

Instructions on how to fix a computer screen that is rotated upside down.

What should you do if your computer screen is rotated upside down, meaning everything displayed is turned 180 degrees, making it impossible to use your computer?

The problem of a computer screen being rotated or inverted is very common in families with young children who often play with the computer, or simply when colleagues or friends tease you. While the inverted screen issue isn't difficult to fix, many people don't know how to handle it. TipsMake guarantees that you won't need more than a minute to remember how to fix this problem.

Computer screen is rotated incorrectly.

Guide to fixing a computer screen that is rotated upside down.

1. The simplest way to fix a computer screen that is rotated upside down.

There's a simple way to fix an inverted computer screen, and it works most effectively on Windows 7, 8, and 10: using keyboard shortcuts. TipsMake recommends memorizing them because they're really easy to use.

>> If your computer screen is rotated 180 degrees or 90 degrees to the left or right, try the following keyboard shortcuts (feel free to experiment; adjust if needed).

- Keyboard shortcut **Ctrl + Alt + Up Arrow** : Landscape mode (normal)
- Keyboard shortcut **Ctrl + Alt + Down Arrow** : Landscape mode (flipped), which is also the problem of the computer screen being rotated inverted as described in our article.

- Keyboard shortcut **Ctrl + Alt + Left Arrow** : Portrait mode.
- Keyboard shortcut **Ctrl + Alt + Right Arrow** : Portrait mode (flipped).

