

Instructions on how to split screen on Windows 10 simply

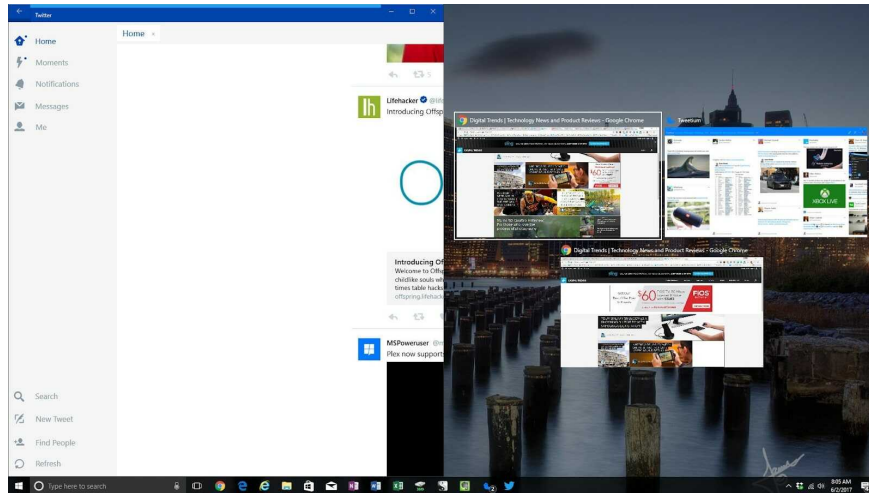

To handle multiple tasks at the same time, people often split the screen on Windows 10 laptops. So what is the simplest and most convenient way to split the screen?

The role of split screen on Windows 10

Why do more and more people want to learn **how to split the screen on Windows 10** so they can do it when needed? Why do manufacturers increasingly build simple tools to help you split the screen on Windows 10? The reason is that splitting the screen brings users the following utilities:

- Split screen helps users handle multiple tasks at the same time, saving maximum time and effort.
- The screen is divided into many different windows to help users process tasks faster and more effectively.
- Split screen helps users work efficiently and flexibly in all situations.

Enable split screen mode on Windows 10

The split screen feature has been developed by manufacturers since **Windows 7**. However, in **Windows 7**, users can only split the screen into 2 parts, while in **Windows 10**, users can split the screen into 3, 4 or even more depending on the characteristics of the work. Before proceeding to split the screen on the laptop, users need to enable the Multitasking feature.

Step 1: Open the start menu and select "**Setting**"

Step 2: In the "Setting" section, select "**System**"

Step 3: Select **Multitasking** to display the window. In this window, you will see 4 Snap-related settings displayed. You can choose to enable or disable the settings depending on your usage needs.

Some simple ways to split screen on Windows 10

After turning on the **Multitasking** feature, there are many **ways to split the screen on the computer** that users can use, including the following basic ones:

Using the mouse to **split the screen** is the simplest and most time-saving method you can apply. Users just need to use the mouse to shrink the screen and then drag the screen to the left or right edge. When the screen appears, the border is divided into 2 halves.

When you release the mouse, the screen will display windows and select another application window. You just need to open the window, select the item you want to use and you have successfully split the screen.

In addition to using the mouse, **splitting the screen on Windows 10** using shortcut keys is also very quick and effective. To apply this method, you first need to identify the window you want to split and click on that window.

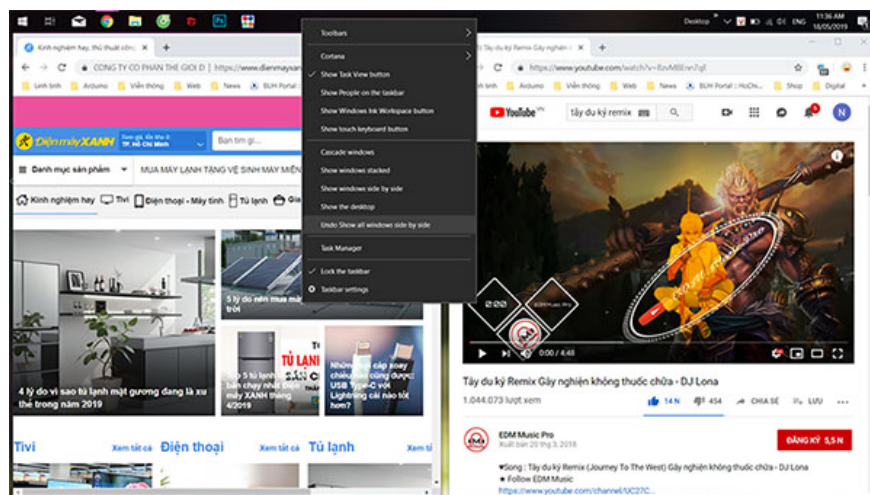

The second step you need to do is press the **Windows** key + **right arrow** to move the window to fill the right screen. If you want to fill the left screen, you will use the **Windows** key + **left arrow** .

Besides using keyboard shortcuts or using the mouse, you can **split the screen on Windows 10** by using **the Taskbar** . With this method, you can split the screen depending on the number of applications on the screen. The basic steps to perform this screen split are as follows:

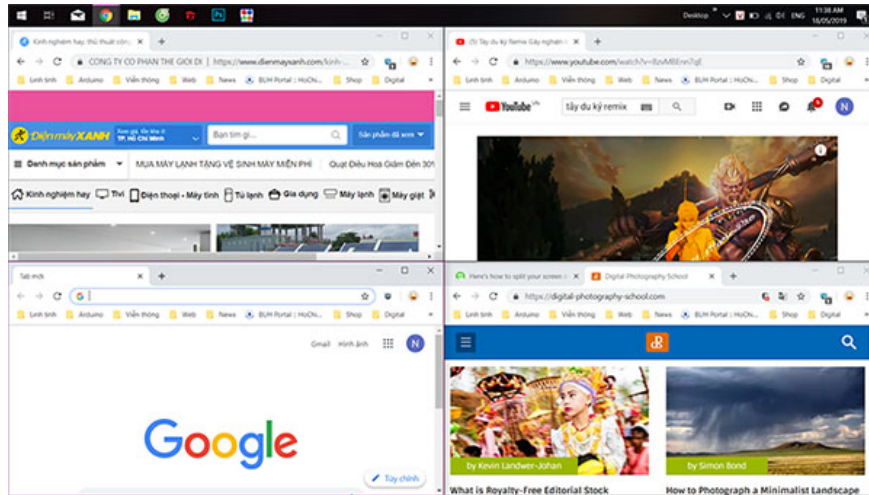

Step 1: User clicks on the Taskbar then selects show Windows side by side.

Step 2: After selecting the tool, the screen will automatically divide into 2 parts as required.

Step 3: To return the screen to its original state, click on the Taskbar and then turn off the Undo Show all windows side by side feature, the screen will not automatically split.

If you want to **split the screen** into more than 2 windows, you can choose **the Corner Snap tool** . This method is very simple and effective, similar to **the method of splitting the screen** into 2 halves. The splitter just needs to drag the window to **the 4 corners of the screen** and divide the window into 4 parts to perform tasks. The player's computer will automatically align to divide the screen into 4 equal parts.

Above are simple and convenient ways to split the screen on a Windows 10 laptop that you can refer to. Each split method not only helps you flexibly use multiple windows on the screen but also improves work efficiency. Hoanghac hopes that with the above sharing, users can flexibly split the screen on Windows 10 to help work achieve the best results.
