

Instructions on how to remove logos from AI videos using Magic Eraser

One of the popular tools for removing logos from videos is Magic Eraser. This tool allows users to quickly remove unwanted details from images and videos.

During the process of creating AI videos, the appearance of logos or watermarks is common, especially when using free tools. Therefore, the need to find ways to remove logos from videos is becoming increasingly popular and necessary. One simple and effective solution currently available is to use a video logo removal tool like Magic Eraser.

This tool allows users to quickly remove unwanted details from images and videos with just a few taps. Magic Eraser can help remove logos while maintaining the natural look of the frame. Below is a guide on how to remove logos from AI videos using Magic Eraser.

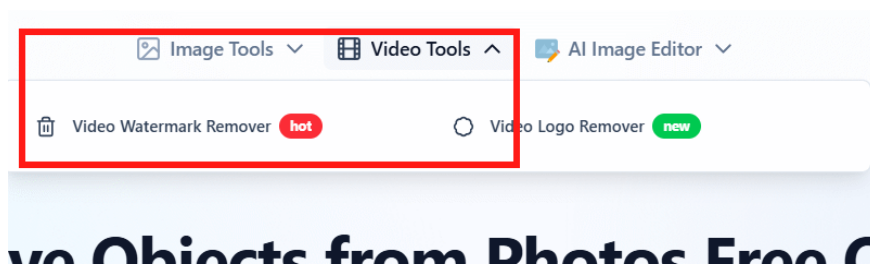

Instructions on how to remove logos from AI videos using Magic Eraser

Step 1:

First, access the Magic Eraser website using the link below; you don't need to register an account.

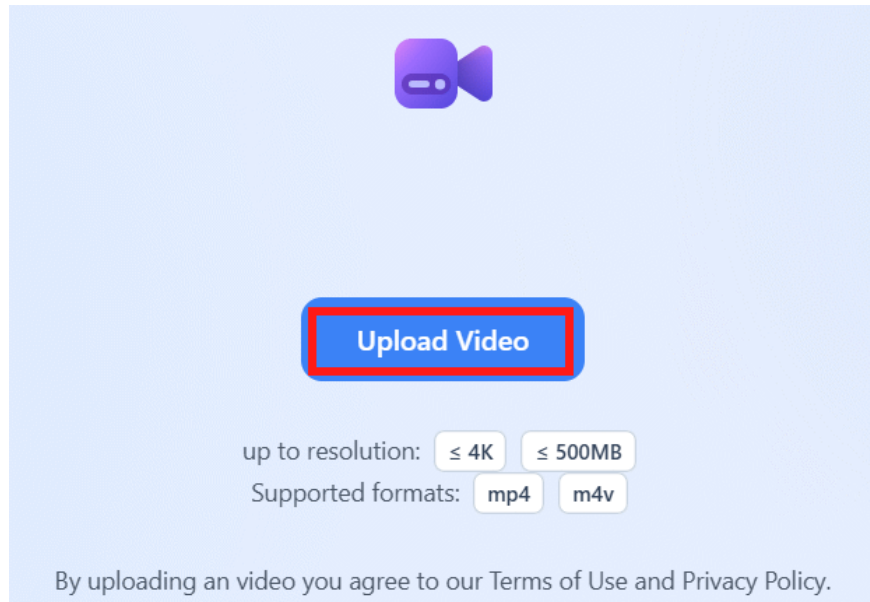

<https://magiceraser.org/>

Next, click on **the Video Tools option** at the top of the interface and then **click the Video Watermark Remover tool** to remove the logo from the AI video.

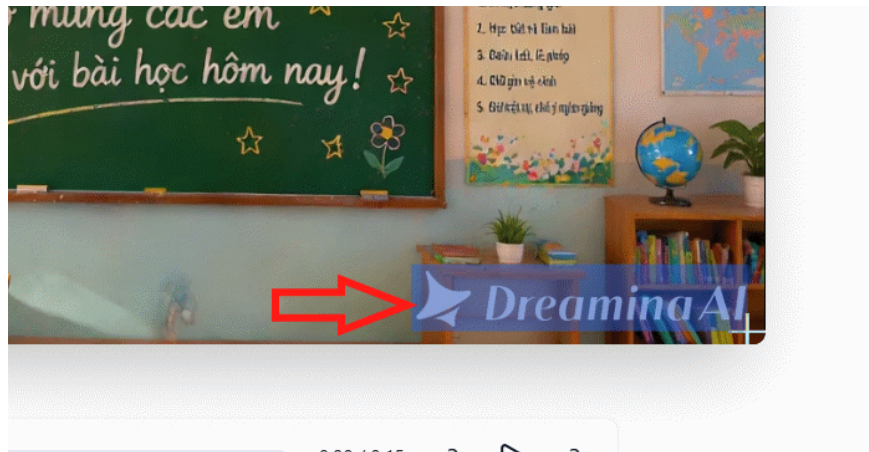

Step 2:

To access the main interface of the video logo removal tool, we proceed to **upload the video** we want to work with to Magic Eraser.

