Instructions on how to turn off the Laptop screen. Laptop is a popular mobile device, compact, multifunction. However, the battery life on the laptop is quite modest due to the optimization between hardware power, portability. By turning off the screen when not in use will bring you longer laptop usage time.

Laptop is a popular mobile device, compact, multifunction. However, the battery life on laptops is quite "modest" due to the optimization between hardware power, portability. By turning off the screen when not in use will bring you longer laptop usage time.

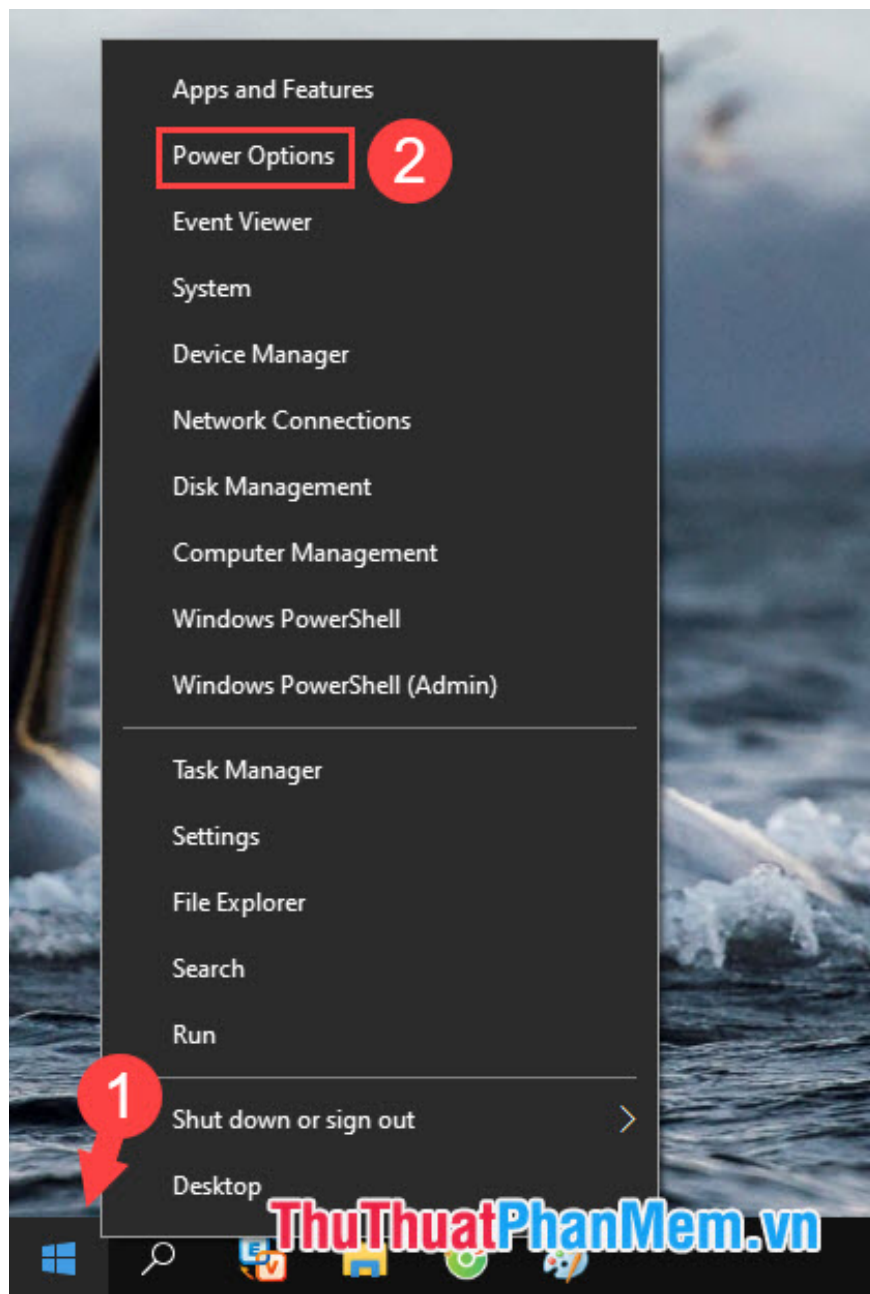

## 1. Turn off the device by folding the screen

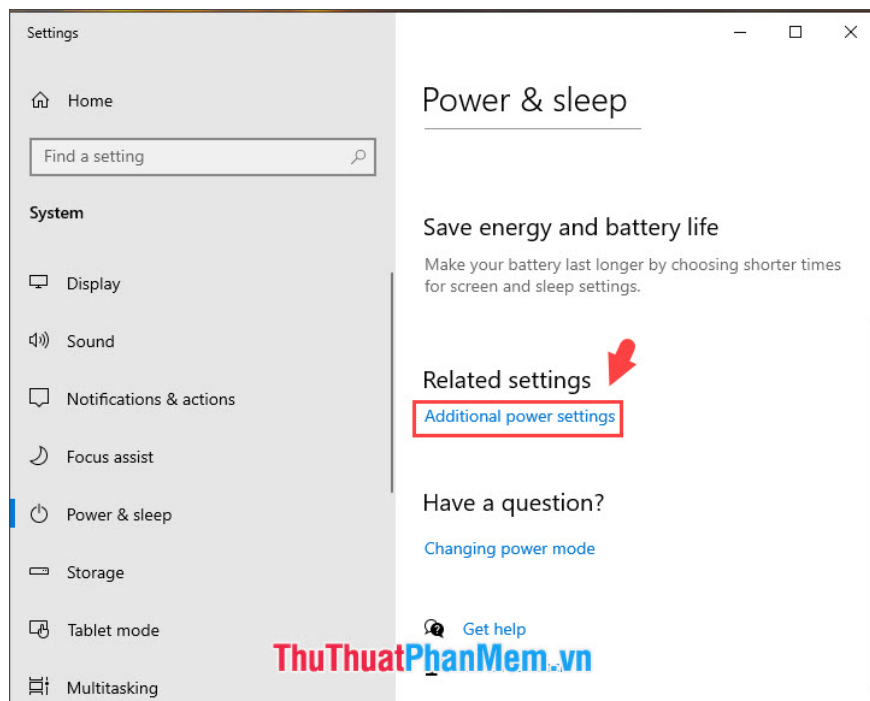

By default, this feature will be enabled on our computer without installation. Just fold the screen and the computer screen will automatically turn off.

- If you want to fold the screen without turning off the screen, follow the instructions below:

