iCloud is Apple's proprietary cloud storage service. With this service, Apple devices such as iPhone / iPad or Macbook . can store photos, files and sync them on different devices.

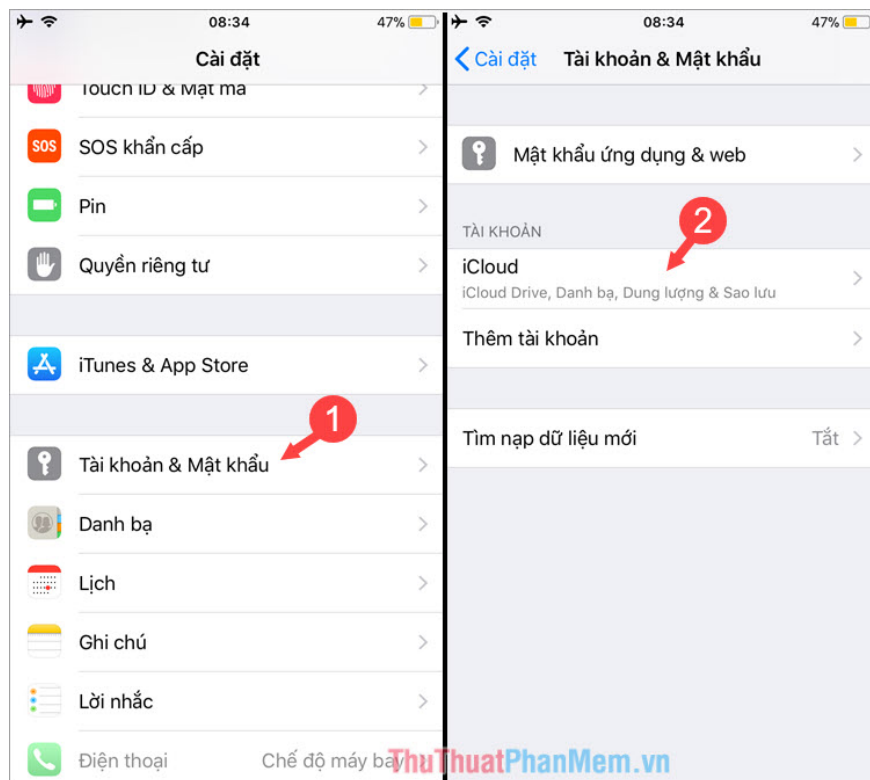

In today's article, TipsMake.vn will guide you how to view photos on iCloud quickly and standardly.

## 1. Sync iPhone photos to iCloud

In order to have photos displayed on iCloud, of course we have to transfer them from your iPhone / iPad. The steps are as follows:

**Step 1:** Go to **Settings => Accounts & Password => iCloud** .

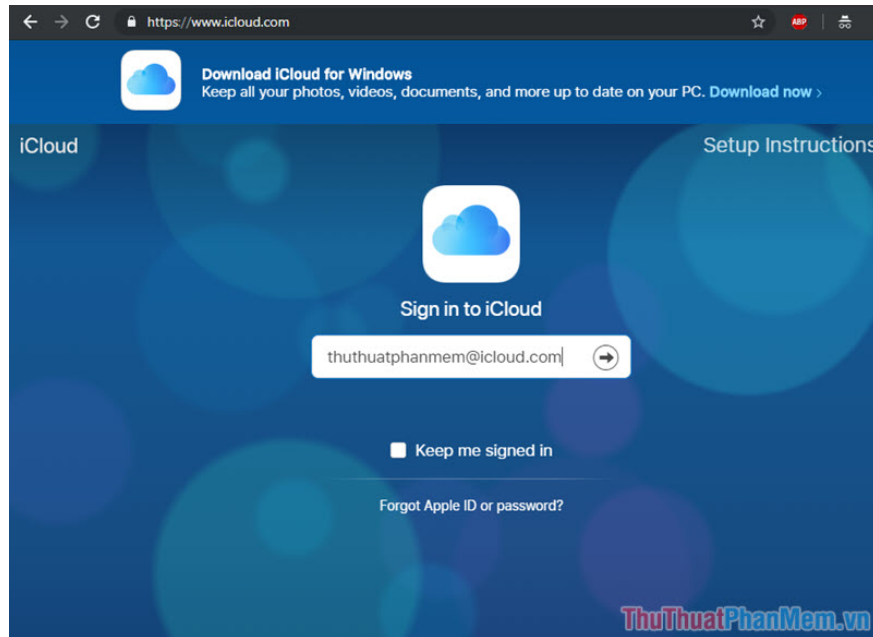

**Step 2:** Choose **Photos** => switch the switch to **On** for **iCloud Photo Library** and **Upload to My Photo Library** .

