

Instructions to build the lineup of Shadow of the Soul Arena of Truth

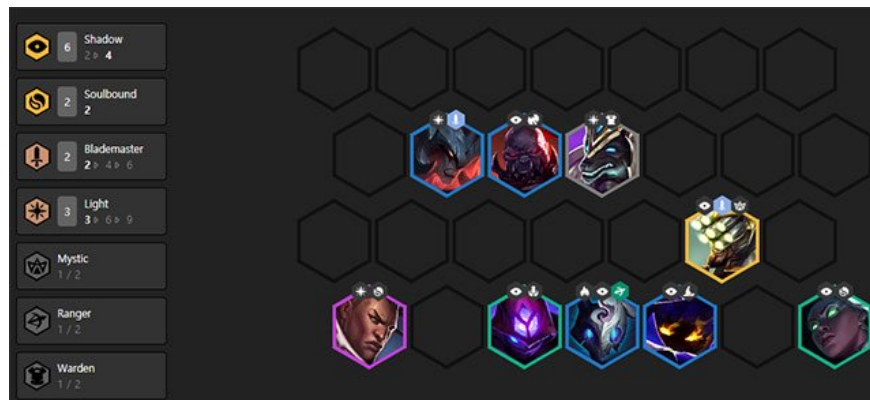

Here are some directions to build the Shadow of the Shadow squad and have Senna in the team in the upcoming 9.24 version.

A general of the element of Darkness is about to be released in the upcoming version of Truth Arena 9.24. Senna will be the general that many people want to test her strength in the current meta game. If you want you can test her strength through the way to build the team of Dark Soul below.

1. Guide to accumulating and spending money effectively in the Arena of Truth season 2
2. The 12 most powerful squads of the Arena of Truth 9.23, 9.24
3. New stages in the Arena of Truth 9.22

Instructions to build the Dark - Soul - Light DTCL formation

Key generals

The main squad has a total buff (6 Dark, 3 Lights, 2 Spirits, 2 Swords), the best elemental buff will be Fire, Water.

1. Senna
2. Lucian
3. Malzahar
4. Veigar
5. Kindred
6. Sion

7. Yorick / Nasus
8. Master Yi
9. Aatrox

You can remove Aatrox or Yorick at will if you don't reach level 9 or earn Natural Armor.

Instructions for building the Light Shadow squad

This formation will be most effective if you apply the Slow Roll tactic (keep the early game and mid game exhaust). Therefore, do not use the money in the first time to level up, but save the money to find Senna in the first round.

Early game

At the beginning of the game, look for some strong generals at the beginning of the game such as Rage Battle (Crocodile, Jax, Sion) and pair with Azir to temporarily use (2 Cat, 3 Rage Battle), or Guard Heroes (Ornn, Thresh, Braum) and paired with Volibear (2 Lightning, 3 Guardians, 2 Ice Kingdoms).

After that, look for all the Senna you see and collect, maybe not yet on the pitch, leave in the reserve. No need to use Hyper Roll to find Senna.

If you find Sion, Senna and Malzahar early, then give them all on the floor, if Malzahar has 2 stars. To effectively map items to champions in this squad, you should pay attention to Gold Shovels, collect as many Gold Shovels as possible. Because this squad will need to 9 new strongest generals possible.

Between game

From the Krugs round, if you see the team is too weak, then level up to level 6 - 7 and start rolling to find Lucian and Senna together with the team of 3 Darkness 3 Fury.

It is also okay to get the Cat buff by putting Azir on the team with Crocodile. However, if you encounter the Ice Kingdom or Assassin team, it will quickly die out. Therefore, it is advisable to arrange the position of the squad appropriately.

It is okay to stuff Azir into the team to get a Cat buff with Renekton, but the team will be quite vulnerable to Ice or Natural Assassin squads, so be careful with your position.

If you have picked Lucian in the team, from now on, focus on finding all 6 Shadows for the team to reach the maximum power at the beginning of the match. Especially when the team has no tanker strong enough.

If your dignity is high, you can find 3-Star Senna and 2-Star Lucian. If you have not been able to get Lucian 2 stars, then put him in a corner to attract the Assassin in the team and let the other members surround Senna.

As for the equipment graft, still prioritize Gold Shovels to gather into 1 Natural Armor, otherwise find Mana and Magic Damage for Senna, or build tanks for Renekton or Master Yi.

Late Game

There will be a number of spending options depending on the following situations:

1. **Up to level 8 and have Nature Armor:** The best case and you should keep money to Slow Roll and find enough 2 Star lineup.
2. **Being at level 7 and having Natural Armor:** Pushing up to level 8 and completing your squad even if the 1 star generals still match. Lucian has 1 star that can serve as bait to buff Light and Senna.
3. **Being at level 8 and not able to pair Nature Armor:** If there is a lot of health (40-50), use money in a round to upgrade to level 9. And if less blood (> 30), keep the squad of 8 champions and roll next to to a 2-star squad.
4. **Being at level 7 and not able to pair Nature Armor:** Pour money to level 8 as fast as possible and pair up for at least 6 Shadows, 2 Spirits and 2 Any Swords to get a buff, don't ask why.

If you meet the Assassin team, line up with Senna 3 stars ahead and Lucian in the corner. Either Senna stays there until he dies and lets Lucian slip out or Lucian goes out and Senna stays in the corner.

If you encounter a Summoner or Witchcraft team, then pair the Dragon Claw item for Senna and Master Yi. Replace Yorick or Aatrox with Nami to get a buff for 2 Mysteries. If you find Lux ??Dark, put both Lux and Veigar in to get 9 Dark.

Instructions to build the Dark Mage Land squad

This squad will have a total buff of 8 Shadows, 2 Mountains, 3 Wizards and no Spirit buffs due to the lack of Lucian.

1. Senna
2. Malzahar
3. Veigar
4. Kindred
5. Sion
6. Taliyah
7. Malphite (equipped with Wizard's Hat)
8. Master Yi
9. Lux (Dark)

If this team is assembled, it is difficult for other teams to get in the way of your team. If you find the Dark team full and add Lux ??Dark. If you don't earn the Dark Lux, you still have a standard Senna squad.

That's the direction to build the Dark squad for Senna in the upcoming Arena Version 9.24. Although you need a lot of slots if you want to perfect your squad, it will have a lot of difficulties in the early and mid-game, but if you have all the necessary champions for this team and combine enough items for Chess, the way to TOP 1 will be a lot easier.
