

# Instructions to backup all photos and videos on Facebook to Google Photos

TipsMake - The following article will guide how to backup photos and videos shared on Facebook to Google Photos, in case Facebook account is locked or hacked out of control.

You are the one who often shares photos and videos on Facebook as a place to store your memories. However, because for some reason your Facebook account was accidentally locked or someone hacked, the photos and videos that have been shared on Facebook so far will no longer be accessible.

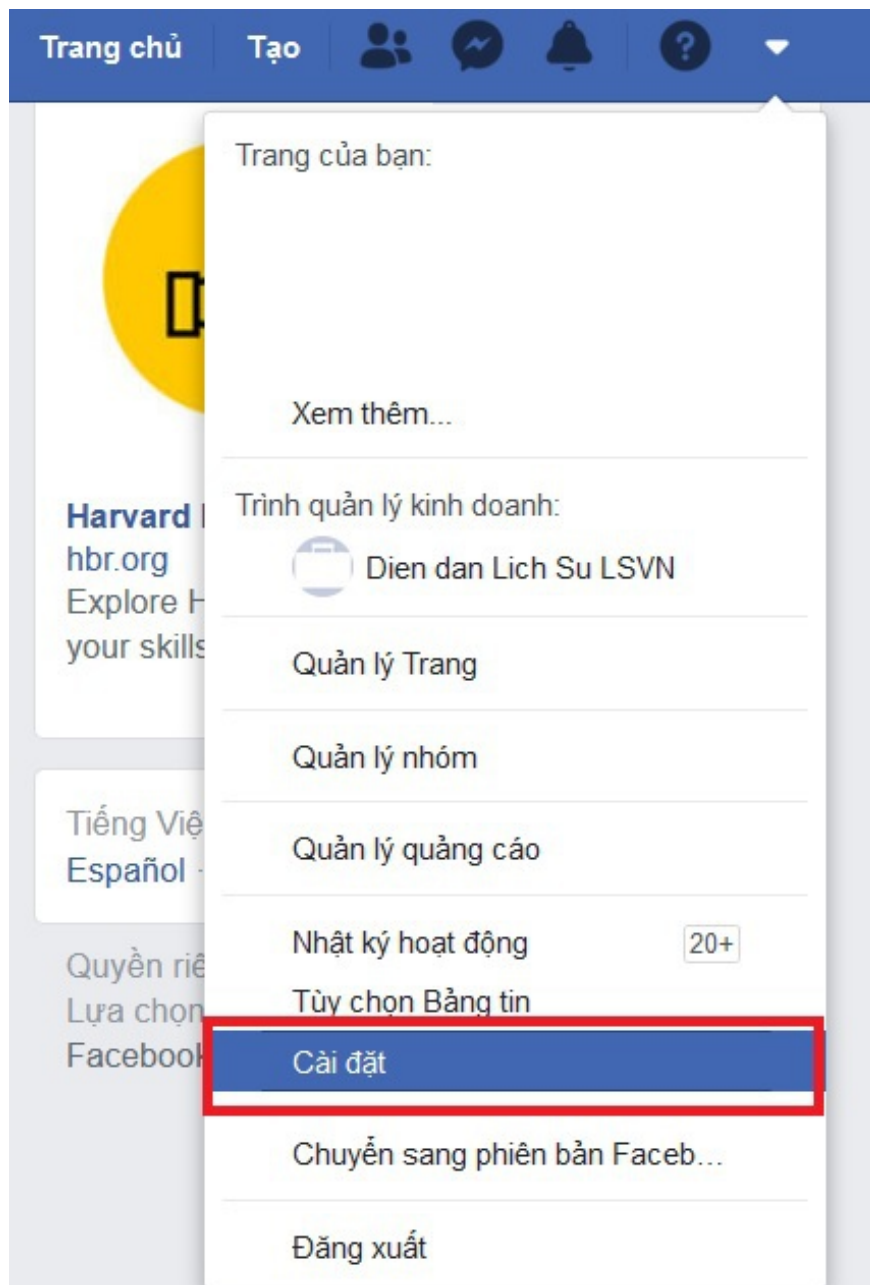

As a precaution, Facebook has introduced a feature that allows users to back up all shared photos and videos to Facebook to Google Photos, Google's image storage service.

This feature, first introduced to Facebook users in the US and Canada, is now available to global users, including users in Vietnam.

*Note: users need to register a Google Photos account to be able to contain backup photos and videos from Facebook. You can sign up for a new Google Photos account **here** or you can use your own Gmail account to log in to the Google Photos service.*

To back up all photos and videos from Facebook to Google Photos, you can follow these steps:

1. First, log into your Facebook account on the web browser. From the web interface, click the arrow icon in the upper right corner, select 'Settings' from the menu that appears.

2. At the next screen, select 'Your information on Facebook' in the list on the left. In the right interface, select 'Transfer a copy of photos or videos'. After selecting this function, Facebook may require users to enter a login password to their account for verification.

3. In the 'Choose destination' section that appears after that, select 'Google Photos'. Mark the 'Photos' or 'Videos' option to back up all photos or videos from Facebook to Google Photos, press the 'Next' button to continue.
