*Are you having trouble inserting images into Excel? Refer to TipsMake's instructions immediately to find a solution to fix this problem in one fell swoop!*

When working with Excel, there are many times when you need to insert images into documents for your work. Inserting images into Excel is not complicated and it is as simple as inserting into Word. But occasionally, many users still encounter the error **of not being able to insert images into Excel** . Don't panic, **TipsMake** has a way to help you fix it.

## Where does the error of not being able to insert images into Excel come from?

Many computer users think that they encounter an error of not being able to insert images into Excel. So where does the main cause for this problem come from? In fact, in terms of objective causes, most of this situation is due to users not performing correct operations. This will make inserting images into Excel impossible.

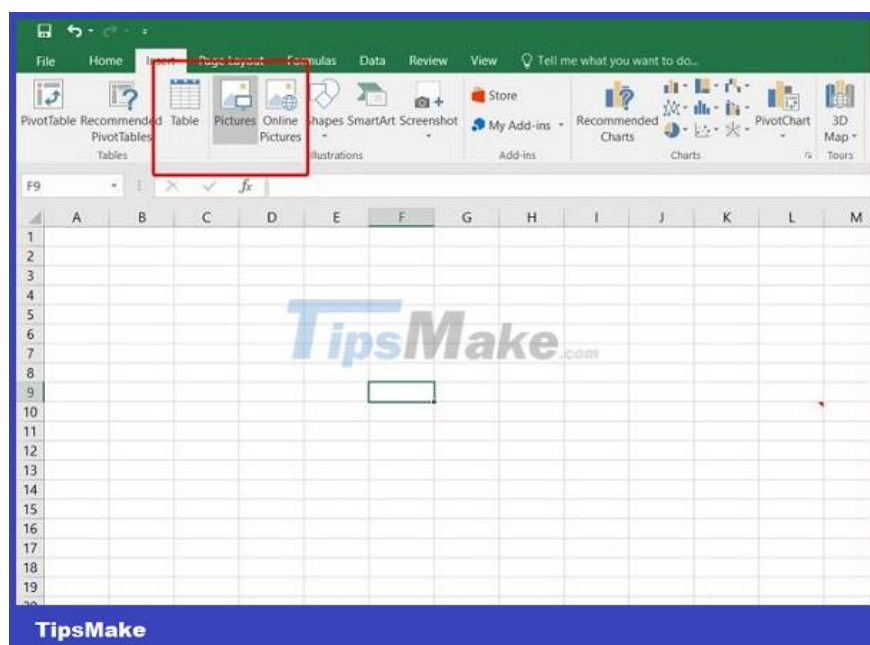

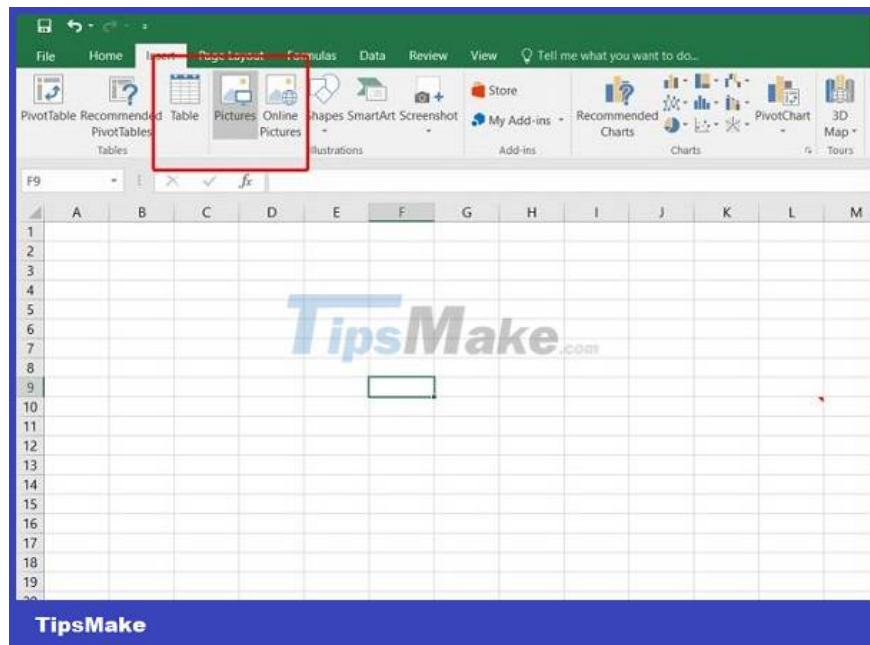

On the other hand, if the computer has an error or the Excel software itself has problems. Users will also not be able to insert images into Excel. So what to do when you can't insert images into Excel? No need to worry too much, try some of the methods we guide below.

## Insert pictures properly into Excel

First, make sure you have inserted the picture into Excel properly. Here's what you can try if you want to insert pictures into Excel quickly and effectively.