## 2. View photos on iCloud

**Step 1:** You access iCloud and login iCloud account has synchronized your photos at the following address:

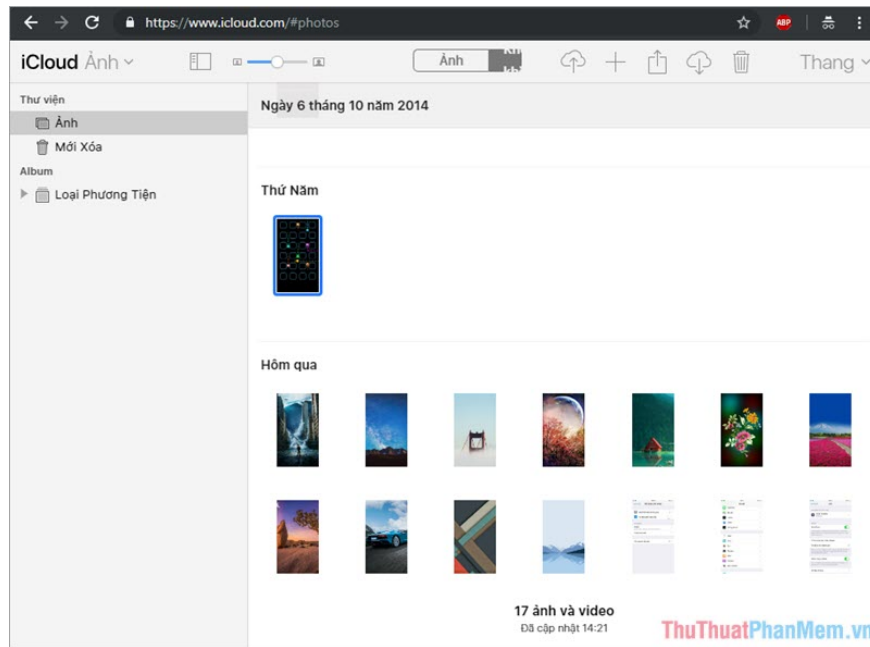

<https://www.icloud.com/>

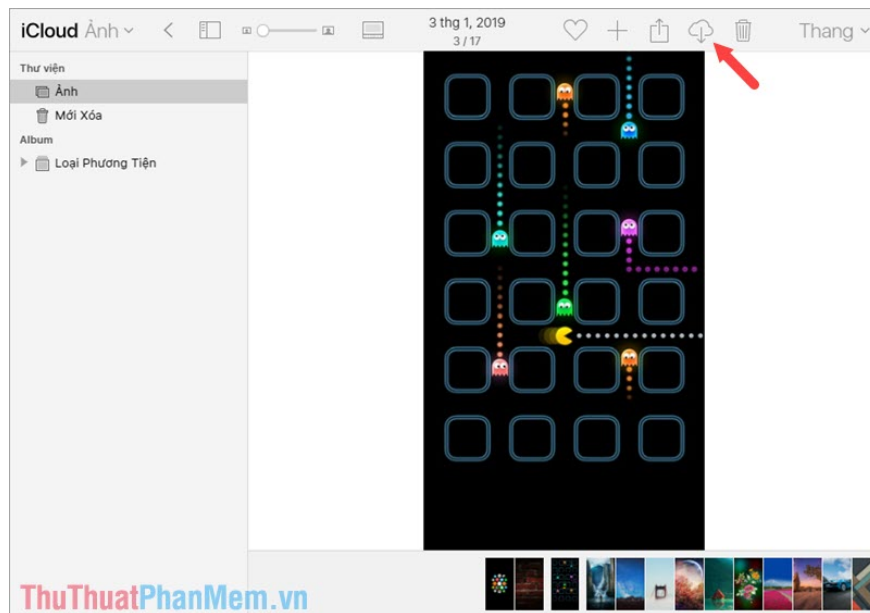

**Step 2:** At the main interface of iCloud, you click on the **Photos** icon .

**Step 3:** In the **Photos** folder of iCloud will display all photos that you have synced from iPhone / iPad. You can select the image you want to view by double clicking on it.

**Step 4:** While browsing photos, if you like and want to download that image to your computer, click the Download icon as shown below.

With iCloud service, you can easily sync your photos and videos to the cloud library and view them wherever you are. Good luck!
