League of Legends is currently the most popular and crowded online game today in Vietnam as well as in the world. If you are new to this game and want to install the game and try it out, in this article TipsMake.com will guide you in detail the steps to download and install League of Legends from A to Z. Please join examination.

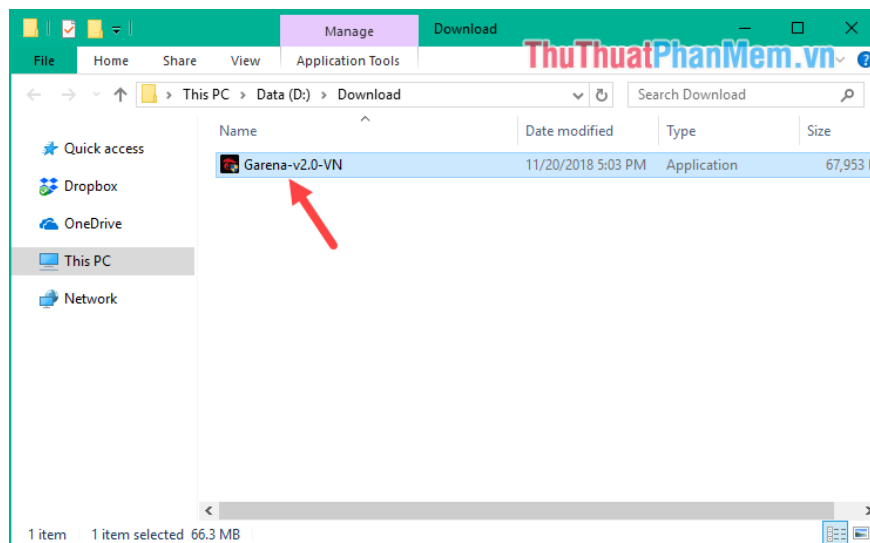

**Step 1** : You access the link to download the game from the homepage below:

<https://taigame.lienminh.garena.vn/#/>

At the interface of the website you choose **Download with Garena**.

