

Instructions on how to write style letters on Skype

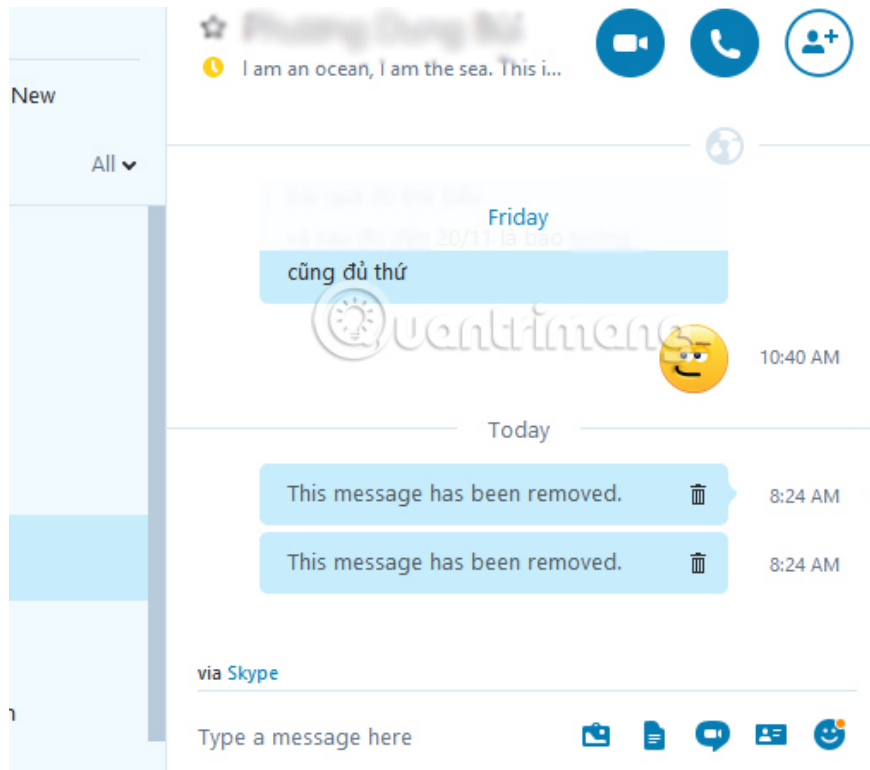

On Skype, it is possible to change the font to other formats such as bold, italic or inline text with a very simple way.

As one of the most popular applications and chat software, Skype supports users to contact friends at any location, or use different means of communication due to the ability to synchronize accounts. . And when sending messages, we can change the normal writing style, into bold typefaces, italics or middle tiles. Along with this set of emoticons and style writing on Skype, your conversation will be much more interesting.

1. How to write bold, italic and hyphenated characters in Skype:

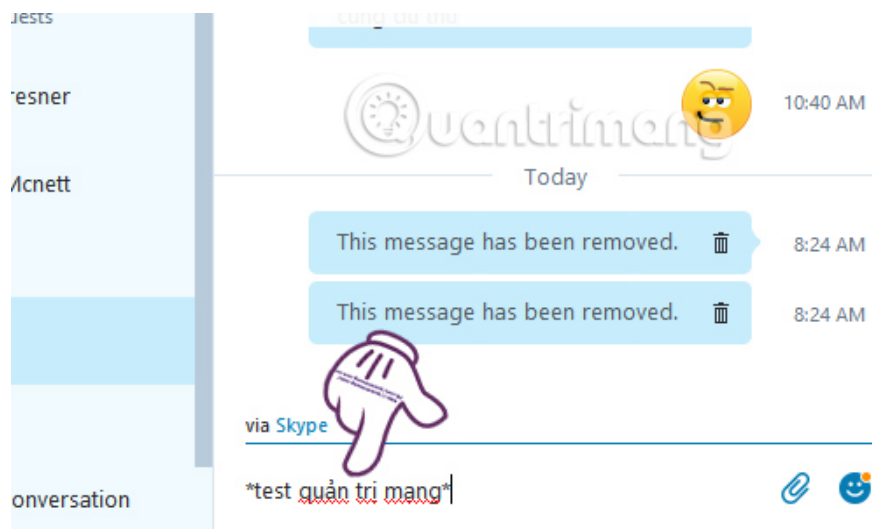

Step 1:

First log into your Skype account and open a chat dialog.