### Manually insert pictures into cells in Excel

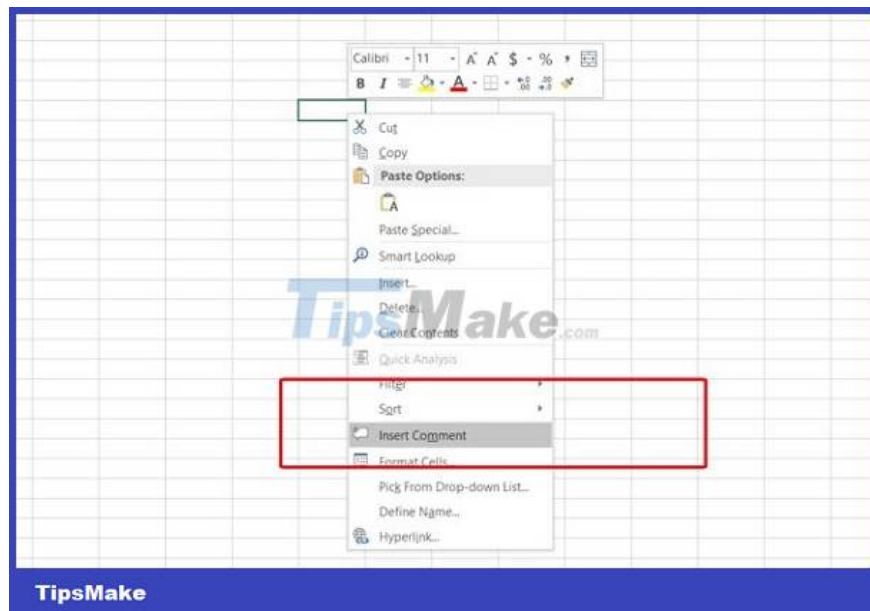

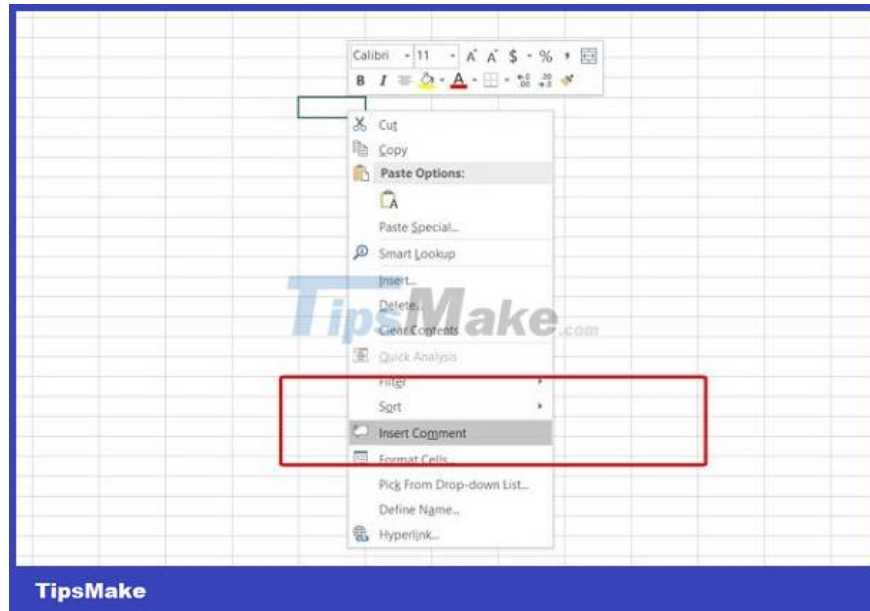

Yes! The simplest, most effective and easiest way to do it is to do it manually step by step. First, open Excel software on your computer. Then click on the cell where you want to insert the image. Next click on the **insert** tab and select **pictures** . Finally