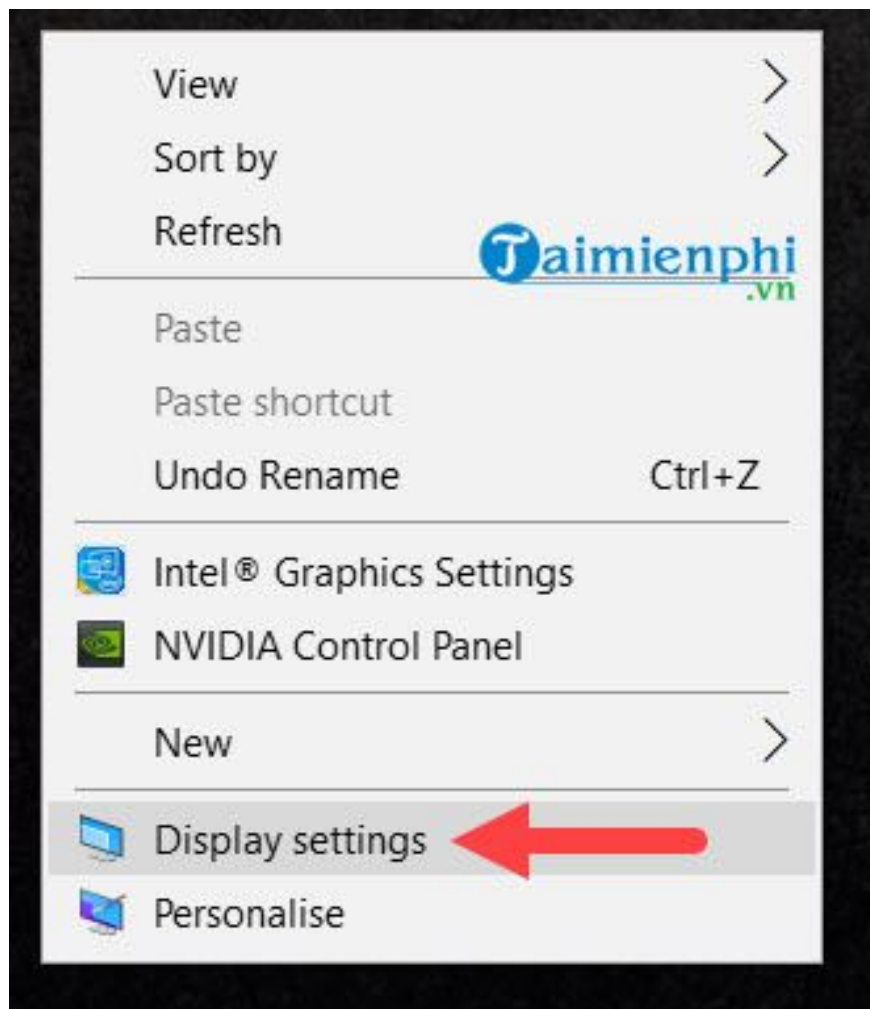

2. Fixing the inverted computer screen issue on Windows 10

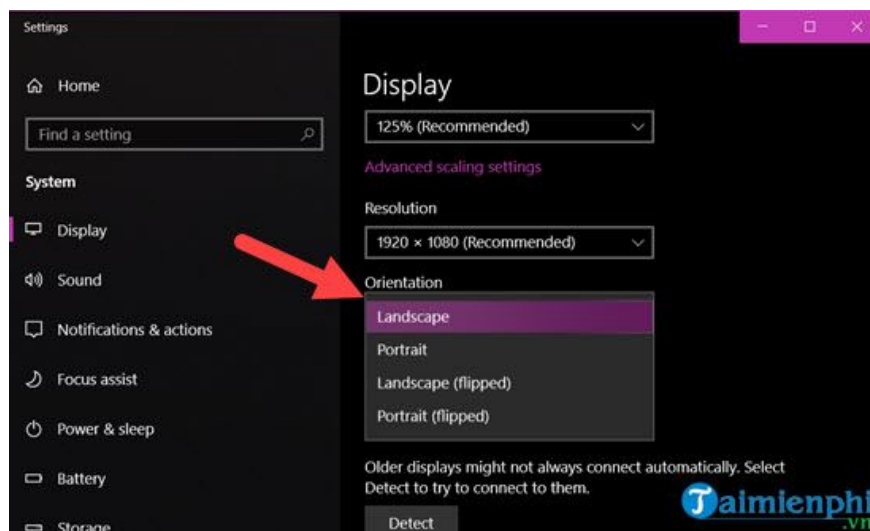

The method above is a quick way to fix a reversed computer screen, but the method above for Windows 10 is different. You might not need this method because the one above is sufficient, but it's still important to know.

Step 1: If you encounter an inverted screen issue on Windows 10, right-click on the desktop and select **Display Settings** .

Note: If you have many open windows on your desktop, press the **Windows + D** key combination to minimize them.

