2. Make artistic black and white photos with PhotoScape
3. How to edit photos with Camera360 on the computer

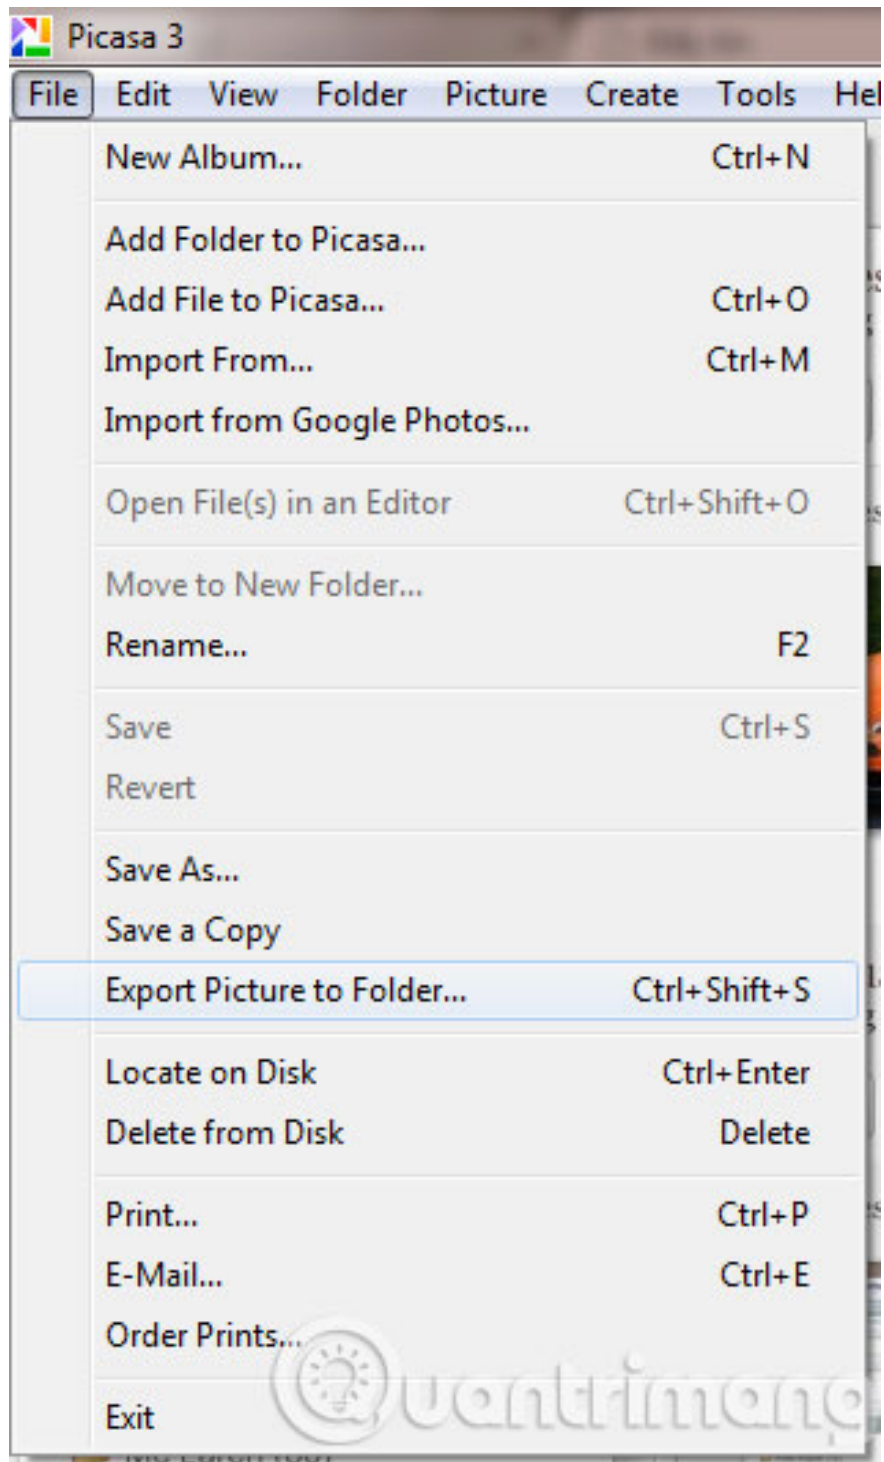

Add watermark to photos

You can protect your images by adding watermark to it. Each watermark in Picasa will be in white text and added to the lower right corner of the photo during the photo export process or uploaded to Google Photos. To add a photo watermark, please use the steps below:

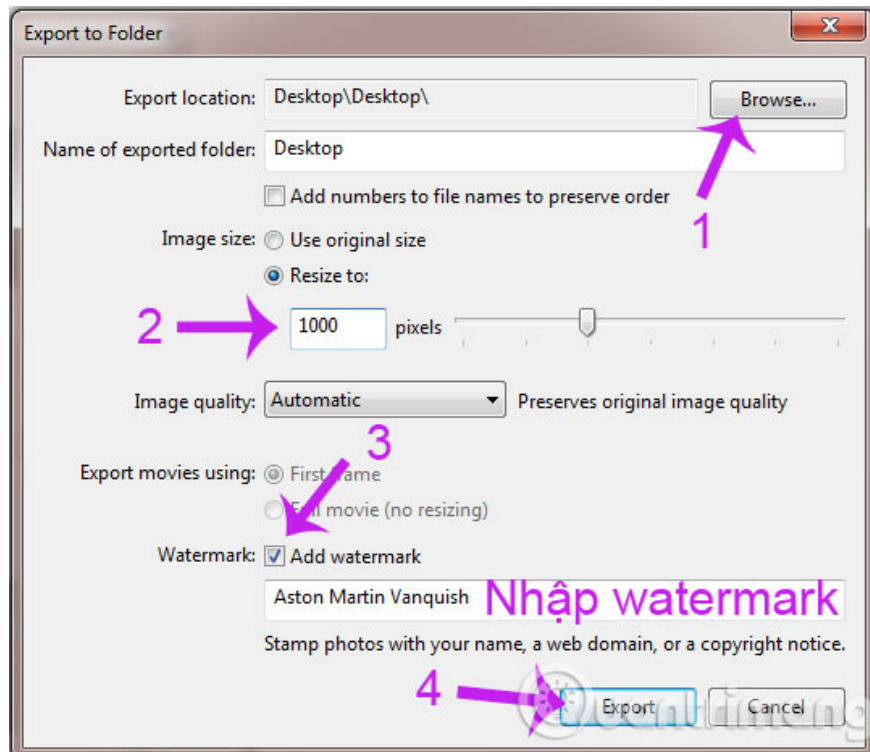

Step 1 : Select the image you want to export

Step 2 : Go to **File** menu, select **Export Picture to Folder**

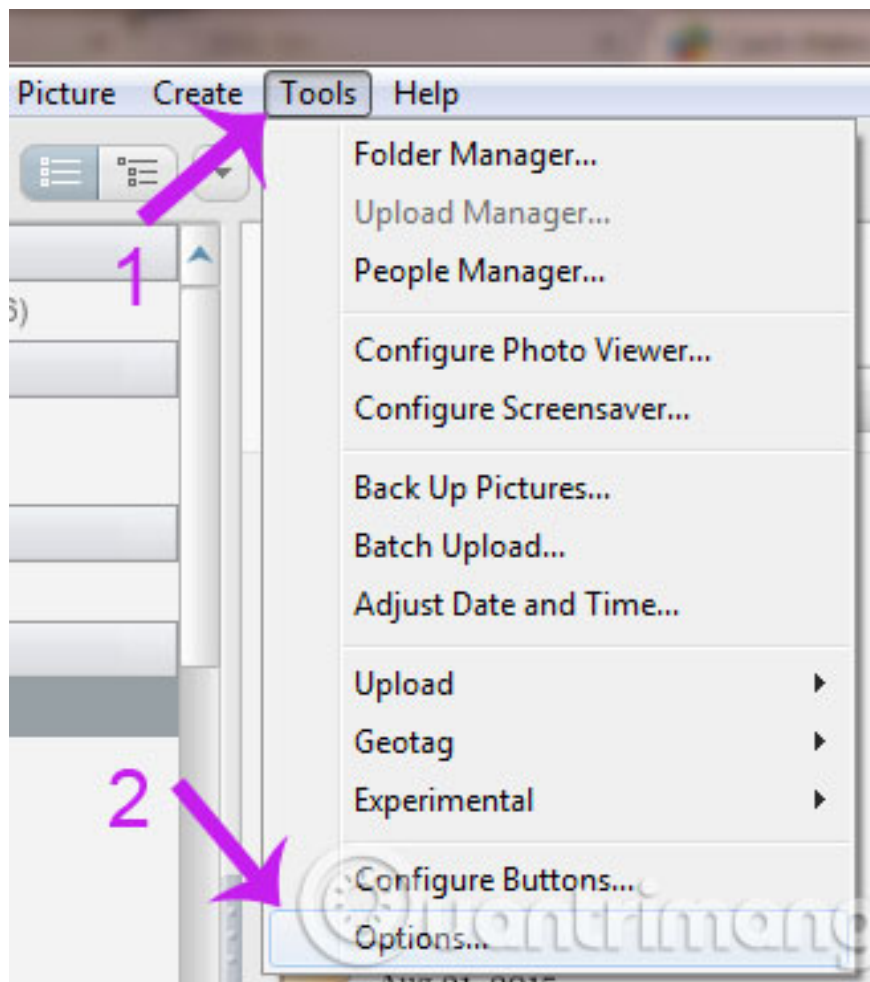

Step 3 : In the **Export to Folder** dialog box, you can select the directory path containing