

Instructions on how to turn on the keyboard light on Lenovo laptops

Lenovo laptops have a light on feature to help you use them in low light conditions, at night easily. Discover now how to enable this feature on your laptop.

Lenovo laptops have a light-on feature to help you use them easily in low-light conditions, at night. Let's find out how to turn on the keyboard light of Lenovo machines with TipsMake.

Lenovo laptops with keyboard lights

Lenovo equips keyboard lights mainly for high-end and mid-range products such as Gaming, Ideapad, Thinkbook, Thinkpad and Yoga.

Lenovo's arrangement of keyboard lights will make it more convenient for users to use in low-light environments, at night.

How to know if a Lenovo laptop has a keyboard light or not?

You can check if your laptop is equipped with a keyboard light by looking at the F1 to F12 keys or the Spacebar. In case you see the above keys with a light icon, your laptop has a keyboard light. Otherwise, your computer is not equipped with a keyboard light.

In addition, you can also check in the user manual when buying the device, see if there is a guide to turn on the keyboard LED button.

Instructions to turn on the keyboard light on Lenovo laptops

There are 3 ways you can turn on the Lenovo laptop keyboard.

Turn on Lenovo laptop keyboard light with physical keys

Observe the F1 to F12 key sequence on your laptop, if there is a keyboard light icon, you just need to press it to make the keyboard light up.

Normally, the physical key with the keyboard light icon will be located at the F3 and F4 keys of Lenovo laptops. You can customize the brightness of the keyboard light by pressing F3 (decrease) or F4 (increase brightness).

Note: Depending on the design of each Lenovo model, the physical keys to adjust the keyboard light will also have certain differences. Therefore, you should observe your device to find the correct keyboard light key.

Turn on the Lenovo laptop keyboard light with a key combination

The next way to help you turn on the keyboard light is through pressing the keyboard combination. In case your computer does not have the light on icon on the F1-F12 key sequence, you can turn on the keyboard light by pressing the Fn key + Spacebar key combination.

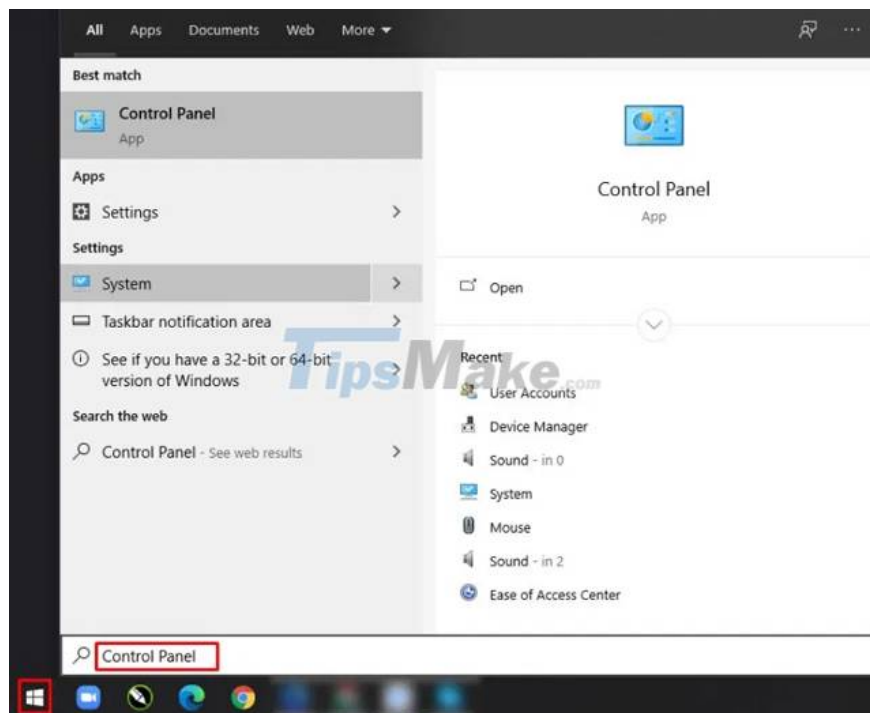

This will help you quickly turn on the light for the laptop keyboard.

