1. Turn Windows 10 computer into Wifi hotspot
2. How to create Wifi on computer
3. How to turn on, turn off 3G on Lumia

To turn Windows Phone into a Wifi hotspot:

First, turn on 3G (see the article on the link above). At the **All Settings** screen, we go to **Internet Sharing** section as shown below, in **Sharing** section, **Off** mode is turned off, swiping right - **On** to turn on Internet sharing feature, also turn the phone into Wifi hotspot:

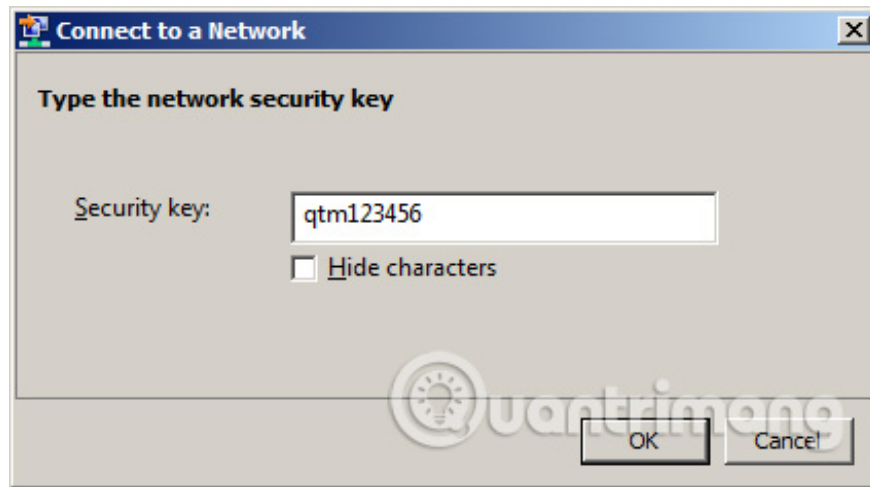

At the bottom of the screen you will see the Edit button icon, so that we can change the Wifi wave name and access password at will:

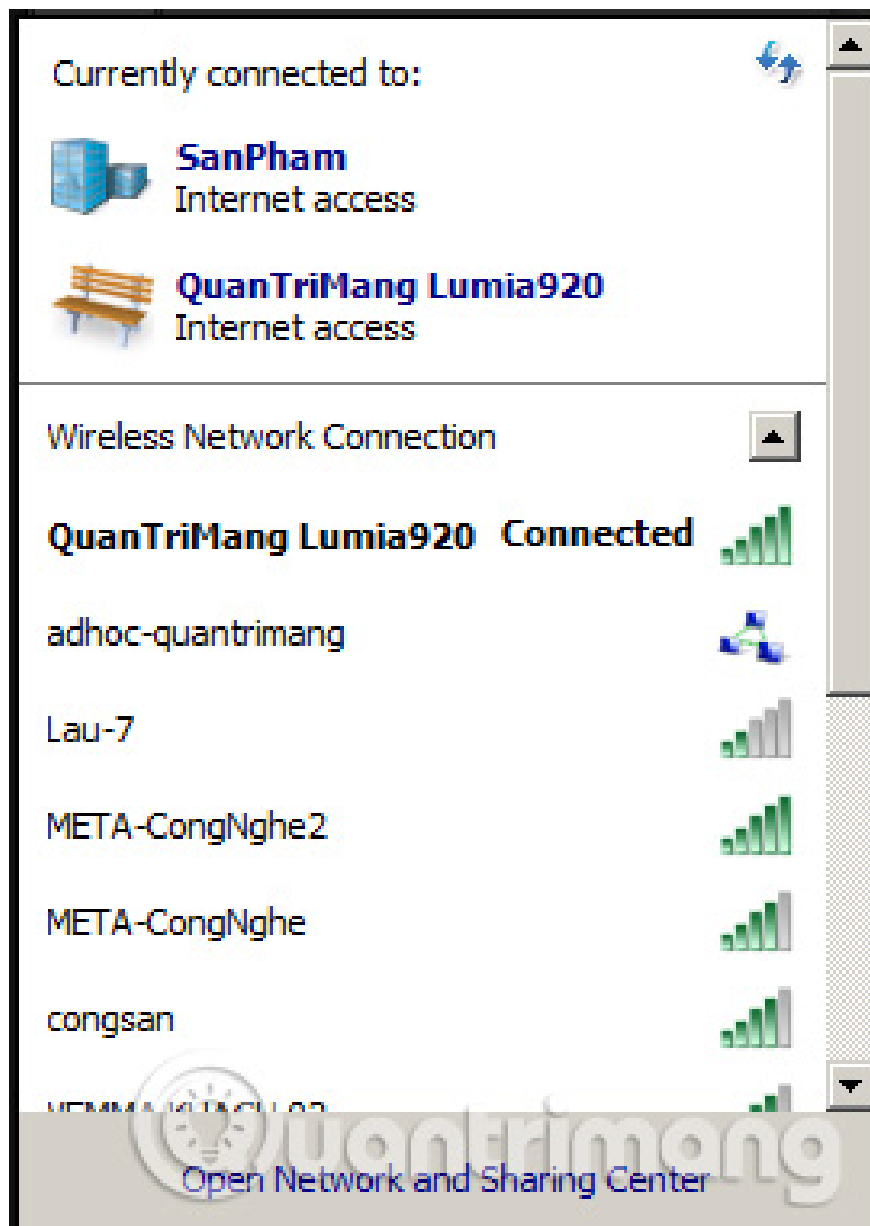

And this is our result:

Connect to try, enter the password:

Access speed on the computer is quite fast, probably because there are only 1 users:

Full wave line, too bad!

However, you should note that this method of Wifi on Windows Phone only limits 8 connections at the same time, meaning that if there is a 9th user, you need to use another device. *Good luck!*