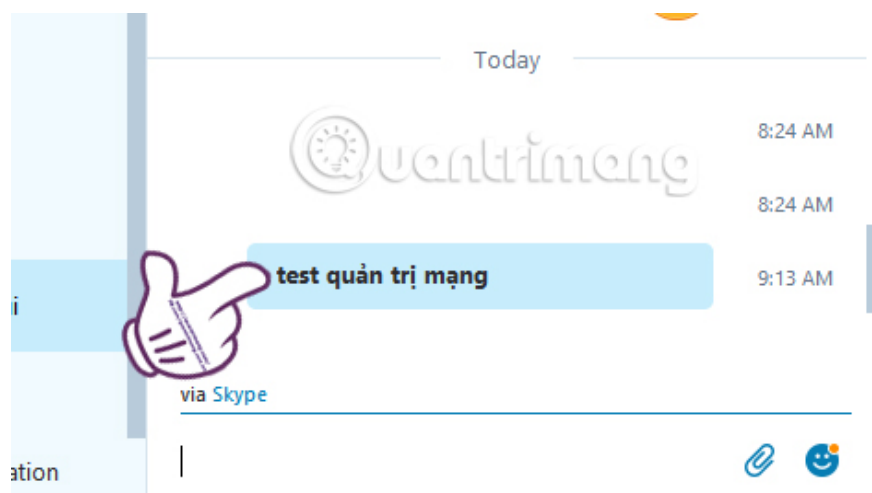

Step 2:

To **write bold letters** and send them to friends, in the message entry section, we will **add a * at the beginning and the end of the chat** . Then press **Enter** to send the message.

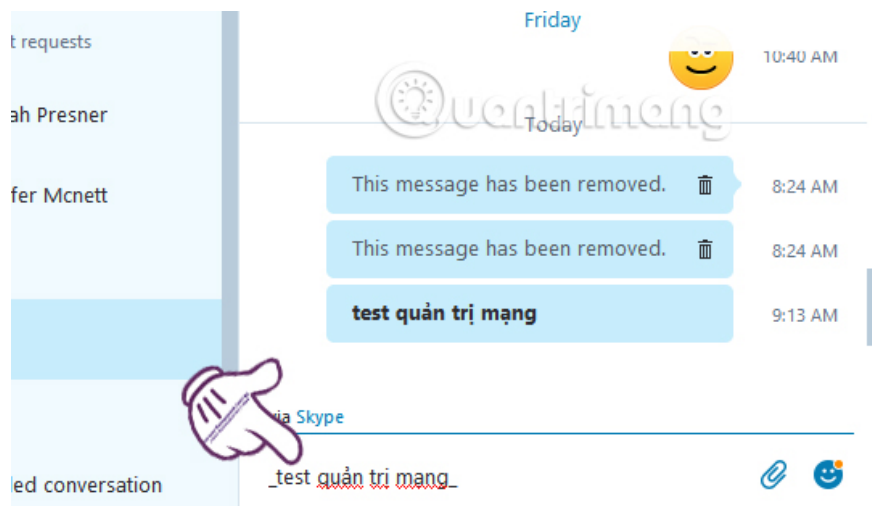

For example, I will type *** network admin test *** and the result will look like the following:

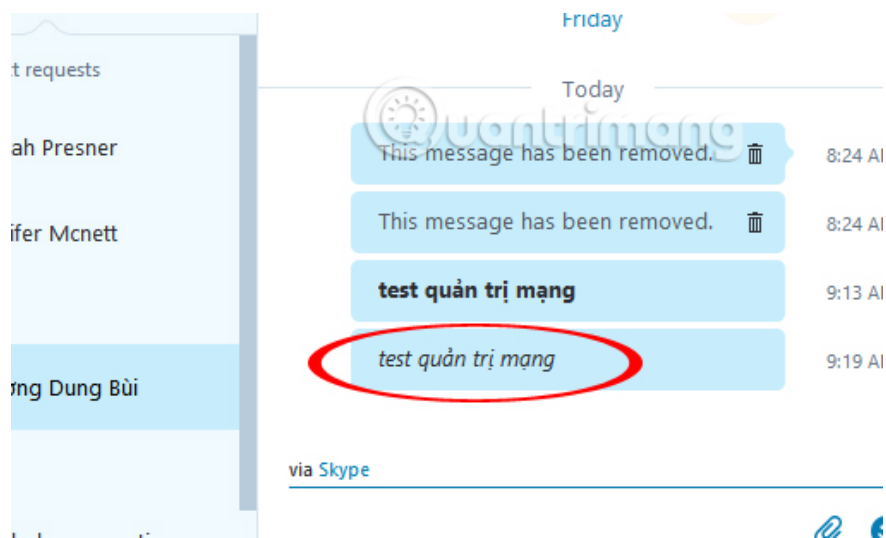

Step 3:

If we want to **write italic** , enter **_ in front and behind the chat** .

