

Instructions on how to download videos on Tiktok without watermark

- If you want to download the video on Tiktok but do not want the video to display the logo of the application, follow the instructions below.

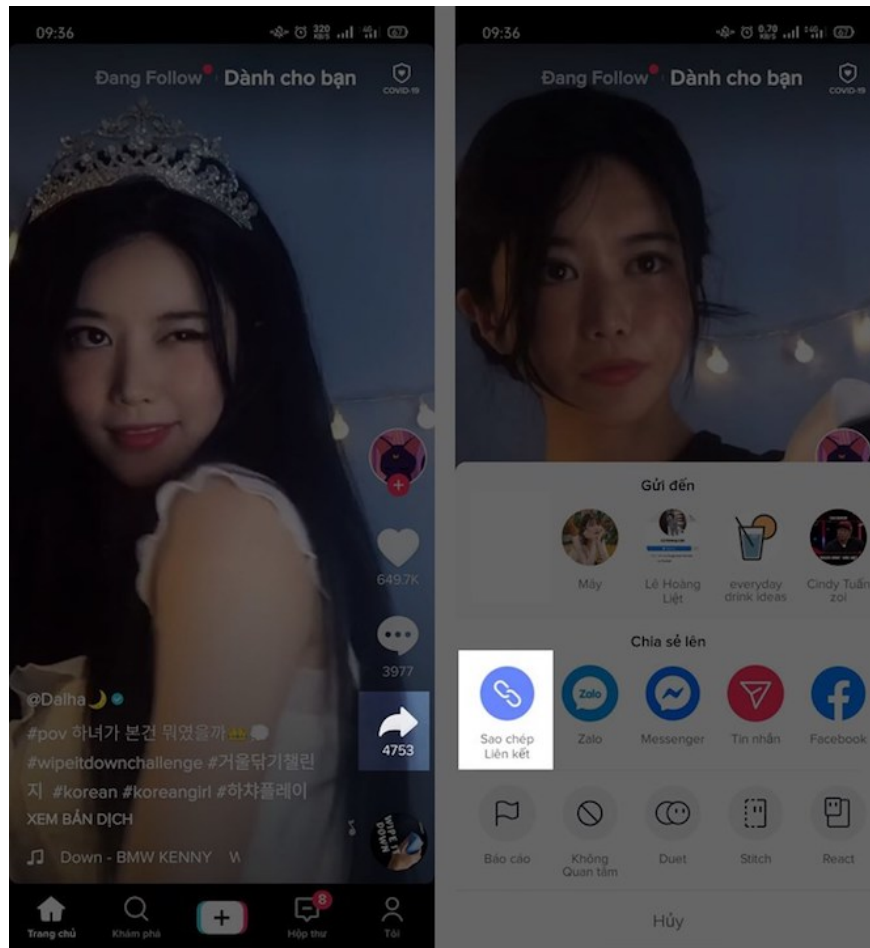

It's not too difficult for you to download videos on Tiktok to your device. However, these videos often have a watermark (logo) of the Tiktok app. If you do not want the video to include a watermark then follow the instructions below.