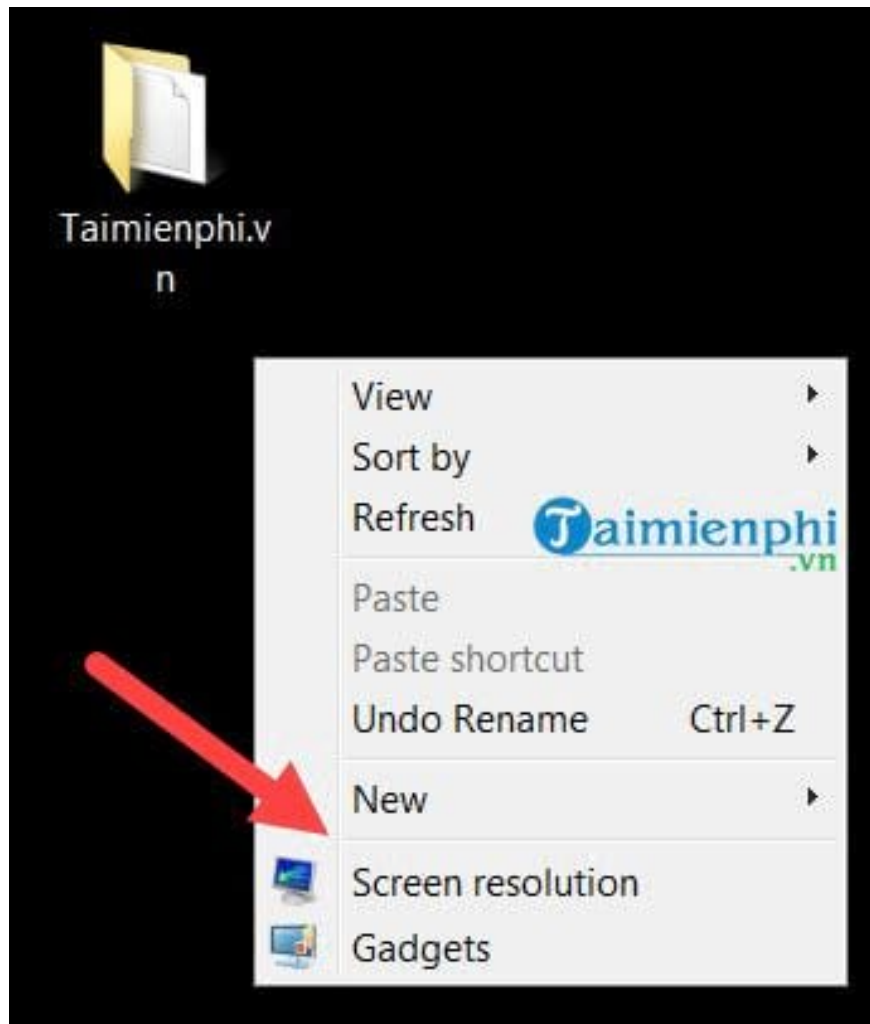

Step 2: Here, simply find the **Orientation** option , change it to **Landscape** , and click **Keep Changes** to retain the changes.

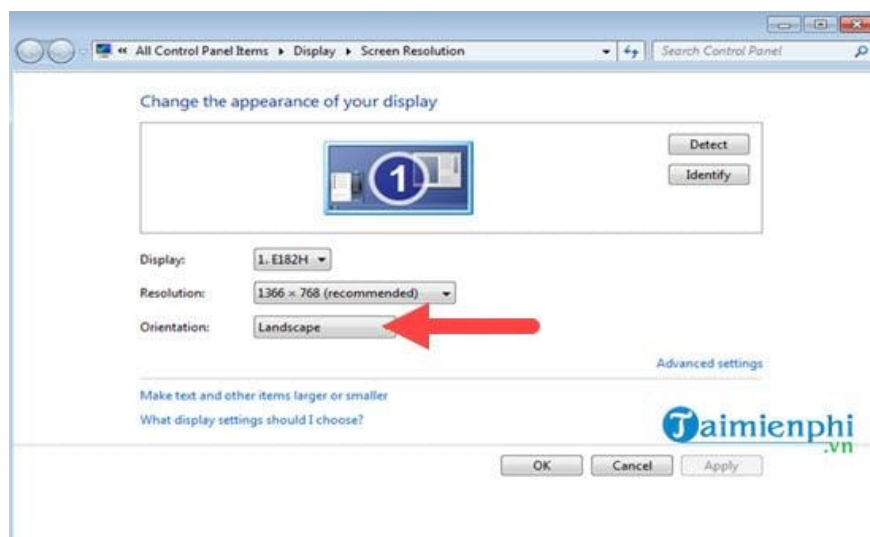

3. Fixing the inverted computer screen issue on Windows 7 and 8

Step 1: Similarly, if your Windows 7 or Windows 8 is experiencing this error, right-click on the Desktop **and** select **Screen Resolution** .

Step 2: In the **Screen Resolution** section , simply click on **Orientation** and then click on **Landscape** .

Above are some ways to help users fix the inverted computer screen error immediately if they encounter it. In reality, Windows 10 users rarely experience this inverted screen error because the system has disabled this shortcut. Therefore, if you encounter the inverted screen error on Windows 10, it's almost certainly someone playing a prank on you, so stay calm and follow the methods above to fix the error. For those using Windows 7 or 8, you can apply the screen rotation shortcut mentioned above to resolve the issue. Through this article, we can see the importance of keyboard shortcuts, not only the screen rotation shortcut but also many other useful shortcuts.