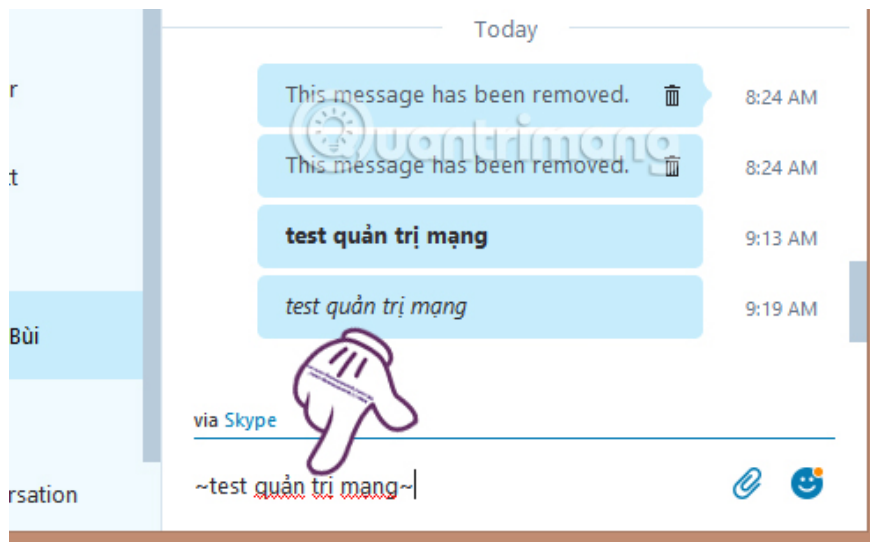

And we will get the result as shown below:

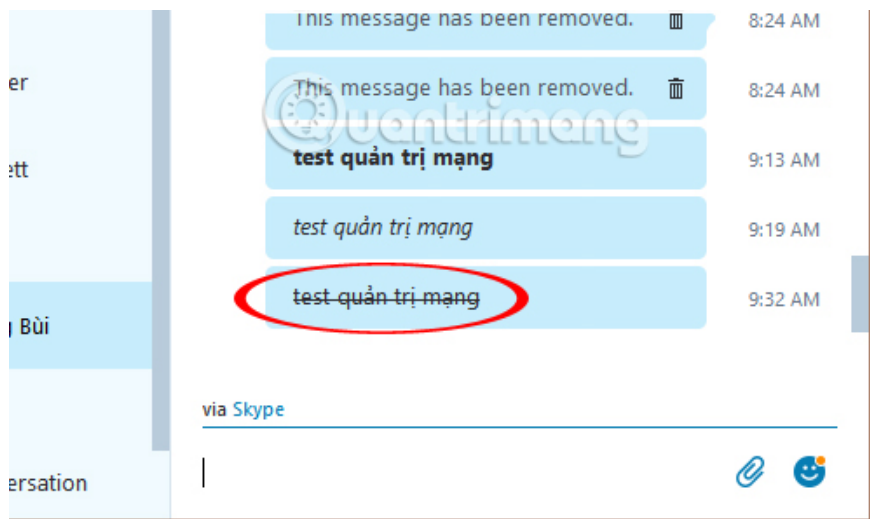

Step 4:

In addition, users can also send chat messages in **the middle of the text** , when you add a **~ sign before and after the same chat.**