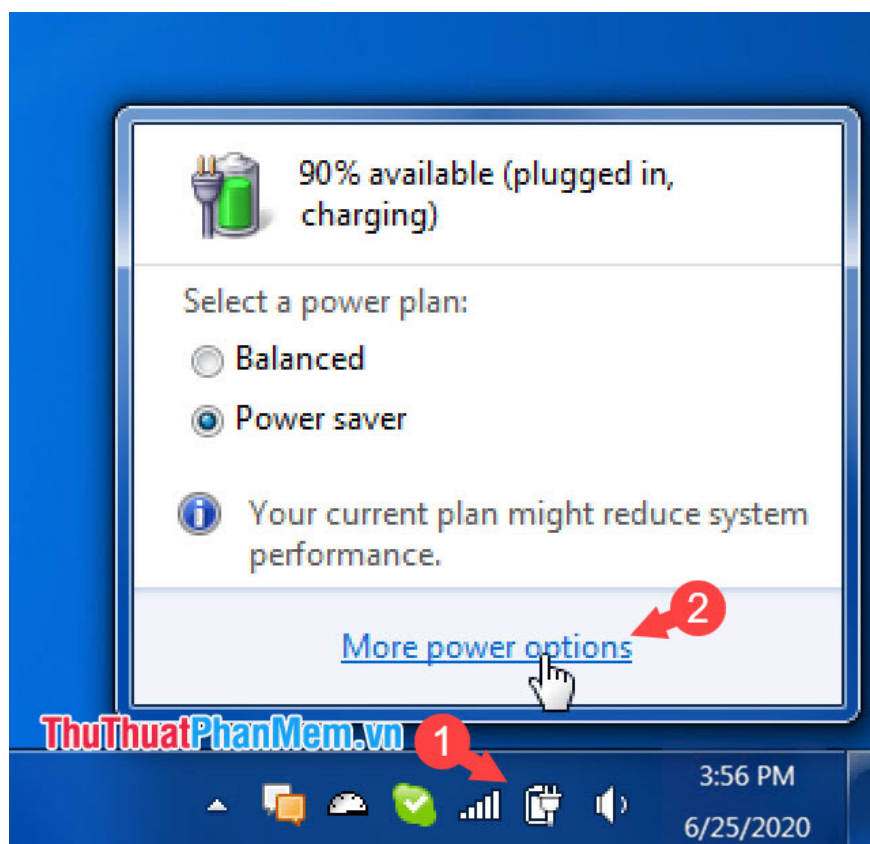

**Step 1:** Right-click the **Start** button (1) => **Power Options** (2) .

**Step 2:** Go to **Additional power settings** .

**For Windows 7:** Just right-click on the **Battery** icon (1) => **More power options** (2) to open the **Power Options** panel.

**Step 3:** Click **Choose what closing the lid does** .

## 2. Use the function shortcut on the laptop keyboard

With some laptops equipped with smart screen shortcuts such as Acer laptops, you can quickly turn off the screen with the shortcut **Fn + F6**. With some different computer models, this feature may or may not be available. To check if your computer has this feature, you can press **Fn + F1** to **F12**, you should avoid pressing the keys with the speaker, microphone or **Zz** symbols with the **Fn** key. This is used to increase or decrease the volume, turn off the speaker, mic and put the device to Sleep mode.

