

Instructions on how to share and send GIF images via Zalo

Sending and sharing animations on Zalo is the latest feature of the call application, this chat is only updated. Users will access Giphy's GIF app store and search for animations to send to friends.

Current chat and voice calls such as Facebook Messenger, Viber, Skype, Zalo, . all add features to send photos to friends in the chat frame. More specifically, many chat applications now allow users to send GIFs to friends like Viber and the latest Zalo.

Zalo chat application also combines with Giphy animation store to support users to search for images, from there to send photos to friends or share with anyone in the contact list. However, new features are released on Android Zalo. With other versions, the manufacturer will update in the future.

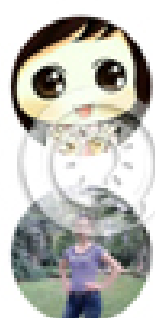

How to send GIF images on Zalo Android

First of all, please update or download the latest version of Zalo to your device to use this feature.

1. Download Zalo for Android

Step 1:

You open the Zalo app on your Android device and open any conversation up. At the chat frame you **enter the @ character** and immediately appear the words **Search GIF from Giphy** . We click on that line.

Step 2:

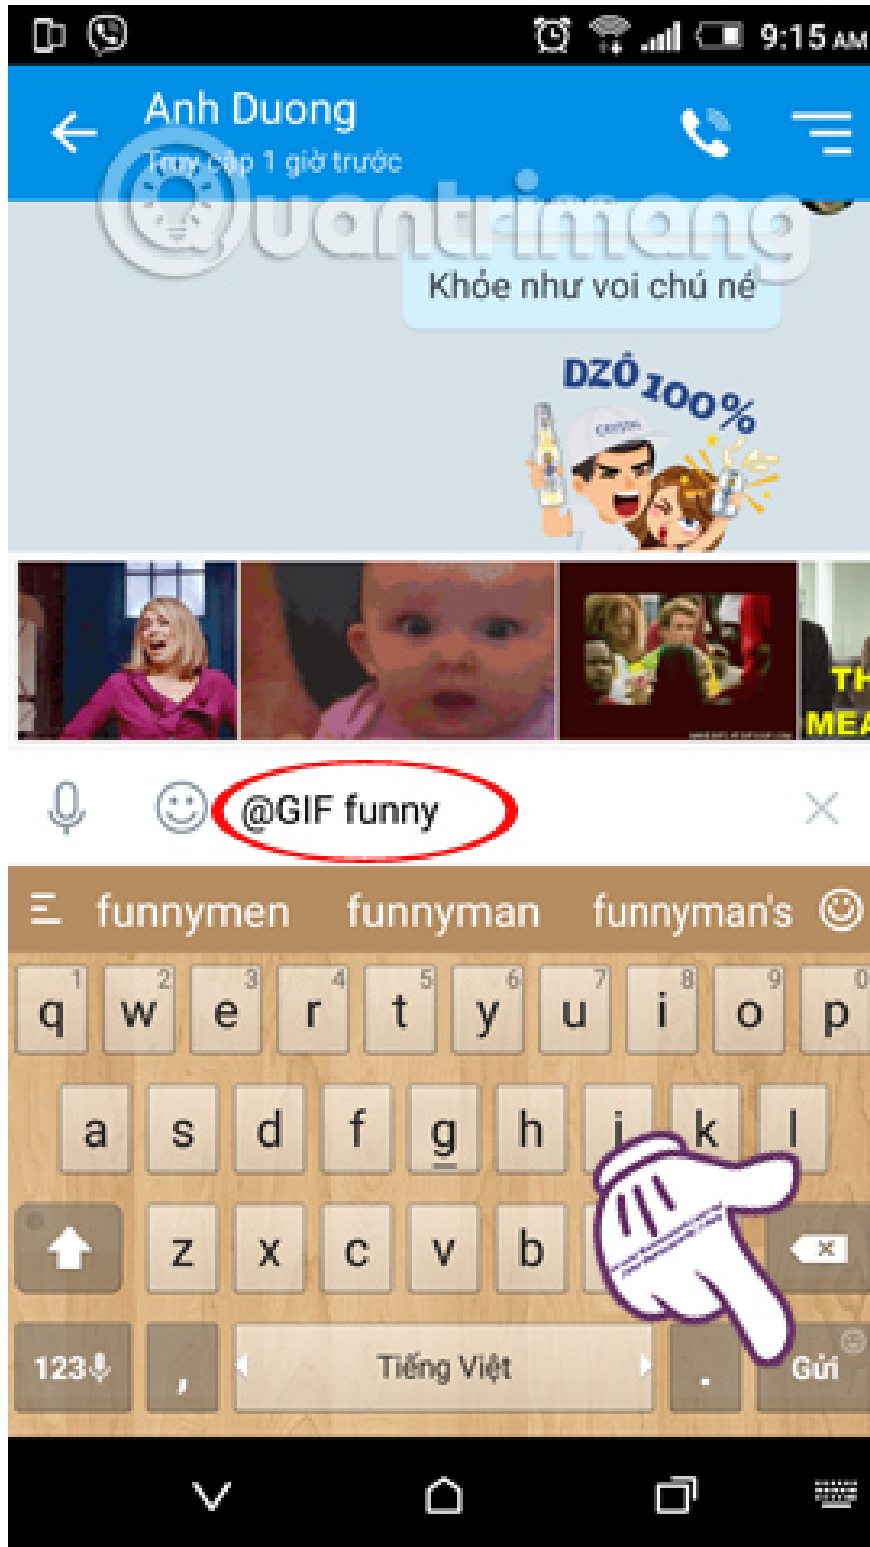

Immediately, random animation appeared. We can **select any animation** and click **Submit** to send animated images to friends on Zalo.