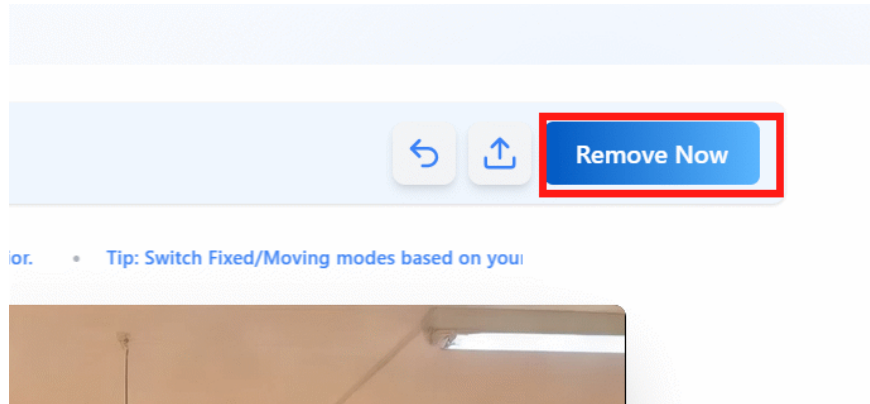

Step 3:

In the video editing interface, **scroll down to the area where you want to remove the logo** , then use your mouse **to select the logo area** .

If you select the wrong area and want to re-select it, press the back arrow to undo the action. Once you've selected the area, **press the "Remove Now" button** to proceed with removing the logo from the AI ??video.

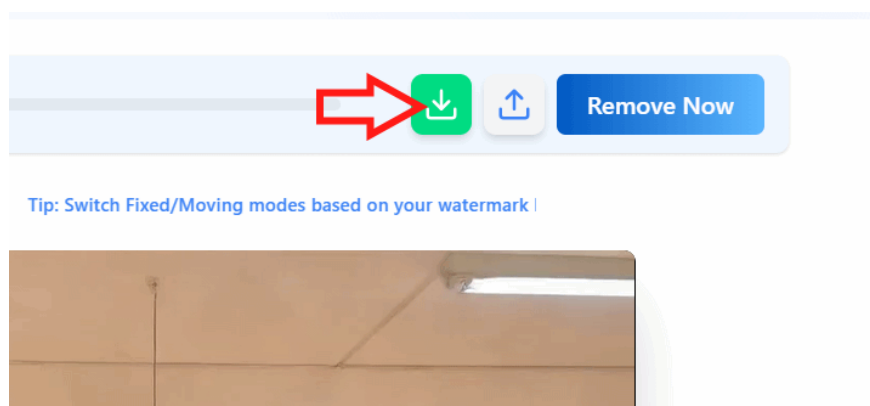

Step 4:

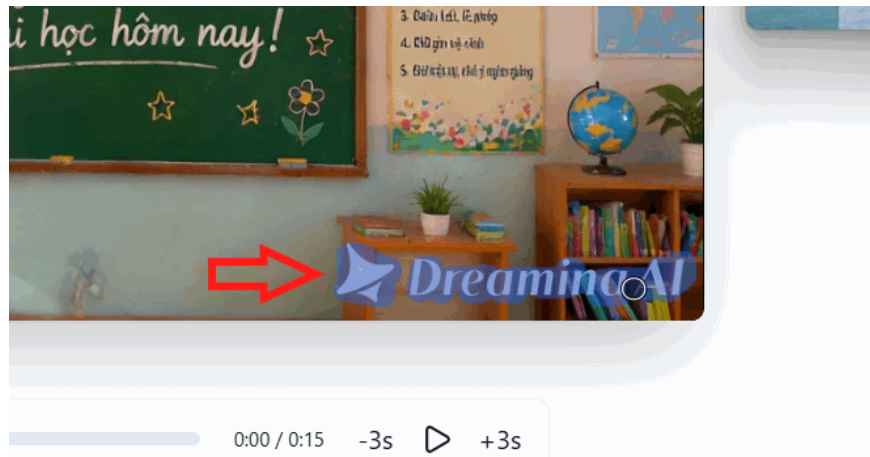

The process of removing the logo from the AI ??video using Magic Eraser was carried out immediately afterward. The result, with the logo removed, is shown in the image below.

Finally, **press the save icon** to download the AI ??video with the logo removed to your computer as usual.

Additionally, Magic Eraser also supports **a logo selection tool** for more detailed removal. Simply tap the pen icon, then highlight the area where you want to remove the logo, and tap Remove.