click on the image you want and select insert. The image will immediately be inserted into Excel effectively.

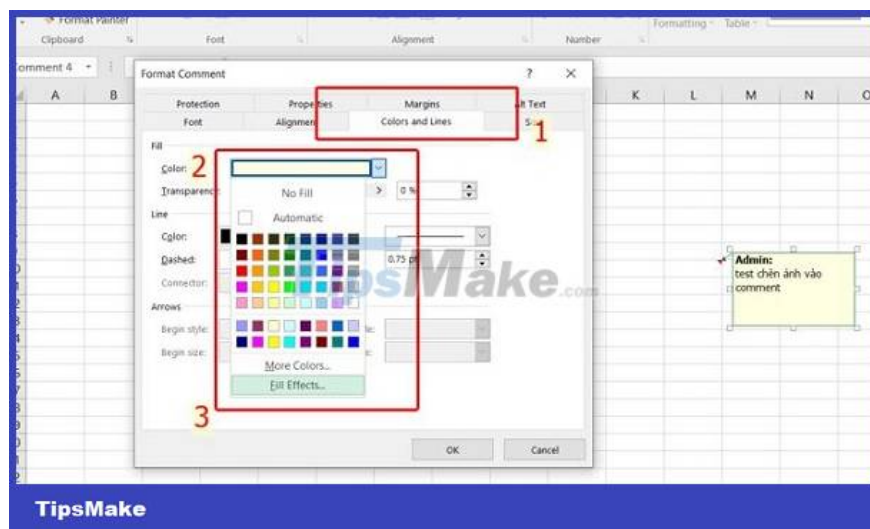

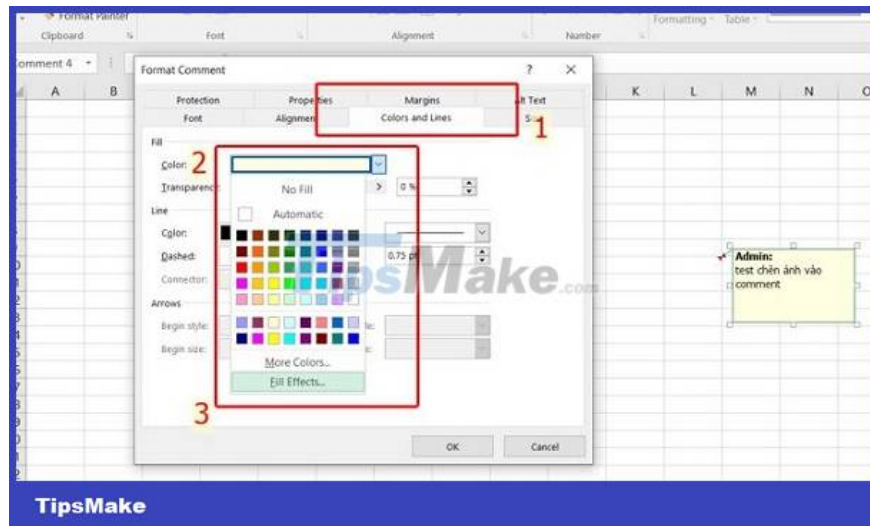

## Insert photo into comment

If you are unable to insert images into comments in Excel. Then try applying the following measures immediately to see if the situation can be fixed or not!