the file, adjust the resolution, add watermark to the image. Then press **Export**

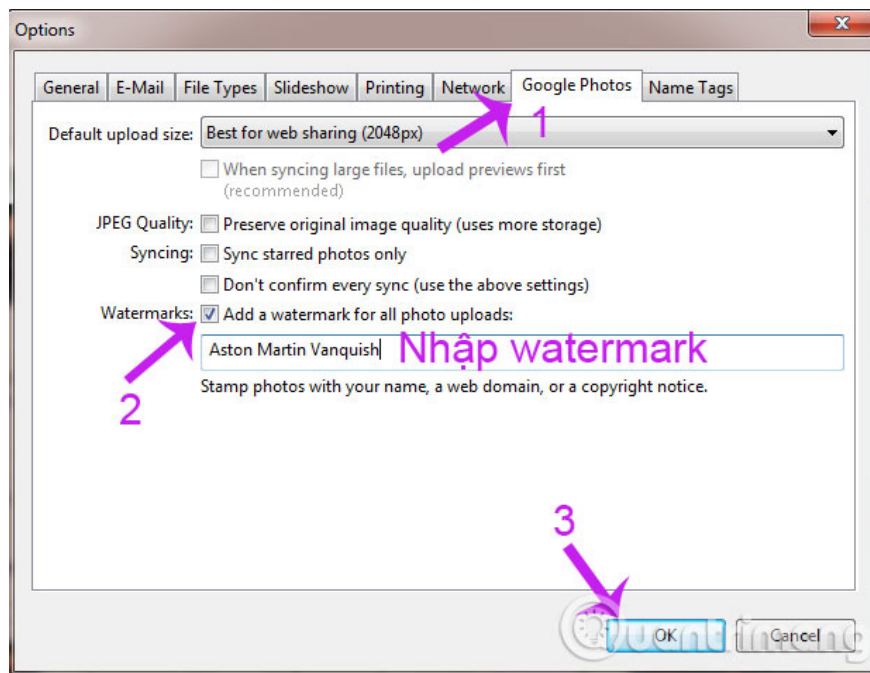

And this is the output file

In addition, you can add Watermark when uploading photos to **Google Photos** by going to the **Tools** menu, selecting **Options**

