

Instructions on how to cut photos as you like in Photoshop

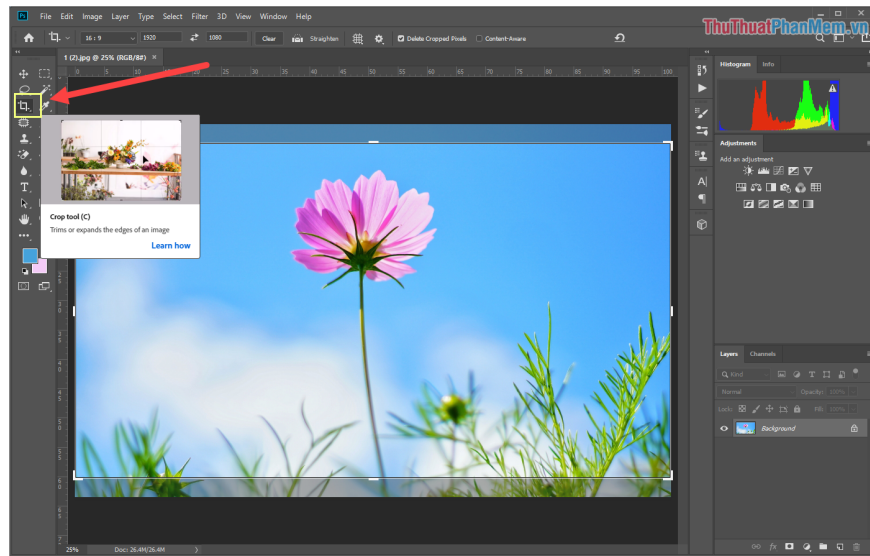

In this article, Software Tips will guide you how to crop images as you like in Photoshop. 1. Cut the image perpendicularly as you like Step 1: You proceed to open the image you want to crop and select the Crop tool (C key) to use.

In this article, Software Tips will guide you how to crop images as you like in Photoshop.

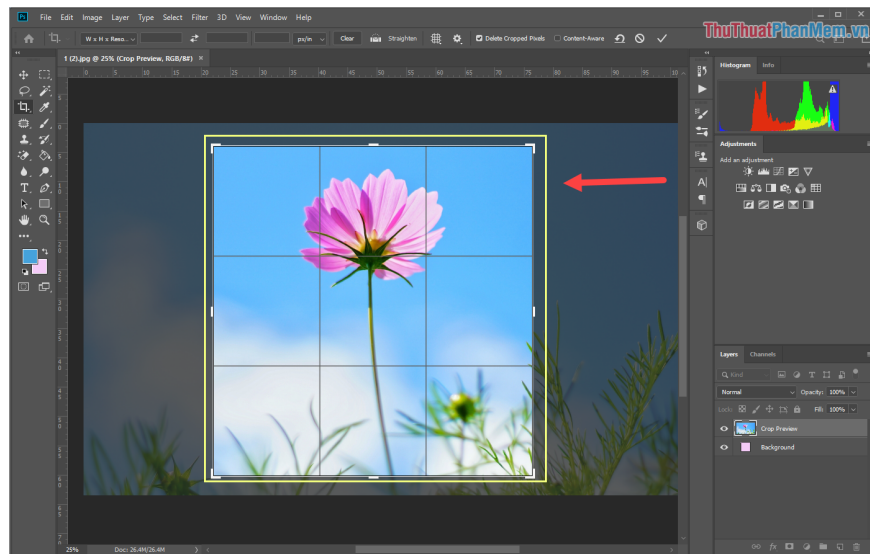

1. Crop the image perpendicular to your liking

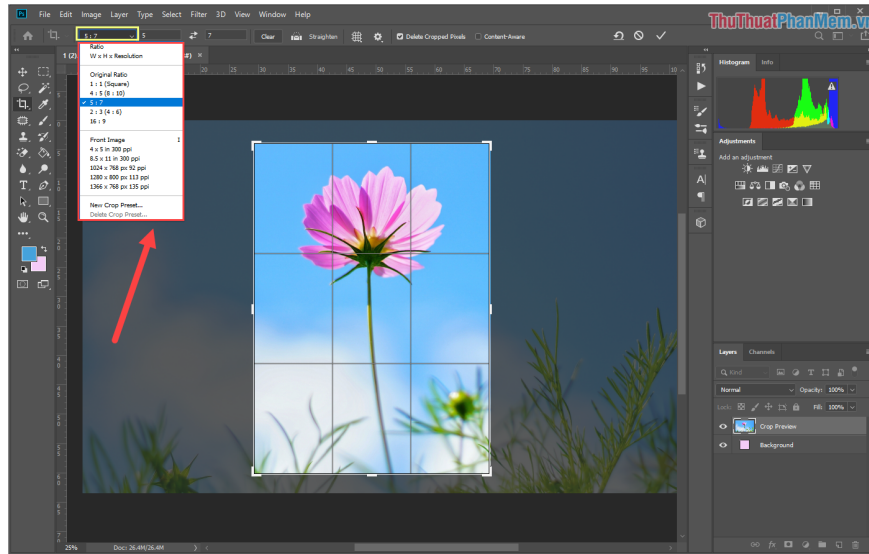

Step 1: You proceed to open the image you want to cut and select the **Crop** tool (**C key**) to use.