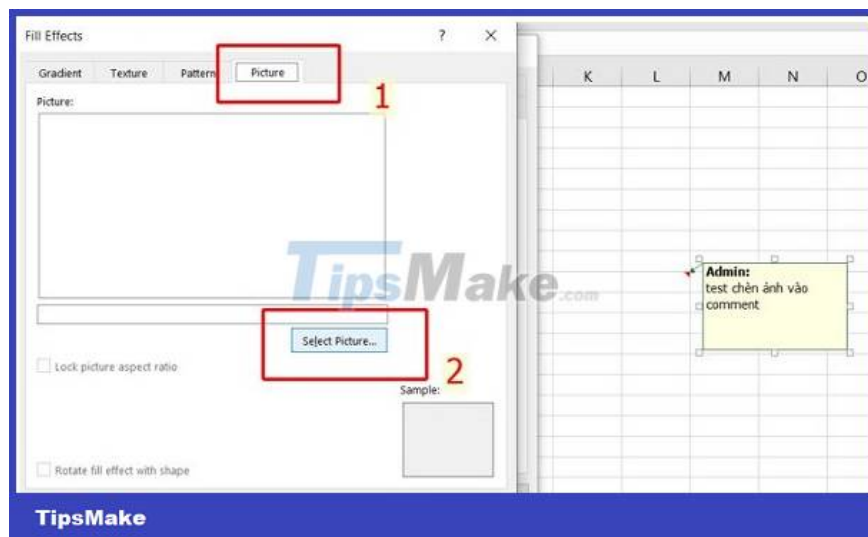

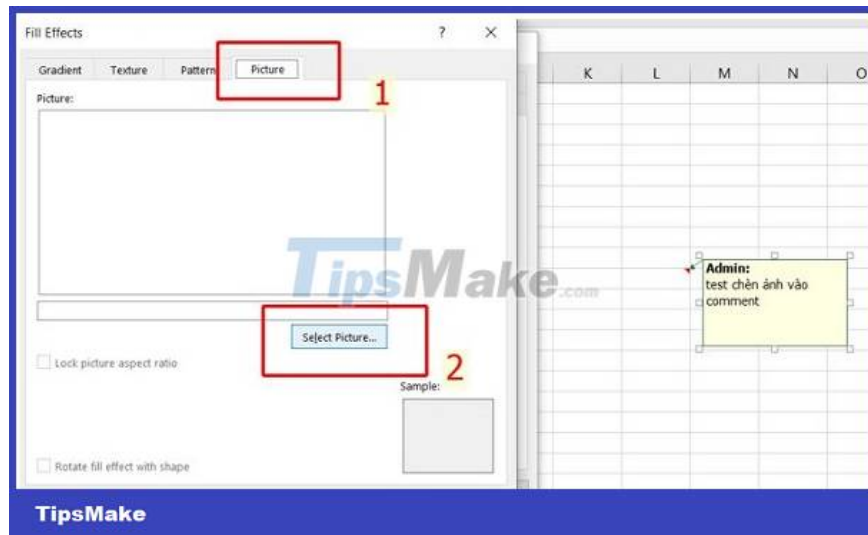

1. **Step 1** : First, insert a comment into Excel by right-clicking on the cell you want to insert. Then click **insert comment** . After entering the **comment** content , we go to the second step.

1. **Step 2** : To insert an image into a comment, click on the edge of the comment and select **format comment** .
2. **Step 3** : When the comment format panel appears, click on **color and lines** . Then in the **fill** tab , click on **color** and select **fill effects** .

1. **Step 4** : Click on the **picture** tab and select **select picture** . Continue to find the location of the image you want to insert. Then click **select** and finally **select open** . The image will now be inserted into the comment in Excel.

## The error of not being able to insert an image has not been resolved yet, what should I do?

When you have applied the above measures but the situation is still not positive. Now try checking the Excel software on your computer again. If necessary, try installing the latest version of Excel. Or if you suspect the error comes from your computer. Try removing the virus or reinstalling Windows. There is a high possibility that the error of not being able to insert images into Excel will be fixed.

*Hopefully the above solutions from TipsMake will help you fix the error of not being able to insert images into Excel successfully!*
