

Instructions on how to watch TV online on your computer with VLC Media Player

To watch TV on your computer with VLC you need to do the following: - Install VLC software. - Install Octoshape support tool to select channels. - List of TV channels.

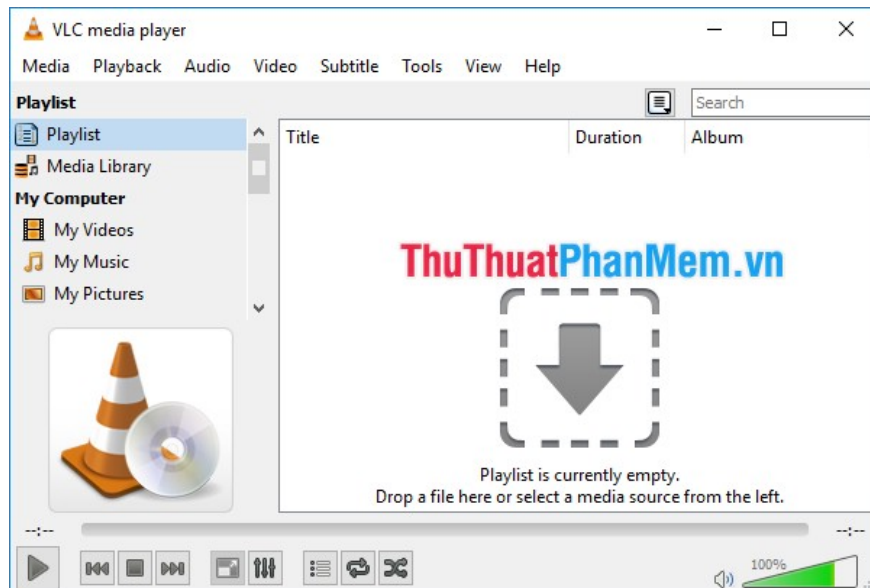

To watch TV on your computer with VLC you need to do the following:

- Install **VLC software**.
- Install **Octoshape support** tool to select channels.
- **List of TV channels**.

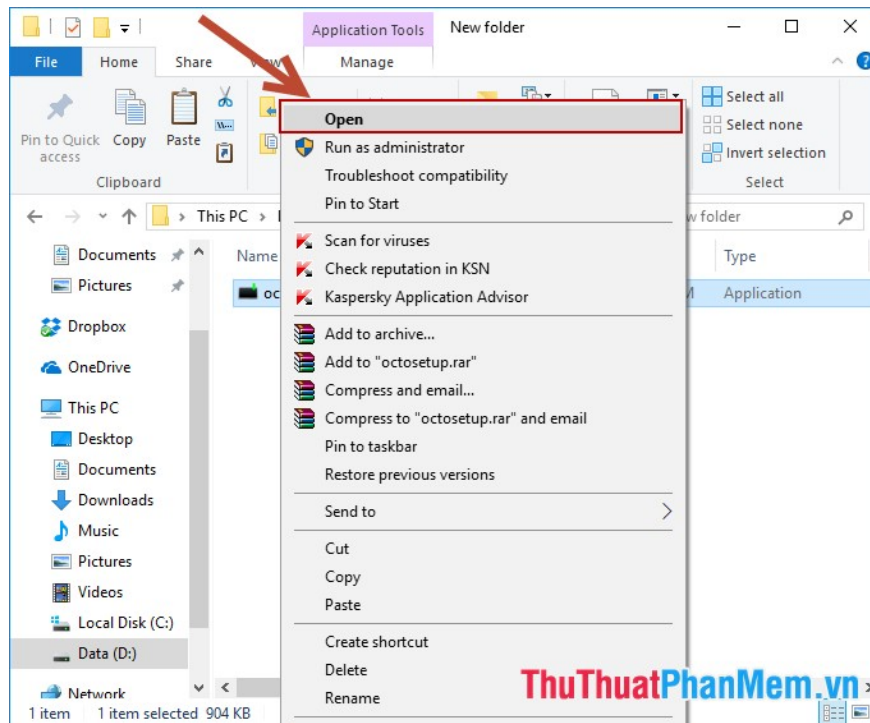

The installation steps are as follows:

Step 1: Visit the website: <https://www.videolan.org/vlc/index.html>

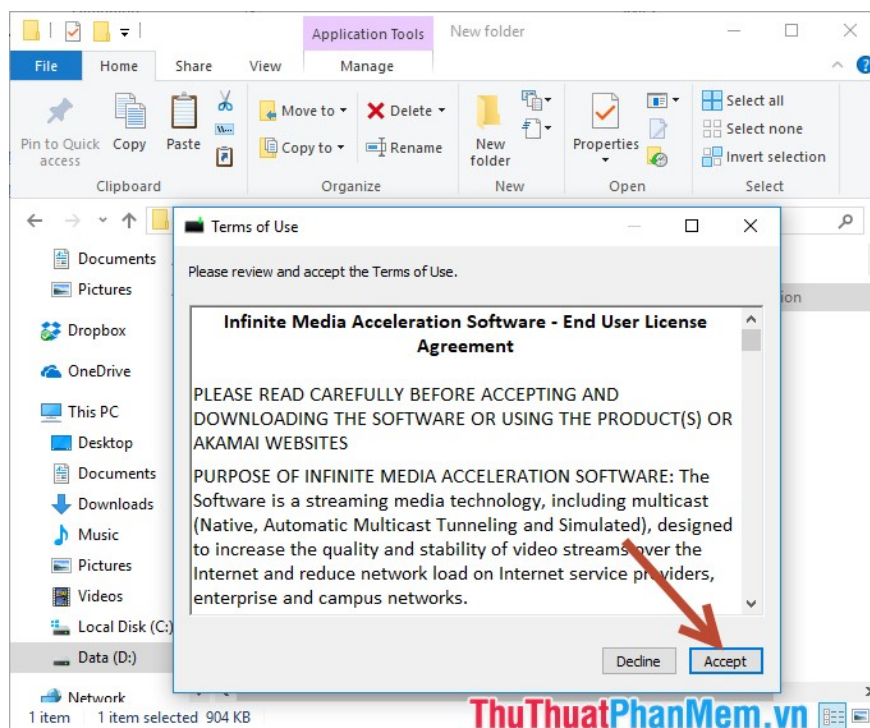

To download the **VLC** software to your computer. After downloading and installing, the **VLC** software interface is as shown:

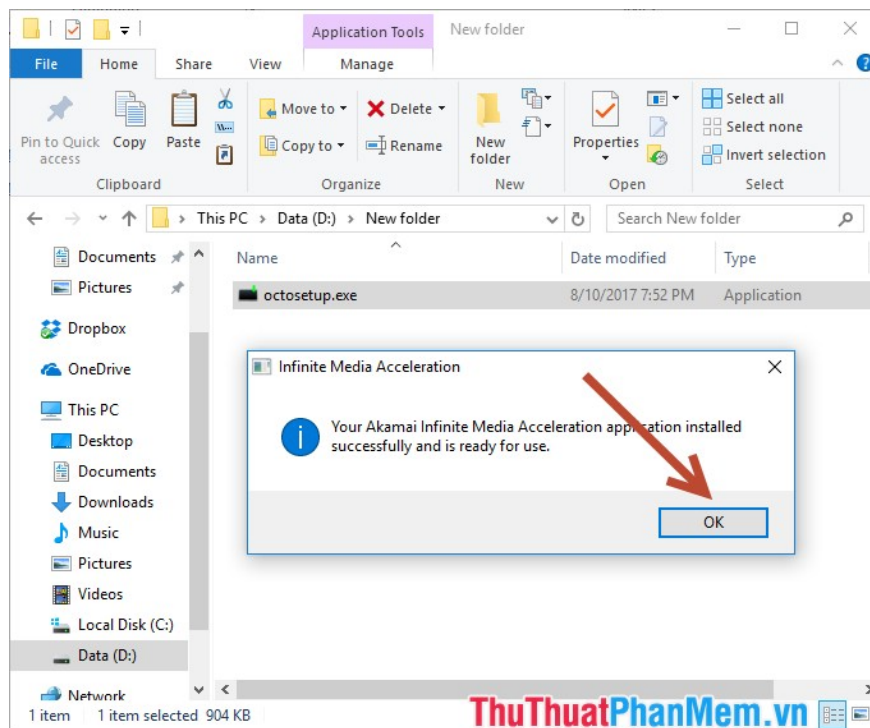

Step 2: Visit the website: <http://www.octoshape.com/support/infinite-hd-octoshape-app/> to download the **Octoshape** plugin to support channel access, without this plugin you can not watch OK. After downloading, click **Open** to install the plugin:

Step 3: Click **Accept** to confirm the settings:

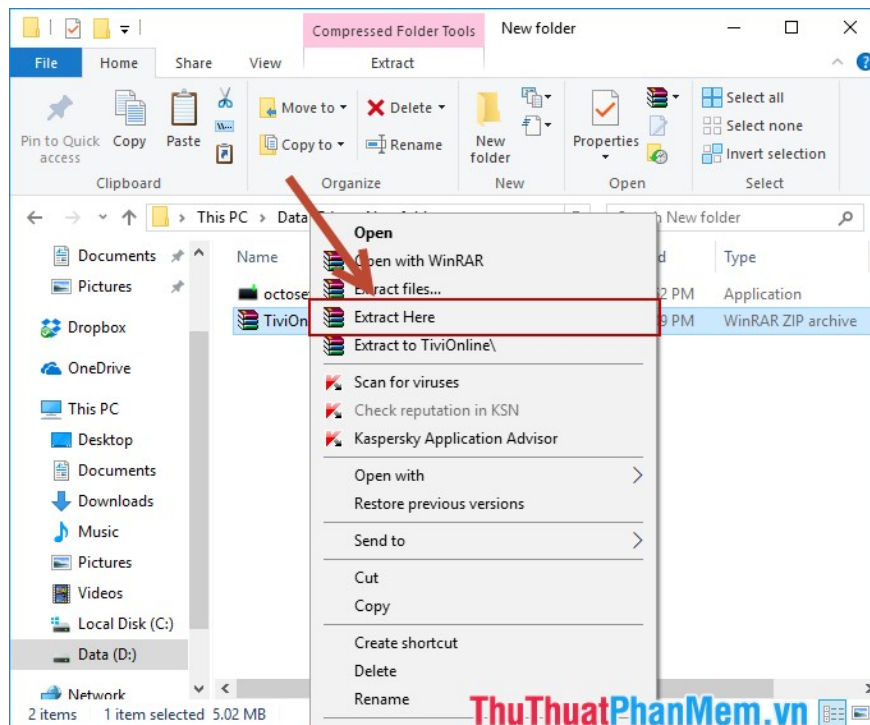

Step 4: Click **OK** to confirm the successful installation:

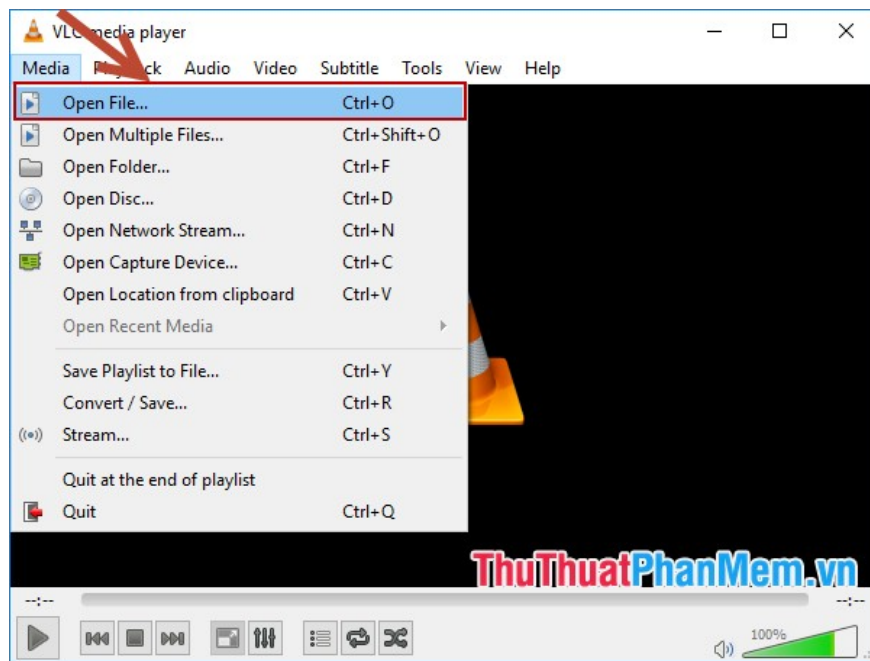

Step 5: Access the link:

<http://www.mediafire.com/file/kqtxnb87igfzo6j/TiviOnline.zip>

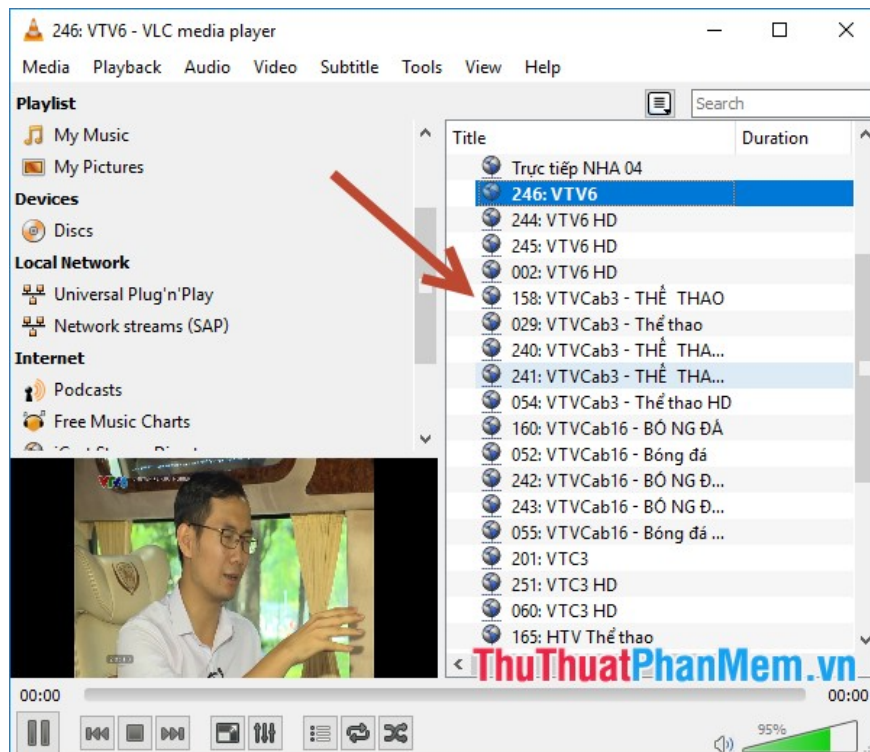

to download the list of TV channels to your device. After downloading, extract the file:

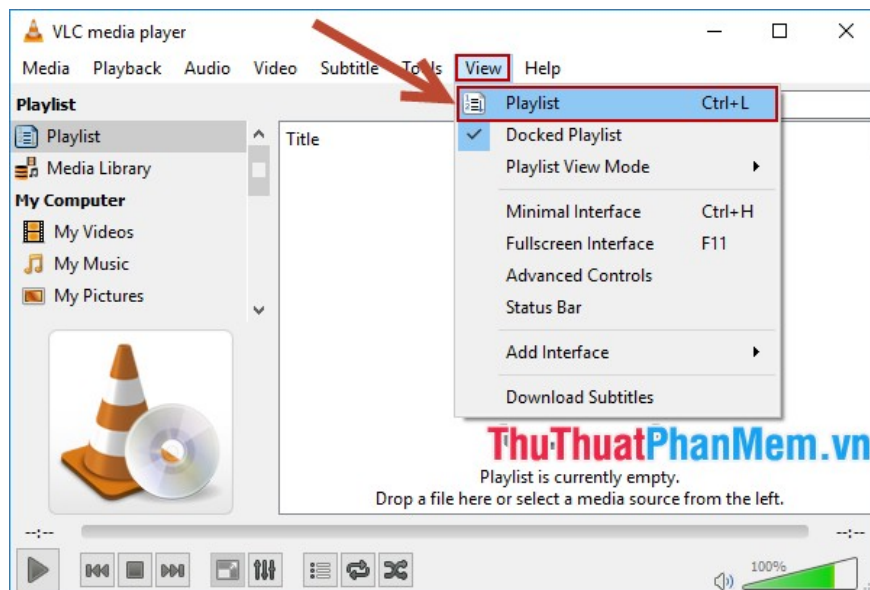

Step 6: After extracting the file, open VLC -> on Media tab -> Open File:

Step 7: Select the path to the list of recently downloaded channels -> wait a moment for the channel list to be uploaded to VLC -> select the TV channel you want to watch in the **Title**:

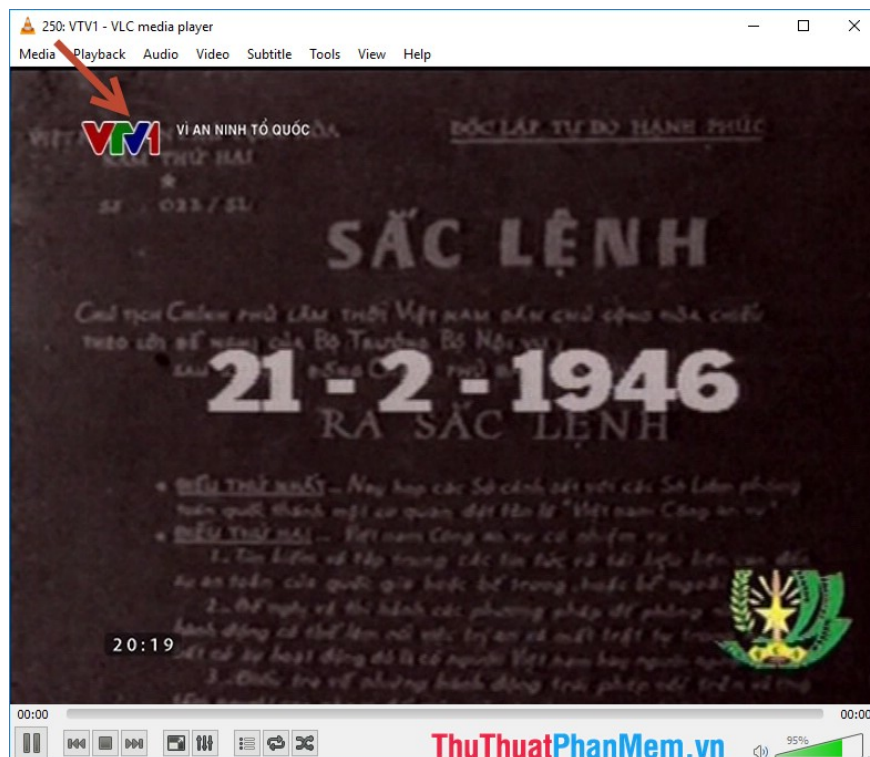

- If the channel list is not displayed on the **View** tab -> **Playlist**:

- After selecting the channel is finished, you zoom in to separately track that channel:

- In case you want to change another channel, go to **View -> Playlist ->** select the channel as required. For example, here choose **VTV1** channel :

- If you want to add a new channel to the playlist, save that channel as a .xspf file

Above is a detailed guide on watching TV online on a computer using VLC. Good luck!
