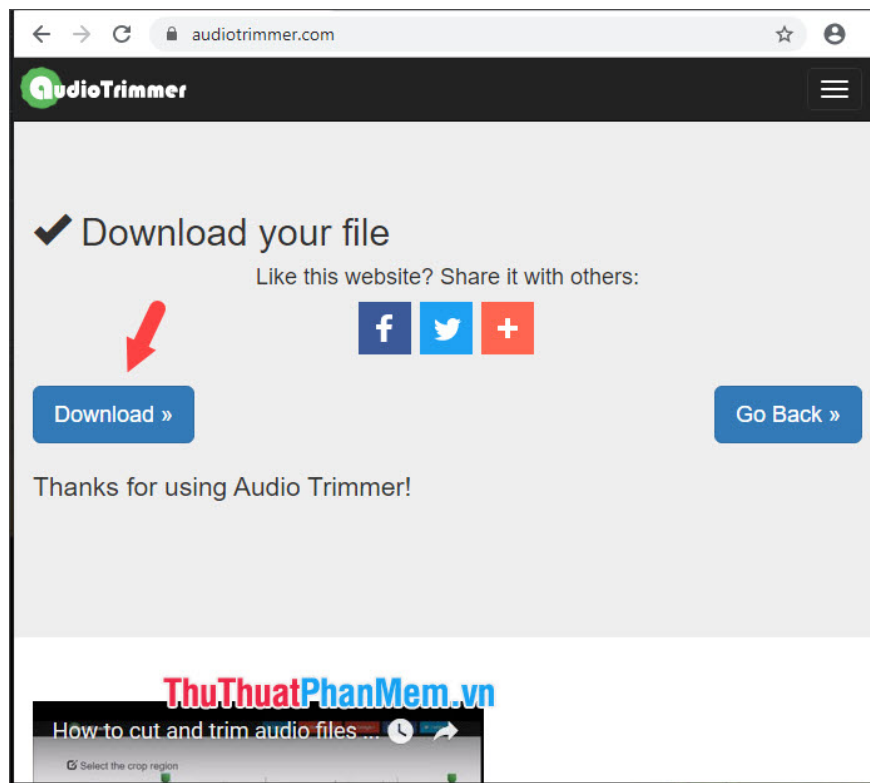

Step 2: Select the music file to cut (1) and click **Open** (2) to proceed to upload the file.

Step 3: You set the beginning (1) and the end (2) of the music to cut. If we want to use the music to be cut as a ringtone for iOS devices (iPhone, iPad, iPod .), then choose the **.m4r** format in **Output format** (3) . After selecting, click **Crop** (4) to cut the piece.

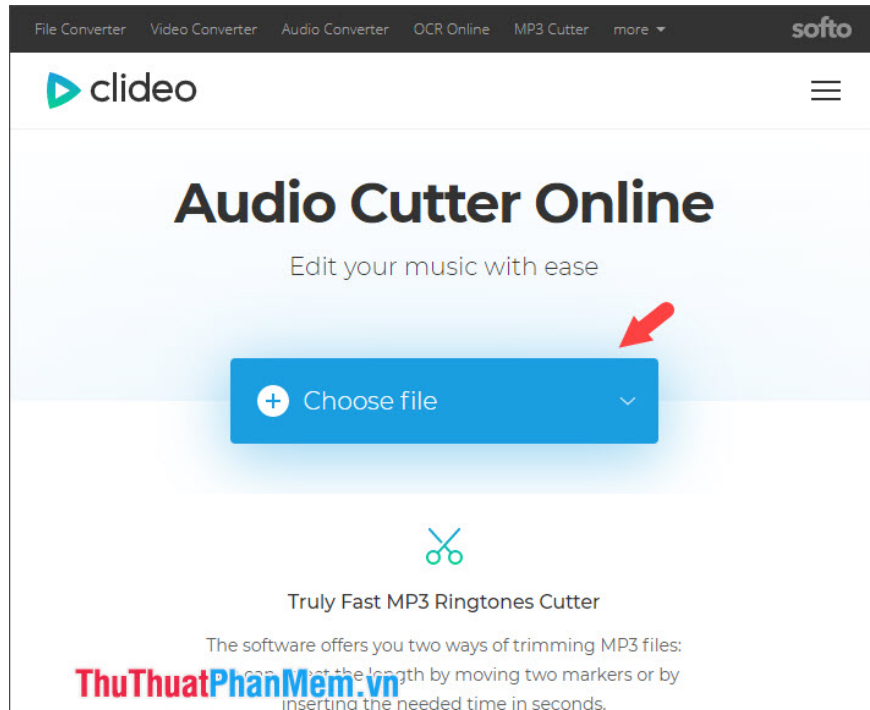

Step 4: After the cutting process is completed, click **Download** .