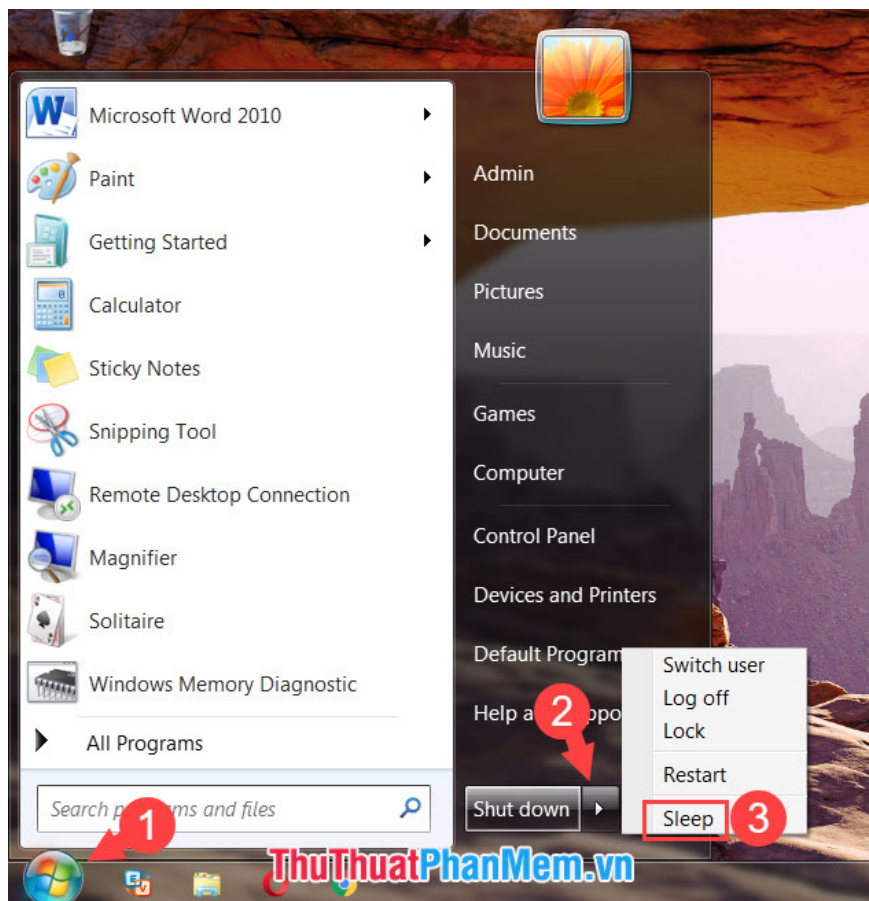

## 3. Turn off the screen using the Sleep feature

### On Windows 7

To turn off the screen and put the computer to sleep mode, go to the **Start** menu **(1)** => click the arrow next to **Shut down (2)** => **Sleep (3)** .

In addition to the above, you can also use the keyboard shortcut **Alt + F4** to open the **Shut down** interface . Next, press the arrow key **?** on the keyboard to go to **Sleep** and press **Enter** to put the computer to sleep mode.

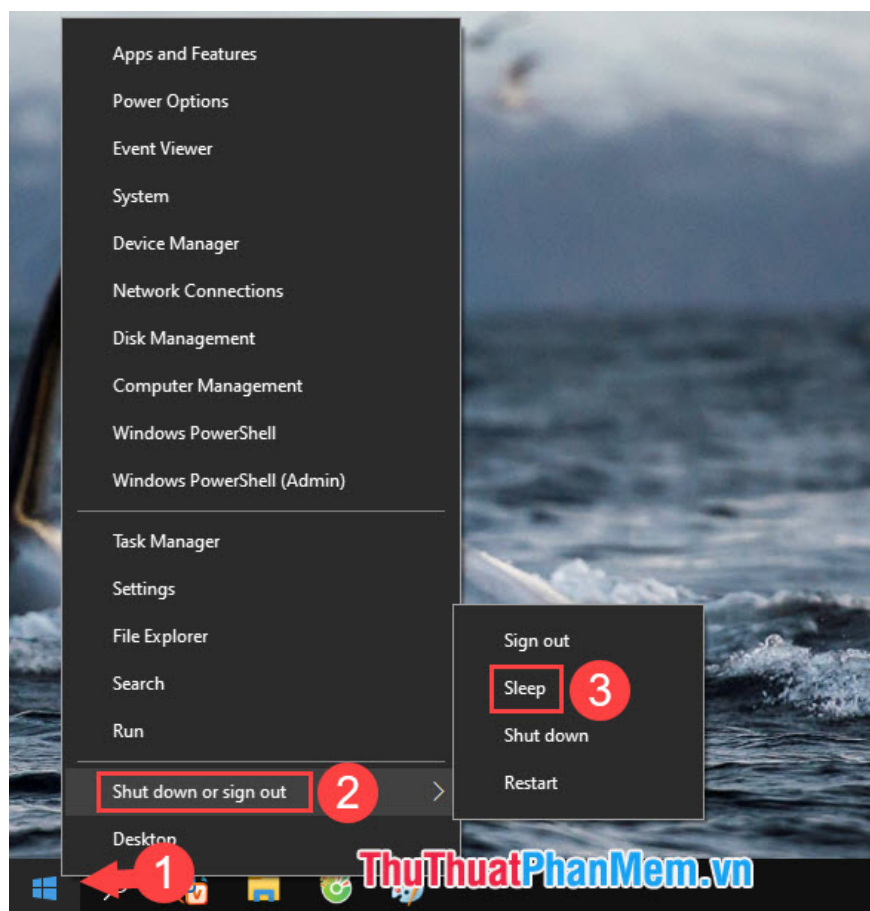

In addition, on some laptop models such as Acer, Asus . there is a shortcut to turn the computer to sleep mode with the key combination Fn + F1, F2, F3, F4.