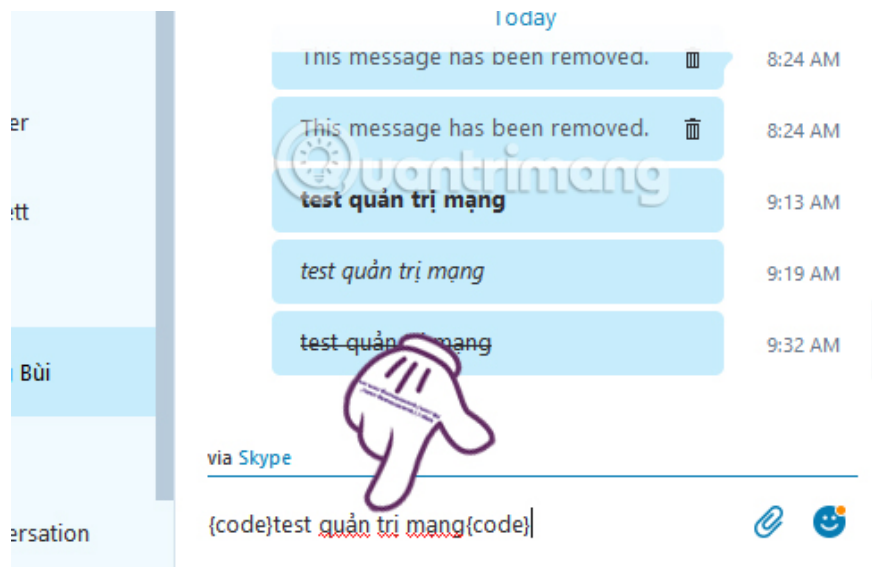

You will also get the middle font type as shown in the picture:

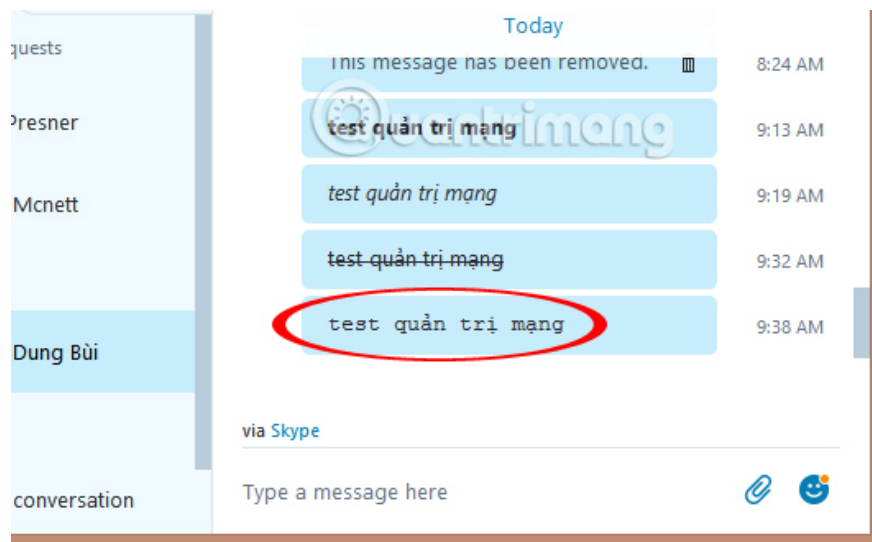

Step 5:

In addition, we can also **add {code} at the beginning and after the chat** to use another font when texting.

You will also have a different typeface compared to the regular form on Skype.

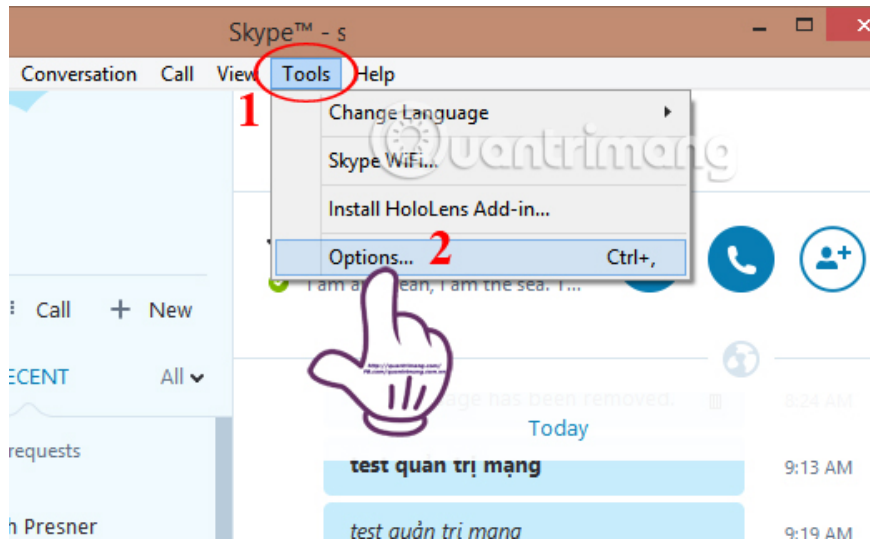

2. Fix the error of writing style letters on Skype:

If we have applied the above steps for each typeface, but do not appear in the conversation in the correct format, then check the settings on Skype.