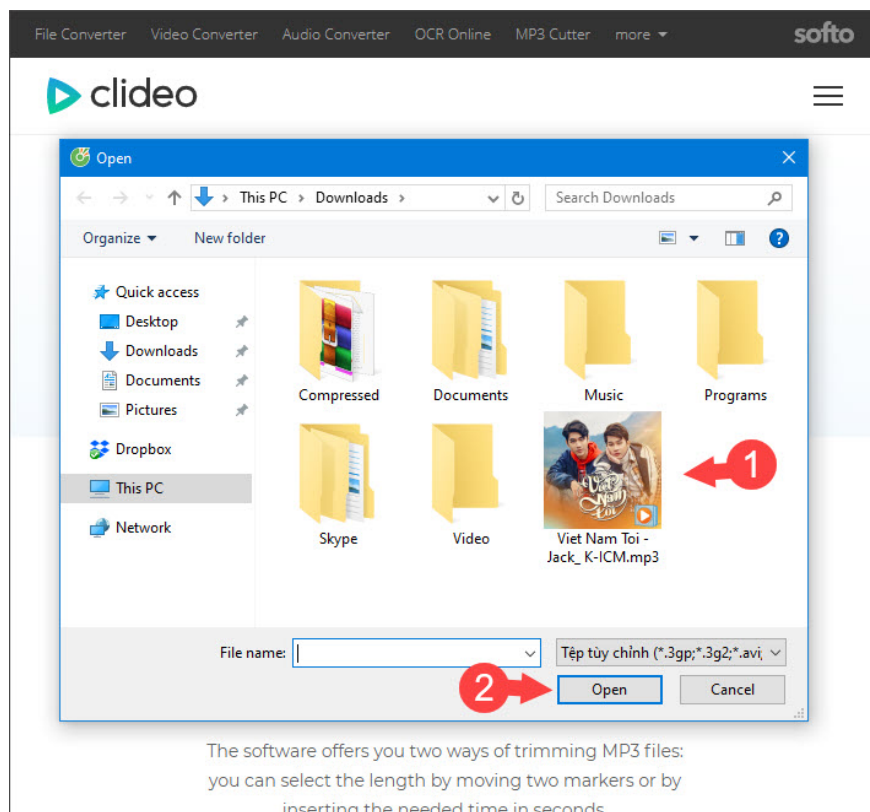

3. Cut MP3 music online with Clideo

Step 1: You visit the website <https://clideo.com/cut-audio>

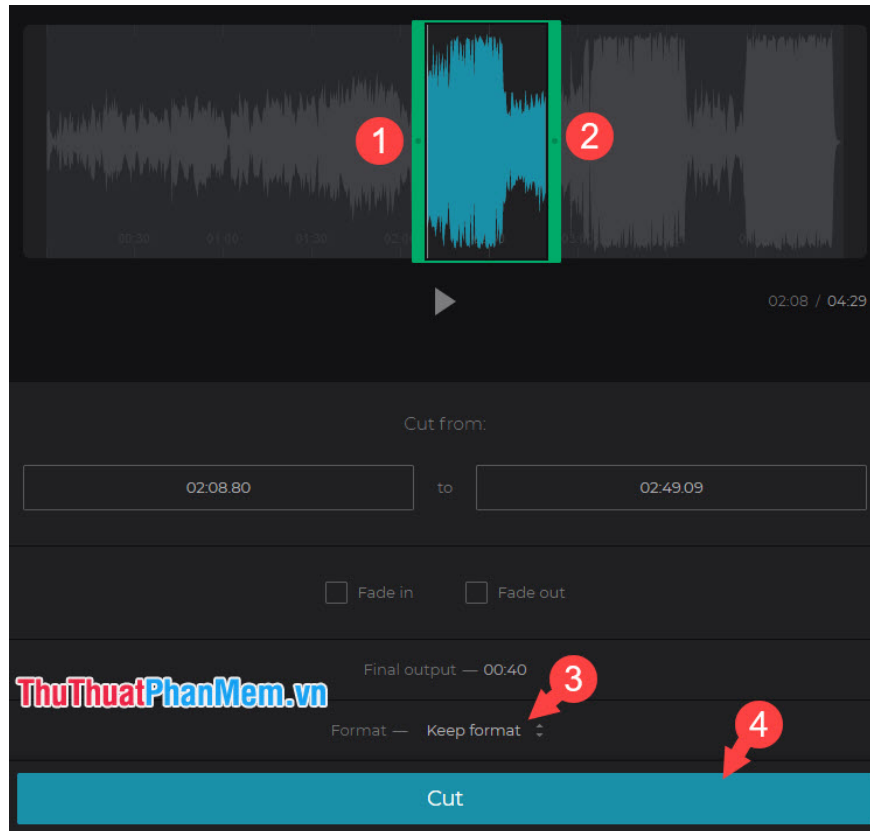

On the home page, click **Choose file** .

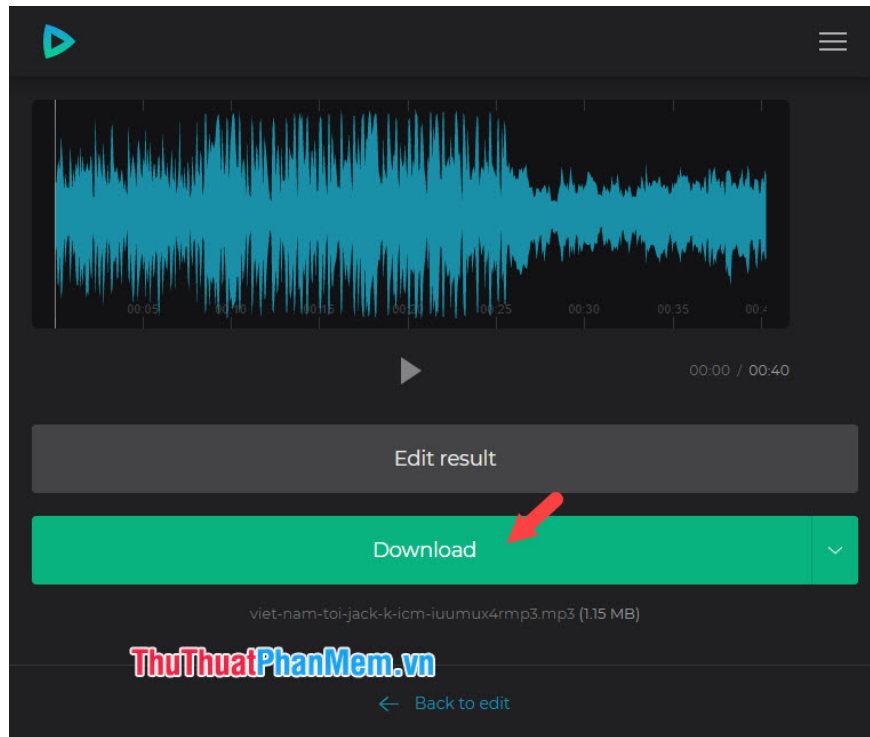

Step 2: Select the music file to be cut at the computer (1) and click **Open** (2) to proceed to upload the file.

Step 3: You set the music area to cut by setting the beginning **(1)** and the end **(2)** for the song. Section **Format** **(3)** allows you to change the music format after cutting, if you do not need to change then you need to set the **Keep format** . To finish, click on **Cut** **(4)** to start cutting music.

Step 4: Before downloading, you can click the triangle button **(Play)** to listen to it, if you do not like it, click **Edit** to edit it. If you are satisfied with the cut music, click the **Download** button to download it to your computer.

Through the two tutorials presented in the article, we can easily cut our favorite music without having to install complicated software on the computer, just need to connect to the Internet and the browser.