## On Windows 10

With Windows 10, right-click the **Start** button (1) => **Shut down or sign out** (2) => **Sleep** (3) .

If you want to turn off the screen quickly without using the mouse, you use the shortcut **Alt + F4** . Next, press the phím arrow key on the keyboard to move to the **Sleep** section and press **Enter** .

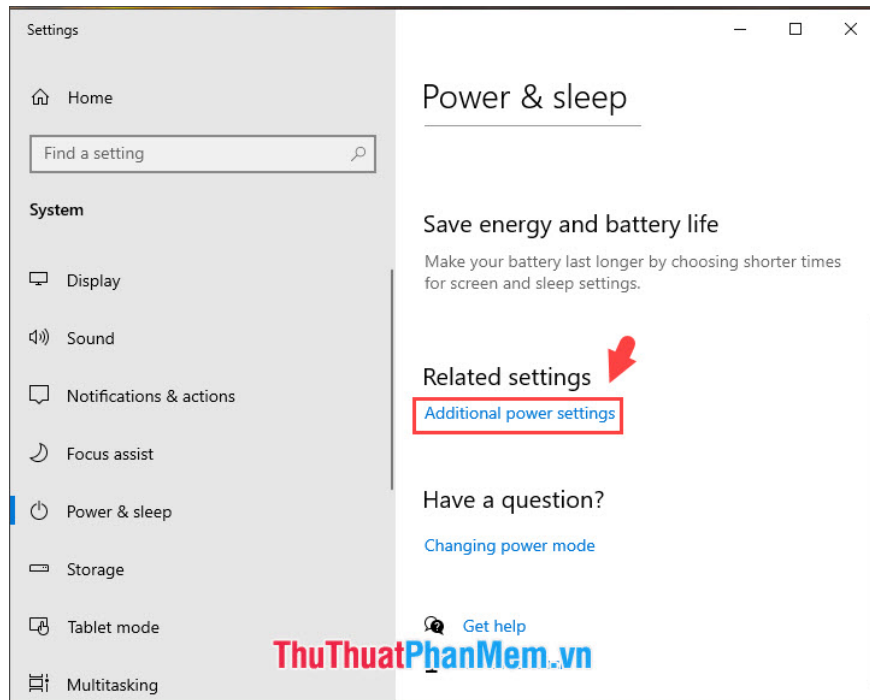

## 4. Turn off the screen with the power key

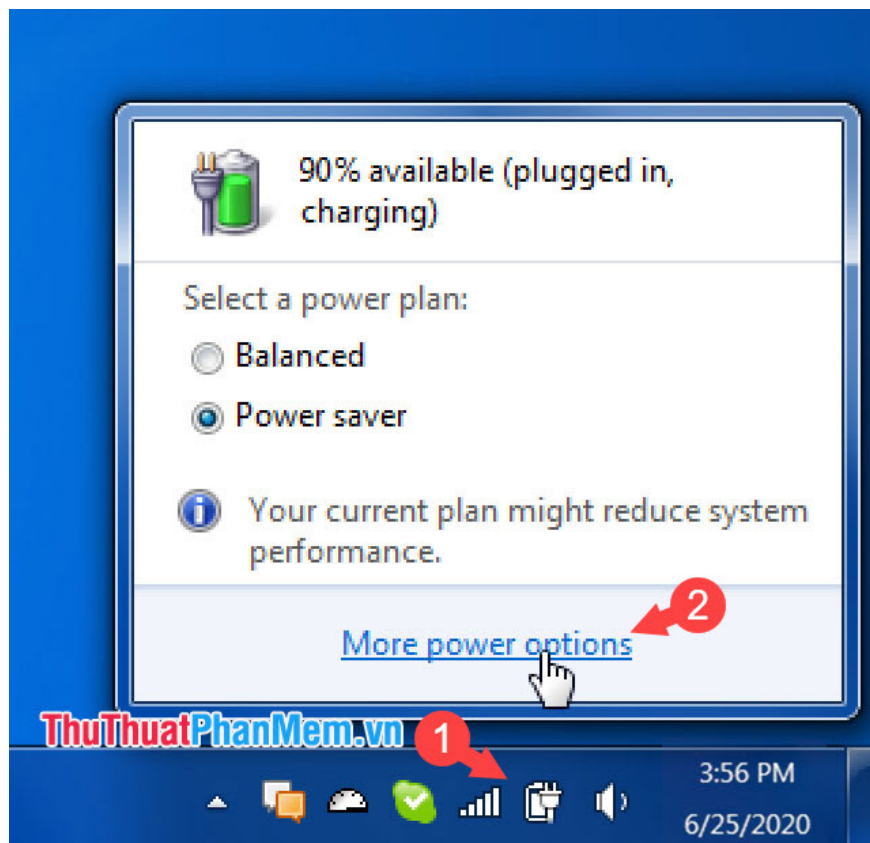

**Step 1:** Right-click Start (1) => Power Options (2) .

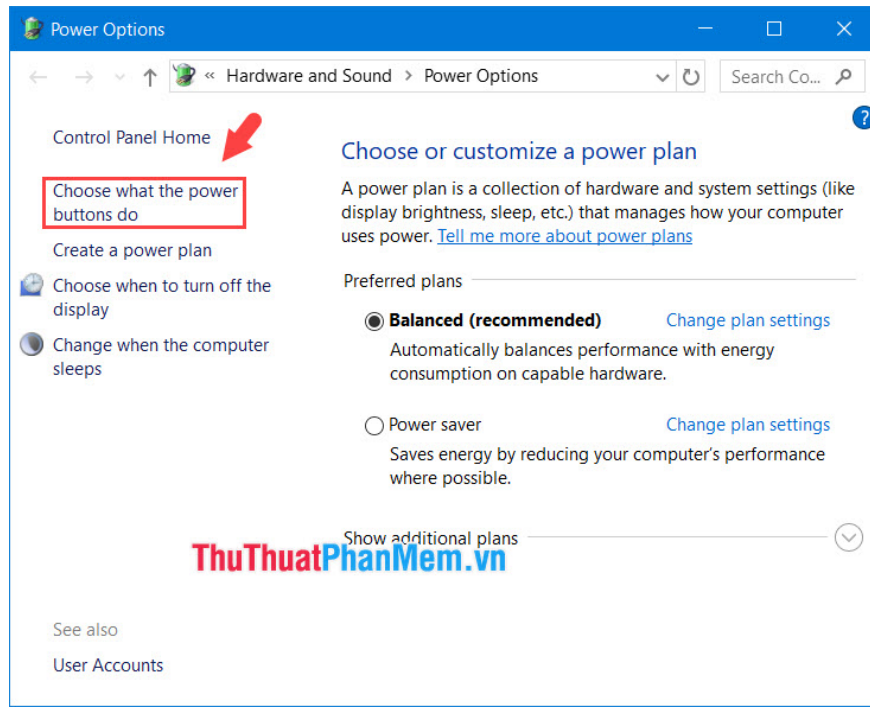

**Step 2:** Click the **Additional power settings** section .

**For Windows 7:** Right-click the **Battery** icon (1) => **More power options** (2) to quickly open the **Power Options** settings panel.

**Step 3:** You select the **Choose what the power buttons do** so .

**Step 4:** Go to **When I press the power button (1)** and turn it **Turn off the display (2)** . With the **Plugged in** part **(3)** you do the same. Click **Save changes (4)** to save changes.