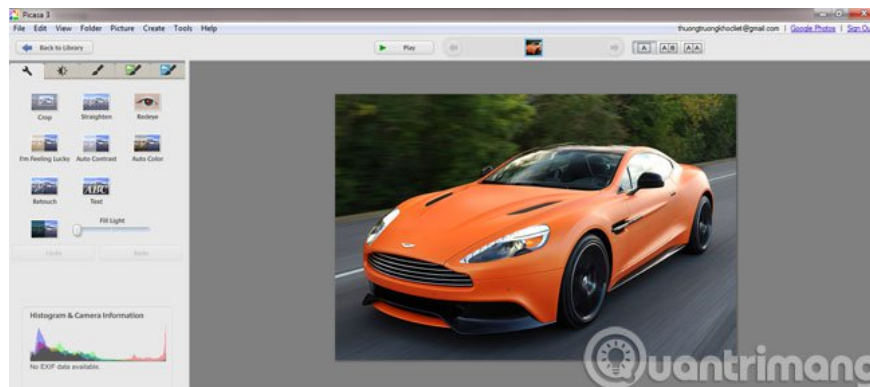

In the **Options** dialog, you go to the **Google Photos** tab, tick the box **Add a watermark for all photo uploads** and fill in the watermark in the box. Then click **OK** . From this, photos uploaded to **Google Photos** will always come with watermark.

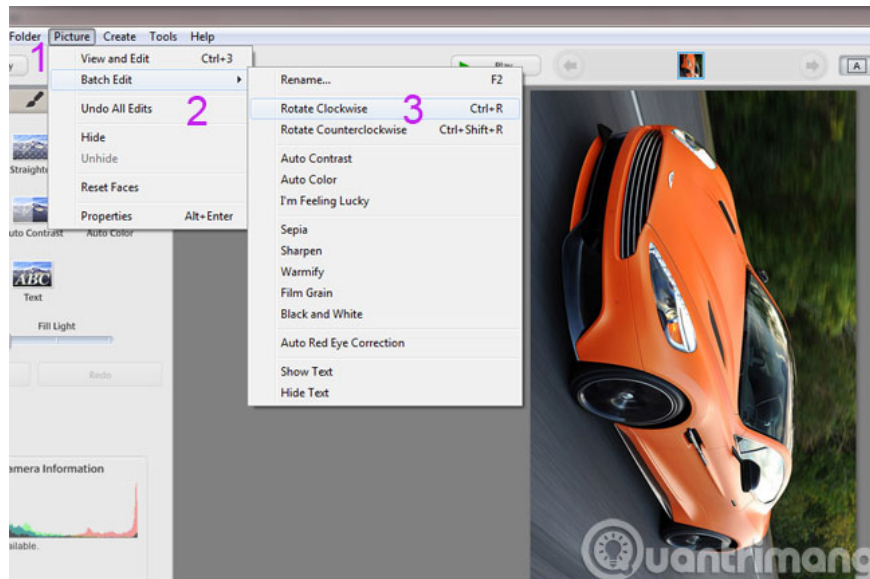

Rotate and flip the image

Step 1 : From the main interface of Picasa, double click on the photo you want to rotate or flip

Step 2 : Go to the **Picture** menu, select **Batch Edit** and then select **Rotate clockwise** to rotate the image clockwise

If you want to rotate the image counterclockwise, select **Rotate Counterclockwise**

Besides, to flip the image, you can use the following two key combinations

1. **Ctrl-Shift-H** : Flip straight horizontally
2. **Ctrl-Shift-V** : Flip the image vertically

So, we have just shown you how to add watermark and rotate, flip photos with Google Picasa software.

Good luck!