Step 1:

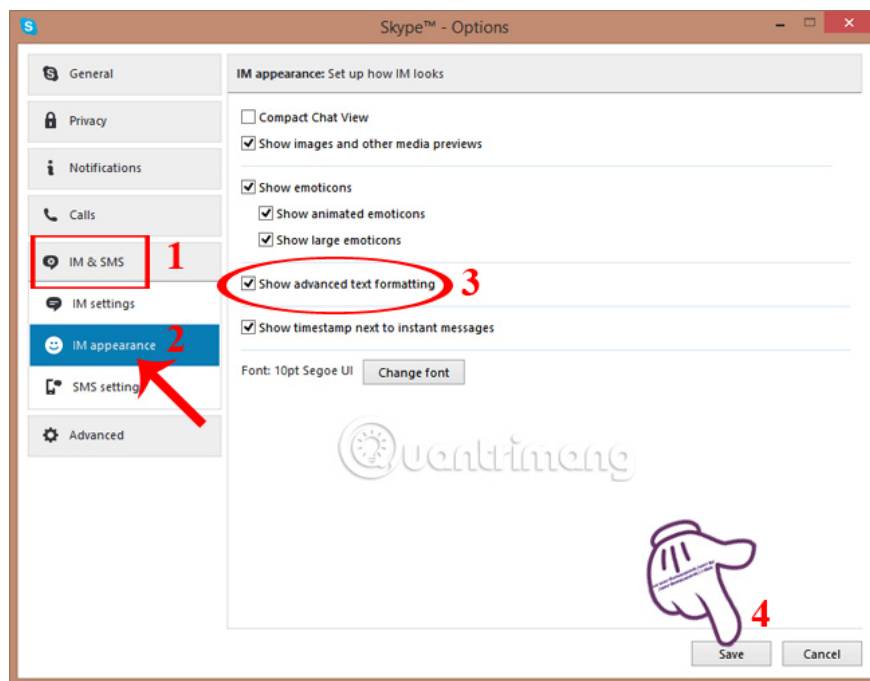

On the Skype interface, click on the **Tools tab** and select **Options** . Or press Ctrl +,

Step 2:

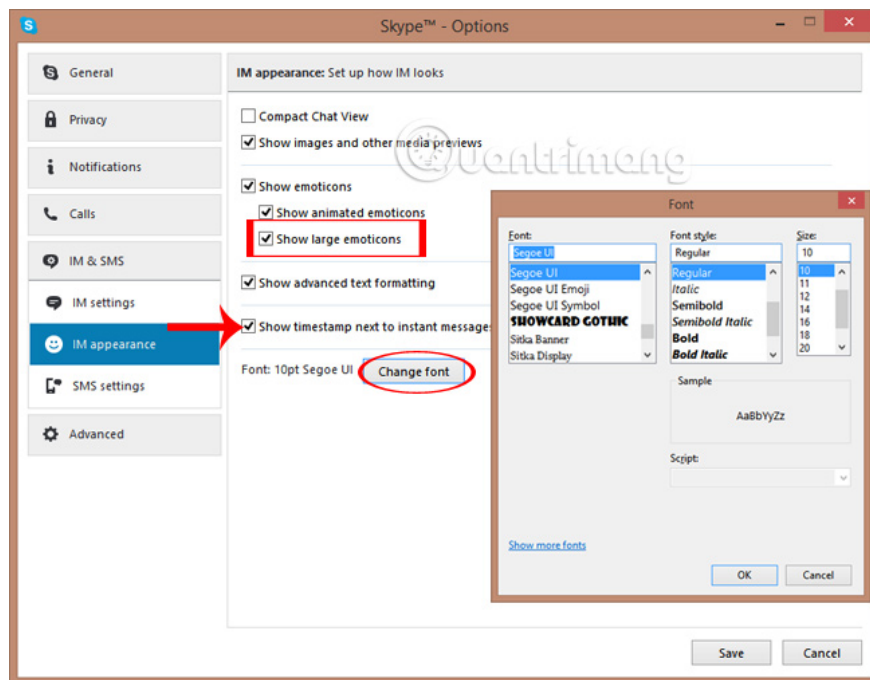

In the Options interface, on **the left menu bar** click on **IM & SMS** . Next select **IM appearance** .

Look at the interface on the right, check **the box for Show advanced text formatting** . Click **Save** to save.

Also, in this Options option, you can also change some of the following settings:

1. **Change font** : change the font when chatting on Skype.
2. **Show timestamp next to instant messages** : show or hide chat time on Skype.
3. **Show large emoticons** : show small emoticons.

The above is a tutorial to change some simple fonts when we text and play with friends on Skpye. Besides, you can also change some settings in Options. Try the different font formats on Skype.