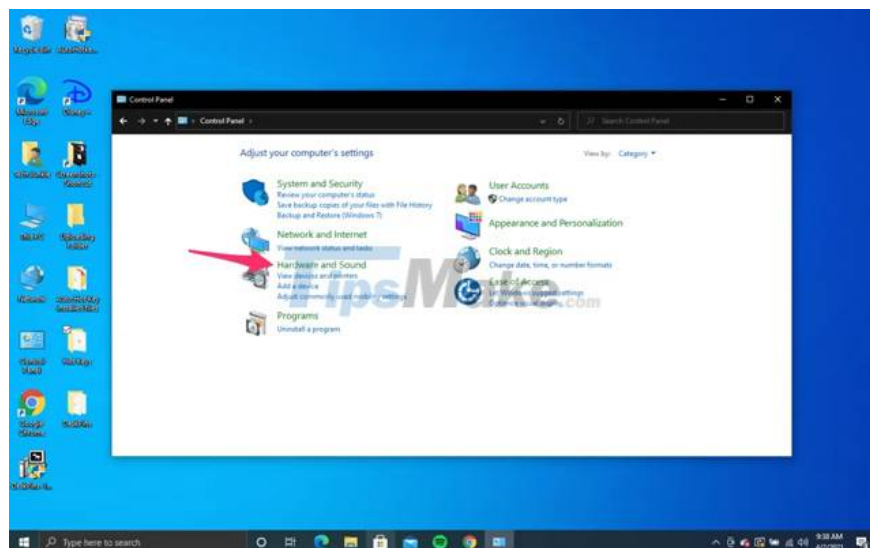

Turn on Lenovo laptop keyboard light with Control Panel

In case you have tried the above 2 ways and the keyboard light is still not on, try installing it through the Control Panel.

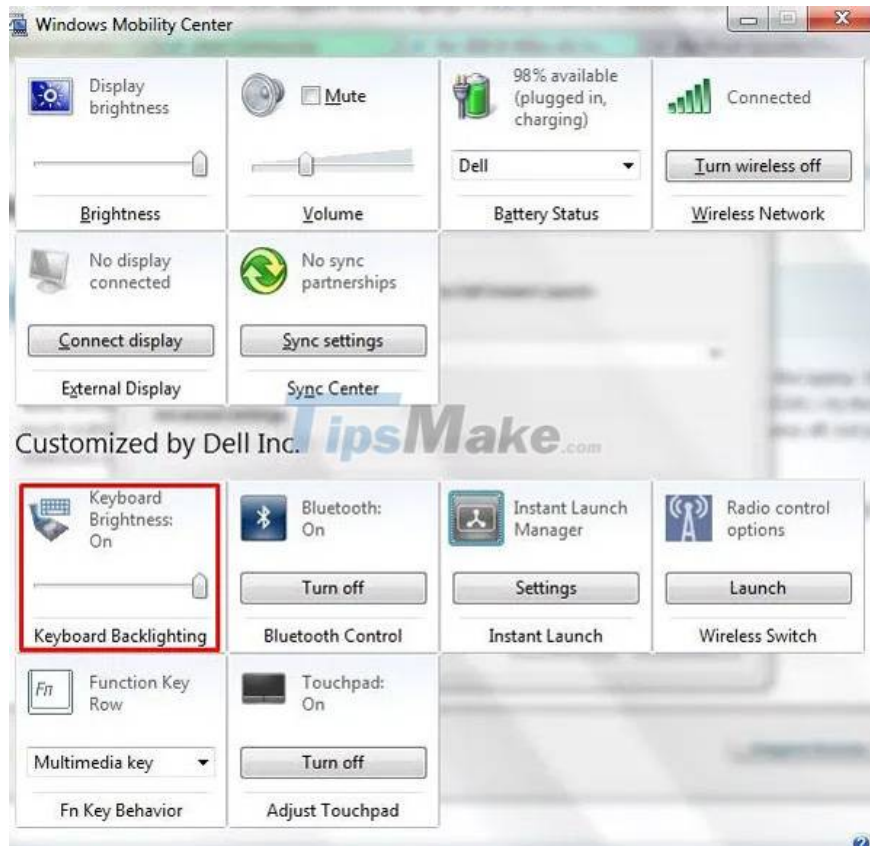

1. Open Control Panel through the search menu on the Taskbar.

1. A new window appears, click on Hardware and Sound.

1. Next, select the Windows Mobility Center item.
2. In the Windows Mobility Center window, click Keyboard Backlighting.

1. At Keyboard Backlighting, you need to customize it to On if you want to turn on the keyboard light or Off if you want to turn it off. You can also adjust the brightness of the keyboard by selecting Bright or Dim.

1. Finally select OK to complete the installation.

Above is the entire content of Instructions on how to turn on the Lenovo laptop keyboard light that TipsMake would like to introduce to you. Hopefully this article will help you more convenient in turning on the keyboard light when using.