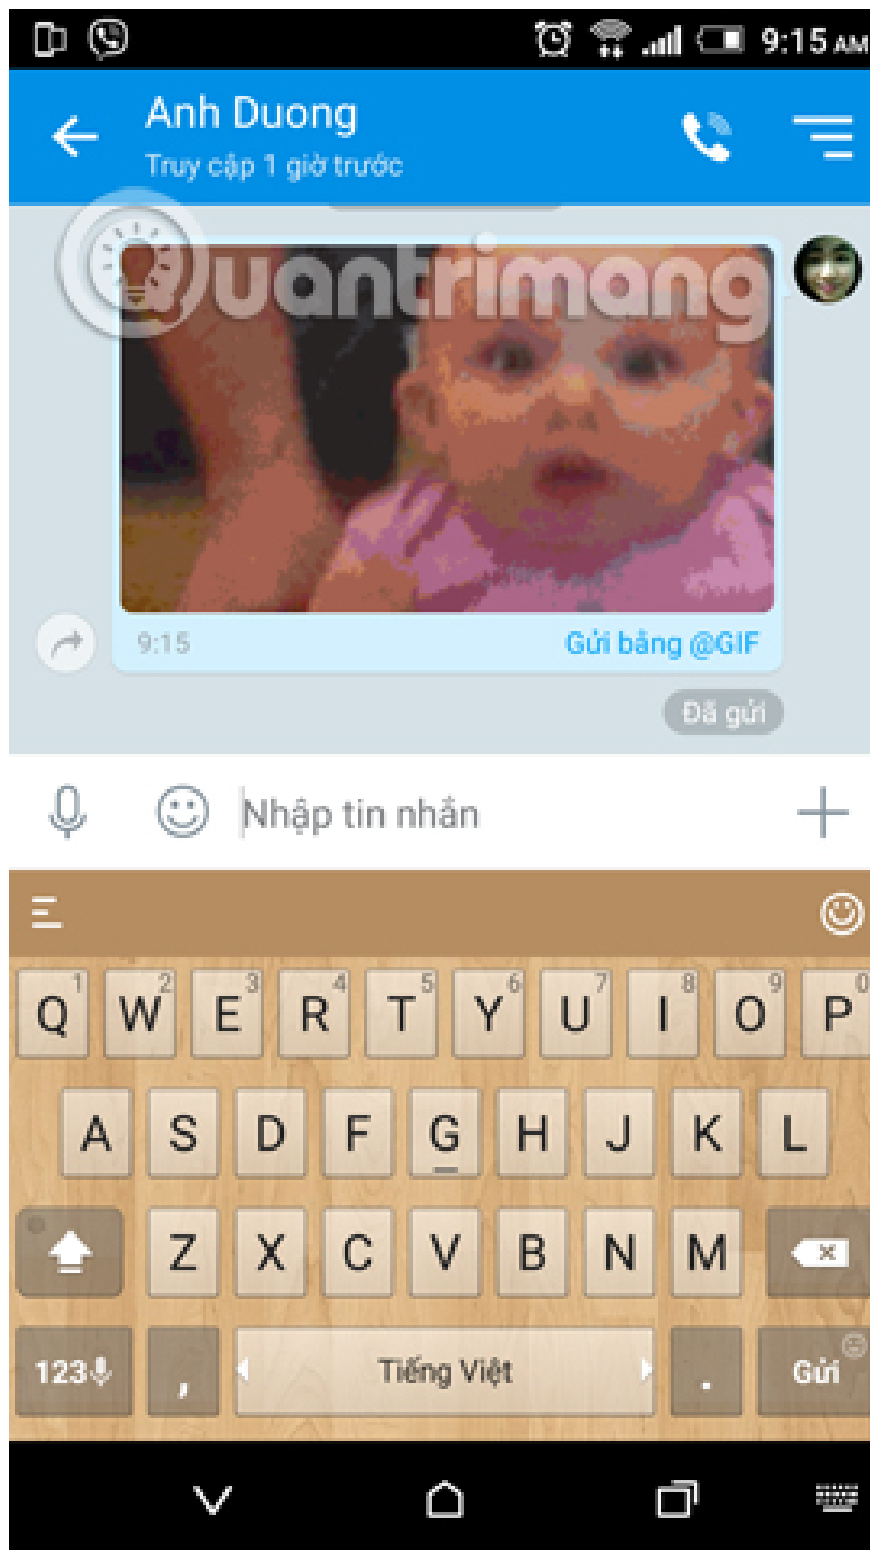

Step 3:

Similar to sending animations on Viber, Zalo also supports users **to search and post animated images by subject** . Also in the chat frame, type the keyword **@GIF** . Then type **in the topic keyword to find the animation** , such as funny @GIF. After that, this series of animated themes will appear for you to choose. We also click on the animation and click **Submit** to send the image.