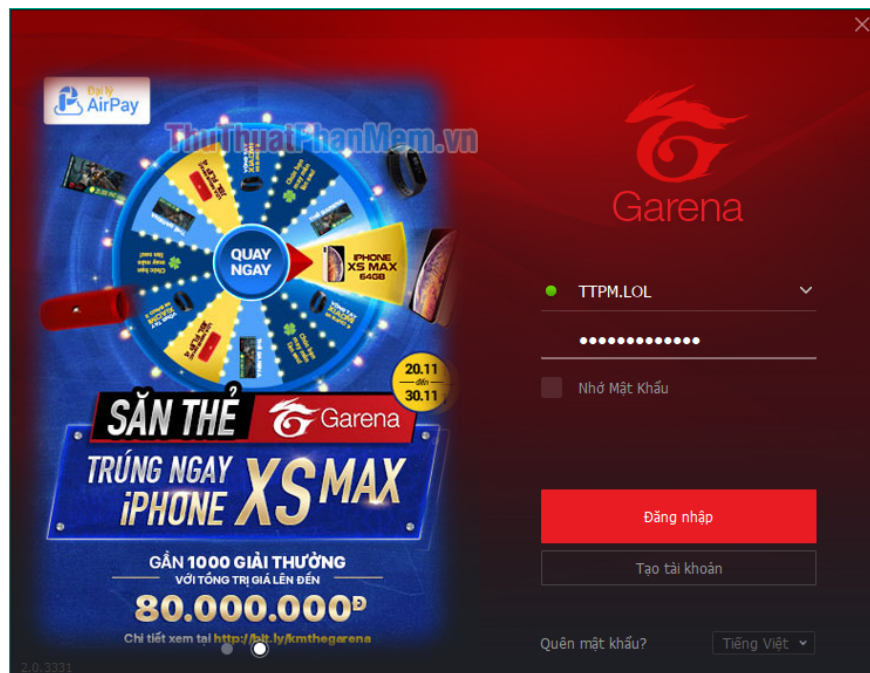

**Step 2 :** Download, double-click the file to install **Garena**

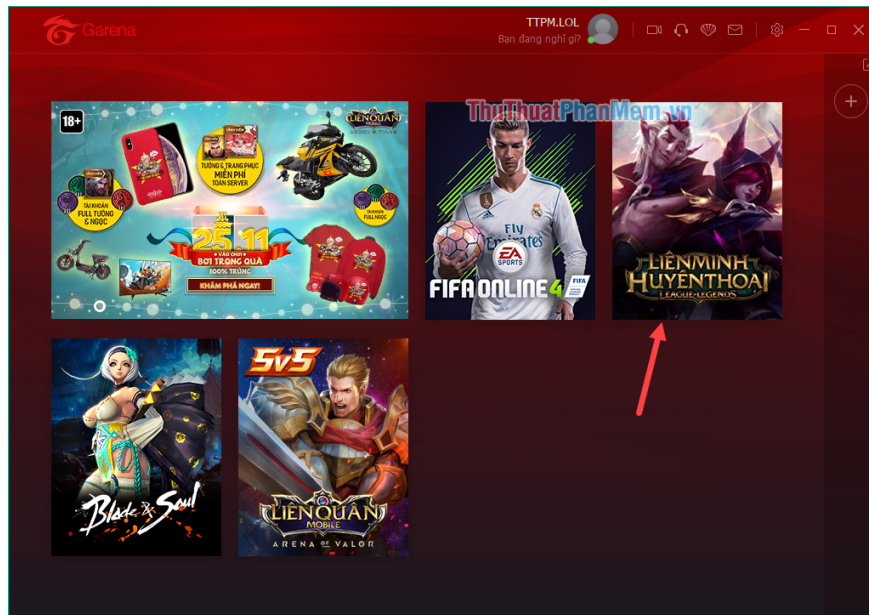

In the installation window you select Accept terms and then click **Install**

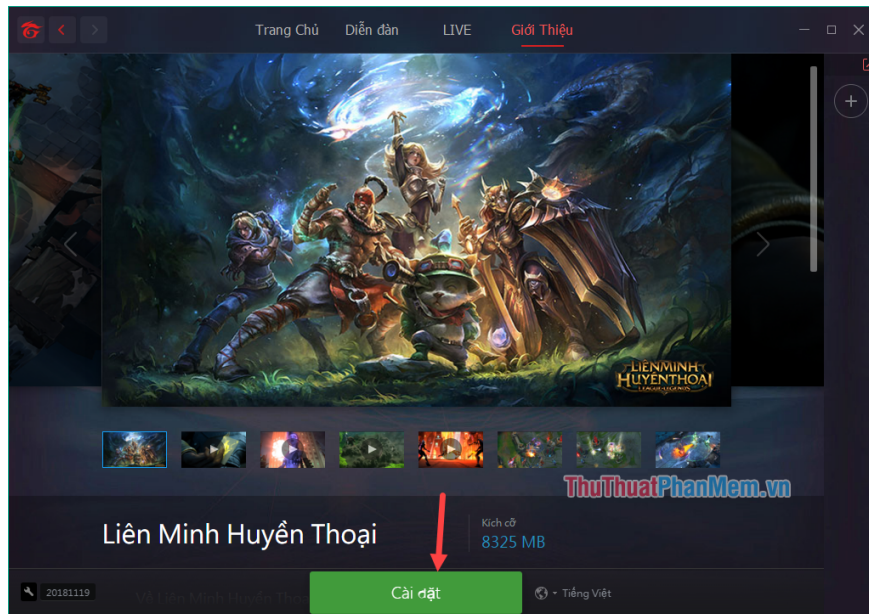

**Step 3 :** After the installation is complete you need to login to your Garena account, if you do not already have a Garena account you can see how to register here:

