

Instructions on how to play the game '22 Seconds' - an 'addictive' game from the Ballz game maker

22 Seconds - a new game application that is causing fever on iOS and Android operating systems

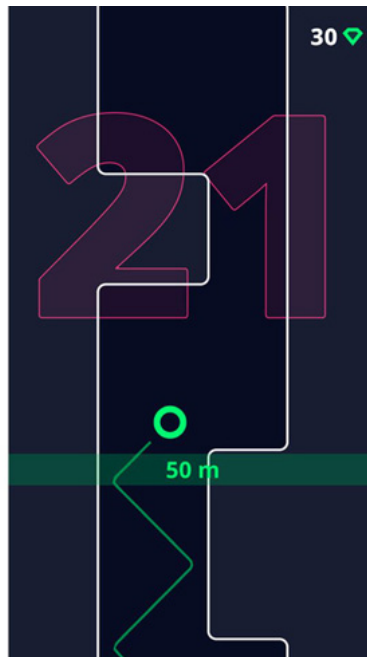

22 Seconds are new games that appear on the iPhone but are very attractive to gamers.

Created by Ketchapp Games, famous for "2048" or "Ballz", **22 Seconds** are extremely simple. So simple that if you don't get a high score you will feel embarrassed.

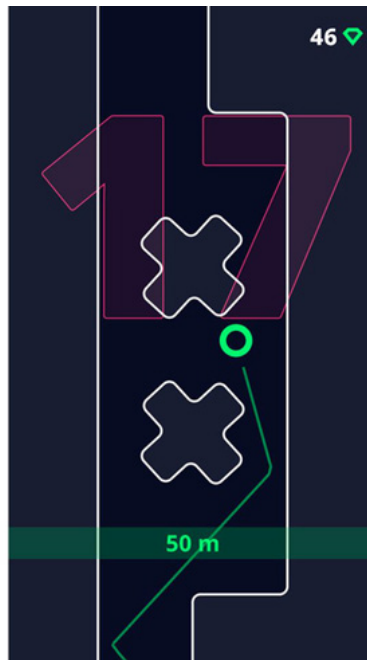

This game is very similar to Pinball. In the game, you have to drop a ball down the path, avoiding obstacles along the way. However, just like the game name, you only have 22 seconds to go as far as possible.

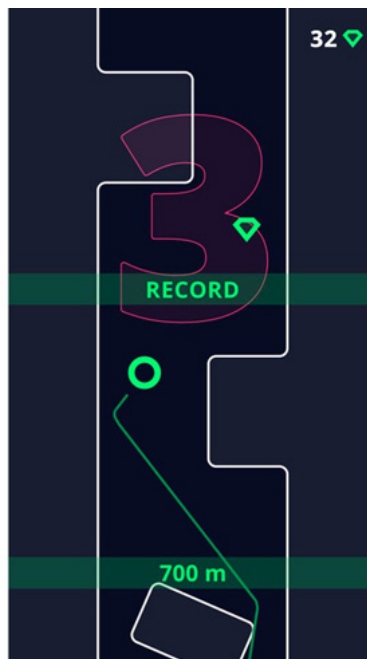

You need to move the ball forward by swiping from the end to the top of the screen. In fact, it is not as easy as it sounds, Ketchapp describes the game **22 Seconds** as "easy to play but difficult to be a player".

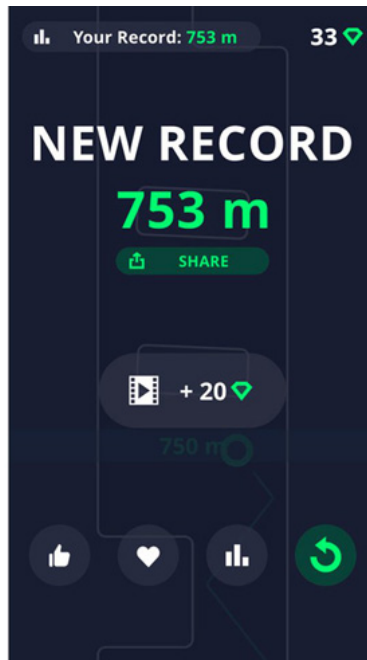

The timer will flash on the screen, creating more pressure for the player. There are also walls or obstacles on the road that make you move more slowly.

You can pick up diamonds while on the move. Once you have collected enough, you can use diamonds to exchange different types of balls, such as a watermelon or an animal.

The goal is the longest distance you can go. When the time runs out, **22 Seconds** will display the distance you have traveled. You can share the victory with your friends or press play again.

Game **22 Seconds** is a free game, however, if you want to play an ad-free version, you will have to pay an additional \$ 0.99. Currently, the game is available on Android and iOS devices. Download and experience **22 Seconds** !
