

Instructions on how to open 2 screens on a computer simply

Instructions on how to open 2 screens on a computer in the simplest way by HACOM to ensure effective learning and working.

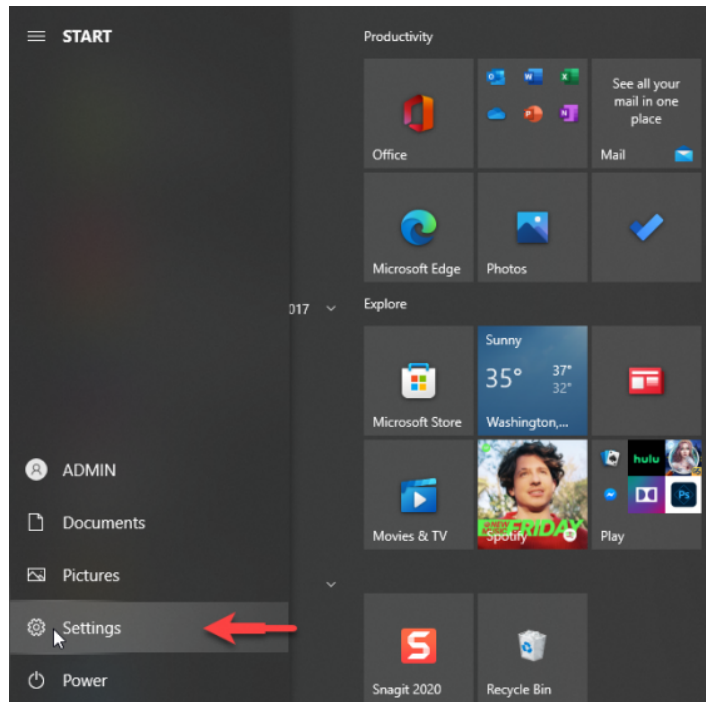

With two screens, you will compare two windows and do many things at the same time, saving a lot of time. You can copy faster and more accurately, it will not take much time to remember which tab data is in, minimizing confusion, and there will be no need to switch back and forth between many different windows. You can comfortably work and watch entertainment programs when the screen is opened in 2 parts. So **how to open 2 screens on the computer** ? Please refer to the article below by TipsMake!

Enable dual screen mode on computer

When using a **laptop** to work, study, etc., you often have to open many tabs. Switching back and forth between tabs will be very inconvenient for your work. Opening 2 separate computer screens will help you operate and monitor tabs at the same time more conveniently.

However, before you can open 2 screens on your computer, you need to activate this feature. The detailed steps are as follows:

- Step 1: Select Settings.

+ Method 1: Click Start menu -> Click Settings

+ Method 2: Press the key combination "Windows + I".

- Step 2: Select System.

- Step 3: Click Multitasking -> Check if the options in Snap windows are enabled.

+ Enabled: Perform operations to open 2 screens.

+ Not enabled: check the option you want to enable.

Note:

1. When dual monitor mode is enabled, windows will automatically resize to fit the screen.
2. When you open 2 Win 10 screens, the split screen will show the windows you can open.
3. When you resize one window, the other windows will automatically resize as well.

The simplest way to open 2 screens on a computer

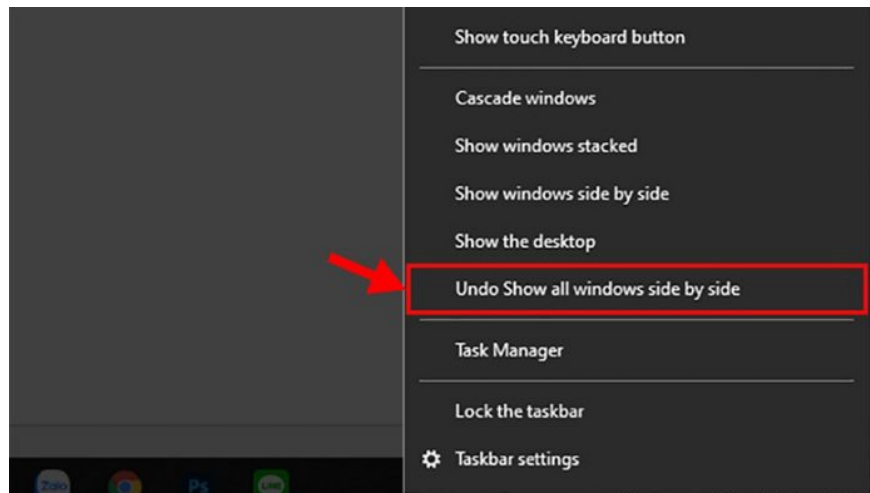

Open 2 screens on the computer screen by dragging and dropping the mouse

First, select the window you want to open on 2 screens on your computer. Press the Windows key + Right arrow key to move the window to the right side of the screen. If you want to move the window to the left side of the screen, press Windows + Left arrow key.

Using the Taskbar

When opening 2 screens on the computer using the Taskbar, the computer will automatically divide the screen according to the number of currently open applications/windows.

For example: You have 04 windows running -> the laptop screen will be opened into 4 parts.

How to open 2 screens on computer using Taskbar:

- Step 1: Right-click on the Taskbar -> click Show windows side by side.
- Step 2: Select Undo Show all windows side by side to return the screen to normal.

Open 2 screens on laptop with shortcut key

Using shortcut keys to open 2 **screens** on the computer is also a simple and convenient option. Here's how to do it:

- Step 1: Click on the window you want to open 2 screens.
- Step 2: Use key combinations.
 - + Windows + Left (right) arrow key: Split screen vertically.
 - + Windows + Up (down) arrow keys: split screen horizontally.
 - + When pressing the Windows + Arrow key combination: The remaining open windows will be displayed next to it, you use the arrow keys to move to select which window will fill the remaining half of the screen.

Instructions on how to open more than 2 working windows at the same time

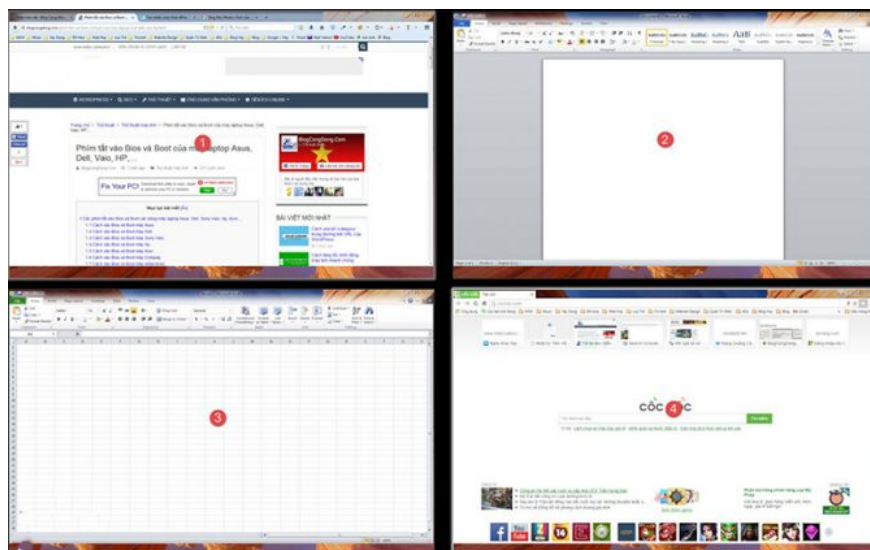

This will make it easier for you to view information, you can open up to 4 windows at the same time. If you open too many, the information will be hidden.

Step 1: Drag and drop windows onto the screen.

Step 2: Right-click on the Taskbar and select Show windows side by side.

Step 3: Resize the window to fit the screen size.

You can open 3 or 4 screens depending on how big or small your screen is, each screen will be in a corner of the computer.

How to turn off dual screen mode on computer

After you have finished your work, you no longer have 2 screens open on your computer and want to restore the screen to its original state, you just need to do the following simple operation: right-click on the Taskbar and select 'Undo show all windows side by side' to complete.

Conclude:

How to open 2 screens on the computer is a very necessary and convenient feature for work, a tip that you always need to keep in mind. For those who use the computer, this method will help control information and content more effectively than ever. You just need to apply it correctly to meet the needs of use in work as well as study in the most effective way. Hope the article is useful to you in work as well as study.