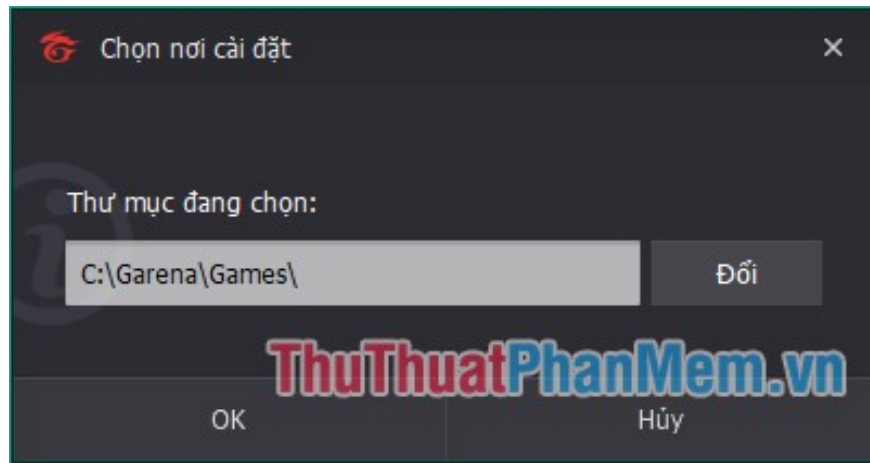

**Step 4:** Login finished in a new window you choose to play **League of Legends** game

**Step 5 :** In this window, click the **Install** button to install the Game

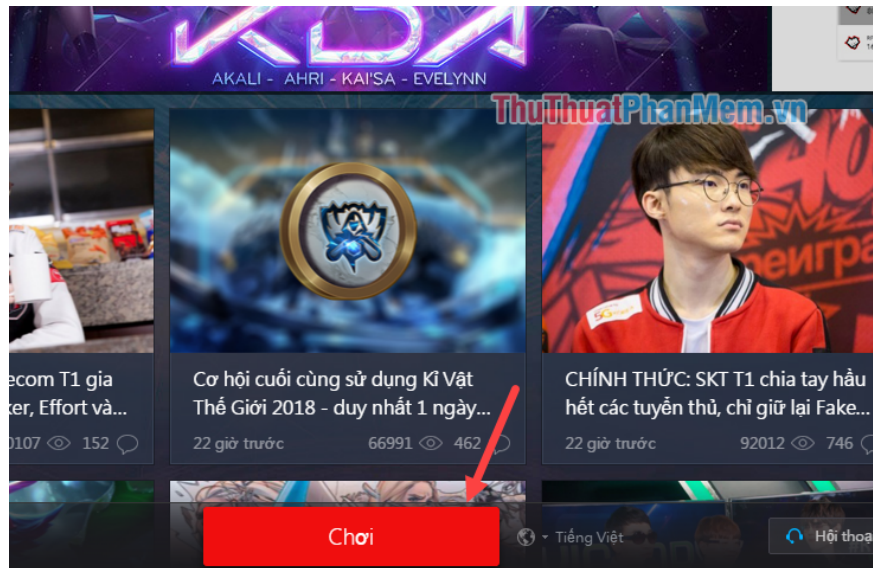

A small window appears, if you want to save the game to another folder, click Change and select a folder to save the game. If not leave the default and click OK.

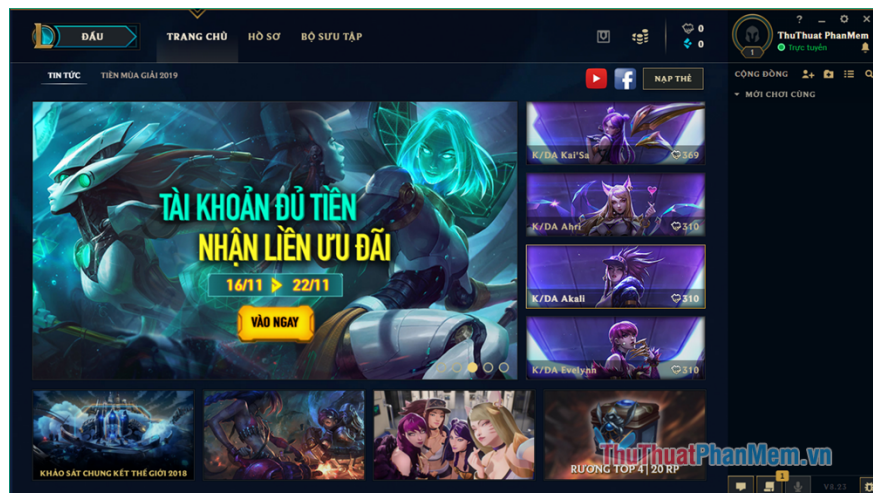

Now our job is to wait for the game to download, the game is quite heavy so it will take time to download, please be patient:

After the game has finished loading, press the **Play** button to start the game.

And here is the Client interface of League of Legends:
