

# Instructions on how to stamp videos on extremely simple Video Watermark software

Use Video Watermark, the software to embed the logo in the video is easy to use and especially the video quality is still good after being stamped.

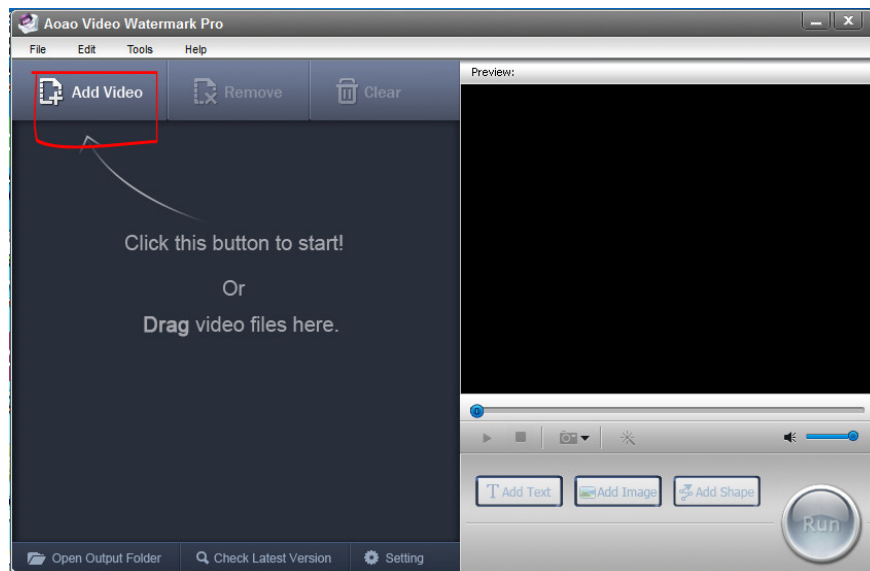

After making a video, you want to close the logo on the video so no one can get your video. Use Video Watermark, the software to embed the logo in the video is easy to use and especially the video quality is still good after being stamped.

Follow the step by step instructions on how to close the logo on the video below.

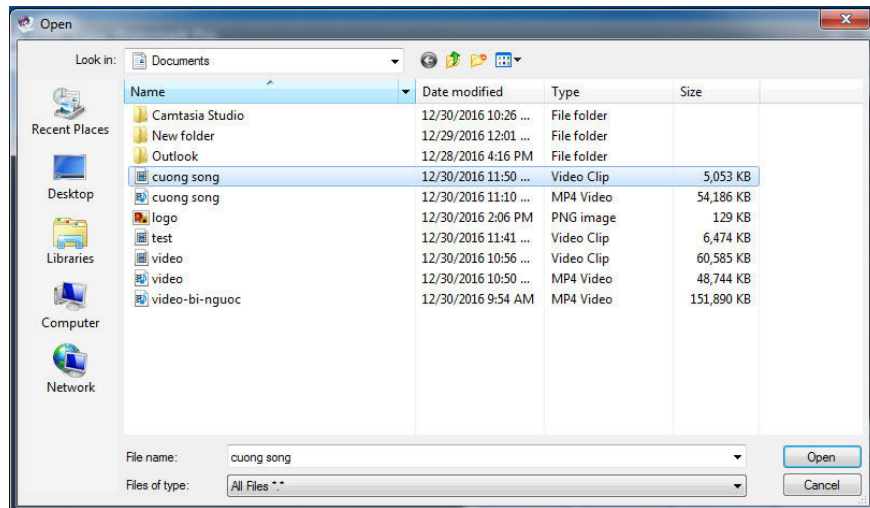

**Step 1** : Download the Video Watermark software to your computer and install it.

Link to download Video Watermark.

**Step 2** : Open the software, on the program interface, click on **Add video** to open the video to be stamped.

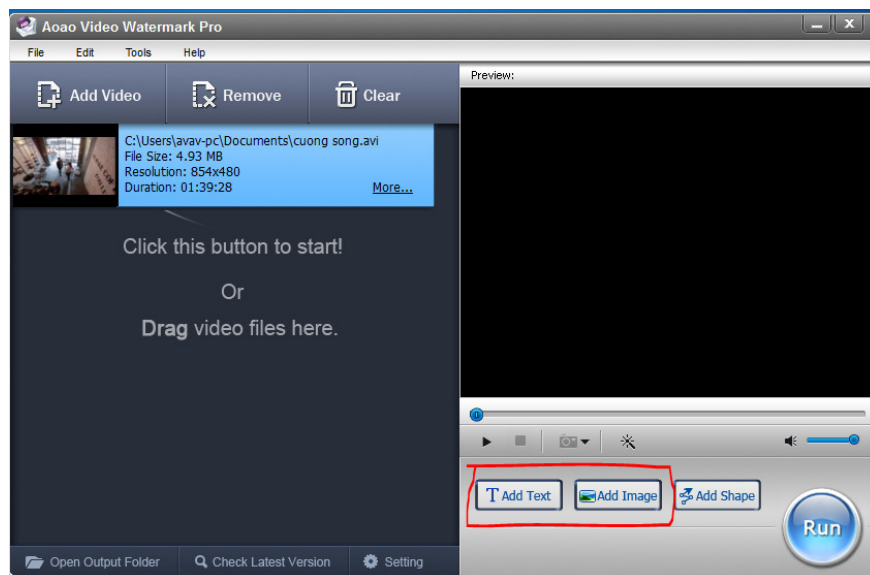

After selecting the video, click **Open** .

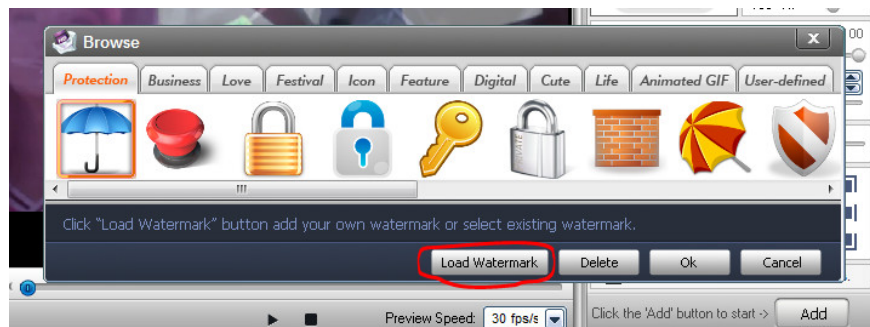

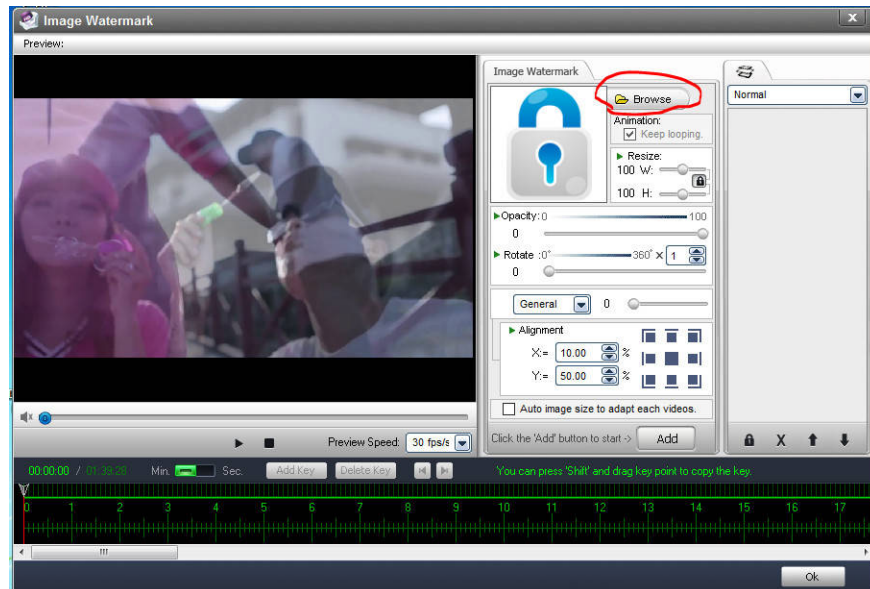

**Step 2** : Select a photo or text to insert into the video.

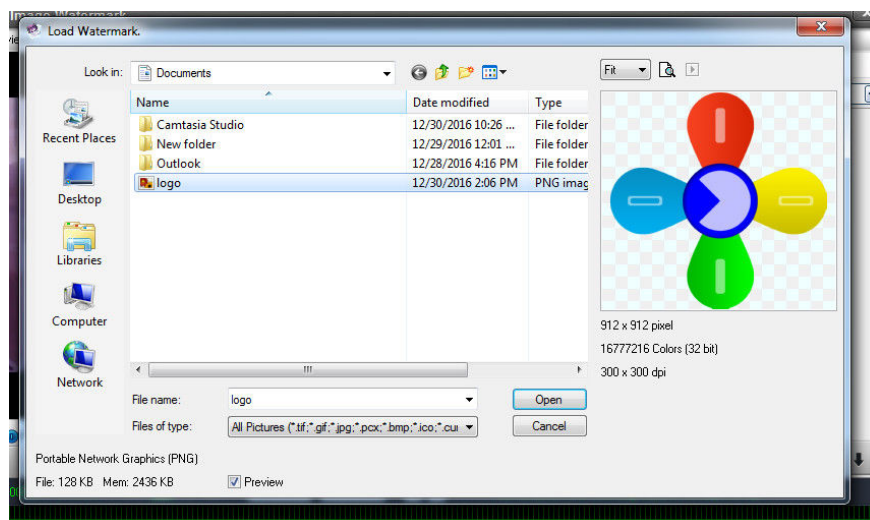

If inserting text, select **T add Text** .

If you insert an image, choose **Add Image** -> in the **Image Watermark** window, click **Browse** to select the image -> click on the **Load Watermark** button and select the image from the computer.

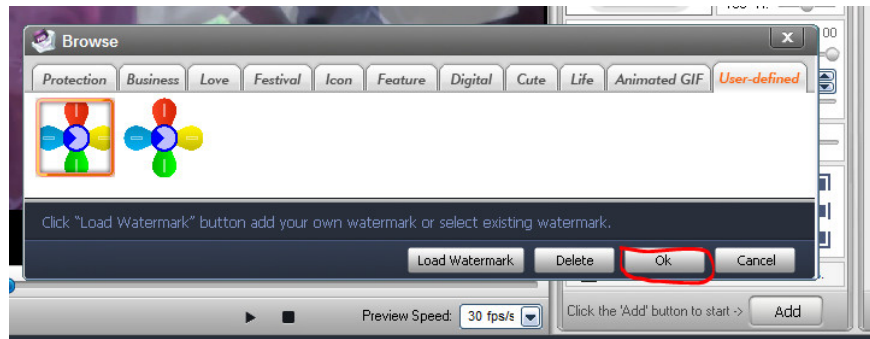

Select the image to insert as a logo in the video and click **Open** .

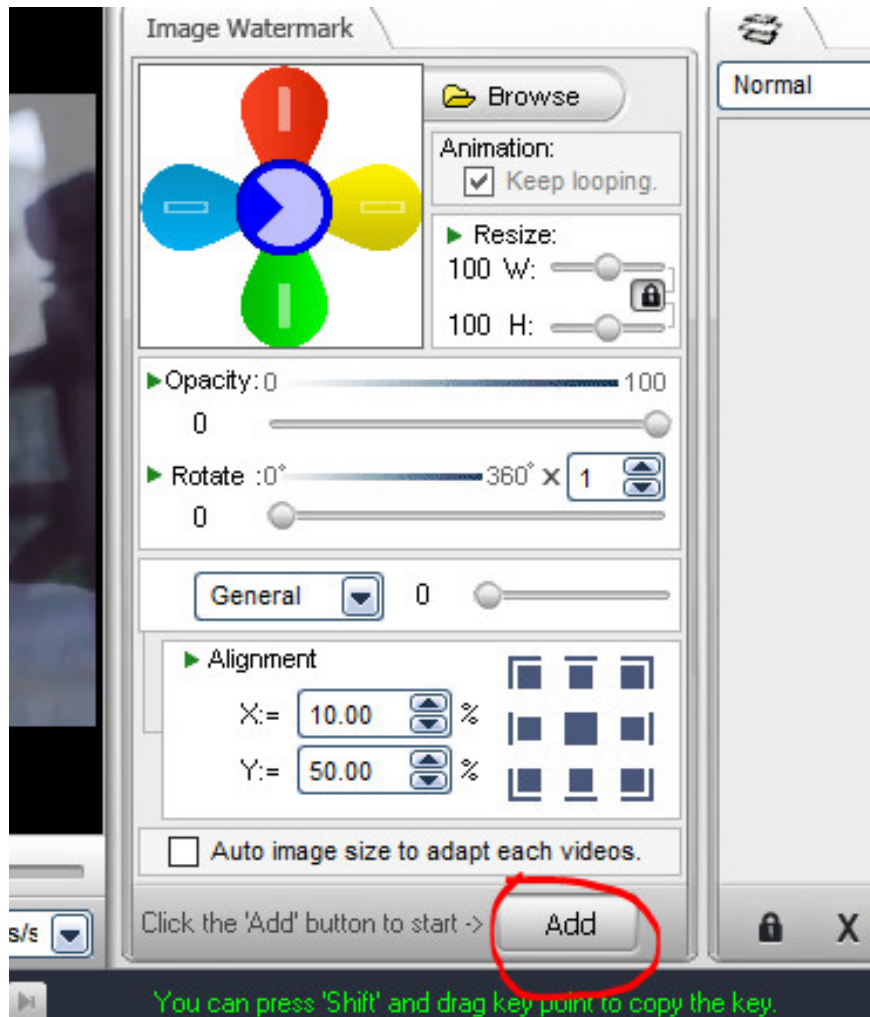

The selected image will appear in the **Browse** window, continue to select **OK** to complete.

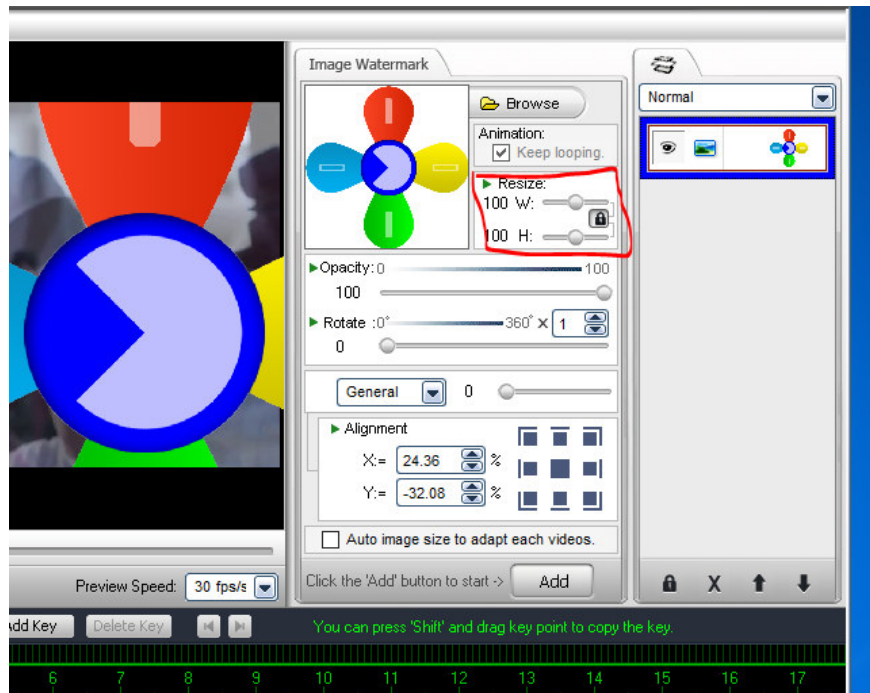

### Step 3:

Select **Add** to insert the image into the video.

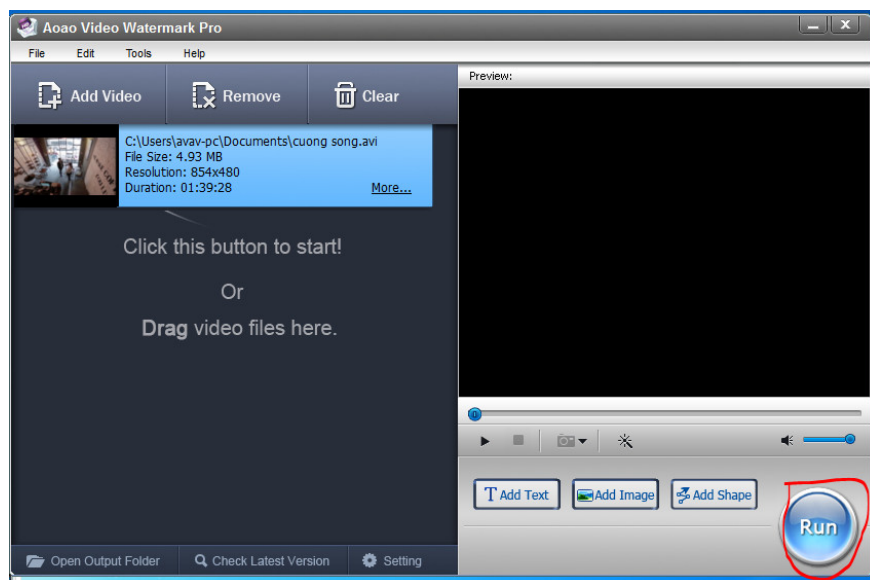

### Step 4 : Adjust the size of the logo.

In the **Image Watermark** window -> go to **Resize** , here you can adjust the size of the following image to be reasonable-> **OK** .

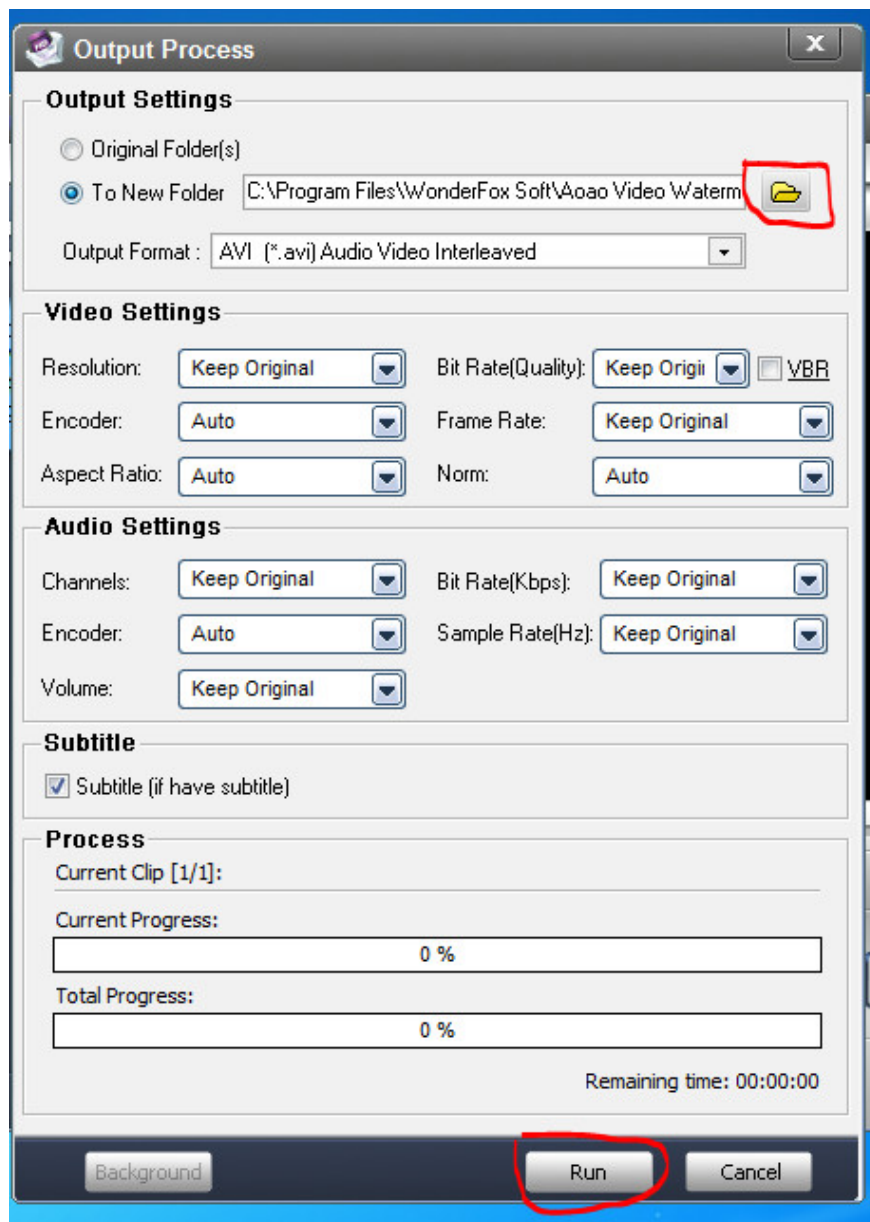

Step 4: In the program window, select **Run** to stamp the logo into the video.

After the program finishes running, a parameter panel will appear.

**To New Folder** : choose where to export the file.

**Output Format** : select the video format.

After selecting, click the **Run** button. So you've already stamped your personal logo into your own video.