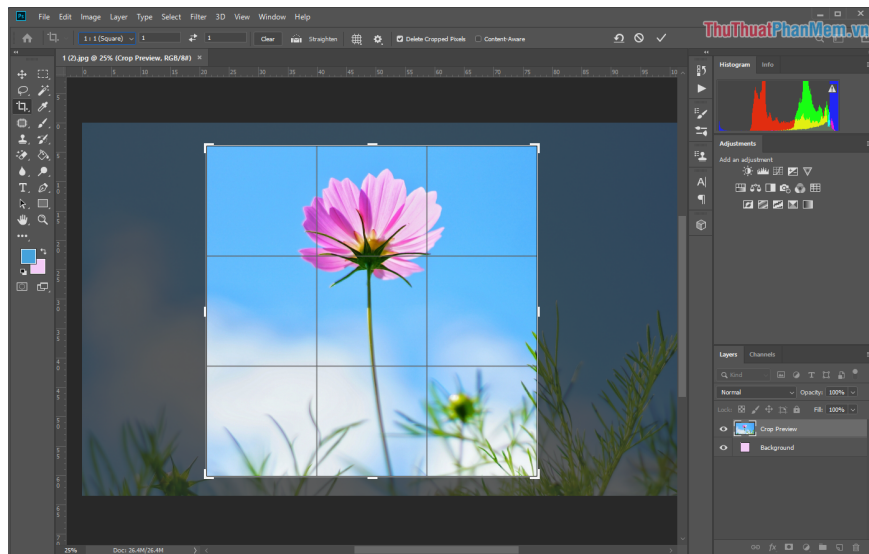

Step 2: Then, you proceed to Click on the anchor points on the image to select the part of the image you want to cut.

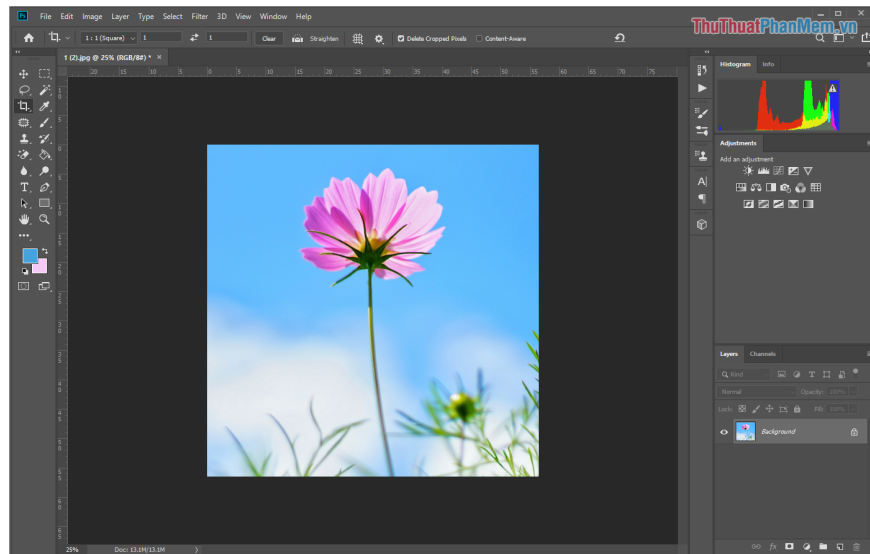

If you want to cut to the common ratio such as: 1: 1 (square), 16: 9 (rectangle), . then you should set the ratio on the toolbar. By default, your cut will be proportional, you can only adjust the size, big and small.

Step 3: After selecting the image area you need to cut, press **Enter** to Photoshop to cut the image.

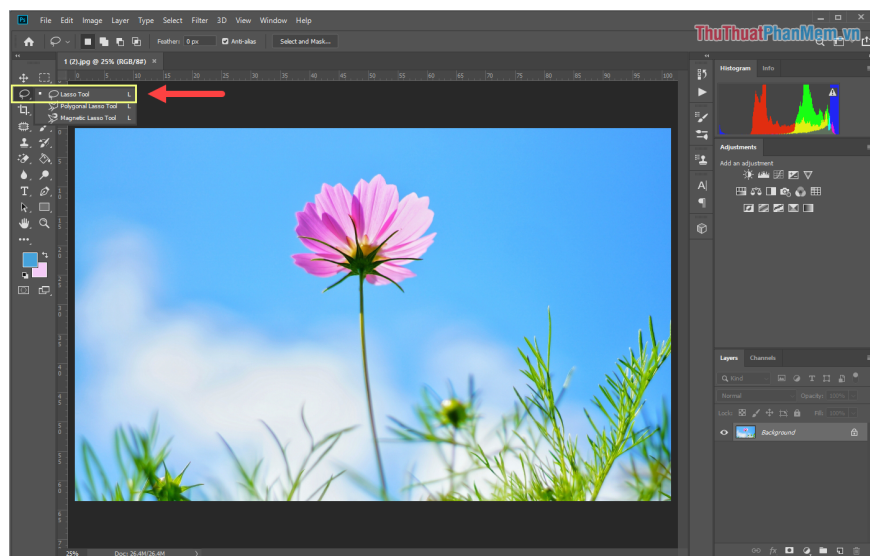

And here is our result after the image is cut.

2. Cut images freely as you like

In Photoshop, besides cutting perpendicularly, you can also cut to your freehand stroke.

Step 1: Open the image you want to cut, then select the **Lasso Tool (L)** to use.

Step 2: At this point, your mouse cursor has moved to the **Lasso Tool** icon .

You press and hold the mouse button to move to select an area of the image you want to crop.

After selecting the image area, you release the mouse button so that Photoshop automatically selects the area.

Note: The end of the selection must be connected to the beginning of the selection into a closed loop.

Step 3: After obtaining a selection to crop the image, press **Ctrl + C (Copy)** and click **New Layer** to create a new layer.

Step 4: You proceed to select **Layer 1** (the newly created layer) and press **Ctrl + V (Paste)** to paste the newly cut image.

Step 5: Finally, you turn off the Eye of the **Background Layer** is done, you have cropped your image as you like.

In this article, Software Tips showed you how to cut images as you like using Photoshop software. Good luck!
