

# Instructions on how to install Adobe Flash Player on your computer

Adobe Flash Player is a program that supports web browsers to be able to watch high quality videos and images. In particular, Flash Player helps users to play online games on web browsers easily.

Adobe Flash Player is software that supports web browsers on different operating systems that can view videos, flash images and even play online games. With the support of Flash Player, all images will be displayed with the highest quality, most accurate, to help users have a much more interesting experience. So how to use Adobe Flash Player on your computer? In the article below, Network Administrator will guide you how to install Flash Player on your computer.

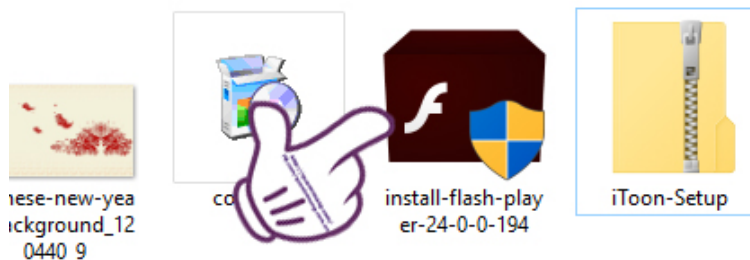

## Step 1: Download Flash Player

First, click on the link below to download the latest Adobe Flash Player version to your computer.

1. Download Adobe Flash Player for PC

## Step 2: Select the file to download Flash Player

We click on the download file of the Flash Player to install it on the computer.

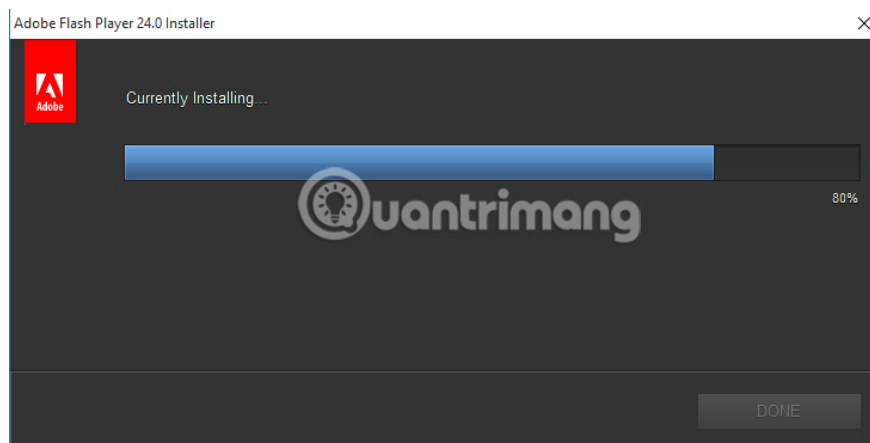

## Step 3: Install Flash Player

The settings dialog box appears, here you will **select I have read and agree to the terms of the Flash Player License Agreement** , then **click Install** below.

## Step 4: Wait for Flash Player installation

Next you wait for the successful installation of Flash Player on your computer.

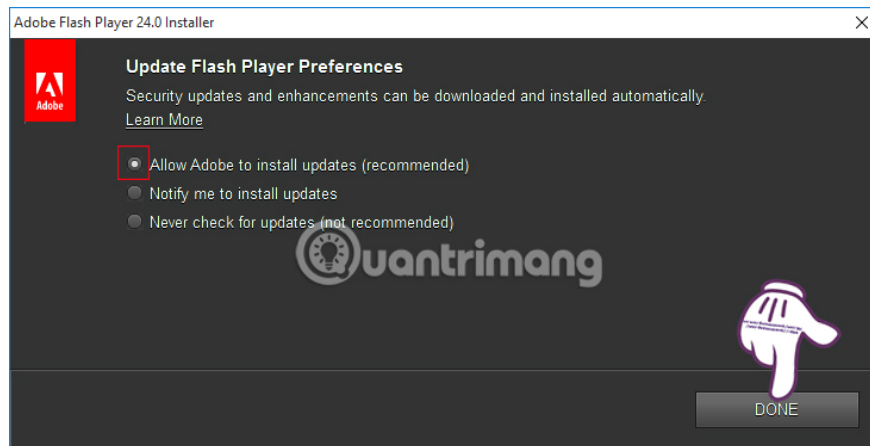

## Step 5: Choose how to update Flash Player

As soon as the installation process reaches 100%, you will come to the installation dialog interface to update the new version for Flash Player. There will be 3 options for users including:

1. **Adobe to install updates (recommended):** automatically download and install updates when new versions are available. This is the mode that publishers encourage you to choose.
2. **Notify me to install updates:** notify users when new versions are available.
3. **Never check for updates (không recommended):** never check the new version.

We need to **select the Allow Adobe to install updates (recommended) option** , and then **click Done** at the bottom to complete the installation of the Flash Player program on the computer.

Thus, when there is support of the Flash Player program on the computer, we will not have problems when watching movies, videos, or playing online games on computer web browsers.
