

Instructions on how to cut youtube video easiest, download in a moment

- Cutting and downloading videos on Youtube is much easier than you think.

Many people use YouTube but don't know how to download or cut videos to their devices. Few people know that only thanks to the service of direct clip is able to cut videos on Youtube in just a few simple steps.

What is ClipConverter?

If there is a need to trim a video clip on YouTube, users can use ClipConverter to quickly perform the desired operation with just a few steps.

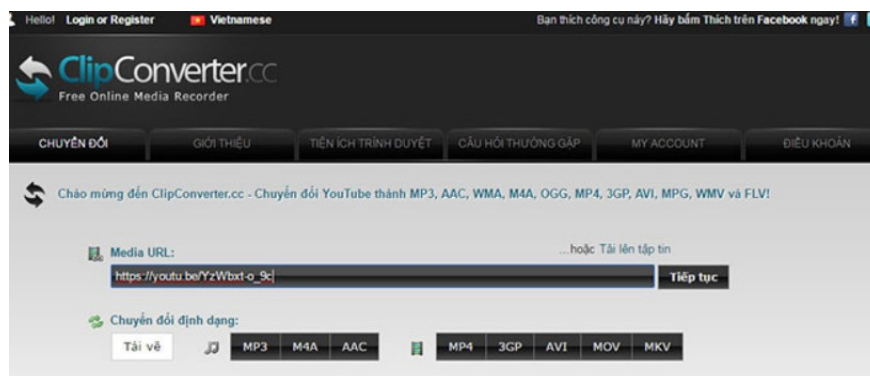

ClipConverter is an online media format converter that allows users to convert audio from any Video URL to popular formats. Currently supporting services: Direct download, YouTube (HQ and HD), Google Video, Sevenload, MySpace, YouTube (HQ), Vimeo (HQ), Metacafe, MyVideo, Youporn, Pornhub, Veoh. Free and fast converter, which allows you to watch your favorite YouTube videos on your mobile phone, PSP, iPhone or any other device.

The advantage of this service is not only in quick and easy operation, but also supports users to choose music format and video quality before deciding to download.

How to cut clips on Youtube with ClipConverter

To cut a clip on the clip with ClipConverter, users need to follow the simple steps below.

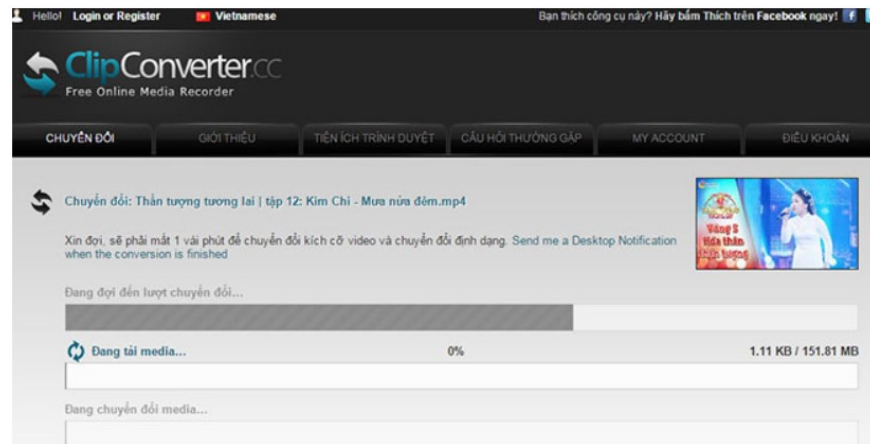

B1: Visit ClipConverter's official website at www.clipconverter.cc.

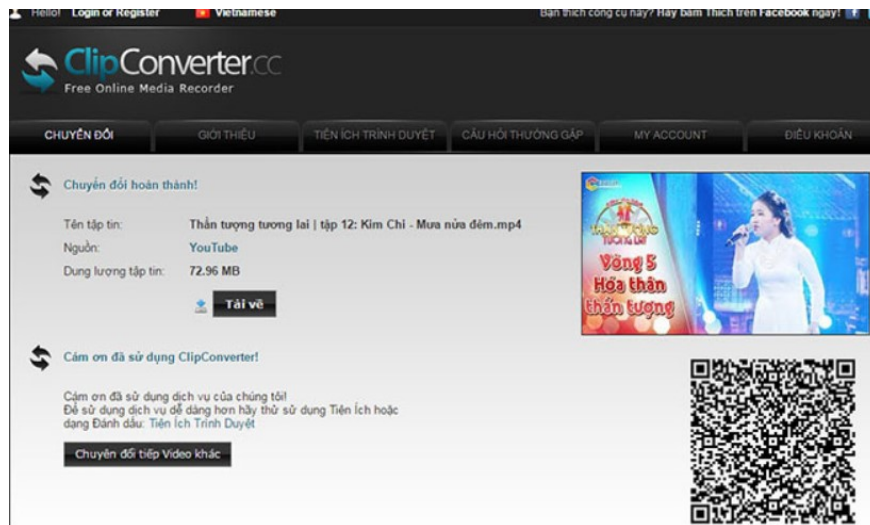

B2: Copy the video URL YouTube wants to cut and paste into the text box next to Media URL. If you have downloaded the video to your computer, ClipConverter also supports users to upload that video to the service to perform the conversion.

B3: Click the Continue button next to the text box to upload YouTube Videos to the tool, then confirm the video quality and the file name you want to download. In the Format conversion section, select the video format to download.

B4: Perform video cut by unchecking the 'From the beginning of Video' and 'To the end of Video' to start cutting video in the period that you want to start and end. After finishing entering the start and end time, click the Start button. The video will then be cut as required, and when finished, the tool will take you to the next page, where the Download button is located. Click on it to download the video to your device. Cropped YouTube videos will be downloaded in the specified format.

In addition to ClipConverter, users can also use other web tools, but ClipConverter is a rare tool that allows users to download cropped videos without any difficulty.