1, The application to download videos Tiktok does not stick watermark

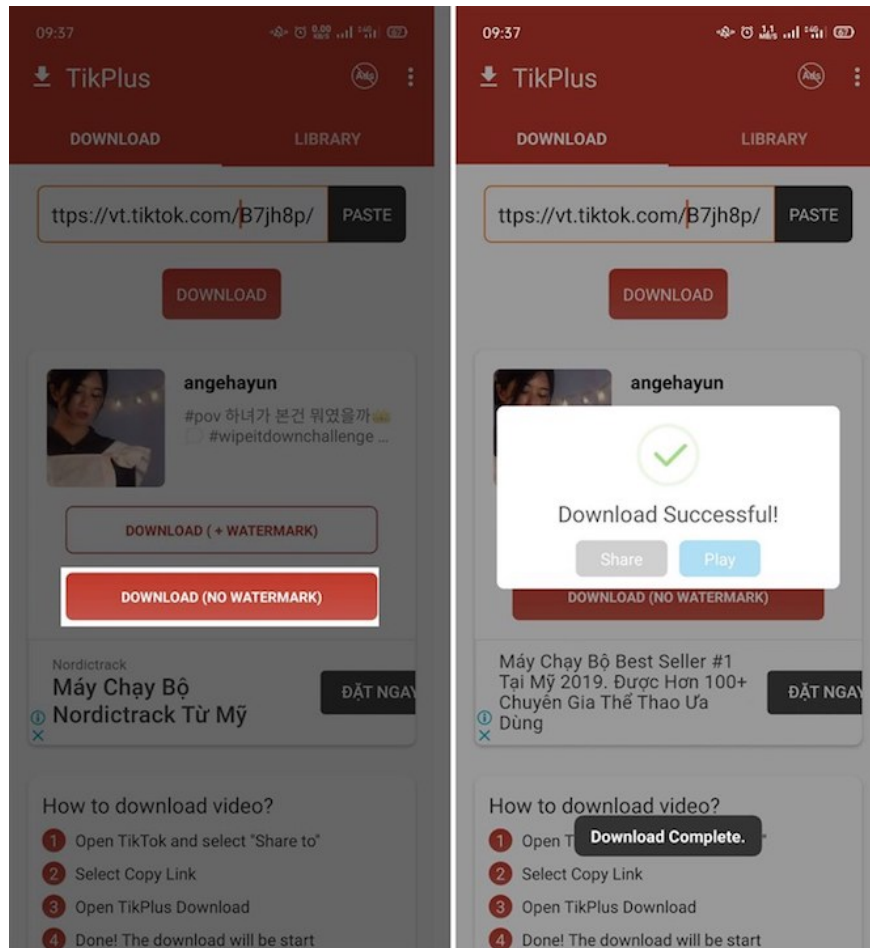

To download videos on Tiktok without the first watermark, you need to install the TikPlus Downloader (Android) application by following the link below.

[TikPlus Downloader here](#)

Next, go to the Tiktok application and open the video you want to download, click the share button to copy the link.

You open the TikPlus Downloader application, the application will automatically paste the link you just copied into it, just click download and select the download without watermark. Now the application will ask you to see a small ad.

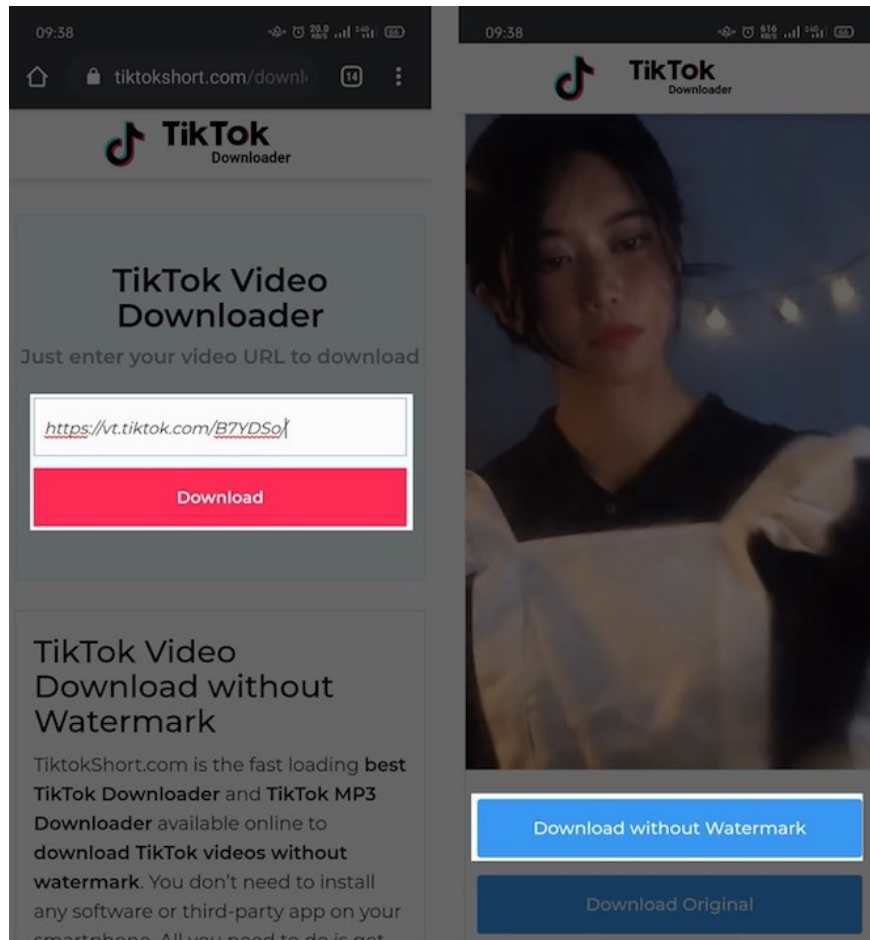

So I have finished guide you how to download videos on Tiktok without watermark. In case you do not want to install the application, there is another way. Please refer to part 2 offline.

2, How to download Tiktok videos directly on the web

The second way is similar to the way 1 above. First, copy the video link you want to download as in step 1.

Then you visit the website here and paste the video link to download into it. Remember to select the video download item without watermark to perform offline.

Now, wait for the video download to finish. It's simple, right.

Tips: If you are looking for cheap TikTok followers, there shouldn't be any place on the web that's better than here!