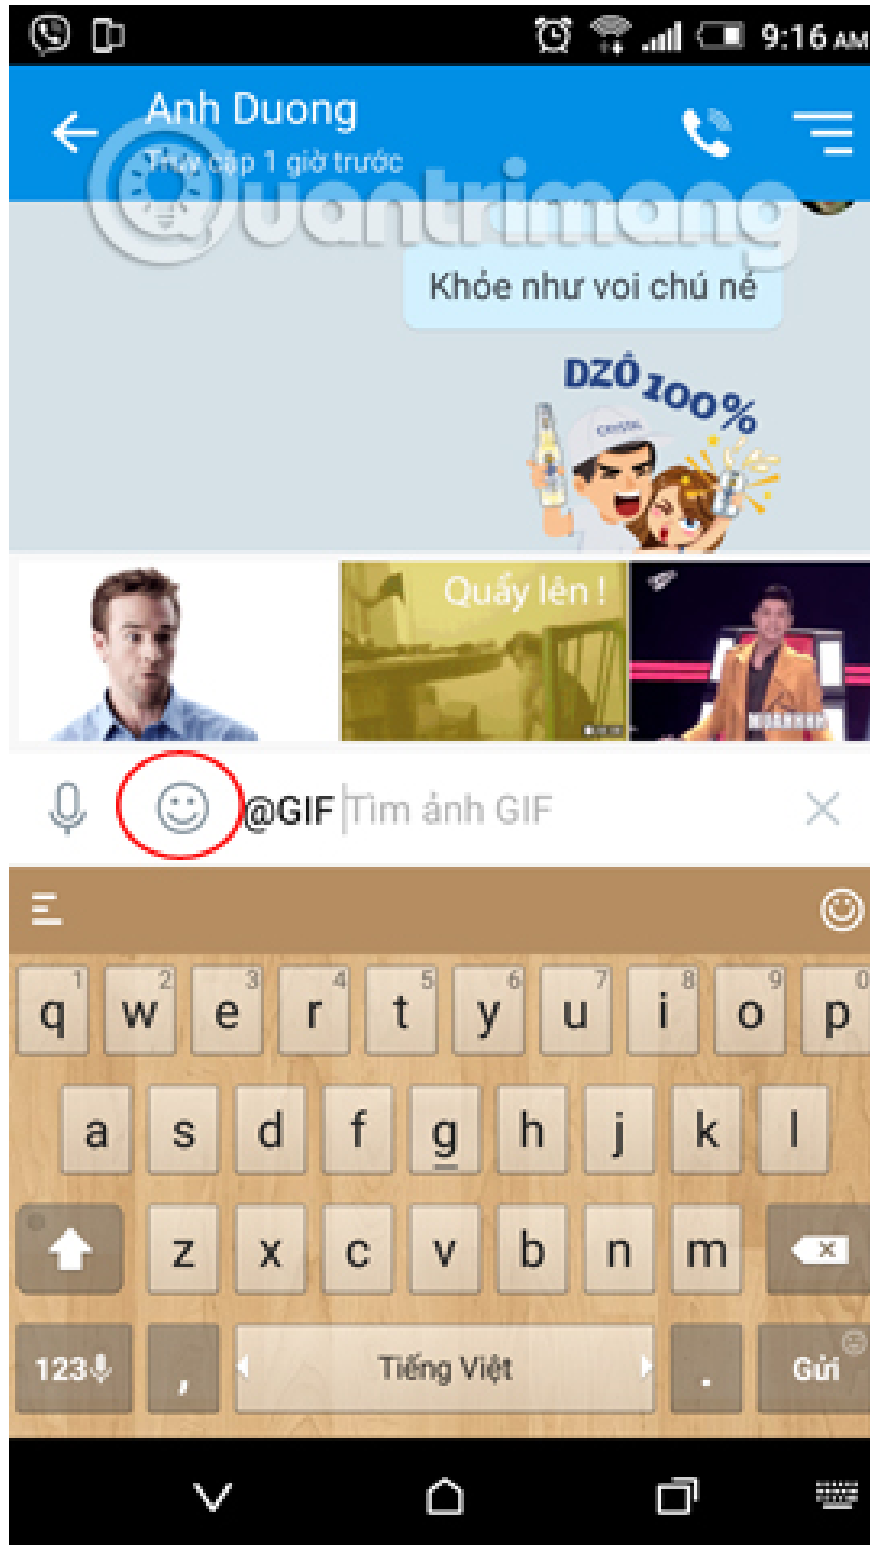

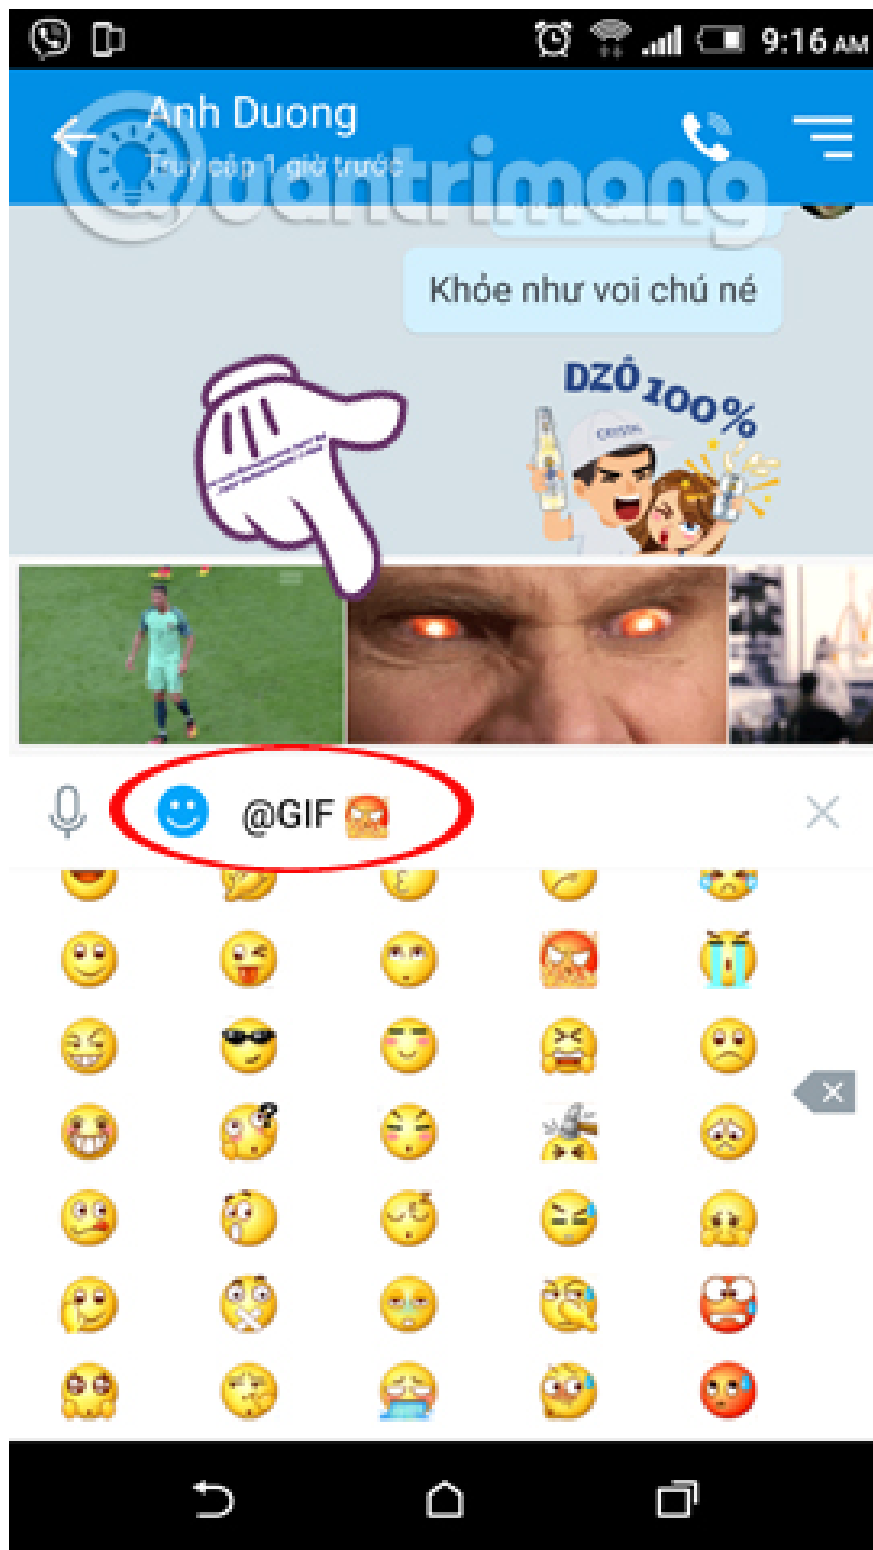

Step 4:

In addition, Zalo also offers many ways to send rich animations in addition to entering keywords like above, that is **sending an animated theme by Zalo emoticon** .

In the chat frame, you also enter the keyword **@GIF** and then select **the emoticon smiley icon** right next to you. The icon list appears and you click on an icon, such as an angry emoticon. Right above will be the animation based on the emoticon theme that we choose.

Step 5:

We also press **Send** to send the animation. You do the same to send another animation according to the emoticon icon.

Pretty simple, isn't it ?! With this new feature, Zalo will help users have more choices during chat with friends, not only send emoticons, stills as before. Hopefully in the future, the feature of sending images on this Zalo will update for other versions to bring an interesting experience to users.
